Annual Industry Report — Iron and Steel and Their Products Group

THE AUTOMOBILE PARTS INDUSTRY, 1946

The Automobile Parts Industry is a division of the iron and steel group and the statistics for the industry, as presented in this bulletin, cover only the factories which made metal parts and accessories as their chief products. Parts, such as tires, batteries, brake linings, etc., which were made in other industries are not covered by this report except in the supplementary summary of the total output of parts from all industries (Table 9). Other automobile materials, such as lacquers, upholstering, etc., are not mentioned at all as the Bureau has no separate record of the output of these articles for automobile use. Data given in Tables 1 to 8, therefore, refer only to the manufacture of auto parts of iron and steel, while Table 9 summarizes the total production of parts of all kinds as specified separately on the Census of Industry reports.

One hundred and twenty-four establishments were included in the Automobile Parts Industry in 1946,distributed by provinces as follows: Ontario 81; Quebec 14; British Columbia 10; Alberta 8; Manitoba 7; Saskatchewan 2; New Brunswick 1, and Nova Scotia 1. Production from these plants was valued at $93,428,899, a decrease of 26.1 per cent from the total of $126,562,829 in 1945.

In 1946 this industry afforded employment to a monthly average of 15,348 people who were paid $27,808,618 in salaries and wages, while in the previous year there were 17,390 workers with earnings of $33,115,867.

Among the products made by firms in this industry were: automobile engines, bodies, differentials, transmissions, radiators, spark plugs, self starters, axles, piston rings, wheels, laminated glass, trailers, springs, bumpers, tire valves, steering gears, hubs, lubricating systems, tire chains, etc. Many of these parts were made by only one or two plants in Canada, so production figures for such items cannot be published separately. Table 8 shows output figures in as much detail as is possible for this industry.

Total specified production of parts and accessories from all industries, including tires, batteries, radios, etc., amounted to $209,674,460 in 1946 compared with $244,523,854 in 1945. Details are listed in Table 9.

Table 1 - PRINCIPAL STATISTICS, 1936-1946

Year	Number of plants	Average number of employees	Salaries and wages	Cost of fuel and electricity at works	Cost of materials at works	Gross selling value of products at works
			$	$	$	$
1936	85	6,842	7,776,726	721,582	18,453,840	33,378,508
1937	88	8,416	10,358,098	849,963	26,631,014	46,631,643
1938	97	7,900	9,349,996	772,420	19,168,459	36,980,424
1939	97	8,119	9,846,641	798,947	19,714,235	38,711,807
1940	100	10,441	14,981,791	1,069,568	35,690,690	64,878,624
1941	102	16,138	25,764,272	1,534,124	73,307,685	124,386,867

Total	...	126,562,829	...	93,428,899

(x) Includes products reported by less than 3 firms, such as engines, pistons, differentials, transmissions, wheels, windshields, steering gears, clutches, generators, distributors, shock absorbers, etc.

(xx) Includes aircraft parts, iron castings, chain, etc.

NOTE: Data given in Table 8 are for the Automobile Parts Industry, which includes only the concerns that manufactured metal auto parts as their chief products. Figures for the individual items do not necessarily represent the total output for Canada as there may also have been an output by concerns classified to other industrial groups. For totals for Canada see Table 9.

Table 9 - PRODUCTION OF SPECIFIED AUTO PARTS AND ACCESSORIES, FROM ALL INDUSTRIES, 1945 and 1946

NOTE: Figures given in this table represent the total reported Canadian production of the commodities listed, regardless of the industry in which produced.
