WEIGHTED PRICE INDEX NUMBERS OF 23 MINING STOCKS  
(1926=100)

The mining market milled about uncertainly during the past week, unable to make much headway but yielding little ground. As a result the general index for twenty-three mining stocks remained stationery at 157.0 for the week ending September 10. This index was 119.3 for the week ending September 12, 1935.

Several specialties in the gold group broke through to higher ground but losses among the senior issues held the index down. A fractional increase from 132.0 for the week ending September 3 to 132.1 for the week ending September 10 was recorded. This index was 110.5 for the same period last year.

Hudson Bay was responsible for the base metal index showing a decline from 260.9 for the week of September 3 to 260.5 for the week of September 10. The comparative index last year was 156.6.

Listed below is a table of average weekly prices as computed by the Dominion Bureau of Statistics for the weeks of September 10 and 3, 1936, and September 12, 1935.
