WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS
(1926=100)

Due to irregularly lower prices for gold stocks the general index for twenty-three mining issues received a set-back of over one point during the past week. The index was 156.8 for the week ending October 15 as compared with 157.9 for the week ending October 8. For the same period last year this index was 119.6.

The gold group lost ground for the third successive week, and the index is now back to early spring levels. It fell from 127.7 for the week of October 8 to 126.1 for the week of October 15 and was 106.8 for the week of October 17, 1935.

Optimism continued in the base metal issues and a further gain was registered for this group. The index rose from 282.7 for the week of October 8 to 283.6 for the week of October 15. The corresponding index last year was 172.6.

Listed below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks ending October 15 and 8, 1936, and October 17, 1935.
