The table at the top of the following page shows estimated value of shipments, inventories and orders in all manufacturing industries.
**Provincial Shipments**

Value of manufacturers' shipments increased 12.5% in April as compared to April last year, with all provinces except Saskatchewan posting gains.

Increased values in Newfoundland were due mainly to higher values in the paper and wood products industries; in Nova Scotia to increases in foods and beverages, metal fabricating, transportation equipment and petroleum products; in New Brunswick to advances in foods and beverages, and wood and paper products; in Quebec to gains in foods and beverages, textiles, paper, primary metals, transportation equipment, electrical, and chemical products; in Ontario to higher values in foods and beverages, textiles, primary metals, metal fabricating, transportation equipment, and electrical products; in Manitoba to advances in foods and beverages; primary metals, and transportation equipment; in Alberta to gains in foods and beverages, wood, primary metals and machinery; and in British Columbia to increases in foods and beverages, wood, paper, primary metals and metal fabricating industries. The decline in Saskatchewan was due to decreased shipments in primary metals, non-metallic minerals and petroleum products.

Canada's index of farm prices of agricultural products (1935-39=100) edged up 0.6% in May to 247.3 from the revised April index of 245.8. Higher prices for livestock and potatoes contributed to this gain; prices for poultry meat and eggs were lower.

Provincial indexes in May were: Prince Edward Island, 264.6 (211.4 in April); Nova Scotia, 238.1 (232.1); New Brunswick, 253.7 (223.6); Quebec, 271.6 (271.7); Ontario, 269.4 (268.3); Manitoba, 229.5 (229.6); Saskatchewan, 212.9 (213.4); Alberta, 236.3 (236.1); and British Columbia, 277.6 (278.7).
28. Public Libraries. Canada's public libraries provided more than 15.5 million books in 1962 which circulated an average of 4.1 times each. This represented increases of 7.2% in stock and 8.1% in circulation as against 1961. Additionally, public libraries provided periodicals, pamphlets, films, filmstrips and other material for reference and home use. Full-time staff of libraries in 1962 was 2,962, almost one-quarter of whom were professional librarians.
