PREFACE

Police statistics have been published by the Bureau since 1920 and in the past have included police administration, crime and traffic enforcement statistics.

The 1960 and future editions will be published in three separate reports: Police Administration Statistics, Crime Statistics, Traffic Enforcement Statistics.

This report contains Crime Statistics for 1960, as reported by the Police. Police Administration Statistics for 1960 have already been published and Traffic Enforcement Statistics will be published later.

As in the case of Police Administration Statistics, there has been a change in the format of the Crime Statistics publication with the grouping of urban areas by population size.

The data compiled herein were obtained from municipal police departments in urban centres of 750 population or more and from the Royal Canadian Mounted Police, the Ontario Provincial Police and Railway Police.

The Bureau gratefully acknowledges the invaluable assistance of all those individuals, agencies and police forces whose co-operation has made this report possible.

This report was prepared in the Judicial Section of the Bureau.

WALTER E. DUFFETT,
Dominion Statistician.

PRÉFACE

Le Bureau publie la statistique de la police depuis 1920 et, dans le passé, les données visaient l'administration de la police, la criminalité et l'application des règlements de la circulation.

A compter de 1960, trois rapports seront publiés: Statistique de l'administration de la police, Statistique de la criminalité et Statistique de l'application des règlements de la circulation.

Le présent rapport comprend la Statistique de la criminalité de 1960, telle qu'elle a été fournie par la police. La statistique de l'administration de la police pour 1960 a déjà paru et celle de l'Application des règlements de la circulation paraîtra plus tard.

Comme dans le cas de la Statistique de l'administration de la police, le format de la publication Statistique de la criminalité a dû être modifié en raison du groupement des régions urbaines suivant la taille de leur population.

Les chiffres du présent rapport proviennent des services de police municipaux des centres urbains de 750 habitants ou plus, ainsi que de la Gendarmerie royale, de la Police provinciale de l'Ontario et de la police ferroviaire.

Le Bureau remercie de leur concours les particuliers, les organismes et les services de police, dont la collaboration a rendu possible le présent rapport.

Le rapport a été rédigé à la Section de la statistique judiciaire du Bureau.

WALTER E. DUFFETT,
Statisticien du Dominion.

A/S – Arrested or summoned – Arrestations ou sommations

P – Prosecuted – Poursuites

INTRODUCTION

The report of Crime Statistics for the calendar year 1960 surveys the law enforcement aspects in relation to offences other than traffic as reported by the municipal police forces in urban communities, the Royal Canadian Mounted Police, the Ontario Provincial Police and the Railway Police. Crime Statistics of the Quebec Provincial Police are not reported but it is hoped they will be included in the near future.

Urban communities included in Tables 1 and 2 are:

(a) communities with a population size of 750 and over, including urban areas policed under contract by the RCMP and the OPP.

(b) communities with a population size of less than 750, policed under contract by the RCMP.

(c) townships, districts, district and rural municipalities, etc. policed under contract by the RCMP or the OPP.

A number of urban communities are excluded from this report because:

(a) community size was less than 750 although they have a police force.

(b) communities were without a police force although their population was more than 750.

(c) communities, while more than 750 population, were policed by the QPP as part of their regular duties.

There were 952 urban communities with a population of 750 and over exclusive of the RCMP, the OPP and the QPP when acting in their capacity as provincial and federal police forces.

Monthly reports were received from 767 departments representing 80.6% of potential contributors. There were 108 departments or 11.3% who submitted less than 12 monthly reports and 77 departments or 8.1% who did not report.

The grouping of communities following the pattern used in the Police Administration Statistics report, has been established on the basis of population size as indicated in the following table which also gives the number of urban communities within each group.

Le rapport statistique de l'année civile 1960 sur la criminalité étudie l'application des lois en fonction des infractions autres que les infractions aux lois de la circulation, telles qu'elles ont été signalées par les services de police des centres urbains, par la Gendarmerie royale, la Police provinciale de l'Ontario et la police ferroviaire. Les chiffres de la Sûreté provinciale du Québec ne paraissent pas, mais on espère les donner dans un avenir prochain.

Les centres urbains inclus aux tableaux 1 et 2 sont les suivants:

a) les centres de 750 habitants et plus, y compris les régions urbaines dont le service contractuel de police est assuré par la Gendarmerie royale et la Police provinciale de l'Ontario;

b) les centres de moins de 750 habitants, dont le service contractuel de police est assuré par la Gendarmerie royale;

c) les townships, cantons, districts, municipalités de district et rurales, etc., dont le service contractuel de police est assuré par la Gendarmerie royale ou la Police provinciale de l'Ontario.

Un certain nombre de centres urbains sont exclus du présent rapport parce que:

a) le centre compte moins de 750 habitants, bien qu'il ait un service de police;

b) le centre n'a pas de service de police, bien qu'il compte plus de 750 habitants;

c) le centre, tout en comptant plus de 750 habitants, est protégé par la Sûreté provinciale du Québec dont c'est une des fonctions régulières.

Il y avait 952 centres de 750 habitants et plus, sans compter les membres de la Sûreté provinciale du Québec, de la Police provinciale de l'Ontario et de la Gendarmerie royale lorsqu'ils remplissaient leurs fonctions à titre d'agents des services de police provinciaux et fédéraux.

Des rapports mensuels ont été reçus de 767 services de police représentant 80.6 p. 100 de tous les répondants possibles; 108 services ou 11.3 p. 100 ont envoyé moins de 12 rapports mensuels et 77 services ou 8.1 p. 100 n'ont pas fait de rapport.

Le groupement des collectivités comme il a été fait dans le rapport statistique de l'Administration de la police a été établi selon la population. (voir le tableau ci-dessous qui indique aussi le nombre des centres urbains de chaque groupe).

Group No.	Population	Number of urban communities
Group 1	100,000 and over	11
" 2	50,000 to 100,000	13
" 3	25,000 " 50,000	37
" 4	10,000 " 25,000	110
" 5	4,000 " 10,000	188
" 6	2,500 " 4,000	139
" 7	1,500 " 2,500	173
" 8	Under 1,500	281

Urban communities with a population under 4,000 (Groups 6, 7 and 8) are not listed by name but their crime statistics are included in bulk totals for selected offences. Where an urban community has no offence to report for certain categories, they are not listed.

The population figures in this report are taken from the 1956 census.

The Royal Canadian Mounted Police data are compiled and reported by that force according to its own statistical system. Differences in definitions are indicated in the footnotes to Table 4.

The data published in the tables of this report leave much to be desired in the way of completeness and uniformity. Variation in the data indicated that police departments are placing different interpretations on reporting instructions. This has resulted in a definite lack of uniformity in the data.

Following are examples of a few apparent inconsistencies:

1. Offences are reported as concluded where no offences were reported as known. Some of these may be accounted for by old crimes being concluded in the current year.

2. The proportions of concluded offences compared with offences known to the police varies widely. Some departments report offences as known but no information is reported on the conclusion of these offences; in others, all offences known are shown as concluded.

3. The number of prosecutions are reported instead of the number of persons prosecuted.

4. In a few instances there has been difficulty in the interpretation of terms in the French language version of the monthly return. In these cases, vol (theft) and vol qualifié (robbery) have apparently been confused as well as vol (theft) and viol (rape).

N° du groupe	Population	Nombre de centres urbains
Groupe 1	100,000 et plus	11
" 2	50,000 à 100,000	13
" 3	25,000 " 50,000	37
" 4	10,000 " 25,000	110
" 5	4,000 " 10,000	188
" 6	2,500 " 4,000	139
" 7	1,500 " 2,500	173
" 8	Moins de 1,500	281

Les centres urbains qui comptent moins de 4,000 habitants (groupes 6, 7 et 8) ne sont pas énumérés par leur nom mais leur statistique de la criminalité est incluse dans les totaux de certaines infractions. Lorsqu'un centre n'a pas d'infraction à déclarer dans une certaine catégorie, il n'est pas indiqué.

Les chiffres de la population dans le présent rapport sont tirés du recensement de 1956.

Les données de la Gendarmerie royale sont établies et déclarées par elle selon son propre système statistique. Les différences entre les définitions sont indiquées dans les renvois du tableau 4.

Les données des tableaux du présent rapport laissent beaucoup à désirer quant à l'intégralité et l'uniformité. Les divergences qu'elles reflètent indiquent que les services de police interprètent de façon différente les directives sur la façon de remplir les rapports. Aussi, les données manquent-elles nettement d'uniformité.

Voici quelques exemples d'inconsistances:

1. On a indiqué certaines infractions dans la colonne des causes réglées sans rien inscrire dans celle des infractions connues de la police. Cela peut s'expliquer par des crimes commis dans le passé, mais dont la cause est réglée durant la présente année.

2. L'écart entre les causes réglées et les infractions connues de la police varie considérablement. En certains cas, on déclare que des infractions sont connues, sans indiquer si ces causes ont été réglées; dans d'autres cas, on indique que toutes les infractions connues ont été réglées.

3. On a indiqué le nombre de poursuites intentées au lieu du nombre de personnes traduites en justice.

4. Dans quelques cas, on a eu de la difficulté à comprendre la signification des termes dans l'édition francaise du questionnaire mensuel. Il semble qu'on ait confondu vol et vol qualifié ou qu'on n'ait pas distingué entre vol et viol.
