Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

The System of National Accounts

In Canada, the National Accounts have been developed since the close of the Second World War in a series of publications relating to their constituent parts. These have now reached a stage of evolution where they can be termed a "System of National Accounts". For purposes of identification, all publications (containing tables of statistics, descriptions of conceptual frameworks and descriptions of sources and methods) which make up this System carry the term "System of National Accounts" as a general title.

The System of National Accounts in Canada consists of several parts. The annual and quarterly Income and Expenditure Accounts (included with Catalogue Nos. carrying the prefix 13) were, historically speaking, the first set of statistics to be referred to with the title "National Accounts" (National Accounts, Income and Expenditure). The Balance of International Payments data (Catalogue Nos. with prefix 67) are also part of the System of National Accounts and they, in fact, pre-date the Income and Expenditure Accounts.

Greatly expanded structural detail on industries and on goods and services is portrayed in the Input-Output Tables of the System (Catalogue Nos. with prefix 15). The Catalogue Nos. carrying the prefix 15 also provide measures of the contribution of each industry to total Gross Domestic Product at basic prices as well as Productivity Measures.

Both the Input-Output tables and the estimates of Gross Domestic Product by Industry use the establishment as the primary unit of industrial production. Measures of financial transactions are provided by the Financial Flow Accounts (Catalogue Nos. with prefix 13). Types of lenders and financial instruments are the primary detail in these statistics and the legal entity is the main unit of classification of transactors. Balance sheets of outstanding assets and liabilities are published annually.

The System of National Accounts provides an overall conceptually integrated framework in which the various parts can be considered as interrelated sub-systems. At present, direct comparisons amongst those parts which use the establishment as the basic unit and those which use the legal entity can be carried out only at highly aggregated levels of data. However, Statistics Canada is continuing research on enterprise company establishment relationships; it may eventually be feasible to reclassify the data which are on one basis (say the establishment basis) to correspond to the units employed on another (the company or the enterprise basis).

In its broad outline, the Canadian System of National Accounts bears a close relationship to the international standard as described in System of National Accounts, 1993, a joint publication of the Commission of the European Communities, International Monetary Fund, Organisation for Economic Co-operation and Development, United Nations and World Bank.

Foreword

About the figures

The series on international security transactions cover portfolio transactions in stocks, bonds and money market securities between non-residents and residents of Canada. The series include trade in outstanding issues, new issues, retirements, and change in interest payable and are further segmented by issuing sector and major geographic area. The principle guiding their construction is that a change of ownership occurs between residents of a foreign country and Canada. These series form an integral part of Canada's balance of payments. Certain types of security transactions, which are excluded from this publication, are classified to other balance of payments series as follows:

- security transactions representing direct investment capital by principal owners of an enterprise, e.g. parent companies subscribing to new stocks;
- foreign securities held as part of Canada's official international reserves or by Canadian banks for their own account;

Security transactions are recorded before charges for fees and commissions. The value used is the transaction price and the timing of a transaction's recording is generally the delivery or settlement date.

The quality of foreign portfolio investment data in Canadian stocks, bonds and money market paper is good. The flows are reported on a monthly survey sent to the major investment dealers, pension funds, and the largest debt issuing institutions such as the provinces and their enterprises. Historically, the response rate has been well over 90%. A considerable effort is made to identify the various sectors and institutions which issue securities to nonresidents; the data may, at times, be revised when new transactors are identified or information becomes available through annual surveys. The coverage is validated against administrative data and the annual census survey of foreign holdings of Canadian portfolio investments.

The quality of estimates of Canadian investment in foreign stocks, bonds, and money market paper is not as good as it is difficult to identify all Canadian residents making portfolio investments abroad. A considerable effort is made to identify the various Canadian institutions which invest in foreign securities and survey them on a monthly basis however individuals in the personal sector using foreign investment firms are harder to identify thereby weakening the estimates. The quality of the data has improved significantly with a series of annual surveys on Canadian portfolio investment abroad that began at year-end 1997. The inaugural survey was carried out as part of an international effort to improve data on external portfolio investment. Fully 35 countries participated in the portfolio survey, co-ordinated by the International Monetary Fund.

For transactions in outstanding securities, the data are largely derived from a monthly survey of investment dealers and of other financial institutions such as mutual funds, pension funds and trust companies which regularly buy or sell securities directly through dealers or brokers outside Canada. The data for new issues and retirements are obtained from survey and non-survey sources such as prospectuses, summaries prepared by dealers and other institutions, press reports, etc.

For a fuller description of the sources and methods employed in the construction of these series, please refer to the free publication Canada's Balance of International Payments and International Investment Position - Concepts, Sources, Methods and Products (Catalogue no. 67-506-X).

Highlights

- Canadians acquired \$4.0 billion worth of foreign securities in June, continuing a trend of heavy purchases for a 17th consecutive month. Meanwhile, foreign purchases of Canadian securities declined to a nominal \$343 million in June.

Analysis - June 2006

For a 17th consecutive month, Canadian investors continued their heavy acquisitions of foreign securities, purchasing \$4.0 billion in June. Meanwhile, foreign purchases of Canadian securities declined substantially from \$5.9 billion in May to a nominal \$343 million in June.

Chart 1
Canadian portfolio investment in foreign securities¹

1. Reverse of balance of payments signs.

Canadians make record purchases of foreign bonds

Canadian investors surpassed the record set in March by acquiring a further \$5.6 billion worth of foreign bonds in June. Buying has been strong in 15 of the past 20 months, bringing the total investment over that time to \$56.5 billion.

June's record was a result of continuous heavy purchases with sales toned down. Acquisitions were equally split between US bonds and overseas bonds; the Canadian investment in overseas bonds was an all time high.

Related market information

In June, Canadian short-term **interest rates** climbed 14 basis points to 4.43%, the highest over the past five years. Meanwhile, US short-term rates only edged up 7 basis points to 4.79%, further narrowing the differential between the two countries to 0.47%.

After a 7 basis points decrease in May, Canadian long-term rates regained 18 basis points to 4.63% in June. US long-term rates increased 13 basis points to 5.25%. The differential between Canada and US long-term rates decreased to 0.62%, favouring investment in the United States.

Canadian **stock prices** declined for the second straight month. June ended with the S&P/TSX composite index falling 1.1% to 11,612.9. Following a 3.1% decrease in May, US stock prices remained virtually unchanged in June with the Standard and Poor's Composite Index settling at 1,270.2.

After hitting a 28-year high in May, the **Canadian dollar** retreated 1.20 US cents in June. The dollar closed June at 89.6 US cents.

Definitions

The data series on international security transactions cover portfolio transactions in stocks, bonds and money market instruments for both Canadian and foreign issues.

Stocks include common and preferred equities, as well as warrants.

Debt securities include bonds and money market instruments.

Bonds have an original term to mature of more than one year.

Money market instruments have an original term to maturity of one year or less.

Meanwhile, Canadian investors sold \$864 million of foreign money market paper in June, the highest sell-off since August 2005. This was largely driven by a divestment of \$1.0 billion in non-US paper. Moreover, the selling of \$244 million of US treasury bills was offset by the purchase of \$389 million in US corporate paper.

Sell-off of non-US shares reverses the investment trend in foreign equities

Canadian investors switched to sell \$702 million worth of foreign equities in June. This reversed a trend of net buying over the past 16 months to a peak of \$5.9 billion in May.

June's deviation from the past investment trend resulted from sales of \$2.6 billion in non-US shares. Nevertheless, acquisitions remained strong in US shares in June, totalling \$1.9 billion.

Non-resident purchases of Canadian equities cool off

Following strong purchases of Canadian equities since January 2006, non-residents decreased their holdings by divesting \$846 million worth in June.

Foreign investors paused from the heavy acquisitions of outstanding Canadian shares that they had been making in consecutive months for almost a year. June's sell-off amounted to \$1.1 billion. Overall, investors from other European Union countries alone sold \$2.4 billion worth. Purchases by US residents declined by almost three-quarters to \$938 million in June, followed by purchases of \$691 million by residents of the United Kingdom.

Foreign investors turn to short-term Canadian paper

Non-residents bought a record \$4.5 billion of Canadian money market paper in June. The acquisitions were concentrated in paper issued by the federal government and their enterprises, amounting to a 10-year high of \$4.1 billion. Heavy purchases of provincial government paper added another half a billion into non-resident portfolios.

American and British residents led the investment in Canadian short-term paper, acquiring \$3.8 billion and \$1.1 billion respectively. Purchases by US residents were the second highest on record while purchases by United Kingdom residents hit the highest point since April 2002.

Foreign holdings of Canadian bonds dipped by \$3.3 billion, due mainly to a \$3.7 billion sell-off of federal government issues. Non-residents did acquire \$1.6 billion of federal enterprise bonds which was largely offset by the selling of provincial and corporate issues.

On a currency basis, the foreign divestment was roughly split between Canadian bonds denominated in Canadian dollars and those in US dollars. Against this, non-residents acquired \$1.7 billion of bonds denominated in other foreign currencies. Geographically, dispositions of Canadian bonds were concentrated in the United States as well as in emerging economies. In contrast, European investors acquired \$2.6 billion in Canadian bonds.

1. Inclusive of new issues, retirements, trade in outstanding and change in interest payable or receivable.

2. Transactions in foreign money market securities are available from 2002 onwards.

Note: Throughout tables 1-14 a minus sign indicates the purchase of securities from non-residents, that is an outflow of capital from Canada.

Table 2-1
Portfolio transactions with non-residents in Canadian bonds, by type of transaction and sector — Federal government
