Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

Revisions

This release of monthly GDP by industry incorporates the revised 2002 and new 2003 input-output annual benchmarks, revised data sources and improved methodologies resulting in revisions to the monthly series back to January 2001.

Note to users

The monthly gross domestic product (GDP) by industry data are chained volume estimates with 1997 as their reference year. This means that the estimates for each industry and aggregate are obtained from a chained volume index multiplied by the industry's value added in 1997. For the period 1997 to 2003, the monthly estimates are benchmarked to annually chained Fisher volume indexes of GDP obtained from the constant-price input-output tables. For the period starting with January 2004, the estimates are derived by chaining a fixed-weight Laspeyres volume index to the prior period. The fixed weights are the industry output and input prices of 2003. This makes the monthly GDP by industry estimates more comparable with the expenditure-based GDP data, chained quarterly.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67), are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic price as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organization for Economic Co-operation and Development, United Nations and World Bank.

Highlights

July 2006

Economic activity increased 0.2% in July after remaining stable in June. Growth was registered in both goods and service industries. The energy, wholesale trade, retail trade and financial services sectors were especially robust. The construction and forestry sectors declined for a third consecutive month, while manufacturing output was essentially unchanged.

Production rises in energy sector

The energy sector grew 1.3% in July, its first gain since March. Despite the prolonged closure of some sites, oil extraction increased substantially on sites that were operating, both on the East Coast and in the oil sands. Pipeline transportation also posted strong growth. Natural gas production and transportation declined as a result of sizable reserves and weaker prices. For a second consecutive month, oil and gas exploration also recorded a sizable increase following two months of steep declines. Electricity production and natural gas distribution both grew, stimulated in part by increased demand for air conditioning.

The production of the mining sector excluding oil and natural gas advanced 2.4% on the strength of coal and potash, as an agreement was reached with China on potash exports.

Motor vehicle sales boost trade

Wholesale trade grew 1.0% in July. Sales of automotive products and of computers and electronic equipment contributed the most to this increase. On the other hand, reflecting the slowdown in the construction sector, wholesalers of metal, wood, and building products saw their activities slacken. Retail trade advanced 0.4%, benefiting from the return of some incentive programs for the purchase of new vehicles and an increase in used vehicle dealers' sales. Meanwhile, sales of clothing and accessory stores as well as home centres and hardware stores were down from the previous month.

Banking and brokerage activities advance

Activities in the finance and insurance sector grew by a hefty 0.8% in July. Brokerage activity increased due to the higher than normal volume of securities transactions. Banking activities also advanced. In the wake of the previous two months, real estate brokerage services lost ground in July (-1.4%), reflecting the slowdown observed in the existing home resale market.

Manufacturing activity remains stable

Activity in the manufacturing sector remained essentially the same as in June. This sector has been showing signs of weakness since the start of the year. Of the 21 major groups, 10 were up, accounting for 44% of total manufacturing output. The gains were mainly registered in the production of durables, led by machinery, wood and primary metal products manufacturing. The largest declines were recorded in the manufacturing of motor vehicles and parts as well as in plastics and rubber products.

Industrial production (the output of mines, utilities and factories) grew 0.5% in July, led by the strong advance of the mining and oil and gas extraction sector (+1.8%). In the United States, industrial production rose 0.4%, with manufacturing, mining and utilities all showing strength.

Construction sector posts a third monthly decline

For a third consecutive month, the construction sector declined in July (-0.2%), pulled down by a 1.1% drop in residential construction. The drop was especially steep in the construction of single-family homes, while that of apartment units continued to advance. Non-residential building construction fell 0.4%. The drop in the construction of industrial buildings was partly offset by the gain observed in the construction of commercial buildings. Engineering and repair works also advanced, tempering the declines.
