ELECTRIC POWER

Catalogue number	Title	Price
	Annual	
57-201	**Electric and Gas Meter Registrations.** Approx. 150 pp. Meter registrations by province, county or census division, company and place served, by type of service	$1.50
57-202	**Electric Power Statistics, Vol. II — Annual Statistics.** Approx. 70 pp. Summary and detailed analyses of generation and use of electric power in Canada, power plant equipment, customers, employees, salaries and wages, financial statistics and historical tabulation of supply and disposal of electric energy	1.00
57-203	**Electricity Bills for Domestic, Commercial and Small Power Service.** Approx. 15 pp. Includes an annual index of electricity bills for domestic service and bills for light and power in cities and representative municipalities	.50
57-204	**Electric Power Statistics, Vol. I — Annual Electric Power Survey of Capability and Load.** Approx. 45 pp. Current and projected data of capability and load of major producers of electric energy in Canada	.75
57-206	**Monthly Summary — Electric Power Statistics.** Approx. 28 pp. Supplement to monthly report 57-001 containing revised monthly figures on production, imports, exports, secondary energy used and sales to ultimate customers, by province	.50
	Monthly	
57-001	**Electric Power Statistics.** Approx. 8 pp. Production by utilities and industrial establishments, imports and exports, power made available for use in Canada, secondary energy used, sales to ultimate customers by rate category, cumulative monthly totals for year to date, by province	10¢ a copy; per year, 1.00
	Occasional	
57-502	**Inventory of Prime Mover and Electric Generating Equipment.** Approx. 120 pp. A list of generating plants in Canada by ownership, showing the location, year of installation, name-plate rating and other details of each unit, as at December 31, 1961	1.50

Subscription orders should be sent to the Publications Distribution Unit, Financial Control Section, Dominion Bureau of Statistics, Ottawa, Canada, with enclosed remittances made payable to the Receiver General of Canada.

SYMBOLS

The following standard symbols are used in Dominion Bureau of Statistics publications:

.. figures not available.
... figures not appropriate or not applicable.
— nil or zero.
-- amount too small to be expressed.
ᵖ preliminary figures.
ʳ revised figures.

ELECTRICITY BILLS FOR DOMESTIC, COMMERCIAL AND SMALL POWER SERVICE

Examples of the Application of Rates

1965

General

This report is based on rate tables supplied by the power companies and municipalities responsible for the distribution of electric energy in the cities and towns in this survey. It consists of the cost of definite quantities of electricity for specific uses and an annual index of electricity bills for domestic service. The monthly bills are computed to show the actual cost to consumers in the 180 municipalities covered by the report when selected quantities are used for specific purposes. The cost to the consumers includes not only the amounts accruing to the distributor, but also all federal, provincial and municipal taxes on such purchases. Discounts for prompt payment have been deducted from gross bills wherever granted.

Uses

Monthly bills cannot be used to obtain the average cost of electricity consumed in any one municipality or to compare municipalities as to cost of electricity, except in a very general way. The unit cost or cost per kilowatt hour of electric energy normally varies according to the nature of the use and the magnitude of the consumption; and, because these factors vary so greatly as between types of user and between municipalities, an average cost for all electricity consumed in any municipality is of little value unless the nature of the uses and amount of consumption for each use is known. Further, industrial power costs vary as to whether the power used is primary or secondary (off-peak or interruptible power taken when available). Other important factors in determining costs of electricity are the relationship between the capacity of a system to produce and distribute electricity and the total consumption, and between the average rate of consumption per day and at different times of the day, and during the year. Because of the difficulty of giving proper weight to these many factors, the Bureau of Statistics has not attempted to show average costs or to compare costs between municipalities. For these purposes the report should be used with the utmost caution.

Computations

Domestic services include delivery of electricity to private residences for lighting, refrigeration, cooking, water heating, house heating and the operation of various electrical appliances. Commercial service includes delivery of electricity to stores, offices, factories, etc., mainly for lighting purposes. Outdoor sign lighting is generally in a separate category and the rates are different from those for commercial services. Street lighting is also in a separate class. Power service includes the delivery of electricity for the operation of electric motors.

The purpose of this presentation is to provide data for comparative purposes on the cost of electric services in Canada. Because of the various methods of computing costs, it was necessary to select some arbitrary conditions, especially for the fixed charges, and use the same basic conditions in each municipality. In the large majority of municipalities the use of these arbitrary conditions was not necessary, the rates containing a fixed charge and a block rate for all consumptions irrespective of appliances.

Consumptions of 700 and 1,000 kilowatt hours include electricity used for water heating. Except where the entire water heater load was on a flat rate basis, metered rates were used in working out these bills. For a few municipalities, where all water heating is on a flat rate basis, an arbitrary division was made between water heating and the metered services. A 700 kwh. consumption was divided to include a metered consumption of 350 kwh. plus an assumed 350 kwh. consumed by a 1,000 watt heater. A consumption of 1,000 kwh. was divided between 490 kwh. metered and 510 kwh. consumption assumed for a heater of 1,000 watts. To show the effect of flat rate water heaters, a bill for 1,000 kwh. including a water heater of 1,000 watts has been shown for all municipalities where such heaters are in general use.

A few municipalities apply a demand charge in addition to the energy charge for electricity used in house heating. In computing bills for house heating in these municipalities it was assumed that the maximum demand is 15 kilowatts. Where service charges are based on two-wire or three-wire service, the higher charge was used only in calculating the bills for 300, 500, 700 and 1,000 kilowatt hours.

Domestic Service Index

There was no change in the provincial index for domestic service in Newfoundland. The bills for 5,000 kwh. and 7,500 kwh. in Cornerbrook and St. John's decreased for 1965 but these are not used in compiling the index.

In Prince Edward Island there was no change in either the index or the bills.

Nova Scotia showed only a change in the house heating bills for Pictou and the index remained unchanged at 105.0.

The New Brunswick index declined from 101.8 to 98.7 as a result of a decrease in the Moncton rates.

The index dropped from 100.2 to 100.0 in Quebec due to a reduction in the Baie Comeau and Ste-Agathe des Monts bills.

Increases in the bills in the Ontario municipalities of Belleville, Chatham, London, Oshawa and Woodstock pushed the index from 131.5 to 132.8.

In Manitoba there was no change in either the index or the bills.

The drop in the Saskatchewan index from 98.2 to 93.7 resulted from decreases in the bills of Regina and Saskatoon.

The index and bills for Alberta remained unchanged.

A slight decrease in the British Columbia index resulted from a decrease in the Prince Rupert bills.

The overall index for Canada shows a slight increase from 115.2 to 115.3.

It should be noted that the new municipalities included in this publication were not used in compiling either the provincial or Canadian indices.

Annual Index[1] of Electricity Bills for Domestic Service, by Province, 1954-65

(1949=100)

Province	1954	1955	1956	1957	1958	1959	1960	1961	1962	1963	1964	1965

[1] Based on electricity rates in effect December 31 each year.

Lowest Bills

Any attempt to determine which municipality in Canada enjoys the lowest cost of electricity might be difficult for reasons mentioned above. From the selected list of municipalities, which comprise this report, those having the lowest bills for selected quantities and uses are shown in the following tables.

While the domestic service bills will probably show the average for most municipalities, it is probable that with larger loads and consumptions for commercial use and for power, other municipalities would have smaller bills. The fact that no one municipality had the smallest bill for all types of consumption in the three classes of service indicates that caution should be exercised when making comparisons as between municipalities.

There is a possibility that some municipalities from which bills have not been collected may have as low or lower bills than those shown in the tables below, and consequently **there is no certainty that these bills are the lowest of any municipality** in Canada.

Lowest Monthly Bills for Domestic Service, 1965

Municipality	Monthly consumption – kwh.								
	60	100	180	300	500	700	1,000	5,000	7,500
	dollars

Bills for Commercial Service

Bills for commercial service in Belleville, Oshawa and Woodstock (Ont.) increased while those in Baie Comeau, Saskatoon and Prince Rupert decreased. The bills for Ste-Agathe des Monts, Chatham (Ont.) and London show both increases and decreases.

Bills for Power Service

Power service bills increased in Charlottetown and in the Ontario cities of Belleville, Chatham, Oshawa, London and Woodstock. The New Brunswick municipalities of Bathurst, Chatham, Moncton, St. Stephen, Sackville, Sussex and Woodstock together with Rimouski (Quebec) had reductions in power bills. In Ste-Agathe des Monts and Baie Comeau, power bills showed both increases and decreases.

TABLE 1. Monthly Electricity Bills (Net) for Domestic Service in Canada as at December 31, 1965

Province and municipality	Number of domestic service customers as at Dec. 31, 1965	Average monthly consumption 1965	Number of domestic house heating customers as at Dec. 31, 1965	Minimum net bill	Lighting and small appliances	Lighting, small appliances and refrigeration	Lighting, etc., refrigeration and cooking	Lighting, etc., refrigeration, cooking and water heating		Lighting, etc., refrigeration, cooking, water heating and house heating	
								Metered rates	Using flat rate water heater

[1] Includes a metered consumption of 490 kwh for lighting, cooking and appliances plus a flat rate water heater of 1,000 watts.
[2] Bills include a provincial sales tax of 5 p.c.
[3] From "Annual Electric Power Statistics", Catalogue No. 57-202.
[4] Includes surrounding area.
[5] Municipality included in survey in 1965 for the first time.
[6] Bills include provincial sales tax of 6 p.c.
[7] House heating customers for Lévis and Québec are combined.
[8] Minimum bill.
[9] Bills include municipal tax of 2½ p.c.
[10] Bills include provincial education and hospital tax of 4 p.c.
[11] Bills include surcharge of 7½ p.c.
[12] Bills include surcharge of 5 p.c.
[13] Bills include surcharge of 10 p.c.
[14] Change in bills due to the acquisition of the city of Regina utility by the Saskatchewan Power Commission.
[15] With water heater of not less than 1,000 watts in use.

* Municipalities in which changes in bills occurred in 1965.

[1] Bills include provincial sales tax of 5 p.c.
[2] From "Annual Electric Power Statistics", Catalogue No. 57-202.
[3] Includes surrounding area.
[4] Municipality included in survey for the first time.
[5] Bills include provincial sales tax of 6 p.c.
[6] Bills include a municipal tax of 5 p.c.
[7] Bills include provincial education and hospital tax of 4 p.c.
[8] Bills include surcharge of 7½ p.c.
[9] Bills include surcharge of 5 p.c.
[10] Bills include surcharge of 10 p.c.
[11] Change in bills due to the acquisition of the city of Regina utility by the Saskatchewan Power Commission.

[1] Municipalities in which changes in bills occurred in 1965.

TABLE 3. Monthly Electricity Bills (Net) for Unrestricted 24-hour Power Service in Canada as at December 31, 1965

Province and municipality	Number of power customers as at Dec. 31, 1965	Total consumption during 1965	Billed load								
			5 kilowatts			50 kilowatts			100 kilowatts		
			Hours use								
			100	200	300	100	200	300	100	200	300
			Consumption – kwh.								
			500	1,000	1,500	5,000	10,000	15,000	10,000	20,000	30,000
		000's kwh.	dollars
