Note

This and other government publications may be purchased from local authorized agents and other community bookstores or by mail order.

Mail orders should be sent to Publications Distribution, Statistics Canada, Ottawa, K1A 0T6, or to Publishing Centre, Supply and Services Canada, Ottawa, K1A 0S9.

Inquiries about this publication should be addressed to:

Special Projects and Regional Statistics Section,
Manufacturing and Primary Industries Division,

Statistics Canada, Ottawa, KIA OT6 (telephone: 996-4991) or to a local office of the bureau's User Advisory Services Division:

St. John's (Nfld.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

Toll-free access to the regional statistical information service is provided in Nova Scotia, New Brunswick, and Prince Edward Island by telephoning 1-800-565-7192. Throughout Saskatchewan, the Regina office can be reached by dialing 1-800-667-3524, and throughout Alberta, the Edmonton office can be reached by dialing 1-800-222-6400.

Nota

On peut se procurer cette publication, ainsi que toutes les publications du gouvernement du Canada, auprès des agents autorisés locaux, dans les librairies ordinaires ou par la poste.

Les commandes par la poste devront parvenir à Distribution des publications, Statistique Canada, Ottawa, K1A 0T6, ou à Imprimerie et édition, Approvisionnements et services Canada, Ottawa, K1A 0S9.

Toutes demandes de renseignements sur la présente publication doivent être adressées à:

Section des projets spéciaux et des statistiques régionales,
Division des industries manufacturières et primaires,

Statistique Canada, Ottawa, KIA OT6 (téléphone: 996-4991) ou à un bureau local de la Division de l'assistance-utilisateurs situé aux endroits suivants:

St. John's (T.-N.)	(726-0713)
Halifax	(426-5331)
Montréal	(283-5725)
Ottawa	(992-4734)
Toronto	(966-6586)
Winnipeg	(949-4020)
Regina	(569-5405)
Edmonton	(425-5052)
Vancouver	(666-3695)

On peut obtenir une communication gratuite avec le service régional d'information statistique de la Nouvelle-Écosse, du Nouveau-Brunswick et de l'Île-du-Prince-Édouard en composant 1-800-565-7192. En Saskatchewan, on peut communiquer avec le bureau régional de Regina en composant 1-800-667-3524, et en Alberta, avec le bureau d'Edmonton au numéro 1-800-222-6400.

Introduction

General

This publication presents data on the consumption of purchased fuel by type and of electricity, by the manufacturing, mining, logging and electric power industries in Canada. Much of this data also appears in the individual industry publications, however this volume groups the fuel data together for all manufacturing industries and also provides additional detail in certain areas. A companion publication *Consumption of Purchased Fuel and Electricity by the Manufacturing, Mining and Electric Power Industries, 1962 - 1974* (Catalogue 57 - 506, Occasional) presents comparable historical data prior to the first issue of this publication in 1975.

Statistical Highlights[1]

The total value of fuel purchased by **manufacturing industries** in Canada in 1977 was reported at $2,790 million, up 20.0% from $2,325 million in 1976. (This and all other fuel figures shown herein cover the larger manufacturing establishments only, however these larger establishments accounted for over 96.7% of all manufactured shipments reported for 1977 so the proportion of fuel covered should be similarly high. See section on "Data Scope and Coverage".)

If this fuel cost is analysed by type of fuel for 1977, it is noted that three types of fuel account for the great majority of expenditures by manufacturing industries. These are electricity at $1,090 million, up 25.0%; natural gas at $719 million up 18.5% and heavy fuel oil at $521 million, up 18.0%. Thus these three fuels alone account for 83.5% of the total expenditure on all fuels by manufacturing establishments, up from 82.6% the previous year.

Eliminating the impact of inflation on these increases a comparison of **quantities** shows electricity, up by only 1.1% while natural gas and heavy fuel oil actually declined by 1.9% and 2.0% respectively.

[1] See Text Table I.

Introduction

Renseignements généraux

Le présent bulletin présente des données sur la consommation du combustible par genre et de l'électricité achetés par les industries manufacturières, minières et forestières et par l'industrie des services d'électricité du Canada. La plupart de ces statistiques figurent également dans des publications distinctes consacrées à chacune des industries, mais ce bulletin regroupe les données portant sur toutes les industries manufacturières et renferme des renseignements supplémentaires au sujet de certains secteurs d'activité. Une publication hors série du même genre intitulée *Consommation de combustible et d'électricité achetés par les industries manufacturières et minières et l'industrie des services d'électricité, 1962 - 1974* (nº 57 - 506 au catalogue, hors série) renferme des données chronologiques analogues avant la première parution de cette publication en 1975.

Faits saillants[1]

La valeur totale du combustible acheté par les **industries manufacturières** du Canada s'est établie à $2,790 millions en 1977, contre $2,325 millions en 1976, ce qui représente une hausse de 20.0 %. (Ces chiffres et toutes les autres données figurant dans ce bulletin s'appliquent aux grands établissements manufacturiers seulement; toutefois, comme ceux-ci comptent pour plus de 96.7 % des livraisons de produits fabriqués en 1977, la proportion de combustible qu'ils ont acheté doit être aussi élevée. Voir la section "Portée et champ d'observation".)

La répartition des coûts selon le genre de combustible montre qu'en 1977 les dépenses des industries manufacturières ont porté principalement sur trois catégories de combustible: l'électricité ($1,090 millions), soit une hausse de 25.0 %; le gaz naturel ($719 millions), une augmentation de 18.5 % et les mazouts lourds ($521 millions), un accroissement de 18.0 %. À elles seules, ces trois catégories de combustible ont ainsi compté pour 83.5 % (contre 82.6 % l'année précédente) des dépenses totales en combustible des établissements manufacturiers.

Si l'on élimine l'effet de l'inflation sur les augmentations mentionnées ci-dessus, une comparaison des **quantités** indique que celles-ci se limitent à 1.1 % dans le cas de l'électricité, alors que dans le cas du gaz naturel et des mazouts lourds, il y a eu en fait une baisse de 1.9 % et de 2.0 % respectivement.

[1] Voir le tableau explicatif I.

Because of the significant price increases which took place in the energy sector, we have in Text Table I based our analyses on quantities rather than values for all but the "other" and "total" categories.

Analysing the volume increases and decreases by type of fuel, it is noted that the most significant increases were reported for liquefied petroleum gas, up 11.8% and for coal and coke, up 9.0%. The largest percentage decreases were recorded by the small kerosene category, down 17.1%, and the light fuel oil category which eased by 7.7%.

Tracing these increases and decreases back to the provinces we find the 11.8% increase in **liquefied petroleum gas** consumption occurred mostly in Ontario which rose by 47.9% and in New Brunswick where a gain of 46.3% was recorded. Quebec, the largest consumer by far, remained virtually unchanged. The increase of 9.0% in **coal and coke** utilization occurred in Ontario and Quebec where the bulk of this fuel is consumed. Ontario gained 21.6% while Quebec was ahead by 10.9% in this category.

The decrease of 17.1% in **kerosene** use was quite general across the Nation with declines in all provinces but one. The drop of 7.7% in **light fuel oil** consumption was largely attributable to a 75.2% decline in British Columbia which accounted for two thirds of the total decrease, while the remainder was spread over most of the other provinces.

Thermal electricity generating plants reported the total value of fuel consumed at $758 million in 1977, up 24.7% from the preceding year. The largest single component of this total was coal which, at $386 million, accounted for 50.9% of total expenditures. The next largest expenditure was for heavy fuel oil which accounted for $173 million or 22.8% followed by natural gas with a cost of $129 million or 17.1% of total expenditures. Of particular interest is the expenditure on uranium which, though still small, rose by 78.0% to $33 million to account for 4.4% of total expenditures in 1977.

Looking at the quantities consumed, the trend is quite clear as all fuels declined except for the large coal category which rose 16.2% to 24.5 million tons, and the small uranium figure which jumped by 67.7% to 473 000 kg. The largest decreases were recorded by diesel oil which dipped 16.5% to 49.9 million gallons and by natural gas which eased 11.1% to 101 million M cu. ft.

The **mining industries** reported an increase of 17.7% in its cost of fuel to $473 million in 1977. The largest component by far was electricity which at

Comme il y a eu des hausses de prix importantes dans le secteur de l'énergie, les données présentées au tableau explicatif I sont fondées sur des quantités plutôt que des valeurs dans toutes les catégories, sauf "autres" et "total".

Si l'on analyse les augmentations et les diminutions selon le genre de combustible, on constate que les hausses les plus considérables touchent le gaz de pétrole liquéfié (11.8 %) ainsi que le charbon et le coke (9.0 %). Les baisses les plus prononcées ont été enregistrées dans la catégorie moins importante du kérosène (17.1 %) et dans celle des mazouts légers (7.7 %).

La répartition des augmentations et des diminutions selon les provinces fait voir que la hausse de 11.8 % de la consommation du **gaz de pétrole liquéfié** est attribuable en grande partie à une augmentation de 47.9 % en Ontario et à une montée de 46.3 % au Nouveau-Brunswick. Pour le Québec, qui est de loin le plus grand consommateur, les données restent pratiquement inchangées. L'augmentation de 9.0 % au chapitre du **charbon** et du **coke** a été enregistrée en Ontario et au Québec où se consomme la plus grosse part de ce combustible. L'Ontario a progressé de 21.6 % alors que le Québec a affiché un gain de 10.9 % dans cette catégorie.

Toutes les provinces, à l'exception d'une seule, ont contribué à la baisse de 17.1 % de la consommation de **kérosène** au Canada. Le recul de 7.7 % pour les **mazouts légers** est essentiellement due à une diminution de 75.2 % en Colombie-Britannique, cette province intervenant pour les deux tiers de la baisse totale, le reste se répartissant dans la plupart des autres provinces.

Les **centrales thermiques** ont déclaré une consommation totale de combustible de $758 millions en 1977, soit une augmentation de 24.7 % par rapport à l'année précédente. Les dépenses au seul titre du charbon se sont élevées à $386 millions, ce qui représente 50.9 % du total. Viennent ensuite les mazouts lourds, qui comptaient pour $173 millions ou 22.8 %, et le gaz naturel, qui intervenait pour $129 millions ou 17.1 % des dépenses totales. Il est particulièrement intéressant de noter que les dépenses pour l'uranium, bien qu'elles soient toujours faibles, sont passées à $33 millions (une augmentation de 78.0 %), ce qui constitue 4.4 % du total en 1977.

Si l'on étudie les quantités consommées, on remarque que tous les combustibles ont accusé une baisse, à l'exception du charbon, dont la consommation a atteint 24.5 millions de tonnes (une augmentation de 16.2 %) et de l'uranium, dont la consommation est montée à 473 000 kg (une hausse de 67.7 %). Les plus fortes réductions ont été enregistrées pour les huiles diesel et le gaz naturel, en baisse de 16.5 % (49.9 millions de gallons) et 11.1 % (101 millions mi pi^3) respectivement.

Dans le **secteur minier**, la consommation est passée à $473 millions en 1977, ce qui représente un accroissement de 17.7 %. Les dépenses en électricité, qui se sont élevées à

$236.6 million accounted for 50.0% of the mining total. The next largest fuel expenditure went for diesel oil at $77.3 million or 16.3% and heavy fuel oil at $75.3 million or 15.9% of the total.

Measured in terms of quantities used, the largest percentage increases were recorded by natural gas and electricity each up 5.6% followed by diesel oil up 5.5%. Major decreases were reported for coal and coke down 46.6%, kerosene down 34.9% and light fuel oil down 32.7%.

The **logging industry** reported the total value of fuel consumed in 1977 at $74.2 million, up 4.7% from the previous year. Two types of fuel accounted for nearly all the energy consumed by this industry as diesel oil with expenditures of $46.6 million accounted for 62.9% and gasoline with $21.3 million amounted to 28.7% of the total. Quantities consumed, however, showed a generally lower pattern with diesel oil down 4.6% and gasoline lower by 5.5%. Some of the less important fuels fluctuated widely with heavy fuel oil up 47% while natural gas declined by 32% and kerosene was 19% lower than in the year previous.

Methodology and Data Collection

The data shown in this publication is collected by means of a question inserted in the questionnaires used in the census surveys of the industries involved. While the data shown herein covers the vast majority of fuel consumed by these industries, there are some exclusions and other complicating factors which should be taken into consideration when using these figures. These factors are outlined in the section on "Data Scope and Coverage".

In order to understand the nature of the data collected it is useful to know the instructions issued to the respondents for completing the questionnaires. The following are the guidelines given to Census of Manufactures respondents. Those for the Census of Mines and Census of Forestry (Logging) respondents are similar (see Questionnaire II).

Consumption of Purchased Fuel and Electricity

This question is designed to obtain information on all **purchased** fuel and electricity **consumed** by the establishment both in its manufacturing and non-manufacturing operations. Answers to the detailed questions should cover amounts used by the establishment in vehicles of all descriptions, plant and office operations and any ancillary units which comprise this accounting entity. Values reported should include transportation, duties, etc., which form part of the laid down cost at the establishment. You should **not** report fuel **purchased** as fuel **consumed** unless the quantities are substantially the same.

$236.6 millions, ont été de loin les plus importantes (50.0 % du total), suivies des dépenses au titre des huiles diesel ($77.3 millions ou 16.3 %) et des mazouts lourds ($75.3 millions ou 15.9 % du total).

D'après les quantités consommées, le gaz naturel et l'électricité ont affiché la plus forte augmentation en pourcentage (5.6 % chacun), suivis des huiles diesel (5.5 %). Des baisses importantes ont été enregistrées au chapitre du charbon et du coke (46.6 %), du kérosène (34.9 %) et des mazouts légers (32.7 %).

Dans le **secteur forestier**, la valeur totale du combustible consommé s'est élevée à $74.2 millions en 1977, soit une augmentation de 4.7 % par rapport à l'année précédente. Deux types de combustible ont représenté presque toute l'énergie consommée par cette industrie: les huiles diesel ($46.6 millions ou 62.9 % du total) et l'essence ($21.3 millions ou 28.7 % du total). Les quantités consommées indiquent toutefois une légère baisse générale de 4.6 % pour les huiles diesel et de 5.5 % pour l'essence. Certains combustibles de moindre importance ont fluctué considérablement: les mazouts lourds ont progressé de 47 % alors que le gaz naturel et le kérosène ont marqué un recul de 32 % et de 19 % respectivement par rapport à l'année précédente.

Méthodologie et collecte des données

Les données figurant dans ce bulletin sont tirées des renseignements fournis en réponse à une question insérée dans les questionnaires de recensement des industries concernées. Ces données portent sur la plupart des combustibles consommés par ces industries, mais les utilisateurs devront tenir compte du fait que certains éléments ont été exclus et que d'autres compliquent l'interprétation des données. Ces derniers points sont mentionnés à la section "Portée et champ d'observation".

Pour comprendre la nature des données recueillies, il est bon de connaître les instructions données aux enquêtés sur la façon de remplir les questionnaires. Voici la ligne de conduite que doivent suivre les enquêtés du recensement des manufactures. Les instructions fournies dans le recensement des mines et celui des forêts sont analogues (voir questionnaire II).

Consommation de combustible et d'électricité achetés

Cette question vise à recueillir des renseignements sur tout le combustible et l'électricité **achetés** et **consommés** par l'établissement dans ses activités manufacturières et non manufacturières. Les réponses aux questions détaillées doivent prendre en compte les quantités utilisées par les véhicules de tous genres, l'usine et les bureaux ainsi que les établissements auxiliaires faisant partie de cette entité comptable. Les valeurs déclarées doivent comprendre le coût du transport, les taxes, etc., qui font partie du coût du combustible livré à l'établissement. **Ne pas** déclarer le combustible **acheté** comme combustible **consommé**, sauf si les quantités sont sensiblement les mêmes.

Data Scope and Coverage

In reviewing and using these data, the reader must bear in mind certain factors:

The series are not mutually exclusive in that the electric energy generated by the electric power industry from the fossil fuels shown in Table 1 (together with any generation from hydro or nuclear sources) is sold to consumers, among which are the logging, mining and manufacturing industries. The purchase of such electric energy by these industries is shown in Tables 2 to 16.

Consumption of purchased energy by the industries noted does not represent their total consumption, in that the data exclude consumption of any self-produced fuel or electricity. For example, the petroleum refining industry uses fuels produced by the refining process, the pulp and paper and sawmill industries consume substantial quantities of waste (e.g., slab and edgings), while numerous industrial establishments have their own hydro generating facilities. Any generating facilities owned by industrial establishments could use some of the fossil fuel shown in this publication as purchased, but equally such facilities could use self-produced fuels.

The data exclude any fuels used for non-fuel purposes, for example, natural gas used as a raw material input.

No quantities are shown for "other fuels" since this category covers steam, wood, etc., involving several different units of measure.

Fuels and energy used by the logging, mining and manufacturing industries do not necessarily relate to industrial activity as such. For example, fuel used in transportation activities or for space heating of an establishment would be included along with that used to provide power for actual industrial processing. Thus any interpretation of ratios between fuel used and industrial activity should be made keeping in mind that some elements of fuel used will be influenced by the extent to which industries provide their own transportation and heating services. See the extract below from instructions to the Census of Mines and Census of Manufactures respondents in replying to questions on the Consumption of Purchased Fuel and Electricity. Census of Logging instructions are similar to those for Mining and Manufacturing.

The **coverage** of the major industry sectors in this report is not complete. As stated above, the Electric Power Industry coverage excludes any power generated by private industry. In mining the coverage is for all establishments in the Annual Census of Mines, Quarries and Oil Wells except for SIC 064, Crude Petroleum and Natural Gas Industry and Major Group 5, Services Incidental to Mining.

Portée et champ d'observation

Le lecteur doit tenir compte de certains facteurs lorsqu'il analyse et utilise ces données:

Les séries ne s'excluent pas l'une l'autre; en effet, l'énergie électrique que produit l'industrie des services d'électricité à partir des combustibles fossiles figurant au tableau 1 (ainsi que l'électricité provenant de sources hydrauliques et nucléaires) est vendue à des consommateurs, dont des industries forestières, minières et manufacturières. Les achats d'électricité de ces industries figurent aux tableaux 2 à 16.

L'énergie achetée par les industries en question ne constitue pas leur consommation totale, en ce sens que les données excluent la consommation de l'électricité ou des combustibles qu'elles auraient elles-mêmes produits. Par exemple, les raffineries de pétrole utilisent des combustibles provenant du processus de raffinage, les usines de pâtes et papiers et les scieries consomment des quantités importantes de déchets (comme les dosses et les délignures), et de nombreux établissements industriels ont leurs propres installations hydro-électriques. Les installations de production d'électricité appartenant à des établissements industriels pourraient utiliser non seulement certains des combustibles fossiles achetés figurant dans la présente publication, mais aussi des combustibles de propre fabrication.

Les données excluent tous les combustibles qui ne sont pas utilisés comme tels, par exemple, le gaz naturel servant comme matière première.

On n'a indiqué aucune quantité au chapitre des "autres combustibles" puisque cette catégorie comprend la vapeur, le bois, etc., éléments dont les quantités sont exprimées en unités de mesure différentes.

Les combustibles et l'électricité utilisés par les industries forestières, minières et manufacturières n'interviennent pas nécessairement dans l'activité industrielle en tant que telle. Ainsi, les données comprennent le combustible dont se servirait un établissement à des fins de transport ou pour le chauffage de ses locaux et le combustible utilisé dans la fabrication industrielle proprement dite. Si l'on cherche à interpréter le rapport entre le combustible utilisé et l'activité industrielle, il ne faut donc pas perdre de vue que le niveau de consommation dépend en partie de la mesure dans laquelle les établissements assurent leurs propres services de transport et de chauffage. On trouvera ci-dessous un extrait des instructions données aux enquêtés du recensement des mines et du recensement des manufactures concernant la façon de répondre aux questions sur la consommation du combustible et de l'électricité achetés. Les instructions du recensement des forêts sont semblables à celles des recensement précités.

Dans ce bulletin, le **champ d'observation** des principaux secteurs de l'industrie n'est pas complet. Comme il est mentionné ci-dessus, le champ d'observation des services d'électricité ne comprend pas l'énergie produite par le secteur privé. En ce qui a trait aux mines, le champ observé recouvre tous les établissements du recensement annuel des mines, carrières et puits de pétrole, sauf le nº 064, "Industrie du pétrole brut et du gaz naturel", et le groupe 5, "Services miniers", de la CAÉ.

Forestry and manufacturing coverage is also incomplete in that small establishments are not surveyed for their use of fuels. For an explanation of how this might effect the data see the Introduction to publication, *Manufacturing Industries of Canada: National and Provincial Areas, 1976* (Catalogue 31 - 203). However, as an indication of this effect, the value of manufactured shipments of these small establishments in forestry was only 9.7% of the total logging activity shipments, while in manufacturing the small establishments accounted for 3.3% of the total manufacturing activity shipments.

Data on the consumption of purchased fuel and electricity used in this report are gathered on questionnaires sent to operating units only. They thus exclude any consumption by ancillary units such as head offices, sales offices, warehouses, laboratories, etc., included in Census principal statistics of an industry, if such consumption is not included in the return of an operating establishment.

Confidentiality

Certain industries in this report are withheld to prevent disclosure of detail relating to individual respondents, as required by the Statistics Act.

Industry Classification

The basic data for this report have been compiled according to the 1970 revision of the Standard Industrial Classification.[2]

[2] Statistics Canada, *Standard Industrial Classification Manual, Revised 1970* (Catalogue 12 - 501).

Le champ d'observation de l'exploitation forestière et des industries manufacturières est également incomplet, car les petits établissements ne sont pas pris en compte. On trouvera des explications sur l'effet que ces lacunes peuvent avoir sur les données dans l'introduction de la publication intitulée, *Industries manufacturières du Canada: Canada et provinces, 1976* (nº 31 - 203 au catalogue). À titre indicatif, signalons que la valeur des livraisons de produits de propre fabrication des petites entreprises des secteurs de l'exploitation forestière et de l'industrie manufacturière n'a représenté, respectivement, que 9.7 % et 3.3 % des livraisons totales dans ces secteurs.

Les données sur la consommation du combustible et de l'électricité achetés figurant dans ce bulletin proviennent de questionnaires envoyés aux seules unités d'exploitation. Elles ne font donc pas état de la consommation des unités auxiliaires (sièges sociaux, bureaux des ventes, entrepôts, laboratoires, etc.), qui est prise en compte dans les statistiques principales d'une industrie, si cette consommation n'est pas comprise dans la déclaration d'un établissement d'exploitation.

Confidentialité

Conformément aux dispositions de la Loi sur la statistique, on a dû éliminer certaines statistiques de ce bulletin afin d'éviter que ne soient divulgués des détails concernant des répondants particuliers.

Classement des industries

Les données de base de ce bulletin ont été rassemblées à partir de la Classification des activités économiques[2], révisée en 1970.

[2] Statistique Canada, *Classification des activités économiques, révisée 1970*, nº 12 - 501F au catalogue.

ELECTRIC POWER STATISTICS

Schedule No. 5

THERMAL GENERATING STATION FUEL CONSUMPTION

for year ending 31 December _____

Collected under Authority of Statistics Act, Chapter 15, Statutes of Canada 1970-71-72.

Sharing of data: Data from this schedule will be made available in confidence to the Department of Energy, Mines and Resources and the National Energy Board. These agencies have agreed to observe the same restrictions on the use of the information as are observed by Statistics Canada.

Instructions: 1) One copy of this schedule is to be completed for each station or station component i.e. steam conventional, steam nuclear, internal combustion, gas turbine, and returned to the Energy and Minerals Section, Ottawa, K1A 0T6, by March 31 following the year under review.

2) Report only fuel burned under boilers or consumed by internal combustion or gas turbines for the generation of electricity.

1 6 8 Name of Station 25

Type of Station or Component (Please check type)

Conventional Steam	Nuclear Steam	Internal combustion	Gas turbine
27-28 CS	27-28 NS	27-28 IC	27-28 GT

Type of fuel	Fuel consumed: Average BTU content (32, 47, 48)	Amount (58, 59)	Total cost (laid down at station*) (69)	70 Gross generation (80)
34 – 35	BTU's per lb.	Short tons	$ (omit cents)	Thousand kWh.
Coal:				
1. Bituminous coal (Canadian)				
2. Bituminous coal (imported)				
3. Sub-bituminous coal				
4. Saskatchewan lignite				
Petroleum fuels:	BTU's per Imp. gallon	Imperial gallons		
5. Furnace fuel oil – light (grades 1, 2 & 3)				
6. Furnace fuel oil – heavy (grades 4, 5 & 6)				
7. Diesel fuel oil				
8. Other (specify)				
Gas:	BTU's per cubic foot[1]	'000 cubic feet		
9. Natural				
Other fuels:	BTU's per unit	Specify units		
10. Nuclear				
11. Other (specify[2])				
12. Total oil fuels				
13. Less generation station service consumption				
14. Total net generation				

* If not available indicate point at which fuel cost is based.

[1] Cubic foot at: 14.73 p.s.i.a., 60° F.

[2] Propane, butane, etc.

STATISTIQUE DE L'ÉNERGIE ÉLECTRIQUE

Questionnaire n° 5

CENTRALES THERMIQUES
CONSOMMATION DE COMBUSTIBLES

durant l'année close le 31 décembre _____

Déclaration exigée en vertu de la Loi sur la Statistique, chapitre 15, Statuts du Canada 1970-71-72

Nom et adresse du répondant	
Nom de la personne qui a établi le présent rapport	
L'indicatif régional et le numéro de téléphone	Numéro télex
Date	Titre

Partage des données: L'information du questionnaire sera disponible en confiance au ministre d'Énergie, Mines et Ressources et à la Commission Nationale d'Énergie. Ces agences ont consentis d'observer les mêmes restrictions sur l'emploi des renseignements observer par Statistique Canada.

Instructions: 1) Un exemplaire de ce questionnaire doit être remplit pour chaque station ou composant de station, i.e. vapeur classique, vapeur méthode nucléaire, combustion interne, turbine à gaz et doit être retourner à la section d'Énergie et Minéraux, situé à Ottawa, K1A 0T6 pour le 31 de mars suivant l'année sous revue.

2) Ne déclarer que le combustible brûlé en chaudières ou consommé par des moteurs à combustion interne ou des turbines à gaz en vue de la production d'électricité.

1 | 41 Nom de la centrale 25

Genre de la centrale ou composante (Veuillez cocher)

Vapeur classique	Vapeur méthode nucléaire	Combustion interne	Turbine à gaz
27-28 CS	27-28 NS	27-28 IC	27-28 GT

Genre de combustible	Combustible consommé 70 — Teneur moyenne en BTU 57 60	Quantité 58 59	Coût total (livré à la centrale*) 65	Production brute 80
31-35	BTU par livre	Tonnes courtes	$ (omettre les cents)	milliers de kWh
Charbon:				
1. Bitumineux (canadien)				
2. Bitumineux (importé)				
3. Sous-bitumineux				
4. Lignite de la Saskatchewan				
Combustibles pétroliers:	BTU par gall. imp.	Gallons impériaux		
5. Mazout – léger (Nos 1,2,3)				
6. Mazout – lourd (Nos 4,5,6)				
7. Huile diesel				
8. Autres (préciser)				
Gaz:	BTU par pi. cub.[1]	Milliers de pieds cubes		
9. Naturel				
Autres combustibles:	BTU par unité	Préciser les unités		
10. Nucléaire				
11. Autres (préciser[2])				
12. Total, tous combustibles				
13. Moins la consommation de la centrale elles-même				
14. Total de la production nette				

* Si non disponible prière d'indiquer le point où le combustible est livré au coût déclaré.

[1] Pieds cubes à 14,73 de pression absolue par pouce carré, 60° F.

[2] Propane, butane, etc.

Question Asked of Respondents to the Annual Census of Logging, Annual Census of Mines and the Annual Census of Manufactures

5. CONSUMPTION OF PURCHASED FUEL AND ELECTRICITY (refer to Instruction 5 in the Reporting Guide)

	Kind	Commodity code for Statistics Canada use	Unit of measure	Quantity used	Cost at this establishment Canadian dollars (omit cents)
5.1	Coal and coke	261	ton		
5.2	Natural gas	263 1	1000 cu. ft.		
5.3	Gasoline	431	Cdn. gal.		
5.4	Kerosene, stove oil (No. 1 fuel oil)	432 2	"		
5.5	Diesel oil	432 3	"		
5.6	Light fuel oil (Nos. 2 and 3)	432 4	"		
5.7	Heavy fuel oil (Nos. 4, 5 and 6)	432 5	"		
5.8	Liquefied petroleum gases (propane, butane, etc.)	436 1	"		
5.9	Electricity purchased (include service charge)	497 1	1000 kwh.		
5.10	Other fuel (include steam purchased) (specify)				
5.11	**Total fuel and electricity**				

Question posée aux répondants au recensement annuel de l'exploitation forestière, au recensement annuel des mines et au recensement annuel des manufactures

5. CONSOMMATION DE COMBUSTIBLE ET D'ÉLECTRICITÉ ACHETÉS (voir l'article 5 du Guide sur la manière de faire rapport)

	Énumération	Indicatif des marchandises à l'usage de Statistique Canada	Unité de mesure	Quantité utilisée	Coût à l'établissement $ canadiens (omettre les cents)
5.1	Charbon et coke	261	tonne		
5.2	Gaz naturel	263 1	1000 pi. cu.		
5.3	Essence	431	gall. cdn.		
5.4	Kérosène, mazout pour poêles (mazout n° 1)	432 2	"		
5.5	Huiles diesel	432 3	"		
5.6	Mazouts légers (n^{os} 2 et 3)	432 4	"		
5.7	Mazouts lourds (n^{os} 4, 5 et 6)	432 5	"		
5.8	Gaz de pétrole liquéfiés (propane, butane, etc.)	436 1	"		
5.9	Électricité achetée (y compris le coût de service)	497 1	1000 kWh		
5.10	Autres combustibles (indiquer vapeur achetée) (spécifier)				
5.11	**Total du combustible et de l'électricité**				

REPORTS ON THE ANNUAL CENSUS OF MANUFACTURES

This report is one of the general, or all-industry, series presenting the results of the annual Census of Manufactures. The complete general series, containing principal statistics on all publishable individual industries and industry groups for all of Canada or its various geographical subdivisions, is as follows:

Catalogue

Annual

31-203 Manufacturing Industries of Canada: National and Provincial Areas

31-209 Manufacturing Industries of Canada: Subprovincial Areas[1]

31-211 Products Shipped by Canadian Manufacturers

31-212 Consumption of Containers and Other Packaging Supplies by the Manufacturing Industries

57-208 Consumption of Purchased Fuel and Electricity by the Manufacturing, Mining and Electric Power Industries

Biennial

31-401 Domestic and Foreign Control of Manufacturing, Mining and Logging Establishments in Canada

31-402 Industrial Organization and Concentration in the Manufacturing, Mining and Logging Industries

Occasional

31-522 Destination of Shipments of Manufacturers, 1974

31-523 Structural Aspects of Domestic and Foreign Control in the Manufacturing, Mining and Forestry Industries, 1970-1972

[1] Principal statistics of industries for economic regions, counties or census divisions, Census Metropolitan Areas, specific Census Agglomerations and municipalities.

RAPPORTS CONCERNANT LE RECENSEMENT ANNUEL DES MANUFACTURES

Le présent rapport fait partie de la série générale qui s'applique à toutes les industries et qui donne les résultats du recensement annuel des manufactures. Voici la série générale complète contenant les statistiques principales sur chaque industrie publiable en particulier et sur les groupes d'industries au Canada entier ou dans ses différentes subdivisions géographiques:

Catalogue

Annuel

31-203 Industries manufacturières du Canada: Niveaux national et provincial

31-209 Industries manufacturières du Canada: Niveau infraprovincial[1]

31-211 Produits livrés par les fabricants canadiens

31-212 Consommation de contenants et autres matières d'emballage, par industrie manufacturière

57-208 Consommation de combustibles et d'électricité achetés par les industries manufacturières et minérales et par les centrales thermiques des services d'électricité

Biennal

31-401 Le contrôle national et étranger des établissements du secteur de la fabrication, des mines et de l'abattage au Canada

31-402 Organisation des industries et concentration dans le secteur de la fabrication, des mines et de l'abattage

Hors série

31-522 Destination des livraisons des manufacturiers, 1974

31-523 Les aspects structuraux du contrôle national et étranger dans les industries manufacturières, minières et forestières, 1970-1972

[1] Statistiques principales sur les industries pour les régions économiques les comtés ou divisions de recensement, les régions métropolitaines de recensement, des certaines agglomérations de recensement et des municipalités.

Catalogue

Occasional – Concluded

31-528 Concepts and Definitions of the Census of Manufactures

31-529 Apparent Domestic Availability of Selected Manufacturing Products, 1975

In addition to these general reports, some 120 annual reports on individual industries contain quantities and values of products shipped and of materials used by the individual industry as well as some of the principal statistics carried in the general reports and certain additional industry information.

A list of all the reports on the Census of Manufactures is included in the bureau's Subscription Order Form, obtainable on request from the Publications Distribution Unit, Statistics Canada, Ottawa.

Catalogue

Hors série – fin

31-528 Concepts et définitions du recensement des manufactures

31-529 Disponibilité national apparente de certains produits fabriqués, 1975

En plus de ces rapports généraux, il existe quelque 120 publications annuelles sur des industries particulières; celles-ci contiennent les données suivantes: quantité et valeur des produits livrés et des matières utilisées par chaque industrie, certaines des statistiques principales publiées dans les rapports généraux et certaines données supplémentaires sur chaque industrie.

Le bulletin d'abonnement contient une liste de toutes les publications du recensement des manufactures: on peut obtenir le bulletin d'abonnement en en faisant la demande à Distribution des publications, Statistique Canada, Ottawa.
