WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS  
(1926=100)

Generally lower prices featured the mining stock market during the past week and the index series of mining issues receded from 168.2 for the week of December 3 to 164.4 for the following week. This index was 136.7 for the week of December 12, last year.

Unchanged at 133.0 for two weeks in succession, the gold index sustained quite a heavy loss, when it dropped to 129.9 for the week ending December 10. Leading the decline were Bralorne, Dome, Lake Shore, Macassa, McIntyre, Pioneer and San Antonio. The comparative index in 1935 was 118.2.

Base metals moved into higher ground in the final days of the week, but their gains failed to offset previous recessions and the index for this group fell from 313.6 for the week of December 3 to 306.9 for the week of December 10. The figure for the corresponding period last year was 211.7.

Appearing below is a table of average weekly prices, as compiled by the Dominion Bureau of Statistics for the weeks of December 3 and 10, 1936, and December 12, 1935.
