Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbol

The following standard symbols are used in this Statistics Canada publication:

Notes

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, i.e. an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, and from January 1995, Austria, Finland and Sweden.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995, the Czech Republic; from May 1996, Hungary; from November 1996, Poland; from December 1996, Republic of Korea; from January 2001, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.
- This publication was prepared by:

John Côté, Don Granger, Barry Mersereau, Carole Parent, Frédéric Potvin, Robert Théberge, Catherine Boies, and Art Ridgeway.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in *System of National Accounts, 1993*, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

ABOUT THE FIGURES

The series on international security transactions cover portfolio transactions in stocks, bonds and Canadian money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;
- foreign money market securities because their measurement is largely through foreign banking data whose level of detail precludes a separate specification.

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks and bonds is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue nos. 67-506-XPE or 67-506-XIE).

Canada's international transactions in securities

February 2003

Foreign holdings of Canadian securities rose in February for the first time in three months, mainly the result of large foreign purchases of existing Canadian federal bonds. In contrast, there was a small divestment by Canadian investors in foreign equities because of weak demand by mutual funds and other institutional investors.

Substantial foreign investment in Canadian federal bonds

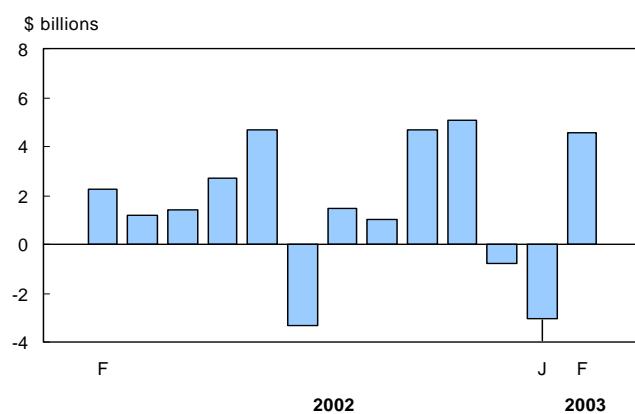

Foreign investors increased their holdings of Canadian bonds by \$5.0 billion in February, reversing most of the \$6.1 billion divestment of the previous two months. The principal driver was \$5.4 billion in foreign purchases of existing federal issues, an amount similar to that of October 2002. The purchases were directed to a broad range of maturities spanning 2 to 11 years.

Coinciding with this surge in investment was a stronger Canadian dollar relative to most major currencies and a widening gap between Canadian and US long-term interest rates in favour of investment in Canada (see box on related market information).

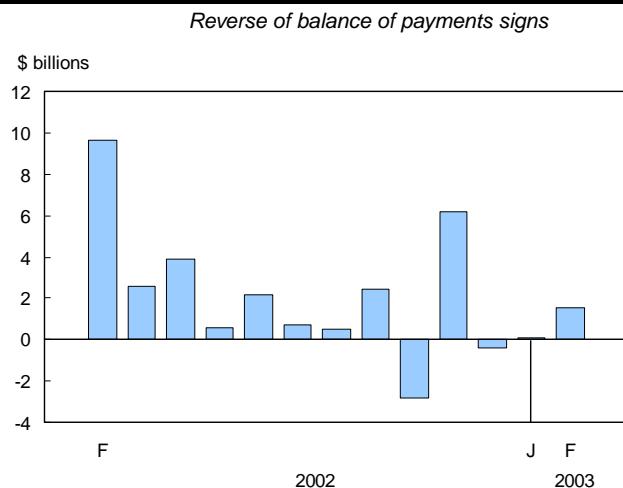

There were \$5.3 billion worth of new Canadian bond issues sold in foreign markets in February, a sharp turnaround from the two-year low in January. Retirements of Canadian bonds held outside the country remained high at \$5.6 billion in February. Overall, investment in February came mainly from American investors.

Chart 1

Foreign investment in Canadian securities¹

¹Includes bonds, stocks and money market paper.

Chart 2**Canadian investment in foreign securities¹**

¹Includes bonds, and stocks.

After adding \$4.6 billion to their holdings of Canadian money market paper in the previous four months, foreign investors reduced their holdings by \$1.2 billion in February. This divestment, which was solely in US holdings, was spread over federal T-bills and provincial and federal government enterprise paper. The gap between Canadian and US short-term interest rates continued to grow in favour of investment in Canada, rising to 171 basis points at the end of February from 166 at the end of January.

Foreign investors make a modest investment in Canadian stocks

Foreign investors made a \$0.8 billion investment in Canadian stocks in February. From November 2002 to February 2003, foreign investors increased their holdings of Canadian stocks by \$2.0 billion, roughly split between purchases of existing shares and new share offerings in foreign markets. For a third consecutive month, Canadian stock prices (S&P/TSX composite index) showed little change, after recording a sharp 5.1% rise in November 2002.

Canadian investors purchase foreign bonds but sell foreign stocks

Canadian investors purchased \$1.7 billion worth of foreign bonds, bringing to \$2.4 billion their investment in the first two months of 2003. February's investment was split between US treasuries and US corporate bonds.

In contrast, Canadian investors reduced their holdings of foreign stocks by \$0.7 billion in the first two months of 2003, a period when investment is usually quite substantial. The average investment in the first two months of the year from 2000 to 2002 was \$7.8 billion. Contributing to the lack of foreign equity investment are mutual funds, which have seen net sales of foreign equity funds turn negative over the first two months of 2003, something not seen in a number of years.

Related market information

Interest Rates

In February, the gap between Canadian and US short-term interest rates continued to grow, rising to 171 basis points from 166 in January. Canadian rates rose 5 basis points to 2.88% compared with no change in US rates, which remained at 1.17% in February.

For long-term rates, the gap in favour of Canada likewise grew in February to 115 basis points from 96 in January. Rates of both countries fell in February, 9 basis points in Canada versus 28 basis points in the United States.

Stock Prices

For the third consecutive month, Canadian stock prices (S&P/TSX composite index) were flat recording only a 0.2% decline in February. Since the sharp 5.1% run-up in November 2002, the index was changed little, closing February 2003 at the same level as November 2002.

By comparison, American stock prices (Standard & Poor's composite 500 index) after posting a similar gain in November 2002 (+5.7%), have recorded three consecutive declines totalling 10.2% in December through February.

Canadian dollar

The Canadian dollar continued the sharp climb it started in January of this year, adding a further one and two-thirds cents in February against the US dollar. This brought to a full four cents the gain over the first two months of 2003. February's closing of US 67.39 cents is the highest since August 2000.

Definitions

The data series on international security transactions cover portfolio transactions in stocks and bonds (both Canadian and foreign issues) and Canadian money market instruments (or paper).

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less. **Government of Canada paper** includes treasury bills and US-dollar Canada bills. **Other money market instruments** includes treasury bills and other paper issued by other Canadian governments or their enterprises, bankers' acceptances, bearer demand notes of banks, commercial paper and other short-term paper.

Balance of Payments Division List of Publications

Canada's Balance of International Payments

(the First quarter 1997 issue provides comprehensive historical coverage from 1926 to 1996) - presents Canada's economic transactions with non-residents under two main accounts: the current account which covers goods, services, investment income and current transfers; and the capital and finance account which covers capital transfers as well as both borrowings from and investments in foreign countries. The transactions are presented quarterly and annually with six broad geographical areas.

67-001-XPB

Canada's International Transactions in Securities

presents Canada's portfolio transactions in Canadian and foreign bonds and stocks and in Canadian money market securities with non-residents. New issues, retirements and trade in outstanding securities are covered as well as repurchase agreements. Monthly gross and net transactions are presented geographically according to six broad geographical areas.

67-002-XIE

67-002-XIF

Canada's International Investment Position

(the 1996 issue provides comprehensive historical data from 1926 to 1996) - presents Canada's asset position with and liability position to non-residents, including a detailed breakdown by claims (direct investment by country, portfolio, etc.) and by six broad geographical areas. The data include the foreign holding of Canada's public debt.

67-202-XPB

Canada's International Transactions in Services

presents Canada's annual service transactions with non-residents. Travel, transportation, commercial services and government services which are presented by three broad geographical areas: United States, European Union and other countries. Commercial services are further categorized by industry; country of control (Canada, United States, Other); whether the service is with foreign affiliated companies or non-affiliates; and with a detailed country breakdown for commercial services.

67-203-XPB
