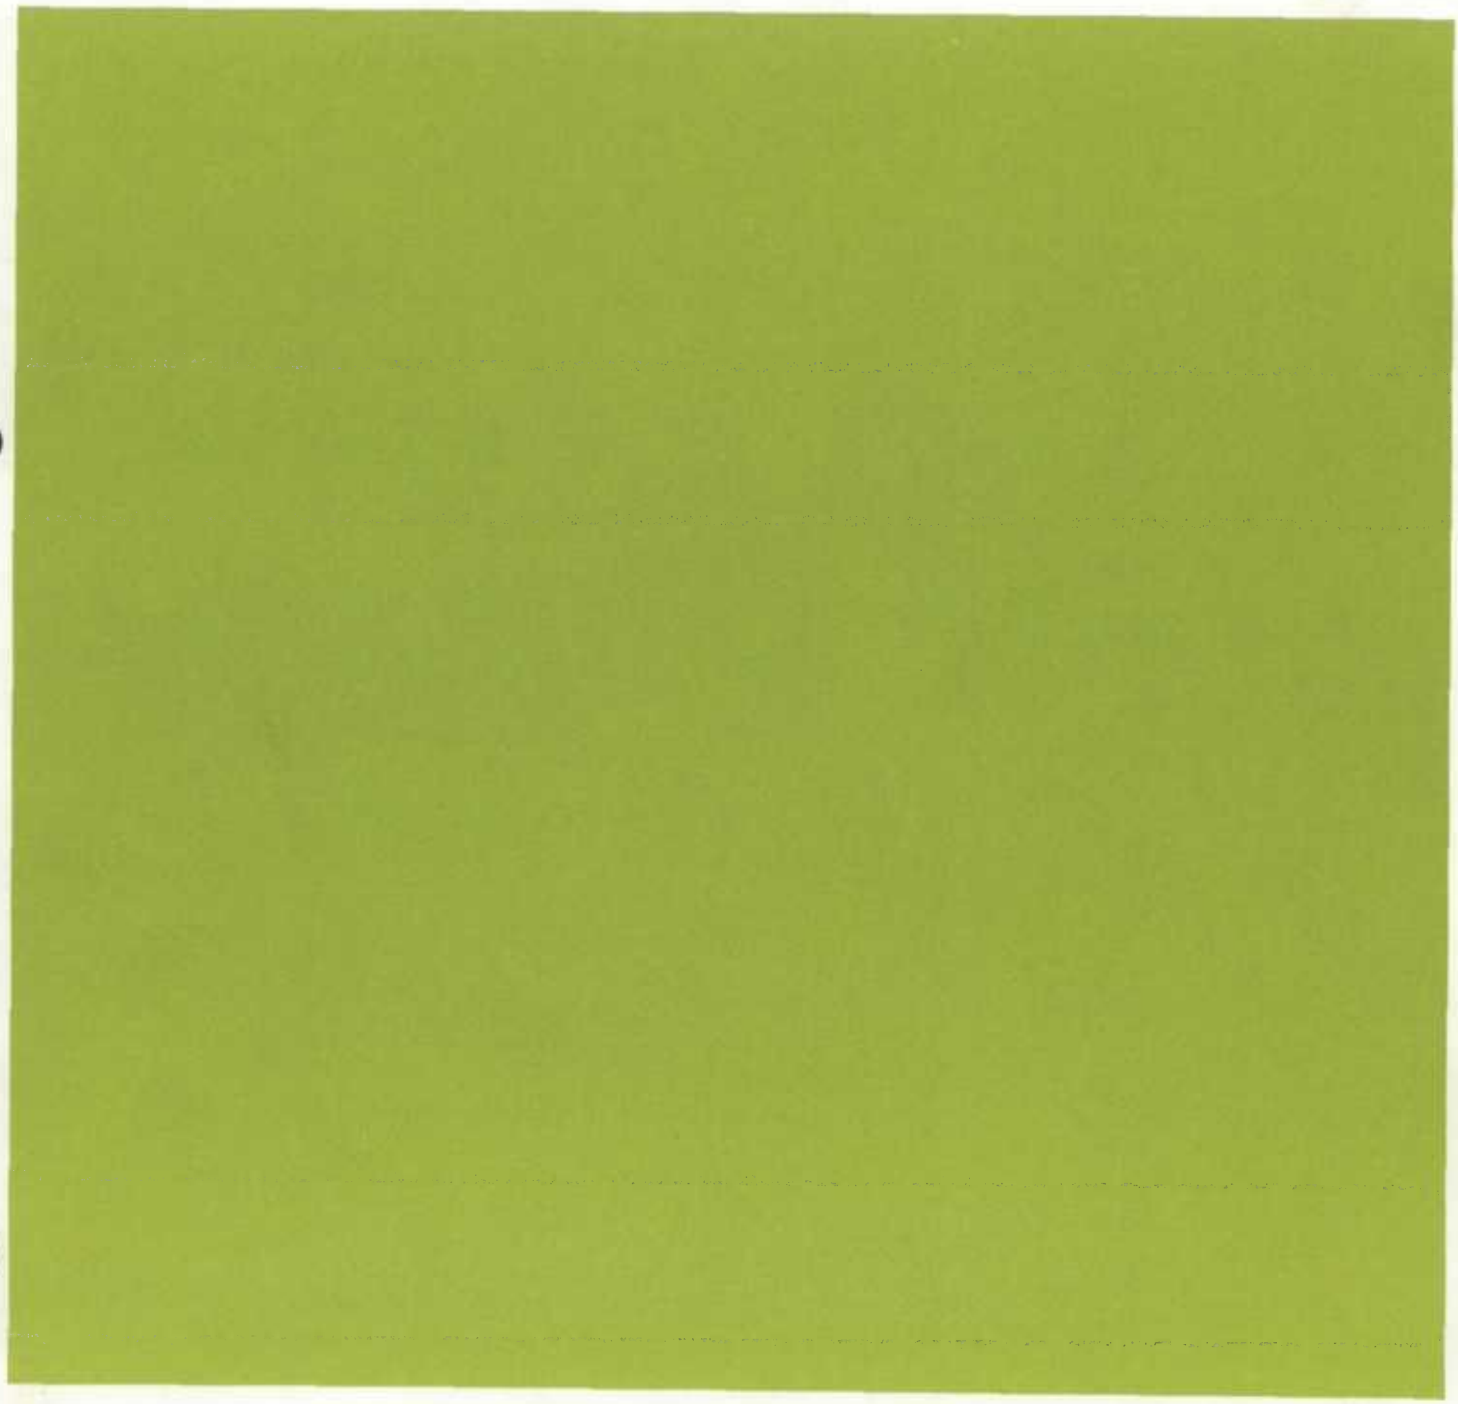
POUR EXAMEN



Statistics Canada Statistique Canada

**Data in Many Forms . . .**

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

**How to Obtain More Information**

Inquiries about this publication and related statistics or services should be directed to:

Monthly Measures Section,
Industry Product Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 990-9145) or to the Statistics Canada reference centre in:

| | | | |
|---|---|---|---|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Toll-free access is provided in all provinces and territories, **for users who reside outside the local dialing area** of any of the regional reference centres.

**How to Order Publications**

This and other Statistics Canada publications may be purchased from local authorized agents and other community bookstores, through the local Statistics Canada offices, or by mail order to Publication Sales and Services, Statistics Canada, K1A 0T6.

**Des données sous plusieurs formes . . .**

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingue et le système d'extraction de Statistique Canada.

**Comment obtenir d'autres renseignements**

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des mesures mensuelles,
Division du produit industriel,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 990-9145) ou au centre de consultation de Statistique Canada à:

| | | | |
|---|---|---|---|
| St. John's | (772-4073) | Sturgeon Falls | (753-4888) |
| Halifax | (426-5331) | Winnipeg | (949-4020) |
| Montréal | (283-5725) | Regina | (359-5405) |
| Ottawa | (990-8116) | Edmonton | (420-3027) |
| Toronto | (966-6586) | Vancouver | (666-3691) |

Un service d'appel interurbain sans frais est offert, dans toutes les provinces et dans les territoires, aux **utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres régionaux de consultation.

## Symbols

The following standard symbols are used in Statistics Canada publications:

. . figures not available.

— nil or zero.

- - amount too small to be expressed.

### Note

Due to rounding, sub-annual detail may not average annual level.

### Codes

SIC code: The Standard Industrial Classification code appearing in the tables should be interpreted as follows:

An SIC Division is indicated by one of the integers 1 to 11.

An SIC Major group within the Division is indicated by two digits following the Division code and separated from it by a colon.

A three- or four-digit industry class is indicated by three or four digits respectively.

### A Note on CANSIM®

Data in this publication were retrieved from **CANSIM** (Canadian Socio-Economic Information Management System) and were manipulated and processed to create a photo-ready copy. All tabular data appearing in this publication, as well as many other data series, are available to the public from **CANSIM** via terminal, on computer printouts, or in machine readable form.

For further information write to **CANSIM**, Statistics Canada, Ottawa, K1A 0T6, or call (613) 990-8200

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

. . nombres indisponibles.

— néant ou zéro.

- - nombre infimes.

### Nota

En raison de l'arrondissement des chiffres, il se peut que la moyenne des données mensuelles et trimestrielles n'équivaille pas au niveau annuel.

### Codes

Code CAÉ: le code de la classification des activités économiques figurant aux tableaux doit être interprété comme suite:

Une branche de la CAÉ, est indiquée par un des nombres entiers de 1 à 11.

Un groupe de la CAÉ, à l'intérieur d'une branche, est indiqué par deux chiffres qui suivent le code de la branche et sont séparés de celui-ci par deux points(:).

Une classe d'industrie à trois ou quatre chiffres est indiquée par trois ou quatre chiffres respectivement.

### Note au sujet de CANSIM®

Les données figurant dans cette publication ont été extraites de **CANSIM** (Système canadien d'information socio-économique). Elles ont été traitées de façon à produire une copie destinée à la photocomposition. Toutes les données présentées dans cette publication et beaucoup d'autres données contenues dans le **CANSIM** peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous une forme lisible par la machine.

Pour plus de renseignements, écrivez à **CANSIM**, Statistique Canada, Ottawa, K1A 0T6, ou téléphones à (613) 990-8200.

- Richard Martel, chef, Section des mesures mensuelles

## THE SYSTEM OF NATIONAL ACCOUNTS

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System will now carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), in their more summary form, are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and on services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 61 provide "constant dollar" measures of the contribution of each industry to Gross Domestic Product at factor cost. Inputs and outputs are related in Productivity Studies (Catalogue Nos. with prefix 14).

Both the Input-Output Tables and estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Levels of outstanding financial assets and liabilities are published annually as a major contribution towards a complete national balance sheet.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise-company-establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in the United Nations publication: *A System of National Accounts* (Studies in Methods. Series F, No. 2 Rev. 3, Statistical Office, Department of Economic and Social Affairs, United Nations, New York, 1968).

## LE SYSTÈME DE COMPTABILITÉ NATIONALE

Au Canada, les comptes nationaux ont fait l'objet depuis la fin de la Seconde Guerre mondiale de toute une série de publications portant sur leurs éléments constitutifs. Ils ont connu une telle évolution qu'on peut maintenant les qualifier de "Système de comptabilité nationale". Aux fins d'identification, toutes les publications qui font partie du système (elles contiennent des tableaux statistiques, la description du cadre théorique et l'explication des sources et des méthodes) porteront désormais le titre général de "Système de comptabilité nationale".

Le système de comptabilité nationale du Canada se divise en plusieurs catégories de comptes. Les comptes annuels et trimestriels des revenus et des dépenses (paraissant dans les publications dont le numéro de catalogue commence par 13) ont constitué le premier ensemble de statistiques à être connu sous le titre de "Comptes nationaux" (Comptes nationaux, revenus et dépenses). Les données sur la balance canadienne des paiements internationaux (numéro de catalogue commençant par 67) font également partie, sous leur forme sommaire, du système de comptabilité nationale; elles ont même existé avant les comptes des revenus et des dépenses.

Une nomenclature beaucoup plus détaillée d'industries et de biens et services figure dans les tableaux d'entrées-sorties du système (numéro de catalogue commençant par 15). Les publications dont les numéros de catalogue commencent par 61 comprennent les mesures, en dollars constants, l'apport de chaque branche d'activité au produit intérieur brut au coût des facteurs. Un rapport est établi entre les entrées et sorties dans les études de productivité (publications dont le numéro de catalogue commence par 14).

L'établissement est l'unité primaire de production industrielle tant dans les tableaux d'entrées-sorties que dans les estimations du produit intérieur brut. Les comptes de flux financiers (publications dont les numéros de catalogue commence par 13) mesurent les opérations financières. Les catégories de prêteurs et d'instruments financiers forment les éléments de base de ces statistiques et la personne morale est le point de départ du classement des agents économiques. Les niveaux des actifs et passifs financiers en circulation sont disponibles annuellement; ils constituent un élément important d'un bilan national exhaustif.

Le système de comptabilité nationale constitue un ensemble conceptuellement intégré dans lequel les diverses catégories de comptes peuvent être considérées comme des sous-systèmes étroitement liés entre eux. Au stade actuel de développement, on ne peut faire de comparaison directe entre les éléments basés sur l'établissement ceux qui sont basés sur l'entité juridique que lorsque les données sont groupées dans des catégories très générales. Toutefois, Statistique Canada poursuit ses recherches sur les relations entre l'entreprise, la société et l'établissement. Il sera peut-être possible un jour de reclasser les données établies sur une certaine base (l'établissement par exemple) de manière à les faire correspondre aux données établies sur une autre base (société ou entreprise).

Dans ses grandes lignes, le système de comptabilité nationale du Canada suit de très près la norme internationale exposée dans la publication des Nations Unies intitulée *Système de comptabilité nationale* (Études méthodologiques, série F, no 2, rév. 3 Bureau de statistique, Département des affaires économiques et sociales, Nations Unies, New York, 1970).

## NOTE RE: HISTORICAL CONTINUITY

On the 1971 base, a continuous record from 1971 of Gross Domestic Product and its components may be obtained from the following Statistics Canada publications:

**Catalogue 61-213.** *Gross Domestic Product by Industry,* 1983 issue, for the 1971-1983 period.

**Catalogue 61-005.** *Gross Domestic Product by Industry,* the April 1984 issue and current issues for the reference period beginning January 1984.

The same data are available in the following **CANSIM** matrices:

| | Matrix numbers |
|---|---|
| Gross Domestic Product: | |
| Monthly | 1131 |
| Quarterly | 1130 |
| Annual | 1125-1129 |

For the period prior to 1971, selected annual data are available on a 1971 reference base. The data are available in **CANSIM** matrix 389 or can be made available upon request by contacting Mrs. M. Galea (613-990-9058), Industry Product Division, Statistics Canada, Ottawa, K1A 0T6.

To obtain a continuous record on a 1971 base, the indexes on a 1961 base must be mechanically rebased to 1971 by multiplying by 100.0 and dividing by the 1971 index value on a 1961 base. For 1971 and earlier years, Gross Domestic Product and the component indexes required for linkage to the 1971 based series may be obtained from the following Statistics Canada publications:

*Indexes of Real Domestic Product by Industry — (1961 Base)* Catalogue 61-506, for Real Domestic Product for the period from 1935-1960 and for the Index of Industrial Production for the period from 1919-1960.

*Real Domestic Product by Industry, 1961-1971, 1961 = 100,* Catalogue 61-516, for the period from 1961-1971.

Data for linking purposes can also be obtained for 1971 and the period prior to 1971 from the following **CANSIM** matrices:

| | Matrix numbers |
|---|---|
| Real Domestic Product: | |
| Annual | 383 |
| Quarterly | 15 |
| Monthly | 1421 |
| Index of Industrial Production: | |
| Annual | 384 |
| Monthly | 16 |

## REMARQUES SUR LA CONTINUITÉ CHRONOLOGIQUE

Les publications de Statistique Canada sous mentionnées peuvent servir à établir une continuité du produit intérieur brut et de ses composantes sur la base 1971 = 100 à partir de 1971:

**N$^{O}$ 61-213 au catalogue.** *Produit intérieur brut par industrie,* publication de 1983 consacrée à la période 1971-1983.

**N$^{O}$ 61-005 au catalogue.** *Produit intérieur brut par industrie,* l'édition d'avril 1984 et les publications courantes présentent des données pour la période de référence commençant en janvier 1984.

On peut obtenir les mêmes données des matrices suivantes de **CANSIM:**

| | Numéros de matrice |
|---|---|
| Produit intérieur brut: | |
| Mensuel | 1131 |
| Trimestriel | 1130 |
| Annuel | 1125-1129 |

En ce qui concerne les années antérieures à 1971, certaines données par année sont disponibles sur la base 1971 = 100. On peut obtenir les données de la matrice 389 de **CANSIM** ou on peut se procurer ces données en s'adressant à Mme M. Galea (613-990-9058), Division du produit industriel, Statistique Canada, Ottawa, K1A 0T6.

Pour obtenir une continuité des données de ces années, les indices sur la base 1961 = 100 doivent être convertis arithmétiquement à l'année de référence 1971 en les multipliant par 100.0 et en divisant le produit obtenu par la valeur de l'indice de 1971 sur la base de 1961 = 100. Dans le cas de 1971 et des années antérieures, le produit intérieur brut et les composantes nécessaires au raccordement avec les séries dont l'année de référence est 1971 peuvent être tirés des publications suivantes:

*Indexes of Real Domestic Product by Industry — (1961 Base)* n$^{O}$ 61-506 au catalogue, produit intérieur réel pour la période 1935-1960 et indice de la production industrielle pour la période 1919-1960.

*Produit intérieur réel par industrie, 1961-1971, 1961 = 100,* n$^{O}$ 61-516 au catalogue, la période 1961-1971.

Des données de raccordement peuvent être obtenues pour 1971 et les années antérieures des matrices suivantes de **CANSIM:**

| | Numéros de matrice |
|---|---|
| Produit intérieur réel: | |
| Annuel | 383 |
| Trimestriel | 15 |
| Mensuel | 1421 |
| Indice de la production industrielle: | |
| Annuel | 384 |
| Mensuel | 16 |

## CONCEPTS, SOURCES AND METHODS

**Catalogue 61-502.** See this publication for description of concepts, sources and methods for the Index of Industrial Production.

**Catalogue 61-505.** See this publication for description of concepts, sources and methods for Real Domestic Product by Industry of Origin.

**Catalogue 61-506.** See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the 1960 Standard Industrial Classification and the adoption of the 1961 weight and reference base.

**Catalogue 61-510.** See this publication for technical note concerning major changes in concepts, sources and methods in Real Domestic Product (including the Index of Industrial Production) resulting from the introduction of the "total activity" concept.

**Catalogue 61-516.** See this publication for technical note concerning the introduction of annual estimates of Real Domestic Product by industry expressed in constant dollars, the incorporation of the results of the 1971 census of merchandising and services for a large number of the service-producing industries, the introduction of annual estimates of gross output, intermediate input, and value added in current and constant (1961) prices and the corresponding implicit price indexes, for selected manufacturing industries and the adoption of the final 1961 weighting system.

**Catalogue 61-213.** See the 1971-1974 issue for the technical note concerning the implementation of a 1971 weight and reference base and the adoption of the 1970 Standard Industrial Classification. See the 1980 issue concerning revisions to the 1971 (base year) Gross Domestic Product distribution and the introduction of annual estimates of gross output, intermediate inputs and value added in current year prices and in constant (1971) prices for all industries. See Appendix 1 for 1) a complete distribution of Gross Domestic Product, 2) the types of indicators used and 3) a quality assessment for both published and unpublished industry estimates. See Appendix 2 for the content of the "Industry Groupings" and Appendix 3 for the content of the "Groupings of Industries by Demand Category".

**Catalogue 61-202.** See this publication for estimates and methodological summaries of annual current and constant (1971) price provincial Gross Domestic Product for selected industries.

## CONCEPTS, SOURCES ET MÉTHODES

**N$^{O}$ 61-502 au catalogue.** Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement de l'indice de la production industrielle.

**N$^{O}$ 61-505 au catalogue.** Se reporter à cette publication, qui présente la description des concepts, sources et méthodes d'établissement du produit intérieur réel par industrie d'origine.

**N$^{O}$ 61-506 au catalogue.** Se reporter à cette publication, qui présente les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'ont entrainé l'application de la Classification type des industries de 1960 et l'adoption de l'année 1961 comme base de pondération et de référence.

**N$^{O}$ 61-510F au catalogue.** Se reporter à cette publication, qui contient les remarques techniques concernant les changements importants survenus au niveau des concepts, sources et méthodes d'établissement du produit intérieur réel (y compris l'indice de la production industrielle) qu'a entrainé l'introduction du concept "d'activité totale".

**N$^{O}$ 61-516 au catalogue.** Se rapporter à cette publication qui contient les remarques techniques concernant l'introduction d'estimations annuelles du produit intérieur réel par industrie exprimées en dollars constants, l'incorporation des résultats du recensement du commerce et de services de 1971 pour plusieurs industries de services, l'introduction de données annuelles pour certaines industries manufacturières concernant la production brute, nette et la consommation intermédiaire aux prix courants et constants (de 1961) et les indices implicites de prix correspondants et l'adoption du régime de pondération finale de 1961.

**N$^{O}$ 61-213 au catalogue.** Se rapporter à la note technique de la livraison de 1971-1974 concernant l'introduction des bases de référence et de pondération de 1971 et l'adoption de la Classification des Activités Économiques de 1970. Se rapporter à la livraison de 1980 concernant les révisions à la distribution du produit intérieur brut de 1971 (année de référence) et l'introduction des estimations de la production brute, la consommation intermédiaire et la valeur ajoutée en prix de l'année courante et en prix constants de 1971 pour toutes les industries. Se rapporter à l'appendice 1 pour 1) une distribution détaillée du produit intérieur brut, 2) les types de projecteurs et 3) une évaluation qualitative-concernant les estimations publiées et non publiées par industrie. Se rapporter à l'appendice 2 pour les listes d'industries comprises dans chaque agrégat d'activités économiques et, à l'appendice 3, pour celles comprises dans chaque groupe d'activités économiques par type de demande.

**N$^{O}$ 61-202 au catalogue.** Se rapporter à cette publication, qui contient les sommaires des méthodes et les estimations (annuelles) provinciales du produit intérieur brut en prix courants et en prix constants de 1971 pour certaines industries.

## REVIEW OF RESULTS

### Seasonally Adjusted Data

Gross Domestic Product (GDP) registered a 0.3% decline in August 1984. This followed a strong 1.2% upsurge in July and was the first drop since February of this year. The average level of output for the first two months of the third quarter, July and August, is 1.7% above the average for the second quarter.

The decline in GDP originated from widespread decreases among both goods and service producing industries. Industrial production was down 0.5% in August, following a 3.5% increase in July.

Of the groupings by demand category, durable consumer goods registered a large increase in August, almost entirely as a result of an increase in motor vehicle manufacturing. Other categories rose only slightly or declined.

Major sources of weakness in August were the mining, trade and finance, insurance and real estate industries. Output gains were reported in community, business and personal services, public utilities, construction and forestry.

The mining industry experienced broad output declines in August, notably among iron ore, copper, nickel, lead and zinc production. The decline in non-metal mines was largely due to a drop in potash mining; production of crude petroleum and natural gas also fell during the month. Services incidental to mining showed an 11.0% reduction in the area of exploration and drilling activity.

The downturn in trade was entirely due to the decline of wholesale trade, as retail activity was unchanged from July. The fall in wholesale trade was concentrated in motor vehicles and parts, electrical machinery and equipment and other industrial machinery and equipment.

By comparison, there were a number of output gains in retail trade, notably among food stores and service stations and garages. New motor vehicle dealers' sales declined for the third consecutive month in August, as retail sales of both North American and overseas produced vehicles fell substantially. Department store sales decreased for the second consecutive month although at a lower rate of decline.

Insurance and real estate agencies also registered decreases, reflecting a fall in real estate sales. A drop in issues of new corporate stocks accounted for the decline in security brokers and dealers.

## REVUE DES RÉSULTATS

### Données désaisonnalisées

Pour la première fois depuis février 1984, le produit intérieur brut (PIB) a baissé en août (—0.3%), après avoir affiché une forte hausse de 1.2% en juillet. Pour les deux premiers mois du troisième trimestre, soit juillet et août, la production moyenne était supérieure de 1.7% à celle du deuxième trimestre.

La diminution du PIB est attribuable à des baisses généralisées observées dans les industries productrices de biens et services. La production industrielle a chuté de 0.5% en août, après avoir enregistré une majoration de 3.5% le mois précédent.

Parmi les agrégats des activités économiques par type de demande, les industries productrices de biens de consommation durables ont affiché une forte hausse en août, due presque entièrement à une augmentation de la production des fabricants de véhicules automobiles, tandis que les autres agrégats n'ont marqué qu'une légère majoration ou diminution.

En août, la production a fléchi surtout dans l'industrie minière et dans le secteur des finances, de l'assurance et des affaires immobilières. On observe une production accrue dans les services socio-culturels, commerciaux et personnels, dans les services publics, dans la construction et dans les forêts.

L'industrie minière a connu une baisse marquée en août dans la production de minerai de fer, de cuivre, de nickel, de plomb et de zinc. Dans les mines non métalliques, la baisse de production est imputable en grande partie à un ralentissement de l'exploitation de la potasse. Au cours du même mois, la production de pétrole brut et de gaz naturel a aussi marqué une régression. Quant aux services miniers, ils ont accusé un fléchissement de 11.0% au chapitre de l'exploitation et du forage.

Dans le secteur du commerce, le recul de la production s'explique uniquement par une baisse du commerce de gros, le commerce de détail étant demeuré inchangé par rapport à juillet. Cette baisse s'est surtout fait sentir dans les industries de fabrication de véhicules et de pièces automobiles, de machines et d'équipement électriques ainsi que d'autres machines et équipement industriels.

En ce qui concerne le commerce de détail, la production s'est accrue dans un certain nombre d'établissements, notamment dans les magasins d'alimentation, les stations-service et les garages. Les détaillants de véhicules automobiles neufs ont vu leurs ventes diminuer en août pour un troisième mois de suite, les ventes au détail ayant chuté de façon appréciable tant dans le cas des véhicules construits en Amérique du Nord que de ceux fabriqués outre-mer. Pour le deuxième mois d'affilée, les grands magasins ont enregistré un fléchissement de leurs ventes, moins prononcé toutefois qu'au mois précédent.

Les agences d'assurances et d'affaires immobilières ont vu leurs ventes fléchir. Une diminution du nombre de nouvelles actions émises par les sociétés a entraîné une baisse de production chez les agents de change et les courtiers en valeurs mobilières.

Although total manufacturing output was effectively unchanged from the high July level, many individual component industries recorded decreases which were offset by a few large increases. The major declines were in pulp and paper mills, iron and steel mills, some food product industries, and smelting and refining. Major output increases were recorded by manufacturers of motor vehicles, parts and accessories, and office and store machinery.

The decline in pulp and paper mills was due primarily to a fall in newsprint production, coinciding with a drop in export demand. This lower demand may be the result of orders placed in advance of recent price increases. Strikes in meat and fish products industries accounted for much of the decline noted in these activities.

Motor vehicle manufacturing recorded its largest monthly increase since January 1983, possibly in part due to strike anticipation. Exports of automobiles and trucks climbed sharply in August. Production of parts and accessories rose for the fourth consecutive month.

Agricultural production also recorded a decline, largely due to a drop in grain production and lower livestock marketings.

Residential construction recorded its strongest monthly increase since June 1983. The greatest growth in work put in place was in single homes and apartment dwellings.

Gross Domestic Product increased 2.9% from December 1983 to August 1984. With the exception of consumer services, none of the consumer demand categories have shown much growth during 1984 (accompanying table). During the same period, the construction and machinery and equipment categories enjoyed strong growth, with the rise in machinery and equipment due in large part to increased exports. Much of the growth to date in the construction-oriented and energy industry groupings can also be traced to improved exports.

Même si la production totale des fabricants est demeurée inchangée par rapport au niveau de production élevé enregistré en juillet, de nombreux secteurs ont accusé des baisses, qui ont été neutralisées par quelques fortes augmentations. Les principales diminutions de production se sont produites dans les usines de pâtes et papiers, dans la sidérurgie, dans certaines industries des aliments ainsi que dans la fonte et l'affinage. Les principales hausses de production sont survenues chez les fabricants de véhicules, de pièces et d'accessoires automobiles ainsi que chez les fabricants de machines de bureau et de magasin.

La baisse de production dans les usines de pâtes et papiers est surtout due à un fléchissement de la fabrication de papier journal, qui s'est fait sentir en même temps qu'une régression de la demande à l'exportation. Cette demande réduite s'explique peut-être du fait que les commandes ont été passées avant la montée récente des prix. Les grèves déclenchées dans les industries de la viande et du poisson sont responsables dans une grande mesure de cette situation.

Les fabricants de véhicules automobiles ont connu leur plus forte augmentation mensuelle depuis janvier 1983, due en partie peut-être à l'imminence d'une grève. Les exportations d'automobiles et de camions ont fortement augmenté en août, et la production de pièces et d'accessoires s'est accrue pour le quatrième mois consécutif.

L'agriculture a accusé une baisse par suite d'une chute de la production de grains et des restrictions apportées aux programmes de commercialisation du bétail.

Le secteur de la construction de bâtiments résidentiels a affiché sa plus forte hausse mensuelle depuis juin 1983. On construit plus de maisons unifamiliales et d'immeubles d'appartements que d'autres types de logement.

Le produit intérieur brut a augmenté de 2.9% entre décembre 1983 et août 1984. Sauf pour les services de consommation, aucune branche productrice de biens et de services de consommation n'a enregistré de hausse sensible en 1984 (voir le tableau). Au cours de la même période, une forte croissance s'est fait sentir dans les industries du bâtiment et des travaux publics d'une part, et des machines et du matériel d'autre part, la hausse étant attribuable dans le deuxième cas en grande partie à des exportations accrues. D'ailleurs, celles-ci expliquent aussi dans une large mesure l'augmentation enregistrée à ce jour dans la production des agrégats d'industries axées sur le bâtiment et les travaux publics et sur l'énergie.

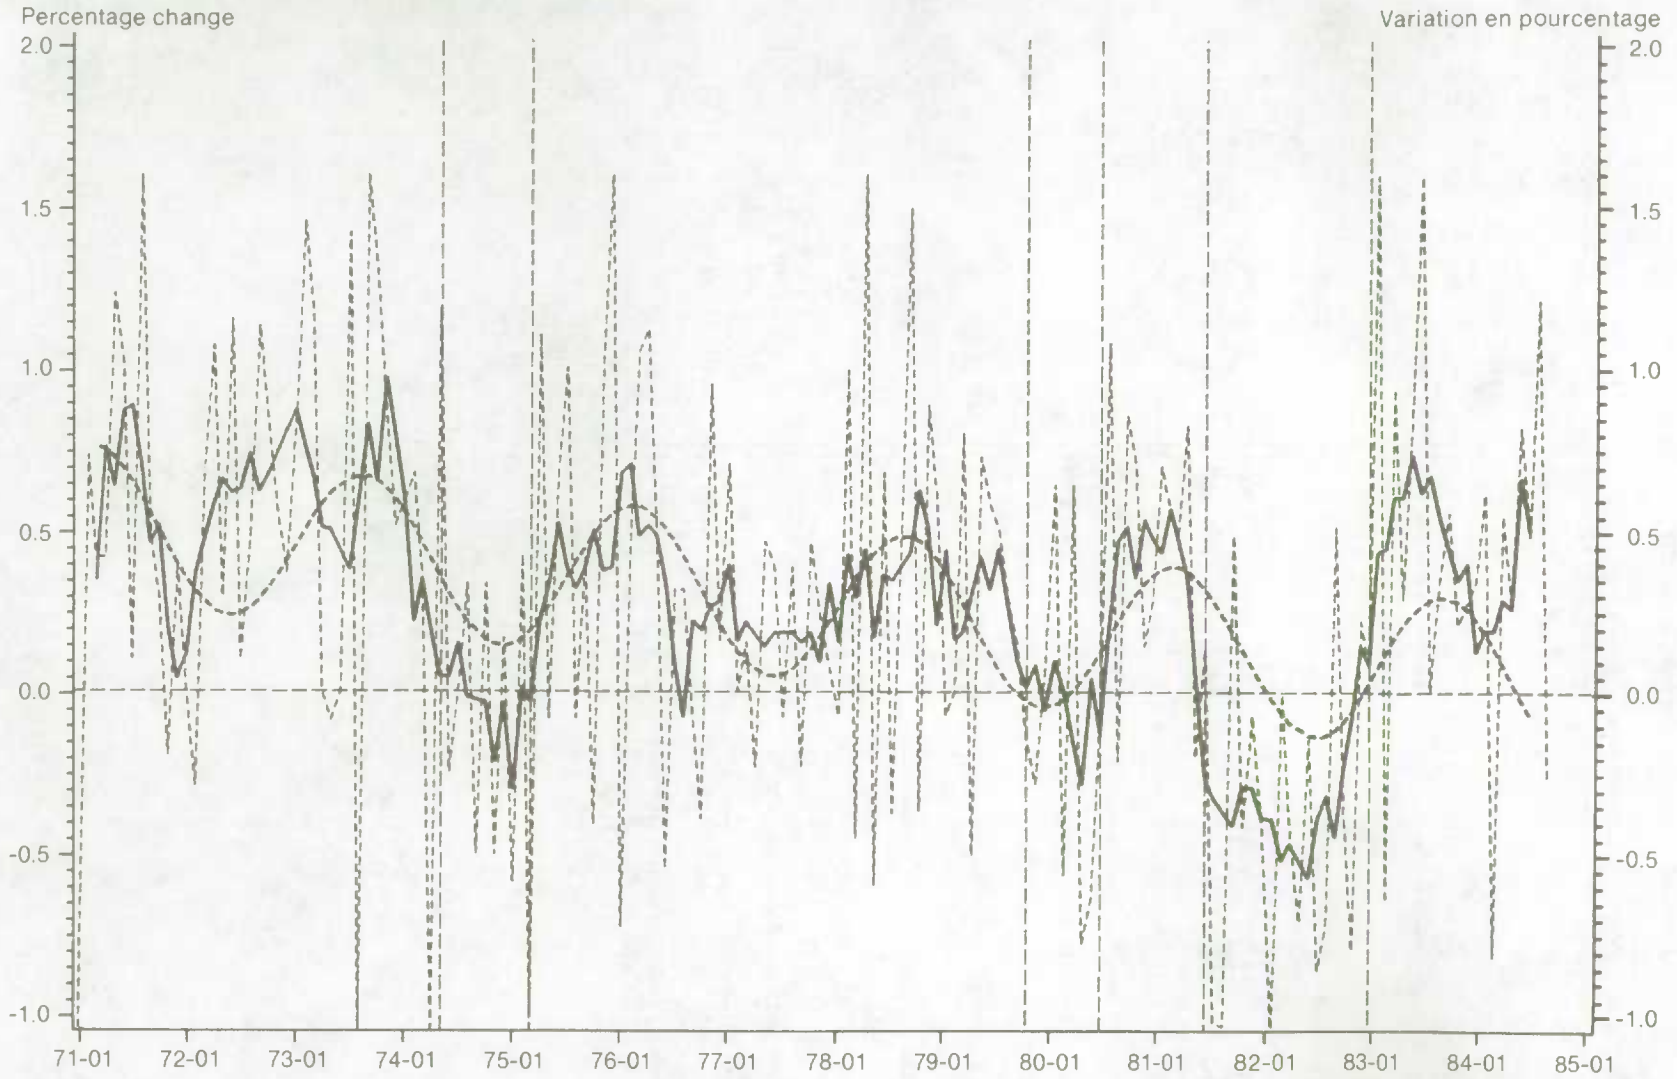
**Cycles in Rates of Growth of Gross Domestic Product**

**Cycles des taux de croissance du produit intérieur brut**



The lighter dashed line represents the month to month percentage changes in the series. The solid line is a five term moving average of the percentage changes. A regular cyclical curve has been imposed on the graph to assist in comparing the amplitude and duration of cycles.

Le trait pointillé et pâte représente les variations en pourcentage du PIB. Le trait continu est une moyenne mobile de cinq mois des variations en pourcentage. On a superposé sur le graphique une courbe cyclique régulière pour faciliter la comparaison de la durée et de l'amplitude des cycles de croissance.
