LIST OF PUBLICATIONS

PREPARED IN THE

MINING, METALLURGICAL AND CHEMICAL BRANCH
DOMINION BUREAU OF STATISTICS

STATISTICS OF MANUFACTURES—based chiefly on minerals.

General reports on the section of manufactures covered by the Mining, Metallurgical and Chemical Branch are issued as follows:—

Annual Printed Reports—

Iron and Steel and Their Products: Pig Iron and Ferro-Alloys—Steel and Rolled Products—Castings and Forgings—Boilers, Tanks and Engines—Agricultural Implements—Machinery—Automobiles—Auto Parts—Bicycles—Railway Rolling Stock—Wire and Wire Goods—Sheet Metal Products—Hardware and Tools—Miscellaneous Iron and Steel Products—Bridge Building and Structural Steel.

Manufactures of Non-Ferrous Metals: Aluminium Products—Brass and Copper Products—Lead, Tin and Zinc Products—Jewellery and Silverware—Electrical Apparatus and Supplies—Miscellaneous Non-Ferrous Metal Products—Non-Ferrous Smelting and Refining.

Manufactures of Non-Metallic Minerals: Aerated Waters—Asbestos Products—Cement—Cement Products—Coke and Gas—Glass (blown, cut, ornamental, etc.)—Lime—Petroleum Products—Products from Domestic Clays—Products from Imported Clays—Salt—Sand-Lime Brick—Dressed Stone—Artificial Abrasives and Abrasive Products—Miscellaneous Non-Metallic Mineral Products, including (*a*) Artificial Graphite and Electrodes, (*b*) Gypsum Products, (*c*) Mica Products, (*d*) Magnesite Products, (*e*) Non-Metallic Mineral Products, n.e.s.

Chemicals and Allied Products: Coal Tar Distillation—Acids, Alkalies and Salts—Compressed Gases—Explosives, Ammunition and Fireworks—Fertilizers—Medicinal and Pharmaceutical Preparations—Paints, Pigments and Varnishes—Soaps and Washing Compounds—Toilet Preparations—Inks—Adhesives—Polishes and Dressings—Flavouring Extracts—Wood Distillation—Miscellaneous Chemical Products, including (*a*) Baking Powder, (*b*) Boiler Compounds, (*c*) Celluloid Products, (*d*) Insecticides, (*e*) Sweeping compounds, (*f*) Disinfectants, (*g*) Matches, (*h*) Dyes and Colours, (*i*) Miscellaneous Chemical Products, n.e.s.

Annual Bulletins.—In addition to the foregoing printed reports, a series of bulletins is issued annually, each of which presents the principal statistics relative to production: (*a*) in a particular industry, e.g., Automobiles—Petroleum Products, etc., (*b*) in each of the four main groups of industries. These are published in mimeograph form from time to time during the year as the necessary material becomes available.

Monthly—

Production of Iron and Steel in Canada.
Coal and Coke Statistics for Canada.
Automobile Statistics for Canada.

Quarterly—

Analysis of the Radio Industry in Canada.

SPECIAL REPORTS—

Report on the Consumption of Prepared Non-Metallic Minerals in Canada.
Report on the Consumption of Mine and Mill Materials in Canada.
Report on the Consumption of Coke in Canada (annual).
The Fertilizer Trade in Canada (annual).

NOTES ON STATISTICS OF PRODUCTION

The Dominion Bureau of Statistics collects information on Canadian production annually. In the collection of these data, the Bureau makes a division between primary and secondary production. In the first-named class there are separate sections for the collection of statistics on (a) **Agricultural Products,** (b) **Furs,** (c) **Fish,** (d) **Forest Products,** (e) **Mineral Products.**

In the second are included (a) **Manufacturing** and (b) **Construction.**

Manufacturing is subdivided into nine groups of industries, producing concerns being classified according to the principal component material of their major products. For example, manufactures of leather goods are classified under "Animal Products"; the pulp and paper industry under "Wood and Paper," etc. An outline of the scheme of classification in use for manufacturing industries is given below:—

(1) **Vegetable Products,** including—Coffee and Spices; Cocoa and Chocolate; Preserved and Canned Products; Pickles, Vinegar and Cider; Flour and Cereals; Bread and other Bakery Products; Macaroni and Vermicelli; Distilled and Brewed Liquors and Wines; Rubber Products; Starch and Glucose; Sugar; Tobacco Products; Linseed Oil and Oil Cake.

(2) **Animal Products,** including—Fish and Fish Products; Dairy Factory Products; Meat and Meat Products; Leather and Leather Products; Furs and Fur Products.

(3) **Textiles and Textile Products,** including—Cotton Textiles (Cloth, Yarn, Thread and Waste); Woollen Textiles (Cloth, Yarn, Blankets, Felt and Waste); Silk Products; Factory-Made Clothing; Carpets, Rugs and Mats; Cordage, Rope and Twine.

(4) **Wood and Paper,** including—Pulp and Paper Mill Products, Paper Goods; Printing, Publishing and Lithographing; Saw and Planing Mill Products; Furniture; Carriages, Wagons and Sleighs; Wooden Containers; Woodenware; Turned Wood Products; and the Output of Similar Wood-Using Industries.

(5) **Iron and Steel and Their Products,** including—Pig Iron and Ferro-Alloys; Steel and Rolled Products; Castings and Forgings; Boilers, Tanks and Engines; Agricultural Implements; Machinery; Automobiles; Auto Parts and Accessories; Bicycles; Railway Rolling Stock; Wire and Wire Goods; Sheet Metal Products; Hardware and Tools; Miscellaneous Iron and Steel Products; Bridge Building and Structural Steel.

(6) **Manufactures of the Non-Ferrous Metals,** including—Aluminium Products; Brass and Copper Products; Lead, Tin and Zinc Products; Jewellery and Silverware; Electrical Apparatus and Supplies; Miscellaneous Non-Ferrous Metal Products; Non-Ferrous Smelting and Refining.

(7) **Manufactures of the Non-Metallic Minerals,** including—Aerated Waters; Asbestos Products; Cement; Cement Products, Coke and Gas; Glass (blown, cut, ornamental, etc.); Lime; Petroleum Products; Products from Domestic Clays; Products from Imported Clays; Salt; Sand-Lime Brick; Stone, Monumental and Ornamental; Artificial Abrasives and Abrasive Products; Miscellaneous Non-Metallic Mineral Products, including (a) Artificial Graphite and Electrodes, (b) Gypsum Products, (c) Mica Products, (d) Magnesite Products, (e) Miscellaneous Non-Metallic Mineral Products, n.e.s.

(8) **Chemicals and Allied Products,** including—Coal Tar Distillation; Acids, Alkalies and Salts; Compressed Gases, Explosives, Ammunition and Fireworks; Fertilizers; Medicinal and Pharmaceutical Preparations; Paints, Pigments and Varnishes; Soaps and Washing Compounds; Toilet Preparations; Inks, Adhesives; Polishes and Dressings; Flavouring Extracts; Wood Distillation; Miscellaneous Chemical Products including (a) Baking Powder, (b) Boiler Compounds, (c) Celluloid Products, (d) Insecticides, (e) Sweeping Compounds, (f) Disinfectants, (g) Matches, (h) Dyes and Colours, (i) Miscellaneous Chemical Products, n.e.s.

(9) **Miscellaneous Products,** including—Brooms and Brushes; Electric Light and Power; Musical Instruments, etc.

The statistics of manufactures are also classified according to the **use** or **purpose** of the end product as follows:—

(1) **Food,** including—Breadstuffs; Fish; Nuts; Fruits and Vegetables; Meats; Milk Products; Oils and Fats; Sugar; Infusions; Miscellaneous.

(2) **Drink and Tobacco,** including—Beverages, alcoholic; Beverages, non-alcoholic; Tobacco.

(3) **Clothing,** including—Boots and Shoes; Fur Goods; Garments and Personal Furnishings; Gloves and Mitts; Hats and Caps; Knitted Goods; Waterproofs; Miscellaneous.

(4) **Personal Utilities,** including—Jewellery and Time-Pieces; Recreational Supplies; Personal Utilities, n.e.s.

(5) **House Furnishings.**

(6) **Books and Stationery.**

(7) **Vehicles and Vessels.**

(8) **Producers' Materials,** including—Farm Materials; Manufacturers' Materials; Building Materials; General Materials.

(9) **Industrial Equipment,** including—Farming Equipment; Manufacturing Equipment; Trading Equipment; Service Equipment; Light, Heat and Power Equipment; General Equipment.

(10) **Miscellaneous.**

PREFACE

This edition of the Directory of Chemical Industries is the third of its kind which has been issued by the Dominion Bureau of Statistics, previous editions having been published in 1919 and 1921, respectively. The present volume brings the information up to date in order to meet the frequent requests that come to the Bureau for complete lists of producers of the many chemicals or chemical products which are manufactured in Canada. In addition, it is believed that a directory of this kind will be a very useful reference for manufacturers, importers and consumers of chemicals and chemical products.

In making up this directory the definition of the chemical industries has been broadly interpreted to include not only the actual manufacturers of chemicals but also those concerns which produce related products or employ chemical processes in their factory operations. The number of firms listed is in the neighbourhood of 1,350 and the number of individual plants represented is considerably more. Only actual producers in Canada are included.

The information as given herein has been taken chiefly from the Census of Industry reports for 1931, but in most cases supplementary details have been obtained from the producers.

Part One is an alphabetical list of manufacturers showing the head office addresses and plant locations and detailed lists of products as reported by the producing firms. Part Two is an alphabetical list of commodities with the names of the producers in each case. In this section only the Canadian head office address has been given.

Statistics of production, imports and exports have not been included in this survey as separate reports along this line are issued regularly by the Bureau and may be obtained on application. The notes on the preceding page indicate the scope of the production statistics as collected by the Bureau, and the summaries on the inside front and back covers detail the reports issued by the Mining, Metallurgical and Chemical Branch.

This volume has been prepared by Mr. H. McLeod, B.Sc., A.C.I.C., under the direction of Mr. W. H. Losee, B.Sc., F.C.I.C., Chief of the Mining, Metallurgical and Chemical Branch of the Bureau.

Directory of Chemical Industries

INTRODUCTION

Canada's chemical and allied industries annually produce commodities valued at about $750,000,000. The 1,600 individual plants that come in this category employ capital amounting to $1,400,000,000 and provide work to approximately 100,000 persons each year. Payments for salaries and wages amount to $130,000,000 annually.

In such an extensive group of industries a wide variety of products is manufactured and it is with the idea of furnishing definite information as to the nature and extent of manufacture of these commodities that the Bureau has prepared the present directory of chemical industries which for scope and style follows previous editions of this publication. Primarily the details have been taken from the returns which the producing companies filed with the Bureau under the Census of Industry for 1931, but in most cases supplementary data have been obtained from the reporting firms. The information, therefore, pertains to the early part of 1932 but every effort has been made to bring the records up to date to the time of going to press.

Many difficulties are met in preparing a directory of this nature. In the first place there is the difficulty of obtaining the essential details from *all* companies. For example, one company is content to list its products under the general heading of " dry colours," whereas another lists in detail the various dry colours which it manufactures. In so far as is possible these inconsistencies have been eliminated but the general result is that considerable valuable detail is lost in order to avoid grave inaccuracies in listing the producers under the individual items.

Secondly, there is the possibility that the names of some firms have been omitted or are erroneously listed. This will be chiefly due to changes which may have taken place since the material for the directory was collected. During the past year many factories have been forced to close or to suspend or curtail operations; still others have changed ownership; others have endeavoured to produce new commodities, seeking in this diversity of operations to provide employment for their staffs and so tide themselves over to better times.

Again, there is the fact that the records of the industrial census may not carry the names of all concerns who might be considered as manufacturers. There are many concerns, particularly in the medicinal and pharmaceutical group, who are licensed to manufacture in Canada but who actually have their goods made in the plant of another company which turns over to them the completed merchandise ready for sale. Many such companies will be omitted from this report as the Industrial Census is concerned only with actual production and does not ask for returns from those companies which do not operate factories.

For these reasons, it is freely admitted at the outset that there may be omissions or inaccuracies in some of the details given herein. However, every care has been exercised to insure accuracy and to bring the revisions up to date, and it is believed that, on the whole, any such errors will be of a minor nature.

Part One of the directory is an alphabetical list of producers, giving the head office addresses, plant locations and detailed lists of products as shown by the reporting firms. Part Two is an alphabetical list of commodities with the names of the producers in each case. In this section only the Canadian head office address is given. The commodity headings such as " leather, upper "—" paints, mixed," etc., correspond with the items as listed on the Census of Industry schedules and may not, in all cases, agree exactly with the listing given in Section One which is in more detail and in many cases taken from separate lists submitted by the producers. This section lists only the chemicals and chemical products which are actually made in Canada.

Statistics of production, imports and exports have been omitted as the Bureau issues separate reports in which this information is given in considerable detail. These publications may be obtained by writing directly to the Bureau.

MINERAL PRODUCTION (Mining and Metallurgy).

GENERAL REPORTS—

Preliminary Reports (semi-annual) on the Mineral Production of Canada.

Monthly Reports on Canada's Leading Mineral Products.

Annual Report on the Mineral Production of Canada. (In one volume).

A comprehensive record of the mining industry embodying historical and world data, detailed information on mineral production, imports and exports for Canada and general statistics relative to the mining industry on capital investment, employment, fuel consumption and power equipment, arranged in 10 chapters, each dealing with a particular branch of the industry. Statistics on production and trade in mineral products appear in detail in the appropriate chapters. A list of operating companies with their office and plant addresses is included. Fully indexed. Chapter titles are: Canada—The Gold Mining Industry—The Silver Mining Industry—The Nickel-Copper Industry—Miscellaneous Metal Mining Industries—The Non-Ferrous Smelting and Refining Industry—The Coal Mining, Coke, Natural Gas, Peat and Petroleum Industries—Non-Metal Mining Industries (Other than Fuels)—The Clay Products and Other Structural Materials Industries—Directory of Reporting Firms—Notes on the Methods of Computing Values—Index.

COAL—

Monthly and Quarterly Reports on Coal and Coke Statistics for Canada.

A condensed report on production, imports and exports of coal and coke is issued monthly, publication being made about the twentieth of the next following month.

A more general review is published quarterly, showing statistics for each month, for the quarter, and for the year to date on the output by coal-mining districts and by provinces, imports and exports by ports and by kinds of coal, employment in coal-mining, and tonnage lost. There is also a section on coke showing production, imports, exports, distribution and consumption by months and by provincial groups.

Annual Report on Coal Statistics for Canada.

Text and tables showing for Canada, and for each of the coal-producing provinces, historical and current data on output, tonnage lost, disposition of coal from the mines, domestic and foreign shipments, exports and imports by ports, consumption of coal, prices, employment, salaries and wages paid, power equipment, capital investment, etc.
