INTRODUCTION

This report presents data on school attendance and level of schooling. The population five years and over is classified into two groups – those attending school on a full-time basis at any time between September 1970 and the census date, June 1, 1971; and those not attending full-time during this period. Each of these groups is further classified into categories to indicate level of schooling.

According to the 1971 Census definition, full-time attendance refers to persons who were taking 75 per cent or more of the normal course load of a grade or year in such institutions as elementary schools, secondary schools, universities, vocational and post-secondary non-university institutions such as technical institutes, teachers' colleges, community colleges, nursing schools, private business colleges, private or provincial trade or vocational schools, seminaries, and schools for the blind and deaf. Part-time attendance includes persons taking day or evening courses not on a full-time basis, but having an organized instructional purpose aimed at expanding knowledge or skills. In this bulletin, persons reported as having attended part-time are included with those not attending full-time.

Level of schooling refers to the highest grade or year of elementary school, secondary school or university ever attended and whether or not additional training in the form of vocational or post-secondary non-university was present. Those currently enrolled were asked to report their present grade or year. Elementary and secondary levels were reported by individual grades from kindergarten to Grade 13. Persons who received their education outside of Canada were asked to equate their level as nearly as possible to the grade system used in Canada.

Ce bulletin présente des données sur la fréquentation scolaire et le niveau de scolarité. La population de 5 ans et plus a été classée en deux groupes: les personnes qui fréquentaient l'école à plein temps à n'importe quel moment entre septembre 1970 et le 1er juin 1971, date du recensement, et celles qui ne fréquentaient pas l'école à plein temps au cours de cette période. Chacun de ces groupes a ensuite été classé en catégories d'après le niveau de scolarité.

Aux fins du recensement, la fréquentation scolaire est "à plein temps lorsqu'on suit 75 % ou plus des cours qui se donnent normalement au niveau où l'on est inscrit" dans des établissements comme les écoles primaires, les écoles secondaires, les universités, les établissements professionnels, postsecondaires non universitaires, tels que les instituts techniques, les écoles normales, les collèges communautaires, les écoles de sciences infirmières, les écoles commerciales privées, les écoles professionnelles ou les écoles de métiers privées ou provinciales, les séminaires et les écoles pour sourds et aveugles. La fréquentation est à temps partiel lorsqu'on suit des cours du jour ou du soir dont l'objet est l'élargissement des connaissances ou le développement des aptitudes. Dans ce bulletin, les personnes ayant déclaré avoir fréquenté l'école à temps partiel ont été comptées avec celles qui n'avaient pas fréquenté l'école à plein temps.

Le niveau de scolarité équivaut à "la dernière année d'études primaires, secondaires ou universitaires", que d'autre formation postsecondaire non universitaire ait été comprise ou non. Les personnes qui fréquentaient un établissement d'enseignement à la date du recensement devaient indiquer l'année où elles étaient inscrites. Les années du primaire et du secondaire ont été réparties de la maternelle à la 13e. Les personnes qui avaient fait leurs études en dehors du Canada devaient estimer le mieux possible le niveau de scolarité qu'elles avaient atteint.

Percentage Distribution of Population 5 Years and Over, Attending and Not Attending School Full-time, by Level of Schooling, for Canada and Provinces, 1971

Répartition en pourcentage de la population de 5 ans et plus fréquentant et ne fréquentant pas l'école à plein temps, selon le niveau de scolarité, Canada et provinces, 1971

1971 Census of Canada

—

Recensement du Canada de 1971

ERRATA

The following note should have been included at the beginning of this report:

Note: Where level of schooling is less than Grade 11, data shown for persons with vocational training also include those with post-secondary non-university training.

La note suivante aurait dû être incluse au début de ce bulletin:

Nota: Si le niveau de scolarité est moindre que la 11^{e} année, les données indiquées pour les personnes ayant une formation professionnelle comprennent aussi les personnes ayant une formation postsecondaire non universitaire.

c.2

Data on level of schooling and sex for 1971 are shown for Canada and the provinces in Table 36. More detailed data on the same topics by attendance status for 1971 are shown for Canada and the provinces in Table 37. The remaining tables provide similar data for other types of areas -- urban and rural, census divisions, municipalities of 10,000 population and over and census metropolitan areas. Table 42 provides a cross-classification of years of post-secondary non-university training and selected levels of schooling. Further classifications of school attendance and level of schooling by age groups and other characteristics will appear later in Reports 92-742 (1.5-2) and 92-743 (1.5-3).

Geographic terms used in this report are defined for census purposes as follows:

Urban: Includes the population living in: (1) incorporated cities, towns and villages with a population of 1,000 or over; (2) unincorporated places of 1,000 or over having a population density of at least 1,000 per square mile; (3) the built-up fringes of (1) and (2) having a minimum population of 1,000 and a density of at least 1,000 per square mile.

Rural: Includes all the remaining population.

Urban size groups: Municipalities classed as urban under (1) and (2) above are classified by size groups according to their population. However, any municipality or part of a municipality lying within the urbanized core (i.e., the central city together with its adjoining built-up area) of a census agglomeration is allocated to the size group of the entire urbanized core.

Rural farm population: Includes the population living in dwellings situated on farms in rural areas. A farm, for census purposes, is an agricultural holding of one or more acres with sales of agricultural products of $50 or more in the previous year. All persons living on such holdings in rural areas are classed as "rural farm" regardless of their occupation. Thus, the population living on "census-farms" would include some persons not connected with farming operations and who derive their income from non-agricultural pursuits. Conversely, it would exclude those farm operators and their families who do not live on their farm holdings (e.g., in a neighbouring town or village).

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100 p.c. basis. *The latter figures, of course, represent the official population counts (see Catalogue Nos. 92-704 to 92-707).*

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Similarly percentages, which are calculated on rounded figures, do not necessarily add to the total. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 92-713). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

On trouvera au tableau 36 des données sur le niveau de scolarité et le sexe pour 1971 (Canada et provinces). Le tableau 37 présente des données plus détaillées sur les mêmes sujets selon la fréquentation scolaire, pour 1971 (Canada et provinces). Les autres tableaux contiennent des données similaires pour d'autres catégories d'habitat -- régions urbaines, régions rurales, divisions de recensement, municipalités de 10,000 habitants et plus et régions métropolitaines de recensement. Le tableau 42 donne un classement recoupé des années de formation postsecondaire non universitaire et certains niveaux de scolarité. On trouvera d'autres classements de la fréquentation scolaire et du niveau de scolarité par groupe d'âge et selon diverses caractéristiques dans les bulletins nos 92-742 (1.5-2) et 92-743 (1.5-3).

Voici la définition, aux fins du recensement, des termes géographiques utilisés ici:

Régions urbaines: Comprend la population vivant dans: 1) les cités, villes et villages constitués de 1,000 habitants et plus, 2) les localités non constituées de 1,000 habitants et plus et ayant une densité de population d'au moins 1,000 habitants au mille carré; 3) les banlieues bâties de 1) et 2) ayant une population minimum de 1,000 habitants et une densité d'au moins 1,000 habitants au mille carré.

Régions rurales: Comprend tout le reste de la population.

Régions urbaines par groupe de taille: Chaque municipalité urbaine mentionnée à 1) et 2) ci-dessus est classée selon le groupe de taille de sa population. Toutefois, chaque municipalité (ou partie de municipalité) constituant le noyau urbanisé d'une région métropolitaine de recensement ou d'une autre agglomération de recensement est classée dans le groupe de taille de l'ensemble du noyau urbanisé.

Population rurale agricole: Comprend la population vivant dans des logements situés dans des fermes dans des régions rurales. Aux fins du recensement, une ferme est une exploitation agricole d'une acre ou plus ayant vendu pour $50 ou plus de produits agricoles au cours de l'année précédente. Toutes les personnes vivant dans une de ces exploitations situées dans une région rurale sont classées sous la rubrique "régions rurales agricoles", quelle que soit leur profession. La population des "fermes de recensement" comprend donc certaines personnes qui n'ont rien à voir avec l'exploitation agricole et qui tirent leur revenu de l'exercice d'activités non agricoles. En contrepartie, les exploitants agricoles et leur famille qui n'habitent pas leur exploitation agricole (par ex., ceux qui habitent une localité voisine) ne sont pas pris en compte.

Les renseignements de la présente publication ont été recueillis par un échantillonnage de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données avaient été recueillies à 100 p. 100. *Bien entendu, c'est ce dernier chiffre qui représente le dénombrement officiel de la population (voir les publications nos 92-704 à 92-707 au catalogue).*

Par souci de confidentialité, les chiffres de 1971 publiés ici ont été soumis à une formule qui garantit l'impossibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités, des tableaux (y compris tous les totaux) sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément au total. Aussi, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas disponibles au moment de la publication. Elles seront disponibles dans le rapport introductoire de ce volume (no 92-713 au catalogue). Les utilisateurs demandant ce renseignement avant la publication du rapport introductoire devraient s'adresser au Service-utilisateurs, Recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Division, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. A standard User's Request Form on which to outline precise tabulation requirements and to request time and cost estimates may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Division of Statistics Canada.

Publications du recensement du Canada de 1971

Le présent bulletin fait partie de la série des volumes des recensements de la population, du logement et de l'agriculture de 1971. Cette série compte au total environ 225 bulletins présentés de telle sorte qu'en retirant leur couverture l'utilisateur peut les réunir et constituer ainsi les 6 volumes de la série, qui comprennent 25 parties distinctes. Un auto-relieur à couverture rigide portant le titre approprié est compris dans le prix d'achat de la série complète des bulletins constituant une partie de volume.

Catalogue

On peut se procurer un catalogue qui décrit chaque bulletin de la série des volumes du recensement de 1971, ainsi que les bulletins des autres séries (série préliminaire, série des secteurs de recensement et série spéciale). Le catalogue contient également une liste de prix et une formule de commande. On peut obtenir un exemplaire de ce catalogue en s'adressant à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6. Pour tout renseignement complémentaire sur les publications du recensement, s'adresser à la Division de l'information de Statistique Canada.

Commandes de bulletins

Les commandes de bulletins peuvent être envoyées à la Distribution des publications, Statistique Canada, Ottawa K1A 0T6, ou à la Division de l'édition, Information Canada, Ottawa K1A 0S9. Toute commande doit être accompagnée d'un chèque ou d'un mandat établi à l'ordre du Receveur général du Canada. On peut aussi commander les publications du recensement aux librairies d'Information Canada de Halifax, de Montréal, d'Ottawa, de Toronto, de Winnipeg et de Vancouver. Pour plus de détails sur les comptes de dépôt, les commandes en gros, etc., s'adresser à la Distribution des publications, Statistique Canada.

Autres formes de publication

En plus des diverses publications contenant les résultats du recensement de 1971, de nombreux tableaux seront mis à la disposition des utilisateurs sous forme d'états mécanographiés. Ces tableaux seront également disponibles en microcopie. Les utilisateurs désireux de faire des analyses par des moyens mécanographiques pourront également se procurer un large éventail de tableaux statistiques sur bandes "sommaires". Pour tout renseignement sur le contenu, le prix et la disponibilité des résultats du recensement sur ces supports, s'adresser au Service-utilisateurs, Division du recensement, Statistique Canada, Ottawa K1A 0T7.

Totalisations spéciales

Dans la mesure où le respect du secret des données le permettra, Statistique Canada établira, à l'intention des utilisateurs qui en acquitteront les frais, des totalisations spéciales qui ne font pas encore partie du programme d'exploitation prévu. On peut obtenir auprès du Service-utilisateurs de la Division du recensement de Statistique Canada une formule normalisée sur laquelle l'utilisateur précisera ses besoins et demandera une estimation du délai et du prix.

Cartes et fichiers géographiques

Les utilisateurs pourront se procurer des cartes à grande échelle indiquant les limites des secteurs de dénombrement (c.-à-d. des territoires recensés par chaque représentant du recensement) ainsi que des cartes à petite échelle des divisions de recensement et des autres secteurs statistiques. Les documents constituant les fichiers géographiques (noms, codes, etc. géographiques) sont disponibles sous forme de tableaux présentant les différents secteurs de dénombrement qui constituent les unités administratives et statistiques (par ex., villes, villages, municipalités et secteurs de recensement). Pour plus de détails et pour une indication des frais, s'adresser au Service-utilisateurs de la Division du recensement de Statistique Canada.
