Ordering and subscription information

This product, catalogue no. 62-011-XIE, is published monthly in electronic format at a price of CAN\$19.00 per issue and CAN\$175.00 for a one-year subscription. To obtain a single issue or to subscribe, visit our website at www.statcan.ca, and select Our Products and Services.

This product is also available as a standard printed publication at a price of CAN\$24.00 per issue and CAN\$233.00 for a one-year subscription. The following additional shipping charges apply for delivery outside Canada:

| | Single issue | Annual subscription |
|------------------------|--------------|---------------------|
| United States | CAN\$6.00 | CAN\$72.00 |
| Other countries | CAN\$10.00 | CAN\$120.00 |

All prices exclude sales taxes.

The printed version of this publication can be ordered

- by phone (Canada and United States) 1 800 267-6677
- by fax (Canada and United States) 1 877 287-4369
- by e-mail infostats@statcan.ca

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136. The service standards are also published on www.statcan.ca under About Statistics Canada > Providing services to Canadians.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- ^p preliminary
- ^r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- ^E use with caution
- F too unreliable to be published

Note on Cansim

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

This publication was prepared under the direction of:

- **George Beelen**, Director, Prices Division
- **Fred Barzyk**, Chief, Producer Prices Section

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Highlights

Monthly prices for manufactured goods at the factory gate were up in September, as gasoline and fuel oil prices continued to rise. Raw materials prices were down in September, following three monthly increases.

Prices charged by manufacturers, as measured by the Industrial Product Price Index (IPPI), were up 0.4% from August to September. Higher prices for petroleum products, lumber products and chemical products were the contributors to this monthly increase.

Prices for manufactured goods increase again

The 12-month change in the IPPI was 0.6%, up from August's year-over-year decrease of 0.3% and largely due to the continuing rise of prices for petroleum products.

The Raw Materials Price Index (RMPI) was down 0.3% from August to September, following a 4.5% increase registered the previous month. There were price decreases in wood products, vegetable products and non-ferrous metals.

Compared to September of last year, raw materials cost factories 14.3% more, down slightly from the 12-month change of 14.6% in August.

In September, the IPPI (1997=100) stood at 111.6, up from August's level of 111.2. The RMPI (1997=100) reached 152.7, down from a revised level of 153.2 in August.

IPPI: Prices for petroleum products continue to rise

On a month-over-month basis, manufacturers' prices were up 0.4% as gasoline and fuel oil prices continued to rise.

Petroleum and coal products prices increased 8.3% compared to August, the eighth increase in the past nine months. If petroleum and coal product prices had been excluded, the IPPI would have decreased 0.4%, rather than increasing 0.4%.

Lumber and other wood products were up 2.8% as demand increased for softwood lumber and particleboard following hurricanes Katrina and Rita. Price increases were also registered for chemical products as prices for organic industrial chemical and synthetic resins were up 5.0% and 3.6% respectively.

However, prices for motor vehicles and other transport equipment and electrical and communication products decreased 1.5% and 0.9% respectively, due to the continuing strength of the Canadian dollar.

Primary metal products fell 2.5% as inventories were strong for nickel, copper and aluminum products. Prices for pulp and paper products were down 1.1% due to lower prices for pulp and newsprint paper. Meat, fish and dairy products also registered a decrease of 0.7% from the previous month.

IPPI: Petroleum and chemical products are the major factors in the 12-month change

On a 12-month basis, the IPPI was up 0.6% in September, following decreases of 0.3% in July and August.

Prices for petroleum and coal products rose 36.1% from September 2004, up from August's increase of 27.9%. If petroleum and coal product prices had been excluded, the IPPI would have decreased 2.4%, rather than increasing 0.6% from a year ago.

Chemical products increased 5.5%, due to higher prices for organic industrial chemicals and synthetic resins. Prices were also higher than one year ago for rubber, leather and plastic fabricated products, tobacco products, non-metallic mineral products, as well as furniture and fixtures.

On the other hand, motor vehicles and other transport equipment prices were down 5.9% from a year ago, the consequence of a stronger Canadian dollar.

Lumber and other wood products declined 14.9% from September 2004 to September 2005, as year-over-year price decreases were recorded for softwood lumber, particleboard and softwood type plywood.

There were also 12-month price declines for primary metals, pulp and paper products, electrical and communication products, meat, fish and dairy products as well as fruit, vegetable and feed products.

RMPI: Crude oil prices remain unchanged

On a monthly basis, raw materials prices fell 0.3% in September, following three monthly increases. Mineral fuels were unchanged compared to August. Crude oil prices had increased following hurricane Katrina, but as concerns about supply diminished, prices fell to remain unchanged from August.

Prices for wood products decreased 2.2% with lower prices for softwood logs and bolts being reported. Vegetable products were down 2.1% due to strong supply for canola and soybeans and lower demand for coffee. Prices for non-ferrous metals fell 1.7% mainly due to lower prices for copper, nickel and lead concentrates. Ferrous materials decreased 0.7% from the previous month as iron ore prices were down 2.2%.

However, prices for animal and animal products rose 1.3% compared to the previous month as increases were registered for whole fluid unprocessed milk and fish.

On a 12-month basis, the price of raw materials rose 14.3% in September, slightly lower than the 14.6% year-over-year increase observed in August. Mineral fuels were up 28.7% with crude oil prices rising 34.6%. If mineral fuels had been excluded, the RMPI would have decreased 0.2% instead of rising 14.3%.

Raw materials prices decline

Prices for non-ferrous metals rose 12.5%, mainly because of higher prices for radio-active concentrates, zinc concentrates and copper concentrates. Higher prices were also observed for animal and animal products and non-metallic mineral products.

Wood products were down 14.4% from a year ago with softwood logs and bolts prices declining 17.8%. Vegetable products decreased 6.3% from September 2004 as prices were down for canola, corn, barley, and wheat. Prices for ferrous materials also declined 3.5% compared to the previous year.

Impact of the exchange rate

Between August and September, the value of the Canadian dollar rose against the US dollar with an increase of 2.2%. As a result, if the impact of the exchange rate had been excluded, the IPPI would have risen 1.0% instead of its actual increase of 0.4%.

On a 12-month basis, the value of the Canadian dollar rose 9.4% against the US dollar. If the impact of the exchange rate had been excluded, producer prices would have risen 3.0% between September 2004 and September 2005, rather than their actual increase of 0.6%.

Prices for intermediate goods increase

Prices for intermediate goods increased 0.6% from August. Higher prices for petroleum products, chemical products and lumber products were the major contributors to the increase.

Lower prices for primary metals, pulp and paper products, motor vehicles, meat, fish and dairy products, fruit, vegetable and feed products as well as electrical and communication products partially offset the monthly increase.

Producers of intermediate goods received 0.6% more for their goods in September 2005 than in September 2004. Higher prices were registered for petroleum products, chemical products, rubber, leather and plastic fabricated products, non-metallic mineral products, machinery and equipment, and beverages.

These increases were partly offset by lower prices for lumber products, primary metals, pulp and paper products, motor vehicles, fruit, vegetable and feed products, meat, fish and dairy products and electrical and communication products.

Finished goods prices increase

On a monthly basis, prices for finished goods were up 0.2% from August. Higher prices for petroleum and lumber products were partially offset by lower prices for motor vehicles, electrical and communication products, and non-metallic mineral products.

Compared with September 2004, prices for finished goods were up by 0.6%. Higher prices for petroleum products, tobacco products, chemical products, rubber, leather and plastic fabricated products, fruit, vegetable and feed products, and furniture and fixtures were the major contributors to the annual increase.

Lower prices for motor vehicles, electrical and communication products, and lumber products partly offset the annual increase.

Note to readers

The **Industrial Product Price Index (IPPI)** reflects the prices that producers in Canada receive as the goods leave the plant gate. It does not reflect what the consumer pays. Unlike the Consumer Price Index, the IPPI excludes indirect taxes and all the costs that occur between the time a good leaves the plant and the time the final user takes possession of it, including the transportation, wholesale, and retail costs.

Canadian producers export many goods. They often quote their prices in foreign currencies, particularly for motor vehicles, pulp, paper, and wood products. Therefore, a rise or fall in the value of the Canadian dollar against its U.S. counterpart affects the IPPI.

The **Raw Materials Price Index (RMPI)** reflects the prices paid by Canadian manufacturers for key raw materials. Many of these prices are set in a world market. Unlike the IPPI, the RMPI includes goods not produced in Canada.

Text Table I

Industrial Product Price Indexes, by Stage of Processing (1997=100), Percentage Change From the Same Month a Year Earlier

| | Jan. | Feb. | March | April | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Annual average |

Note: Indexes for the most recent six months shown are subject to revision.

- The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM series number (v nnnnnn) and a numeric descriptor. The numeric descriptor is of the order ss-mm-nn-pppp-rr where
 - ss indicates the S-level commodity code (from 9 to 28)
 - mm indicates the M-level commodity code (from 14 to 43, 45 to 69)
 - nn indicates the M-level commodity split, or 91, which indicates a special aggregation or 99, which indicates special details
 - pppp indicates the PCGA code (except for some special aggregations which include several PCGAs)
 - rr indicates a split of a PCGA.

Note: Indexes for the most recent six months shown are subject to revision.

1. The aggregation of indexes by commodity or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
2. The numeric code to the right of the CANSIM series number on the last line of each series is the 1997 North American Industry Classification System (NAICS) code.

Explanation of methods used and additional sources for industrial price indexes

Industrial Product Price Indexes (1997=100)

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 980 Principal Commodity Group Aggregates (PCGA) outputs as defined in the 1997 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in Statistics Canada's *The Daily* (Catalogue 11-001-XIE) following a pre-announced schedule of release dates. Simultaneously, all the indexes become available on CANSIM in Tables 329-0038 to 329-0049 or by request.

Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 9,000 prices are collected monthly from about 3,000 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure. Important producers are «must take» respondents. A random selection is taken from the smaller producers. These samples are redrawn on a regular cycle as dictated by changes in the market. A directly surveyed elemental index is usually supported by 12 to 15 price quotes. An index may be derived from as few as 8 quotes or as many as 30 quotes.

About 700 of the 980 PCGAs in the manufacturing sector are accommodated by direct survey and these account for about 90% of the value of manufacturing output in 1997.

The price movement for the other PCGAs is estimated indirectly from either directly priced PCGAs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the «Make» matrix of the 1997 Input/Output table which, in turn, is derived from 1997 values reported for the Survey of Manufacturers and edited to conform to the 1997 North American Industry Classification System. However, each December, company/product weights within a commodity index can be changed in order to reflect important changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Historical Data

Historical series on the 1997 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1997 North American Industry Classification System (NAICS) and for commodity indexes classified under the Principal Commodity Group Aggregates (PCGA) classification. The historical series were obtained by linking together movements from the 1997-based Industrial Product Price Indexes (IPPI) series and the corresponding 1992-based Industrial Product Price Indexes (IPPI) series, using 1997 as the linking period. A set of concordance tables between both sets of IPPI series are available to the public.

Reference Documents

62-558-XPB Industry Price Indexes, 1986=100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns (1986) for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556-XPB Industrial Product Price Indexes, 1981=100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures. A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9606, facsimile (613) 951-1539, Internet address infounit@statcan.ca.

Raw materials price indexes (1997 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example, wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1997 time base, are published monthly in Statistics Canada's The Daily approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in Table 330-0006.

Historical Data

The new historical series were obtained by linking together movements from the 1997-based Raw Material Price Indexes (RMPI) series and the corresponding 1992-based Raw Material Price Indexes (RMPI) series, using the year 1997 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both sets of RMPI series are available to the public.

Coverage

The index covers purchases of imported and domestically produced goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not

available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weight Base

Weights were derived from the 1997 Input/Output tables which provide values at purchasers' prices of commodities purchased as intermediate inputs.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Formula

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in 1997;

$P_{t/o}^i$ is the price index for element i , meaning its price change from the base period o to time t ;

\sum_i indicates summation over all elements i in the defined aggregate.

Electric Power Selling Price Indexes, Non-residential, (1997=100)

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 kW and for sales of 5000 kW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1997 as a time reference base and the weights used are 1992 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described in the explanation of methods used for the Industrial Product Price Indexes, 1997=100. The indexes are available on CANSIM in Table 329-0050. Indexes for the current year and the previous year are subject to revision.
