THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks, and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data, (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The indexes of Real Domestic Product by Industry (included with Catague Nos. carrying the prefix 61) provide "constant dollar" measures of the contribution of each industry to gross domestic product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and Indexes of Real Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics, and the legal entity is the main unit of classification of transactors. Also, provision is made in the System for incorporation of balance sheet (wealth) estimates when such data are sufficiently developed.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication, "A System of National Accounts" (Studies in Methods, Series F, No. 2, Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux on fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, l'explication des cadres théoriques et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels de revenu et de dépenses (publiés dans les bulletins dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance des paiements internationaux (numéros de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes de revenu et de dépenses.

Une nomenclature, sensiblement augmentée, d'industries et de biens et services figure dans les tableaux d'intrants et extrants (input-output) du système (numéro de catalogue commençant par 15). Les indices du produit intérieur réel par industrie (compris dans les publications dont les numéros de catalogue commencent par 61) mesurent, en "dollars constants", l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre intrants et extrants dans les études de productivité (publications dont les numéros de catalogue commencent par 14).

L'établissement sert d'unité de base de la production industrielle tant dans les tableaux 'input-output' que dans les indices du produit intérieur réel. Les comptes de flux financiers (publications dont les numéros de catalogue commencent par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. En outre, le système a été conçu de façon à pouvoir incorporer les comptes de bilans (qui prennent pour objet le patrimoine) lorsque les données s'y rapportant seront suffisamment développées.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement et ceux qui sont basés sur l'entité légale que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données fondées, par exemple, sur l'établissement de manière à les faire correspondre aux données établies d'après la société ou l'entreprise.

Dans ses grandes lignes, le système de comptabilité nationale du Canada est étroitement relié à la norme internationale exposée dans la publication des Nations Unies *A system of National Accounts* (Études méthodologiques, série F, N° 2, Rev. 3, Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1968).

SYMBOLS AND CODES

The interpretation of the symbols used in the tables throughout this publication is as follows:

.. figures not available.

– nil or zero.

-- amount too small to be expressed.

S.I.C. code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An S.I.C. Division is indicated by one of the integers 1 to 11.

An S.I.C. Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A 3 - or 4 - digit industry class is indicated by 3 or 4 digits respectively.

CONTENT OF SPECIAL INDUSTRY GROUPINGS

The industry content of these special groupings is defined as follows:

Real Domestic Product less agriculture: All industries less agriculture (S.I.C. 2 to 11).

Goods-producing industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); and electric power, gas and water utilities (S.I.C. 7:04).

Goods-producing industries less agriculture: The total of the previous grouping less agriculture (S.I.C. 2-6; 7:04).

Service-producing industries: Transportation, storage and communication (S.I.C. 7:01-03); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); community, business and personal service industries (S.I.C. 10); and public administration and defence (S.I.C. 11).

Commercial industries: Agriculture (S.I.C. 1); forestry (S.I.C. 2); fishing and trapping (S.I.C. 3); mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); construction (S.I.C. 6); transportation, storage and communication (S.I.C. 7:01-03) less highway and bridge maintenance (S.I.C. 516); electric power (S.I.C. 572); gas distribution (S.I.C. 574); trade (S.I.C. 8); finance, insurance and real estate (S.I.C. 9); offices of physicians (S.I.C. 823); offices of dentists (S.I.C. 825); other health services (S.I.C. 827); motion picture and recreational services (S.I.C. 10:04); services to business management (S.I.C. 10:05); personal services (S.I.C. 10:06) less private households (S.I.C. 873); miscellaneous services (S.I.C. 10:07).

Commercial industries less agriculture: The total of the previous grouping less Agriculture (S.I.C. 2-6; part 7; 8; 9; part 10).

Non-commercial industries: Highway and bridge maintenance (S.I.C. 516); water systems and other utilities (S.I.C. 576; 579); hospitals (S.I.C. 821); welfare organizations (S.I.C. 828); religious organizations (S.I.C. 831); private households (S.I.C. 873); education and related services (S.I.C. 10:01); and public administration and defence (S.I.C. 11).

Index of Industrial Production: Mines (including milling), quarries and oil wells (S.I.C. 4); manufacturing (S.I.C. 5); and electric power, gas and water utilities (S.I.C. 7:04).

Notes: 1 Due to rounding, sub-annual detail may not average the annual level.

2 For RDP purposes the content of S.I.C. Division 7 has been altered to include only transportation, storage and communication; electric power, gas, water and other utilities are excluded and measured separately, as a component of the Index of Industrial Production.

SIGNES ET CODES CONVENTIONNELS

Voici la signification des signes et des codes conventionnels employés dans les tableaux:

.. chiffre non disponible.

- néant ou zéro.

-- chiffre infime.

Code C.T.I.: Le code de la Classification type des industries figurant aux tableaux doit être interprété comme suit:

Une branche de la C.T.I. est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la C.T.I., à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points(:).

Une classe d'industrie à 3 ou 4 chiffres est indiquée par 3 ou 4 chiffres respectivement.

INDUSTRIES RÉUNIES DANS CHAQUE AGRÉGAT SPÉCIAL

Énumération des industries qui composent chaque groupe spécial ci-après:

Produit intérieur réel, moins l'agriculture: Toutes les industries, moins l'agriculture (C.T.I. 2-11).

Industries productrices de biens: Agriculture (C.T.I. 1); forestage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); et électricité, gaz et eau (C.T.I. 7:04).

Industries productrices de biens, moins l'agriculture: Le total du groupement précédent, moins l'agriculture (C.T.I. 2-6; 7:04).

Industries productrices de services: Transports, entreposage et communications (C.T.I. 7:01-03); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); services sociaux, commerciaux, industriels et personnels (C.T.I. 10); administration publique et défense nationale (C.T.I. 11).

Industries commerciales: Agriculture (C.T.I. 1); forestage (C.T.I. 2); pêche et piégeage (C.T.I. 3); mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); construction (C.T.I. 6); transports, entreposage et communications (C.T.I. 7:01-03); moins l'entretien des routes et des ponts (C.T.I. 516); électricité (C.T.I. 572); distribution du gaz (C.T.I. 574); commerce (C.T.I. 8); finance, assurance et immeuble (C.T.I. 9); cabinets de médecin (C.T.I. 823); cabinets de dentiste (C.T.I. 825); autres services de santé (C.T.I. 827); cinématographie et services récréatifs (C.T.I. 10:04); établissements au service des entreprises (C.T.I. 10:05); services personnels (C.T.I. 10:06), moins ménages privés (C.T.I. 873); services divers (C.T.I. 10:07).

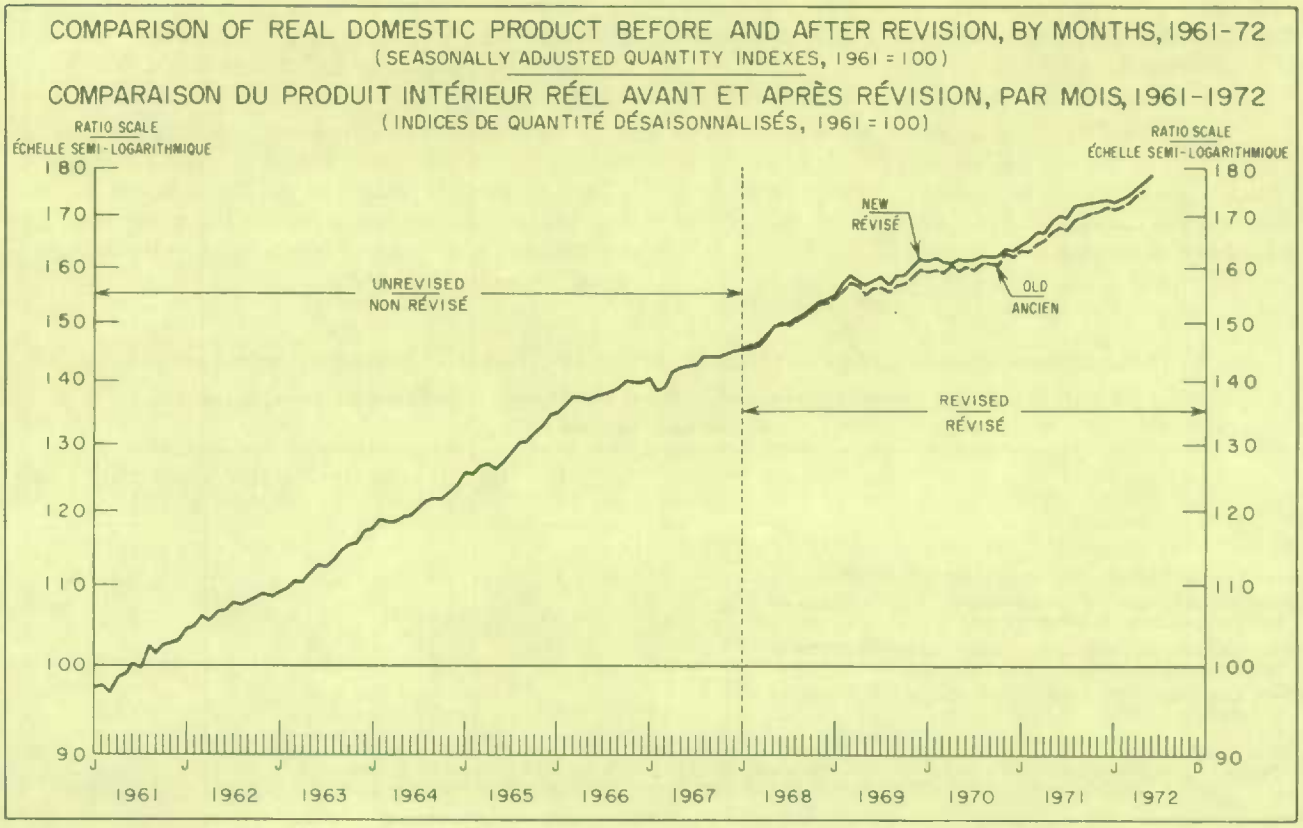
Industries commerciales, moins l'agriculture: Le total du groupe précédent, moins l'agriculture (C.T.I. 2-6; partie de 7; 8; 9 et partie de 10).

Industries non commerciales: Entretien des routes et des ponts (C.T.I. 516); services d'eau et autres services d'utilité publique (C.T.I. 576; 579); hôpitaux (C.T.I. 821); oeuvres de bienfaisance (C.T.I. 828); organismes religieux (C.T.I. 831); ménages privés (C.T.I. 873); enseignement et services connexes (C.T.I. 10:01); administration publique et défense nationale (C.T.I. 11).

Indice de la production industrielle: Mines (y compris le broyage), carrières et puits de pétrole (C.T.I. 4); industrie manufacturière (C.T.I. 5); électricité, gaz et eau (C.T.I. 7:04).

Remarques: 1 En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

2 Pour le calcul du produit intérieur brut, la division 7 de la classification type des industries a été modifiée de façon à inclure seulement les transports, l'entreposage et les communications. L'électricité, le gaz, l'eau et les autres services d'utilité publique sont évalués séparément.



TECHNICAL NOTE

This supplement contains revised annual indexes of Real Domestic Product by Industry for the period of 1969 to 1971 and revised sub-annual data for the period 1968 to 1971. These indexes are continuous with those for the period 1961 to 1967 as published in "Indexes of Real Domestic Product by Industry", Catalogue 61-510.

The revisions form part of the regular annual revisions to the Indexes of Real Domestic Product and result from the incorporation of more recent annual data (causing revisions in level), and from the incorporation of new monthly information as well as updated seasonal adjustment factors. The revised data for the period January 1972 to June 1972 are published in the June issue of 61-005, Indexes of Real Domestic Product by Industry.

Chart 1 shows a comparison of the revised monthly R.D.P. index with the previously published RDP levels.

REAL DOMESTIC PRODUCT 1971

Canada's real domestic product increased by 4.8% in 1971 or more than double the 1970 growth rate. Total employment as measured by the labour

NOTE TECHNIQUE

Ce supplément contient les données annuelles, trimestrielles et mensuelles revisées du produit intérieur réel par industrie, pour la période de 1968 à 1971. Pour un dossier continu, il faut se reporter à la publication 61-510F: "Indices du produit intérieur réel par industrie" contenant les indices pour la période de 1961 à 1967, comparables à ceux du présent supplément.

Ces revisions font suite au processus normal des revisions annuelles de l'indice du produit intérieur réel et proviennent de l'incorporation de chiffres annuels plus récents (causant des revisions des niveaux annuels) et de l'introduction de nouvelles informations mensuelles et de facteurs saisonniers mis à jour. Les chiffres revisés pour la période de janvier à juin 1972 sont publiés dans la livraison de juin de 61-005, indices du produit intérieur réel par industrie.

Le Graphique 1 montre une comparaison de l'indice mensuel revisé du P.I.R. avec les niveaux du P.I.R. publiés antérieurement.

PRODUIT INTÉRIEUR RÉEL 1971

Le produit intérieur réel canadien augmenta de 4.8 % en 1971, plus que doublant ainsi le taux de croissance de 1970. L'emploi total, tel que mesuré par

force survey grew by 2.7% against a 1970 increase of 1.7%. Price performance was also improved in 1971 as the consumer price index increased by 2.8% in contrast to a 3.4% increase in 1970.

As indicated by Table 1, growth in the economy was stronger in the first half of the year. However, for Real Domestic Product excluding agriculture, growth was roughly equally divided between the first and second half of the year.

l'enquête sur la main-d'oeuvre augmenta de 2.7 % comparativement à 1.7 % en 1970. La performance des prix fut améliorée en 1971 alors que l'indice des prix à la consommation augmenta de 2.8 % en regard de 3.4 % en 1970.

La croissance de l'économie, telle que présentée au tableau 1, fut plus forte durant la première moitié de l'année. Cependant, quant au produit intérieur réel sans l'agriculture, la croissance se trouva pour ainsi dire répartie de façon proportionnelle entre la première et la deuxième moitié de l'année.

In a comparison of U.S. and Canadian economic performance in 1971, real domestic product in Canada recorded a larger increase than GNP in constant dollars in the U.S. For the five years 1964 to 1968 growth in Canada exceeded growth in the U.S. by .7 percentage points on average. Since 1969 the differential has been about 2-1/2% on average. For the index of industrial production growth in Canada has also been stronger since 1969.

Dans une comparaison des performances économiques américaine et canadienne en 1971, le produit intérieur réel canadien enregistra une plus forte hausse que le P.N.B. américain en dollars constants. Pour les cinq années de 1964 à 1968, la croissance au Canada dépassa celle des États-Unis par .7 points de pourcentage en moyenne. Depuis 1969, la différence représente 2-1/2 % en moyenne. Pour l'indice de la production industrielle, la croissance a également été plus forte depuis 1969.

The major contributors to the 1971 increase in Canada's Real Domestic Product were manufacturing and trade and to a lesser extent agriculture and community, business, and personal services.

L'industrie manufacturière, le commerce et, dans une moindre mesure, l'agriculture de même que les services sociaux, commerciaux, industriels et personnels contribuèrent le plus à la hausse du produit intérieur réel canadien.

Durable goods manufacturing recovered strongly in 1971 from its 1970 decline. Significant in this increase were a recovery from a strike in 1970 in motor vehicle manufacturers and the strong stimulus to production of building materials and major appliances provided by the sharp increase in residential construction activity. Housing starts advanced strongly in both Canada and U.S., increasing by 23% in Canada and 42% in the U.S.

Some of the manufacturing industries affected by higher demand from construction activity were the wood industries (+ 13%), furniture and fixtures industries (+ 8%), wire and wire products (+ 15%), major appliance manufacturers (+ 33%), cement manufacturers (+ 15%), gypsum products (+ 26%), concrete products (+ 24%) and ready-mix concrete (+ 18%).

The 2.9% increase in non-durable manufacturing was still somewhat below the average growth for the past decade. Most major groups improved in 1971 with the most important exceptions being paper and allied industries and chemicals and chemical products. These industries as well as tobacco products and food and beverages did not attain their 1961 to 1970 average growth rates.

In trade both wholesale and retail trade grew substantially. Retail trade advanced by more than 7% in 1971, following an unusually small increase in 1970. (The smallest since the cyclical downturn of 1960). Output of all store types in retail trade increased. Store types registering the largest advance were motor vehicle dealers and used car dealers, department stores and furniture, T.V. and radio stores.

Agriculture output increased by over 16% on an increased wheat crop and a 19% increase in wheat exports. The increase in the wheat crop was accompanied by an increased crops of other grains, notably rapeseed, and a decline in livestock productions, a reversal of trends from 1970.

Mining and utilities which together with manufacturing comprise the index of industrial production, also increased. In mining, increased export demand was a significant factor. In the case of coal mining exports to Japan increased, while in the case of crude petroleum and natural gas exports to the US accounted for a substantial part of the increase. Reduced export demand was important in reducing the output of iron ore mining, particularly in the latter half of the year.

Utilities increased strongly on gains in all components. Gas distribution increased by almost 10% and electric power utilities by more than 6%.

La fabrication des biens durables se releva fortement en 1971 de sa diminution en 1970. Dans cette hausse, il y eut comme significatifs une reprise suite à la grève de 1970 chez les manufacturiers de véhicules automobiles et un stimulus très fort pour la fabrication des matériaux de construction et des gros appareils électriques apporté par l'augmentation énergique dans la construction résidentielle. Les mises en chantier s'accrurent fortement au Canada par 23 % et aux États-Unis par 42 %.

Quelques industries touchées par la demande accrue par l'activité de la construction furent l'industrie du bois (+ 13 %), l'industrie du meuble et accessoires d'ameublement (+ 8 %), l'industrie du fil métallique et ses produits (+ 15 %), les manufacturiers de gros appareils (+ 33 %), les manufacturiers de ciment (+ 15 %), les manufacturiers de produits de gypse (+ 26 %), les manufacturiers de produits en béton (+ 24 %) et l'industrie du béton préparé (+ 20 %).

L'augmentation de 2.9 % pour l'industrie manufacturière des biens non durables se trouvait quelque peu en dessous du taux de croissance moyen pour la dernière décennie. Presque tous les groupes d'industries connurent des améliorations en 1971, à l'exception, surtout, de l'industrie du papier et produits connexes et de l'industrie chimique et des produits connexes. Ces industries ainsi que celle du tabac et celle des aliments et boissons n'ont pas atteint leur taux de croissance de la période de 1961 à 1971.

Dans le commerce, tous deux, le commerce de détail et le commerce de gros augmentèrent de façon significative. Le commerce de détail progressa de plus de 7 % en 1971, suite à une augmentation inhabituellement minime en 1970, la plus faible depuis la descente cyclique de 1960. La production de tous les types de magasins dans le commerce de détail augmenta. Les plus fortes avances furent enregistrées par les marchands de véhicules automobiles et d'autos d'occasion, les magasins à rayon et les magasins de meubles, de téléviseurs, de radios et d'appareils électro-ménagers.

La production agricole augmenta de plus de 16 % grâce à de meilleures récoltes de blé et à une hausse de 19 % des exportations de blé. La progression dans les récoltes de blé était accompagnée par des récoltes accrues d'autres grains, notamment de graines de colza et par une baisse dans la production du bétail, contrairement à la tendance de 1970.

L'industrie minière et les utilités, qui, ensemble avec l'industrie manufacturière, forment l'indice de la production industrielle, progressèrent également. Dans l'industrie minière, la demande accrue pour exportation fut un facteur important. Pour les mines de charbon, les exportations au Japon s'accrurent; quant au pétrole brut et au gaz naturel, les exportations aux États-Unis furent responsables pour une large part de l'augmentation. Une demande pour exportation réduite fut responsable pour la baisse de production des mines de fer, notamment durant la seconde moitié de l'année.

Les utilités progressèrent grâce à des gains dans toutes les composantes. La distribution du gaz augmenta de près de 10 % et l'électricité, de plus de 6 %.
