criminalité, 1949.

MUNICIPAL POLICE STATISTICS

Police statistics were collected in 1949 from 198 urban centres, 13 district municipalities and 2 unorganized districts of 4,000 population and over. The total population of these centres was 5,334,925 according to the 1941 Census, and the strength of the police forces was 8,415.

In the following summary 1948 figures are given in brackets for comparison with those of 1949.

The offences known to the police rose to 1,104,883 (960,709). The increase is due in part to a better understanding of the term "offences known to the police" which includes all offences reported to the police and recorded daily by them. Arrests numbered 157,626 (154,214) and 808,786 (672,021) persons were summoned. There were 995,584 (864,965) prosecutions. Of the prosecutions 8.7 per cent were for crimes against the criminal code and Federal statutes, 21.8 per cent were for offences against provincial statutes and 69.5 per cent were for municipal by-law infractions.

The number of motor vehicles, reported as stolen, totalled 9,573 (8,665) with 9,452 (8,895) recovered. In two provinces more motor vehicles were reported found than were reported stolen. There is no reason to believe this is a discrepancy in the statistics for a car can be recovered by the police before the owner has reported a loss or a car stolen in 1948 may be found in 1949. Of 17,649 (16,558) stolen bicycles, 15,098 (14,036) were reported recovered.

Other stolen articles were valued at \$5,614,585 (\$4,817,863) of which \$2,589,547 (\$2,573,680) worth were found by the police. The police in two municipalities reported that all the property stolen, other than motor vehicles and bicycles, was recovered. This might happen but experience shows it is improbable.

The identification departments of police forces fingerprinted 33,920 (26,491) and photographed 19,917 (18,695) persons.

There were 95,931 (80,862) motor vehicle accidents investigated by the police in which 624 (608) persons were killed and 21,412 (19,579) were injured. Other accidents reported to the police had a toll of 724 (730) deaths and 12,051 (9,509) injured persons.

Shelter in police stations was given to 85,713 (79,567) persons, an increase of 7.7 per cent. Out of 8,309 (9,004) persons reported missing 7,754 (8,181) were located.

STATISTIQUE DE LA POLICE MUNICIPALE

En 1949, la statistique policière est colligée dans 198 centres urbains, 13 municipalités de district et 2 districts non organisés de 4,000 habitants et plus. D'après le recensement de 1941, la population totale de ces centres est de 5,334,925 et l'effectif policier, de 8,415.

Dans le sommaire suivant, les chiffres de 1948 paraissent entre parenthèses pour fins de comparaison avec ceux de 1949.

Les délits connus de la police augmentent à 1,104,883 (960,709). L'augmentation provient en partie d'une meilleure interprétation du terme "délit connu de la police", qui englobe tous les délits déclarés à la police et enregistrés quotidiennement par elle. Les arrestations se chiffrent par 157,626 (154,214) et 808,786 (672,021) personnes sont sommées de comparaître. Il y a eu 995,584 (864,965) poursuites, dont 8.7 p. 100 en vertu du Code criminel et de la législation fédérale, 21.8 p. 100 en vertu de la législation provinciale et 69.5 p. 100 en vertu des règlements municipaux.

Le nombre de véhicules automobiles volés s'élève à 9,573 (8,665), dont 9,452 (8,895) sont retrouvés. Dans deux provinces, le nombre de véhicules retrouvés surpasse celui des véhicules déclarés volés. Cette anomalie n'est pas une erreur de statistique; il arrive qu'une automobile soit retrouvée par la police avant que le propriétaire ne fasse rapport du vol ou qu'une automobile volée en 1948 soit retrouvée en 1949. Sur les 17,649 (16,558) bicyclettes volées, 15,098 (14,036) sont retrouvées.

Les autres articles volés ont une valeur de \$5,614,585 (\$4,817,863). La police en retrouve pour une valeur de \$2,589,547 (\$2,573,680). La police de deux municipalités déclare que toute la propriété volée, autre que les véhicules automobiles et les bicyclettes, a été retrouvée. Cela peut arriver, mais l'expérience démontre que c'est improbable.

Les services de confrontation de la police prélèvent les empreintes digitales de 33,920 (26,491) personnes et photographient 19,917 (18,695) personnes.

Le nombre d'accidents d'automobile portés à l'attention de la police s'élève à 95,931 (80,862); dans ces accidents, 624 (608) personnes perdent la vie et 21,412 (19,579) sont blessées. Les autres accidents déclarés à la police coûtent la vie à 724 (730) personnes et en blessent 12,051 (9,509).

Les postes de police hébergent 85,713 (79,567) personnes, augmentation de 7.7 p. 100. Sur les 8,309 (9,004) personnes portées disparues, 7,754 (8,181) sont retrouvées.

It is difficult to procure accurate police statistics partly because the chief constables in some places, though keeping local statistics with care, fail to realize the value of national statistics and are apt to think that estimated figures rather than a true count are sufficient for statistical purposes, which, of course, is erroneous.

The encouraging side to this problem is the continued interest of the chiefs of police to obtain more accurate recording so that these statistics will be of use to themselves. A decided improvement was shown in 1949.

The 1948 report stated that one in every three reports of police statistics had to be returned for the correction of discrepancies that were apparent to the Dominion Bureau of Statistics. In 1949 only 1 in every thirteen was returned. However, there is still room for betterment. For instance, in 7 of the 1949 reports, the offences known to the police, and in 44 reports, the number of offences cleared up by the police, were recorded as less than the number resulting in prosecution. This is not logical for surely a prosecution clears up a case, as far as the police are concerned, and should be included in the total figure of offences known to the police and offences cleared up by the police.

RCMP, Provincial and Railway Police Statistics

The statistical reports of the Royal Canadian Mounted Police and the Provincial Police do not include those places of 4,000 and over which they police. For instance, in British Columbia 13 of the centres listed under Municipal Police Statistics in this Report are patrolled by the Provincial Police, and likewise in Saskatchewan 4, in Manitoba 4 and in New Brunswick 3 are policed by the R.C.M.P.

However, these combined statistics do not give a full picture of police activities in Canada since they do not include the statistics of the Newfoundland Ranger or Constabulary Forces, the Quebec Provincial Police and of the police forces in those incorporated towns and villages of less than 4,000 population, which are not patrolled by the R.C.M.P. or the Provincial Police.

Il est difficile d'obtenir des statistiques policières précises, en partie parce que les chefs de police de certains endroits, même s'ils colligent avec soin leur statistique locale, ne sont pas saisis de l'importance de la statistique nationale et croient à tort que les chiffres approximatifs suffisent aux fins statistiques.

Le problème a son côté encourageant: l'effort soutenu de la part des chefs de police en vue d'obtenir un enregistrement plus précis afin que la statistique leur soit plus utile. L'amélioration est sensible à ce point de vue en 1949.

Le rapport de 1948 déclare qu'un rapport de la statistique policière sur trois a été renvoyé pour fins de correction d'erreurs relevées par le Bureau fédéral de la statistique. En 1949, un rapport seulement sur treize a été renvoyé. Toutefois, la situation pourrait encore s'améliorer. Par exemple, dans sept des rapports de 1949, les délits connus de la police, et dans 44 rapports, le nombre de délits réglés par la police était inférieur à celui qui résulte en une poursuite. Cela n'est pas logique, car sûrement une poursuite règle le cas en ce qui concerne la police et ce cas doit être compris dans le total des délits connus de la police et réglés par la police.

Statistique de la Gendarmerie royale, de la police provinciale et de la police des chemins de fer

Les rapports statistiques de la Gendarmerie royale et de la police provinciale ne comprennent pas les endroits de 4,000 habitants ou plus qu'ils surveillent. En Colombie-Britannique par exemple, 13 des centres inscrits dans la statistique de la police municipale dans le présent rapport sont surveillés par la police provinciale; 4 centres en Saskatchewan, 4 au Manitoba et 3 au Nouveau-Brunswick sont ainsi surveillés par la Gendarmerie royale.

Toutefois, ces statistiques réunies ne donnent pas un aperçu complet de l'activité policière au Canada, puisqu'elles ne comprennent pas la statistique des garde-forestiers ou gendarmerie de Terre-Neuve, de la police provinciale de Québec et de la police des villes et villages non incorporés de moins de 4,000 habitants, qui ne sont pas surveillés par la Gendarmerie royale ou la police provinciale.
