Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses and governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the Statistics Act
- e use with caution
- f too unreliable to be published

Notes

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, and from January 1995, Austria, Finland and Sweden.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995, the Czech Republic; from May 1996, Hungary; from November 1996, Poland; from December 1996, Republic of Korea; from January 2001, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.
- This publication was prepared by:

John Côté, Don Granger, Barry Mersereau, Carole Parent, Stavros Iliadis, Robert Théberge, Catherine Boies, and Art Ridgeway.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in *System of National Accounts, 1993*, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and Canadian money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;
- foreign money market securities because their measurement is largely through foreign banking data whose level of detail precludes a separate specification.

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to non-residents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks and bonds is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue nos. 67-506-XPE or 67-506-XIE).

Canada's international transactions in securities

February 2004

In February, foreign investors reduced their holdings of Canadian securities by \$7.6 billion, which more than reversed the large increase in January. The foreign divestiture was the largest in two and a half years with three-quarters related to the sale of debt securities.

Meanwhile, Canadian investors increased their holdings of foreign securities, adding bonds through secondary market transactions and stocks via a corporate takeover.

Foreign investment declines for both Canadian bonds and money market paper

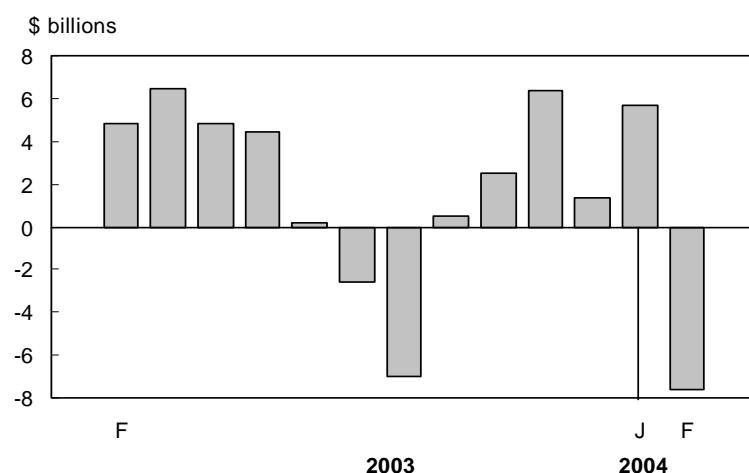

Foreign investors reduced their holdings of Canadian bonds by \$4.2 billion in February, after an increase of \$4.5 billion in January. The reversal was concentrated in existing federal bonds. The value of new bonds issued in foreign markets was low for the second consecutive month and offset by an equal amount of retirements of foreign-held Canadian bonds.

On a currency basis, foreign investors reduced their holdings of Canadian-dollar denominated bonds in February by \$4.7 billion, reversing much of the \$5.9 billion purchased in January. Foreign investors purchased a small amount (\$0.5 billion) of bonds denominated in US dollars. This occurred at a time when the Canadian dollar retreated two and a quarter US cents over the first two months of 2004.

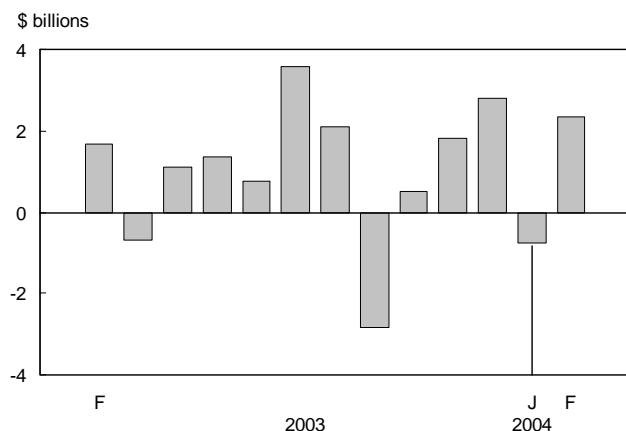

Foreign holdings of Canadian money market paper fell for a second consecutive month, down \$1.6 billion in February, bringing the two-month decline to \$3.0 billion. The reductions in February were concentrated in federal paper, both Government of Canada treasury bills and paper issued by federal enterprises. In February, the gap between Canadian and US short-term interest rates narrowed a further 17 basis points to 1.20%, its lowest value since October 2002. Still favouring investment in Canada, the gap peaked at 215 basis points in June 2003, but

Chart 1

declined steadily through to the end of February.

Foreign investment in Canadian stocks declines because of a foreign takeover

Foreign investors saw their holdings of Canadian shares decline by \$1.8 billion in February, the first reduction in almost a year. The reduction in Canadian stocks was dominated by the foreign takeover of a Canadian company whose foreign portfolio shareholders exchanged their Canadian shares for foreign shares. This more than offset continued foreign buying of \$1.3 billion of secondary market shares. Foreign investors have been steady buyers of existing Canadian shares totalling \$11.8 billion since April 2003. This occurred against a backdrop of rising stock prices; Canadian stock prices recorded their second strong gain of 2004 adding 3.1% in February to the 3.7% gain in January.

Canadian investors add to their holdings of both foreign bonds and stocks

Canadian investors added a further \$1.3 billion to their holdings of foreign bonds in February following a small addition in January. This investment was spread evenly over US treasuries, other US bonds, and overseas bonds.

As part of the takeover mentioned earlier, Canadian investors received shares in a foreign company in payment for their shares in the acquired Canadian company. These transactions were the principal cause of the rise in Canadian holdings of foreign shares in February.

Revised estimates for Canadian money market

With this release, the monthly series covering Canadian money market transactions and positions with non-residents have been revised back to January 2003. However, this scheduled revision included changes that resulted from the introduction of a new approach to measuring these transactions: it aligns the short-term side with the instrument-by-instrument basis used for long-term debt instruments. In the coming months, the new system will produce increased detail on the Canadian money market (i.e., by currency of instrument) and also estimates for foreign money market paper owned by Canadians.

Related market information**Interest Rates**

In February, the gap between Canadian and US short-term interest rates narrowed by 17 basis points to 1.20%, its lowest value since October 2002. Continuing to favour investment in Canada, the gap that peaked at 215 basis points in June 2003 has been on a steady decline through February. Over this eight-month period since July 2003, Canadian rates have fallen nearly a full percent (94 basis points) while American rates continue to hover closely around their historical low at the 90 basis-point level.

The spread between Canadian and American long-term interest rates, which also favour investment in Canada, held at 39 basis points for the third consecutive month. A 25 basis-point decline in Canadian rates in the first two months of 2004 has been matched by a similar decline in US rates.

Stock Prices

Canadian stock prices recorded their second strong gain of 2004 in February, adding 3.1% to the 3.7% gained in January. After recording higher monthly closes in 10 of the last 11 months dating back to March 2003, Canadian stock prices are up 38.5% over this period. The S&P/TSX composite index at 8,788.5 at the end of February 2004 was at a level not witnessed since January 2001.

American stock prices posted smaller gains of 1.2% in February and 1.7% in January. The performance of the Standard & Poor's composite 500 index in the past year has also been impressive, advancing in 11 of the past 12 months for a gain of 36.1% since February 2003. The index at 1,144.9 in February 2004 was at a closing level not seen since March 2002.

Canadian dollar

The Canadian dollar, after closing at a 10-year high against the US dollar at the end of 2003, has retreated somewhat, declining 2.26 US cents in the first two months of 2004. The decline brought the Canadian dollar to a February close of 74.87 US cents.

Definitions

The data series on international security transactions cover portfolio transactions in stocks and bonds (both Canadian and foreign issues) and Canadian money market instruments.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less. **Government of Canada paper** includes treasury bills and US-dollar Canada bills. **Other money market instruments** include treasury bills and other paper issued by other Canadian governments or their enterprises, bankers' acceptances, bearer demand notes of banks, commercial paper and other short-term paper.

1 Inclusive of new issues, retirements, trade in outstanding and change in interest payable. For Money Market, change in interest payable is included from Jan. 2003

2. Transactions in foreign money market securities are not available.

Note: Throughout tables 1-14 a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada.

Table 2
Portfolio Transactions with Non-residents in Canadian Bonds, by Sector and Type of Transaction

Balance of Payments Division List of Publications

Canada's Balance of International Payments

(the First quarter 1997 issue provides comprehensive historical coverage from 1926 to 1996) - presents Canada's economic transactions with non-residents under two main accounts: the current account which covers goods, services, investment income and current transfers; and the capital and finance account which covers capital transfers as well as both borrowings from and investments in foreign countries. The transactions are presented quarterly and annually with six broad geographical areas.

67-001-XPB
67-001-XIB

Canada's International Transactions in Securities

presents Canada's portfolio transactions in Canadian and foreign bonds and stocks and in Canadian money market securities with non-residents. New issues, retirements and trade in outstanding securities are covered as well as repurchase agreements. Monthly gross and net transactions are presented geographically according to six broad geographical areas.

67-002-XIE
67-002-XIF

Canada's International Investment Position

(the 1996 issue provides comprehensive historical data from 1926 to 1996) - presents Canada's asset position with and liability position to non-residents, including a detailed breakdown by claims (direct investment by country, portfolio, etc.) and by six broad geographical areas. The data include the foreign holding of Canada's public debt.

67-202-XIE
67-202-XIF

Canada's International Trade in Services

presents Canada's annual service transactions with non-residents. Travel, transportation, commercial services and government services which are presented by three broad geographical areas: United States, European Union and other countries. Commercial services are further categorized by industry; country of control (Canada, United States, Other); whether the service is with foreign affiliated companies or non-affiliates; and with a detailed country breakdown for commercial services.

67-203-XIB
