Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0^s value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- p preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Throughout this report:

- totals may not add due to rounding;
- a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada;
- Other EU Countries include: Belgium, Denmark, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Spain, from January 1995, Austria, Finland and Sweden; from May 2004, Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, the Slovak Republic and Slovenia.
- Other OECD Countries include: Australia, Iceland, New Zealand, Norway, Switzerland, Turkey; from July 1994, Mexico; from December 1995 up to April 2004, the Czech Republic; from May 1996 up to April 2004, Hungary; from November 1996 up to April 2004, Poland; from December 1996, Republic of Korea; from January 2001 up to April 2004, the Slovak Republic; up to December 1994, Austria, Finland and Sweden.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Forward

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue nos. 67-506-X).

Highlights

- Canadian investors acquired a robust \$5.4 billion of foreign securities in June. This was a return to the pattern of strong acquisitions over the early part of the year after a relatively small purchase in May. Meanwhile, following nine months of continuous buying, foreign investors reduced their holdings of Canadian securities by \$2.1 billion in June.

Analysis — June 2005

Canadian investors acquired a robust \$5.4 billion of foreign securities in June. This was a return to the pattern of strong acquisitions over the early part of the year after a relatively small purchase in May.

Meanwhile, following nine months of continuous buying, foreign investors reduced their holdings of Canadian securities by \$2.1 billion in June.

Chart 1

Canadian portfolio investment in foreign securities¹

1. Reverse of balance of payments signs.

Canadian investors substantially increase their holdings of foreign securities

After a relatively quiet May in which Canadian investors purchased only \$373 million in foreign securities, they bought \$5.4 billion worth in June. Investment was spread across all classes of securities with foreign bonds receiving the most at \$2.3 billion. More than three-quarters of the investment in foreign bonds went into US treasuries with the rest going into overseas bonds.

Canadians also continued to invest in foreign stocks (\$1.5 billion), exclusively in US equities, purchasing \$1.9 billion worth while divesting some of their holdings in overseas stocks. The increase in US equity holdings was partly due to a foreign takeover of a domestic company where Canadian investors received shares in the foreign company in payment for their shares in the acquired Canadian company. Meanwhile, purchases of foreign money market paper reached a record high of \$1.7 billion. Nearly half of the investment went into overseas paper with the rest being split among US treasury bills and other US paper.

Related market information

US short-term **interest rates** increased yet again in June, rising to 2.97% from 2.84% the month before. Meanwhile, Canadian short-term rates remained relatively steady increasing only 2 basis points to 2.48%. The resulting differential increased to 49 basis points, the highest level favouring investment in the United States over Canada since November 2000.

Both Canadian and US long-term interest rates fell in June by 21 and 9 basis points respectively. Canadian rates fell to 3.81% with US rates falling to 3.99%. Continuing to favour investment in the United States, the resulting differential increased to 18 basis points.

Canadian **stock prices** increased for the second consecutive month with the S&P/TSX Composite Index rising 3.1%, ending June at 9,902.8. Since the beginning of the year, the S&P/TSX Composite Index has risen more than 7.0% while US stock prices have fallen by nearly 2%. US stock prices were flat in June with the Standard and Poor's Composite Index ending the month at 1,191.3.

The **Canadian dollar** rose almost 2 US cents in June closing the month off at 81.61 US cents. However, it is still down from last year's close of 83.19 US cents.

Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments (both Canadian and foreign issues).

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to maturity of more than one year.

Money market instruments have an original term to maturity of one year or less.

Over the second quarter, Canadians have purchased \$9.1 billion in foreign securities, the highest level on a quarterly basis in over three years. Furthermore, in the year thus far, Canadian investors have bought \$16.0 billion worth in foreign securities compared to \$7.1 billion over the same period last year and \$18.5 billion for 2004 overall. As announced in the federal budget in February, foreign content limits in tax-deferred Canadian investment vehicles have been eliminated.

Foreign investors reduce their holdings of Canadian debt

After purchasing the largest amount in Canadian bonds thus far in the year in May (\$2.6 billion), foreign investors reduced their holdings in June. Over the month, non-resident holdings of Canadian bonds fell by \$1.2 billion, the largest divestment in the sector since February 2004.

Foreign divestment in Canadian bonds was wholly concentrated in federal government bonds as all other sectors experienced an increase in holdings. Non-residents saw their holdings of federal government bonds decline by \$2.2 billion, the fifth straight month of reductions in the sector. However, whereas in previous months foreign holdings fell because of sales in outstanding issues, June's reduction in the sector was entirely due to retirements.

During the second quarter of this year, foreign investors have purchased \$1.2 billion in Canadian bonds, substantially less than purchases made over the same period in previous years. Over the year thus far, foreign investors have acquired only \$1.9 billion in Canadian bonds, compared to purchases of \$16.1 billion in 2003 and \$6.7 billion in 2004 over the same period. While most sectors have experienced an increase in holdings, foreign holdings of federal government bonds have declined by \$4.7 billion since the beginning of the year. Over the same period, long-term interest rates in Canada have dipped below those in the United States for the first time in over four years while the Canadian dollar fell by 1.59 US cents.

Meanwhile, foreign investors sold off \$410 million in Canadian money market paper after buying \$1.1 billion in May. Sales were primarily concentrated in federal treasury bills in which non-residents sold off \$684 million worth, the largest divestment in that sector in almost a year. Investors out of the United Kingdom and Asia were the principal sellers of Canadian paper over the month.

Despite June's divestment, foreign investors increased their overall holdings of Canadian money market paper over the second quarter of 2005, purchasing \$1.0 billion worth and partially offsetting the \$1.9 billion sold off over the first quarter of 2005. Investment over the second quarter was entirely in federal direct (\$209 million) and federal enterprise paper (\$1.1 billion) with the bulk of the acquisitions coming out of Europe.

Non-residents sell off Canadian equities for second consecutive month

Foreign investors continued to decrease their holdings of Canadian equities in June, selling off \$447 million worth. For the fourth consecutive month foreign investors sold outstanding shares, selling another \$151 million in June. An additional \$296 million was also divested through other transactions, due mainly to another foreign takeover of a Canadian company whose foreign (as well as Canadian) portfolio shareholders exchanged their Canadian shares for cash. Overall, investors out of the United Kingdom did the majority of the selling of Canadian shares in June.

During the quarter, foreign investors reduced their holdings of Canadian equities by \$2.5 billion, the first quarterly divestment since the first quarter of 2003. Sales occurred entirely in secondary issues with holdings reduced across a broad range of industrial sectors.

1. Inclusive of new issues, retirements, trade in outstanding and change in interest payable or receivable.

2. Transactions in foreign money market securities are available from 2002 onwards.

Note: Throughout tables 1-14 a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada.

Table 2-1

Portfolio transactions with non-residents in Canadian bonds, by type of transaction and sector — Federal government
