Ci-inclus, supplément de "L'Indice de  
l'offre d'emploi, 1981-1996"

## Data in many forms

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on the Internet, compact disc, diskette, computer printouts, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

## How to obtain more information

Inquiries about this publication and related statistics or services should be directed to: Analysis and Dissemination Section, Labour Division, Statistics Canada, Ottawa, Ontario, K1A 0T6, telephone: (613) 951-4090, fax: (613) 951-4087 or by Internet: [labour@statcan.ca](mailto:labour@statcan.ca) or to the Statistics Canada Regional Reference Centre in:

Halifax	(902) 426-5331	Regina	(306) 780-5405
Montreal	(514) 283-5725	Edmonton	(403) 495-3027

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

## Des données sous plusieurs formes

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur Internet, disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiologique et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de la présente publication ou au sujet de statistiques ou de services connexes doit être adressée à: Section de l'analyse et de la diffusion, Division du travail, Statistique Canada, Ottawa, Ontario, K1A 0T6, téléphone: (613) 951-4090, télécopieur (613) 951-4087 ou par Internet: [labour@statcan.ca](mailto:labour@statcan.ca) ou à l'un des centres de consultation régionaux de Statistique Canada:

Halifax	(902) 426-5331	Régina	(306) 780-5405
Montréal	(514) 283-5725	Edmonton	(403) 495-3027
Ottawa	(613) 951-8116	Calgary	(403) 292-6717
Toronto	(416) 973-6586	Vancouver	(604) 666-3691
Winnipeg	(204) 983-4020		

Vous pouvez également visiter notre site sur le Web:  
<http://www.statcan.ca>

Un service d'appel interurbain sans frais est offert à **tous les utilisateurs qui habitent à l'extérieur des zones de communication locale** des centres de consultation régionaux.

## Note of Appreciation

Canada owes the success of its statistical system to a long-  
standing co-operation involving Statistics Canada, the citizens of  
Canada, its businesses, governments and other institutions.  
Accurate and timely statistical information could not be produced  
without their continued co-operation and goodwill.

## Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien  
établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes  
et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de  
produire des statistiques précises et actuelles.

## Access data in spreadsheet format:

The data contained in the electronic version can also be imported into a spreadsheet format using comma delimited ASCII files. During the installation of this electronic product, the data files (ASCII) were loaded for the survey of **Employment, Payrolls and Hours** and for the **Help-Wanted Index in the directory C:\LABOUR**. These ASCII files are identified with the extension PRN.

## Employment, Payrolls and Hours tables:

The file names are constructed using the table number format from this publication followed by the geographic abbreviation. These ASCII files contain data from 1983 to 1996.

Example: Table 1 for Manitoba: TAB1\_MB.PRN

## Help-Wanted Index:

The data for this program are contained in the file HWI.PRN.

### Geographic abbreviations

CA = Canada  
 F = Newfoundland  
E = Prince Edward Island  
NS = Nova Scotia  
PQ = Quebec  
ON = Ontario

MB = Manitoba  
SK = Saskatchewan  
AB = Alberta  
BC = British Columbia  
YT = Yukon  
NT = Northwest Territories

## Comment accéder aux données dans un chiffrier électronique:

La version électronique de cette publication vous permet d'importer les données dans un chiffrier électronique en utilisant des fichiers ASCII (délimités par des virgules). Ces fichiers (ASCII) ont été copiés sur votre disque dur lors de l'installation de ce produit dans le répertoire **C:\LABOUR pour l'Enquête sur l'emploi, la rémunération et les heures et pour l'Indice de l'offre d'emploi**. Les fichiers ASCII sont identifiables à l'extension PRN.

## L'Emploi, la rémunération et les heures:

Les données sont classées selon le numéro de tableau relatif à cette publication suivi de l'abréviation géographique. Ces fichiers (ASCII) comprennent des données à partir de 1983 à 1996.

Exemple: Tableau 1 pour le Manitoba : TAB1\_MB.PRN

## L'indice de l'offre d'emploi:

Les estimations de ce programme se trouvent dans le fichier HWI.PRN.

### Abréviations géographiques

CA = Canada  
 = Terre-Neuve  
Î = Île du Prince-Édouard  
NS = Nouvelle-Écosse  
PQ = Québec  
ON = Ontario

MB = Manitoba  
SK = Saskatchewan  
AB = Alberta  
BC = Colombie-Britannique  
YT = Yukon  
NT = Territoires du Nord-Ouest

# Table 1

# Tableau 1

Estimates of Employment, for All Employees, by Industry, Canada, Provinces and Territories.

Estimations de l'emploi, pour l'ensemble des salariés, par industrie, Canada, provinces et territoires.

Led by the construction industry, employment growth rates in 1996 were highest in the Yukon (+10.7%) and Prince Edward Island (+6.5%).

Menés par l'industrie de la construction, les taux de croissance de l'emploi en 1996 étaient plus élevés au Yukon (+10,7 %) et à l'Île-du-Prince-Édouard (+6,5 %).

## Table 2

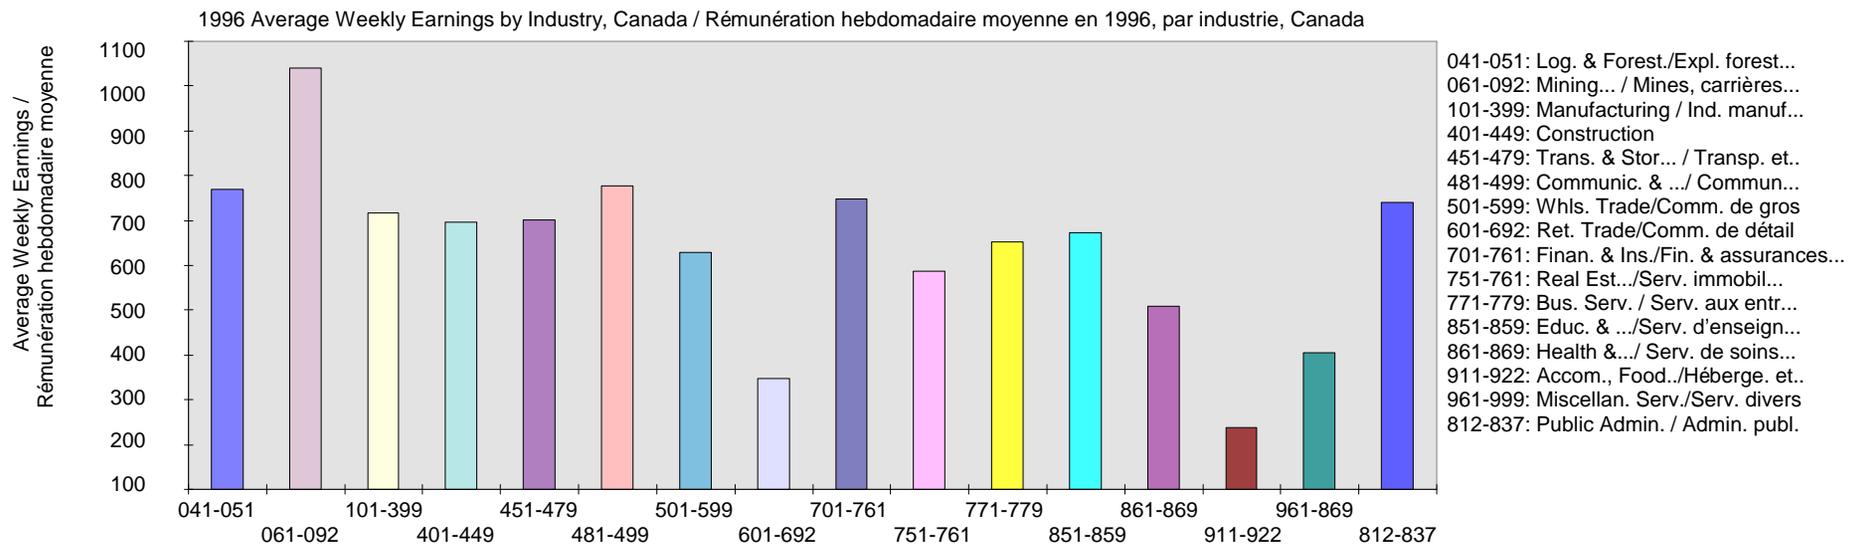

## Tableau 2

**Estimates of Average Weekly Earnings (including overtime), for All Employees, by Industry, Canada, Provinces and Territories.**

**In 1996, employees in Finance and Insurance registered the highest growth rate (+7.8%) for average weekly earnings while employees in Mining, Quarrying & Oil Wells continued to earn the highest weekly earnings in terms of levels.**

**Estimations de la rémunération hebdomadaire moyenne (incluant le temps supplémentaire), pour l'ensemble des salariés, par industrie, Canada, provinces et territoires.**

**En 1996, les salariés dans l'industrie des intermédiaires financiers et assurances ont démontré le plus haut taux de croissance (+7,8%) de la rémunération hebdomadaire moyenne. Par contre, la rémunération hebdomadaire moyenne des salariés dans les mines, carrières et puits de pétrole est demeurée la plus élevée.**

## Table 3A

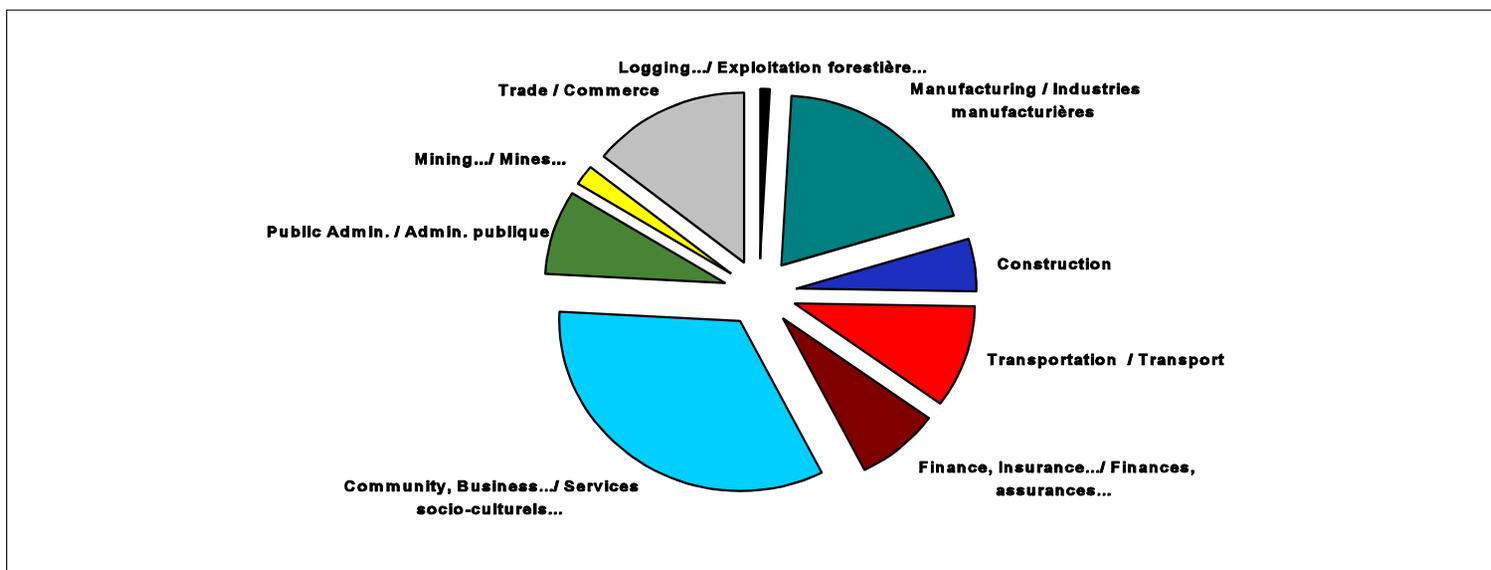

## Tableau 3A

Estimates of Total Weekly Payrolls, for All Employees, for Selected Industries, Canada, Provinces and Territories.

At the Canada level for 1996, total weekly payrolls grew slightly in all major economic sectors except Public Administration and Transportation, Storage, Communication and Other Utilities.

Estimations de la rémunération hebdomadaire brute, pour l'ensemble des salariés, pour une sélection d'industries, Canada, provinces et territoires.

En 1996, au niveau du Canada, la rémunération hebdomadaire brute a augmenté légèrement dans tous les secteurs économiques majeurs sauf pour l'administration publique et le transport, l'entreposage, les communications et les autres services publics.

## Table 4

## Tableau 4

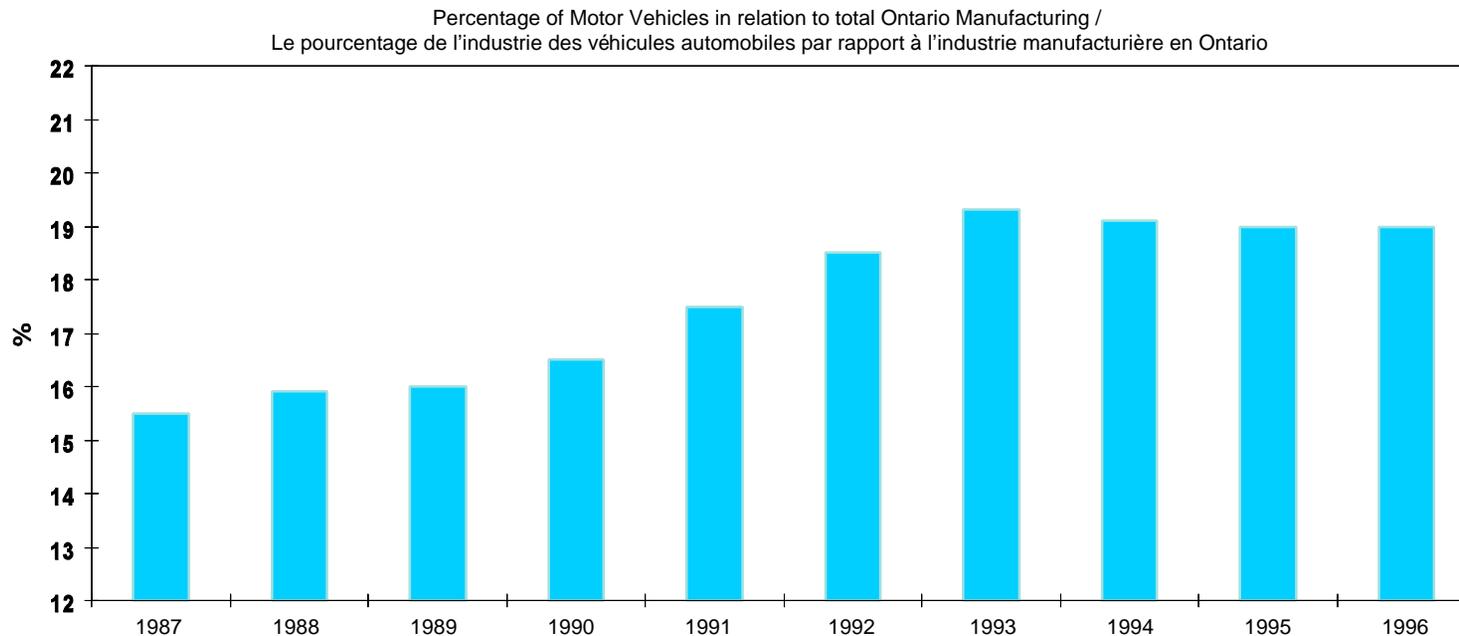

---

Estimates of Employment, for Employees paid by the Hour, by Industry, Canada, Provinces and Territories.

In Ontario, the percentage of hourly paid employees in the Motor Vehicle industry, in relation to total manufacturing, increased and remained high in the '90's.

Estimations de l'emploi, pour les salariés rémunérés à l'heure, par industrie, Canada, provinces et territoires.

Durant les années 90, le pourcentage des salariés rémunérés à l'heure en Ontario, dans l'industrie des véhicules automobiles a augmenté et est demeuré élevé par rapport à l'ensemble des industries manufacturières.

Annual Estimates of Employment, Earnings and Hours, 1984-1996, Statistics Canada  
Estimations annuelles de l'Emploi, des gains et de la durée du travail, 1984-1996, Statistique Canada

## Table 5

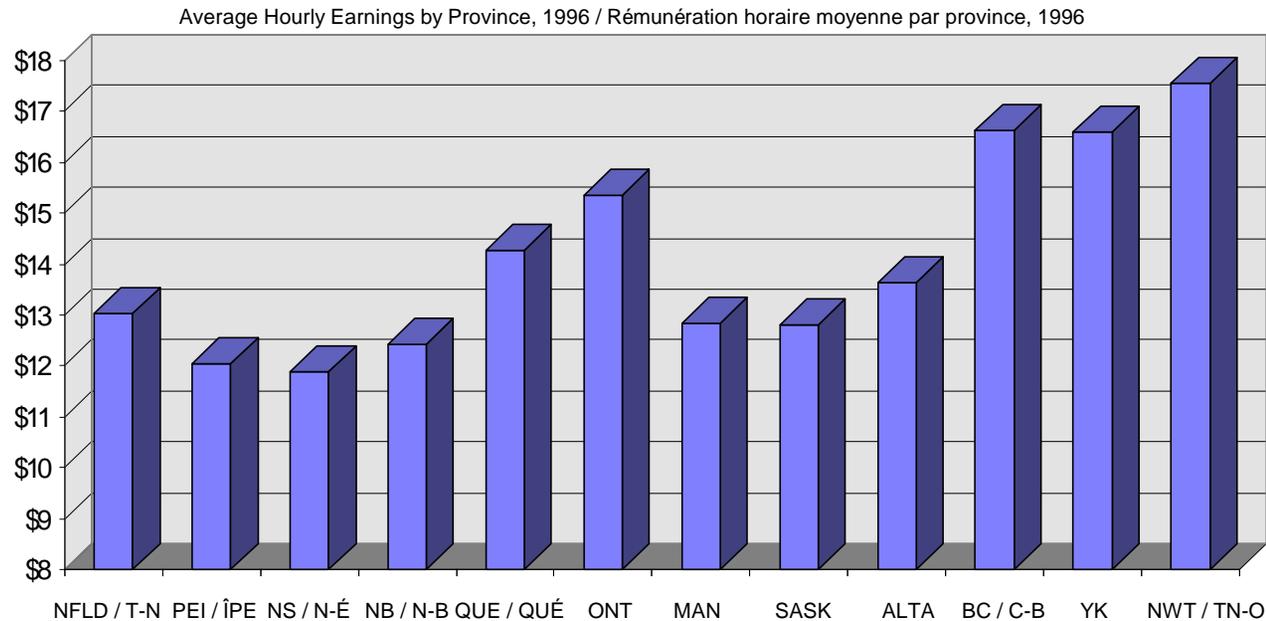

## Tableau 5

Estimates of Average Hourly Earnings, for Employees paid by the Hour, by Industry, Canada, Provinces and Territories.

Estimations de la rémunération horaire moyenne, pour les salariés rémunérés à l'heure, par industrie, Canada, provinces et territoires.

For the provinces, 1996 average hourly earnings for employees paid by the hour is still highest in the Northwest Territories.

En 1996, la rémunération horaire moyenne pour les salariés rémunérés à l'heure est demeurée la plus élevée dans les Territoires du Nord-Ouest.

## Table 6

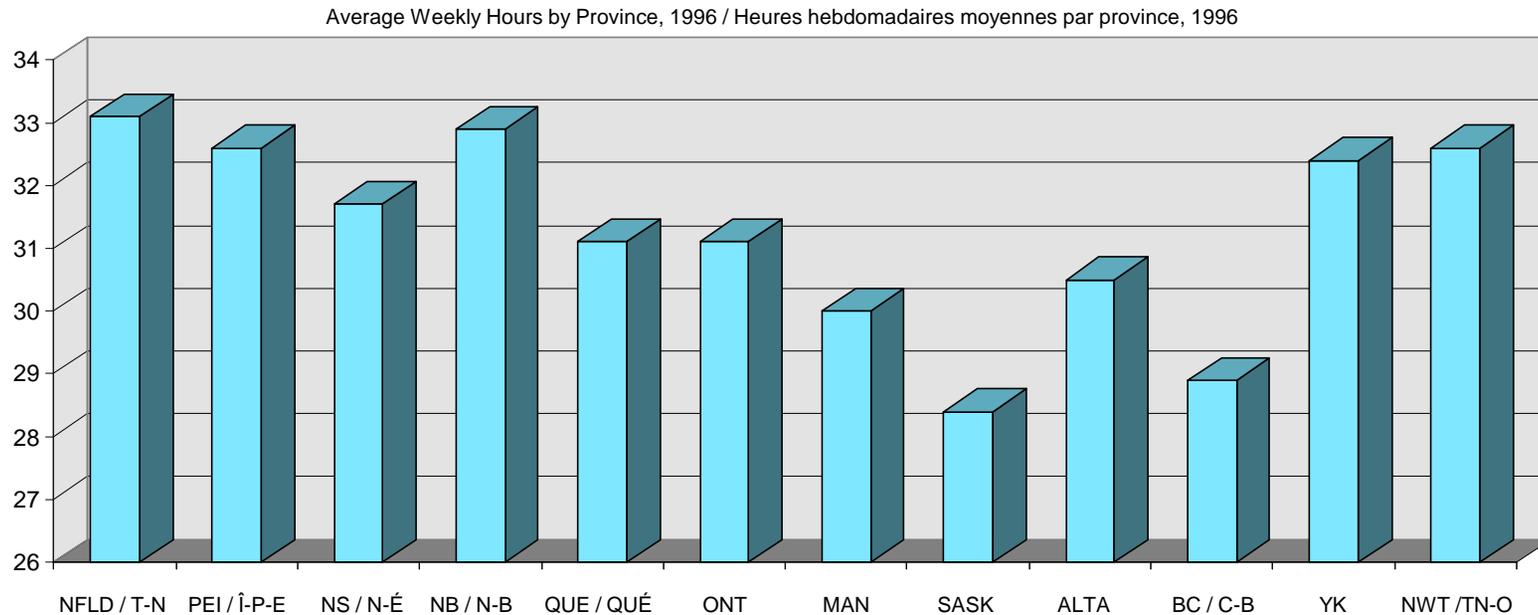

## Tableau 6

Estimates of Average Weekly Hours, for Employees paid by the Hour, by Industry, Canada, Provinces and Territories.

Estimations des heures hebdomadaires moyennes, pour les salariés rémunérés à l'heure, par industrie, Canada, provinces et territoires.

Newfoundland (33.1) and New Brunswick (32.9) led all provinces for 1996 with the highest average weekly hours worked for employees paid by the hour.

En 1996, les heures hebdomadaires moyennes pour les salariés rémunérés à l'heure étaient plus élevées à Terre-Neuve (33,1) et au Nouveau-Brunswick (32,9).

## Table 7A

## Tableau 7A

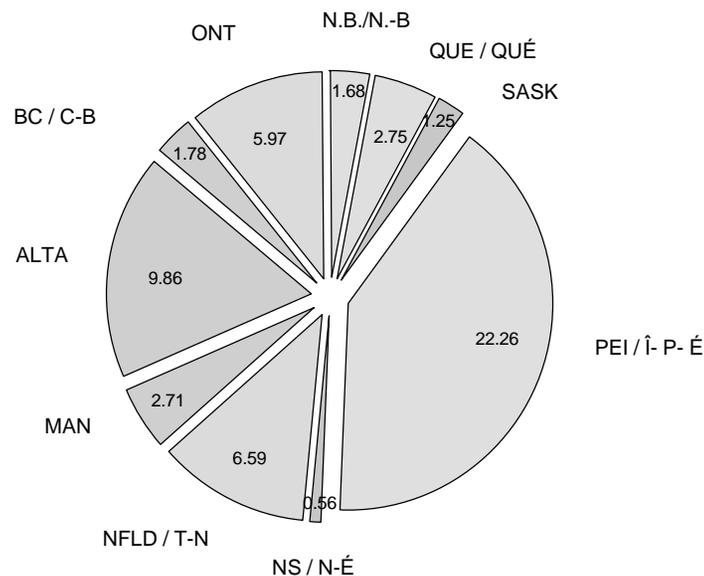

Estimates of Total Weekly Payrolls for Employees paid by the Hour, for Selected Industries, Canada, Provinces and Territories.

In 1996, Prince Edward Island had the highest yearly rise in total weekly payrolls for employees paid by the hour (+22.3%) led by Construction and Manufacturing. Nova Scotia showed the lowest increase at +0.6%.

Estimations de la rémunération hebdomadaire brute pour les salariés rémunérés à l'heure, pour une sélection d'industries, Canada, provinces et territoires.

En 1996, mené par la construction et les industries manufacturières, l'Île-du-Prince-Édouard enregistrait l'augmentation annuelle la plus élevée de la rémunération hebdomadaire brute, des salariés rémunérés à l'heure (+22,3%). La Nouvelle-Écosse enregistrait l'augmentation la plus faible (+0,6%).

1996 Annual Increase in Total Weekly Payrolls / Augmentation annuelle de la rémunération hebdomadaire brute en 1996

## Survey Overview

---

**T**he monthly Survey of Employment, Payrolls and Hours is designed to measure the levels and month-to-month trends of payroll employment, paid hours and earnings. The data are compiled at detailed industrial levels for Canada, provinces and territories.

The target population is composed of all employers in Canada, except those in agriculture, fishing and trapping, private households services, religious organizations and defence services. Conceptually, the SEPH reference period is the last seven days of the month, but the questionnaire asks respondents to report for the last pay period in the month.

### Methodology

**The statistics contained in this publication are based on:**

- a census of establishments within enterprises with a complex structure and having approximately 300 or more employees,
- a census of administrative records having approximately 100 employees or more,
- a sample of administrative records having approximately 99 employees or less,
- a sample survey (BPS) conducted to estimate the variables not reported on administrative records.

The total payroll employment estimates are derived by adding up the employment data obtained by integrating two different sources, the Establishment survey and the Administrative records. However, processes are independent for the sample selection, data collection and estimation. The Establishment Survey accounts for about 35% of the total payroll employment, while the remaining portion is from Administrative records. The Business Payrolls Survey (BPS) is conducted monthly to collect data that is utilized in the calculation of ratios and regression coefficient needed to estimate data not reported on the administrative records. Combining different sources, BPS, Administrative Survey, and Establishment Survey results in the full range of SEPH variables.

## Aperçu de l'enquête

---

**L'**enquête mensuelle sur l'emploi, la rémunération et les heures a pour objet de mesurer les niveaux et les tendances mensuelles de l'ensemble des salariés inscrits sur la liste de paye, des heures rémunérées et des gains. Ces données sont rassemblées à des niveaux détaillés selon l'activité économique pour le Canada, les provinces et les territoires.

La population cible comprend tous les employeurs au Canada sauf ceux des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques, des ménages, des organismes religieux et des services de la défense. En théorie, la période de référence de l'EERH correspond aux sept derniers jours du mois, mais les répondants doivent remplir le questionnaire en tenant compte de la dernière période de paye du mois.

### Méthodologie

**Les statistiques comprises dans la présente publication sont fondées sur:**

- un recensement d'établissements à l'intérieur d'entreprises ayant une structure complexe et comprenant approximativement plus de 300 salariés,
- un recensement des dossiers administratifs comprenant approximativement 100 salariés ou plus,
- un échantillon des dossiers administratifs comprenant approximativement 99 salariés ou moins,
- une enquête-échantillon (ERE) servant de base pour estimer les variables non rapportées sur les dossiers administratifs.

Le nombre total de salariés inscrits sur la liste de paye est obtenu en additionnant l'emploi provenant de deux différents volets de l'enquête soit celui des enquêtes sur les établissements et celui des dossiers administratifs. Toutefois, les procédés sont distincts pour le choix de l'échantillon, la collecte des données et les estimations. L'enquête sur les établissements représente environ 35% du total des salariés inscrits sur les listes de paye, le reste provenant des dossiers administratifs. L'Enquête sur la rémunération auprès des entreprises (ERE) est effectuée chaque mois en vue de recueillir des données afin de calculer des ratios et des coefficients de régression, servant à estimer les données qui ne sont pas rapportées sur les dossiers administratifs. Ces différents volets soit l'ERE, les dossiers administratifs ainsi que l'enquête sur les établissements sont combinés en vue de produire toutes les variables propres à l'EERH.

---

## TERMS AND DEFINITIONS

**Industry classification:** On the basis of its principal activity, each establishment is assigned an industry code according to the 1980 Standard Industrial Classification (SIC). A description of the various industries and groups of industries is contained in the "Standard Industrial Classification Manual", Catalogue 12-501-XPB. In the tables of this publication, a column is identified "S.I.C. Code" and corresponds to that manual. SEPH has 281 industry groups in scope. For analytical purposes, special groupings which are not part of the Standard Industrial Classification, have been created.

- a) Industrial aggregate (000-999) represents the sum of all the industries included in the survey. Since January 1994, employment estimates for the Industrial aggregate include the unclassified businesses.
- b) Unclassified businesses (000) represents businesses that have not yet been classified to an SIC, a province or a territory. Since January 1994, employment estimates for industrial aggregate includes the unclassified businesses.
- c) Goods-producing industries (041-449)(491-499) consist of the following industries; forestry, mining, manufacturing, construction and other utilities industries.
- d) Service-producing industries (451-484)(501-999) consist of the following industries; transportation, communication and storage, trade, finance and insurance, services (except religious organizations and private households) and public administration industries (except for defence services and other government services).
- e) Durable goods (39U) manufacturing consist of the following industries; wood (251-259), furniture and fixtures (261-269), primary metal (291-299), fabricated metal products (301-309), machinery (311-319), transportation equipment (321-329), electrical and electronic products (331-339) and non-metallic mineral products (351-359).
- f) Non-durable goods (37U) manufacturing consist of the following industries; food (101-109), beverage (111-114), tobacco (121-122), rubber products (151-159), plastic products (161-169), leather products (171), primary textile (181-183), textile products (191-199), clothing (243-249), paper and allied products (271-279), printing, publishing and allied (281-284), refined petroleum and coal products (361-369), chemical and chemical products (371-379) and other manufacturing industries (391-399).

## TERMES ET DÉFINITIONS

**Classement par activité économique:** Un code d'activité économique tiré de la Classification type des industries de 1980 (CTI) est attribué à chaque établissement selon sa principale activité. Les industries et les différents groupes industriels sont décrits dans le manuel "Classification Type des Industries 1980" catalogue 12-501-XPB. Dans les tableaux de cette publication, une colonne est identifiée "CTI 1980". Ces codes correspondent à ce manuel. On compte 281 groupes d'activités visées par l'EERH. À des fins analytiques, nous avons créé des groupes spéciaux qui ne figurent pas dans la Classification type des industries.

- a) Ensemble des industries (000-999) représente la somme de toutes les industries visées par l'enquête. Depuis janvier 1994, l'emploi pour l'ensemble des industries comprend les entreprises non classifiées.
- b) Les entreprises non classifiées (000) représentent des entreprises n'ayant pas été identifiées à une classification industrielle, une province ou un territoire. Depuis janvier 1994, l'emploi des entreprises non classifiées est compris dans l'ensemble des industries.
- c) Branche productrice de biens (041-449)(491-499) englobe les industries suivantes; forêts, mines, manufactures, construction et autres services publics.
- d) Branche productrice de services (451-484)(501-999) englobe les industries suivantes; transports, communications et entreposage, commerce, finances et assurances, services (sauf les organismes religieux et les ménages privés) et l'administration publique (excepté les services de la défense et autres services gouvernementaux).
- e) Biens durables (39U) des industries manufacturières englobe les industries suivantes; bois (251-259), meubles et articles d'ameublement (261-269), première transformation des métaux (291-299), fabrication des produits métalliques (301-309), machinerie (311-319), matériel de transport (321-329), produits électriques et électroniques (331-339) et produits minéraux non métalliques (351-359).
- f) Biens non durables (37U) des industries manufacturières englobe les industries suivantes; aliments (101-109), boisson (111-114), tabac (121-122), produits en caoutchouc (151-159), produits en matière plastique (161-169), cuir (171), première transformation du textile (181-183), produits textiles (191-199), habillement (243-249), papier et produits connexes (271-279), imprimerie, édition et industries connexes (281-284), produits raffinés du pétrole et du charbon (361-369), produits chimiques (371-379) et autres industries manufacturières (391-399).

- g) Commercial services (95U) consist of the following industries; business services (771-779), accommodation services (911-914), food and beverage services (921-922), amusement and recreational services (961-969), personal services (971-979), membership organization (982-986) and other service industries (991-999).
- h) Non-commercial services (94U) consist of the following industries; educational and related services (851-859) and health and social services (861-869).
- i) Banks (700) consist of the following industries; Central Bank (701), Chartered Banks and other banking-type intermediaries (702).
- j) Other amusement and recreational services (960) consist of the following industries; commercial spectator sports (964), gambling operations (966) and other amusement and recreational services (969).
- k) Public Administration (812-837) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

## Variables

### *Employee*

The employment is derived by adding up data derived from two sources; the establishment survey and from the administrative records. Since the data for the different employee categories are not reported on the administrative records the BPS survey is conducted to estimate ratios needed to calculate those variables.

The survey determines an employee as being any person drawing pay for services rendered or for paid absences and for whom the employer must complete a Revenue Canada T-4 Supplementary Form.

The employee concept includes full-time employees, part-time employees (those who regularly work fewer hours than the standard work week of the establishment). It also comprises working owners, directors, partners and other officers of incorporated businesses.

- g) Services commerciaux (95U) englobe les industries suivantes; services aux entreprises (771-779), hébergement (911-914), restauration (921-922), services de divertissements et loisirs (961-969), services personnels (971-979), associations commerciales (982-986) et autres industries de services (991-999).
- h) Services non commerciaux (94U) englobe les industries suivantes; services d'enseignement et services annexes (851-859) et services de soins de santé et services sociaux (861-869).
- i) Banques (700) englobe les industries suivantes; banque centrale (701) et banques à charte et autres intermédiaires de type bancaire (702).
- j) Services de divertissements et de loisirs (960) englobe les industries suivantes; sports commerciaux (964), loteries et jeux de hasard (966) et autres services de divertissements et de loisir (969).
- k) Administration publique (812-837) comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental, et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Ainsi, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

## Variables

### *Salarié*

L'emploi est obtenu en additionnant les données provenant de sources différentes; l'enquête sur les établissements et des dossiers administratifs. Toutefois les estimations pour les différents types d'emplois ne sont pas rapportées sur les dossiers administratifs, l'enquête ERE est effectuée en vue de recueillir des données afin de calculer les ratios servants à estimer ces variables.

L'enquête définit un employé comme étant: toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de Revenu Canada.

Le terme "salarié" désigne les salariés à temps plein et à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise). Il désigne aussi les propriétaires, administrateurs, associés et autres dirigeants actifs des entreprises constituées en corporation.

---

The definition excludes owners or partners of unincorporated businesses, the self-employed, unpaid family workers, persons working outside Canada, military personnel and casual workers for whom a T-4 is not required. It also excludes those who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance, Workmens' compensation or other related fund, etc.). However, employees paid for part of the reference period and unemployed or on strike for the rest of this period are included in the survey.

### The employees are classified into the following categories:

- a) **Employees paid by the hour:** any employee whose basic wage is expressed as an hourly rate.

Employment for Elementary and Secondary (851), Post Secondary (852) and University (853) education industries, represent in this category **non-teaching staff**: All employees other than teachers and academic staff, for example; president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer and other services (janitor, caretaker, bus driver, etc.).

- b) **\*Salaried employees** : any employee whose basic remuneration is a fixed amount for at least one week. *Although this variable is not included in this document, the data remains available.*

Employment for Elementary and Secondary (851), Post Secondary (852) and University (853) education industries, represent in this category **teaching staff**: those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

- c) **\*Other employees**: those employees whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc. *Although this variable is not included in this document, the data remains available.*

Employment for Elementary and Secondary (851), Post Secondary (852) and University (853) education industries, represent in this category **supply or substitute teachers**: teachers who are called in as needed either to augment existing staff or as short-term replacements for a full-time or part-time teachers.

Le concept de salarié exclut les propriétaires et les associés des entreprises non constituées en corporation, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les personnes travaillant à l'extérieur du Canada et le personnel militaire et les employés occasionnels dont l'employeur n'est pas tenu de remplir la formule T4. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (c.-à-d. les personnes en grève, en congé non payé, les personnes recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'un régime analogue, etc.). Cependant, les travailleurs rémunérés pour une partie de la période de référence et en chômage ou en grève pour le reste de la période sont inclus dans l'enquête.

### Les salariés sont classés dans les catégories suivantes:

- a) **Salariés rémunérés à l'heure:** tout salarié dont la rémunération de base est calculée selon un taux horaire.

L'emploi pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853), représente dans cette catégorie le **personnel non enseignant**: tous les salariés autres que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le secrétaire général, l'économiste, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel ainsi que les autres services (le concierge, pourvoyeur, chauffeur d'autobus, etc.)

- b) **\*Employés**: tout salarié dont la rémunération de base constitue une somme fixe versée pour au moins une semaine. *Même si cette variable ne figure pas dans ce document, elle demeure disponible.*

L'emploi pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853), représente dans cette catégorie le **personnel enseignant**: tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

- c) **\*Autres salariés**: tout salarié dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de milage, etc. *Même si cette variable ne figure pas dans ce document, elle demeure disponible.*

L'emploi pour les industries d'enseignement élémentaire et secondaire (851), post secondaire (852) et universitaire (853), représente dans cette catégorie le **personnel suppléants ou remplaçants**: enseignants appelés à se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

---

**Weekly Payrolls:**

Weekly payrolls are defined as the portion of gross monthly payrolls that reflect work performed during the reference week. It represents the gross dollar value before deductions for income taxes, unemployment insurance contributions etc., including regular pay, overtime and a portion of bonuses, commissions and other type of special payments. The payroll concept excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to unemployment insurance, Canada/Quebec pension plans, provincial medical plans, workers compensation and other welfare plans. Some annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period. The payroll is derived by adding up data derived from two sources, the Establishment survey and the Administrative records.

**Average weekly earnings for all employees:**

Average weekly earnings are derived by dividing total weekly payrolls by the payroll employment.

**Average weekly hours for employees paid by the hour and standard work week for salaried employees:**

Average weekly hours are obtained by dividing the total paid weekly hours for employees paid by the hour by the number of employees paid by the hour. Total paid hours are defined as all hours paid including overtime hours plus hours of paid absence. *Although the standard work week for salaried employees is not included in this document, this data remains available.*

**Average hourly earnings (including overtime) for employees paid by the hour:**

Is obtained by dividing the total weekly payrolls for employees paid by the hour by the total number of weekly hours for employees paid by the hour. Average hourly earnings are calculated for the hourly-rated employees and for the \*salaried employees.

\*Data for other employees and salaried employees are available in the monthly publication (cat. 72-002-XPB) or directly from the Labour Division (613) 951-4090.

**Rémunération hebdomadaire brute:**

La rémunération brute est définie comme étant la partie de la rémunération hebdomadaire brute qui reflète le travail accompli durant la semaine de référence. Ça représente la valeur brute en dollars avant les déductions pour l'impôt sur le revenu, les contributions à l'assurance-chômage etc., incluant le salaire régulier, le surtemps et la partie bonis, commissions et tout autres types de paiements spéciaux. Les concepts sur la rémunération, ne comprend pas les montants en dollars qui représentent des allocations et des avantages imposables, certains types d'indemnités non salariales ainsi que les cotisations patronales à l'assurance-chômage, au régime de pension du Canada ou au Régime des rentes du Québec, aux régimes d'assurance-maladie provinciaux, aux caisses d'indemnisation des accidents du travail et à d'autres régimes de prévoyance. Les paiements annuels spéciaux sont exclus tandis que les paiements forfaitaires spéciaux sont rajustés de façon à coïncider avec la semaine de référence. La rémunération brute est obtenue en additionnant les données provenant de sources différentes soit l'enquête sur les établissements et les dossiers administratifs.

**Rémunération hebdomadaire moyenne pour l'ensemble des salariés:**

La rémunération hebdomadaire moyenne est calculée en divisant la masse salariale brute imposable par le nombre de salariés inscrits sur la liste de paye.

**Heures hebdomadaires moyennes pour les salariés rémunérés à l'heure et la semaine normale de travail des employés:**

Les heures hebdomadaires moyennes sont calculées en divisant le nombre total d'heures hebdomadaires rémunérées des salariés rémunérés à l'heure par le nombre de salariés rémunérés à l'heure. Le nombre total d'heures rémunérées est défini comme étant toutes les heures payées y compris les heures supplémentaires et les heures d'absence payées. *Même si le nombre d'heures dans une semaine normale de travail ne figure pas dans ce document, ces données demeurent disponibles.*

**Rémunération horaire moyenne (incluant le temps supplémentaire) des salariés rémunérés à l'heure:**

La rémunération horaire moyenne est calculée en divisant la rémunération hebdomadaire brute des salariés rémunérés à l'heure par le nombre d'heures travaillées de ces mêmes salariés. La rémunération horaire moyenne est calculée à l'égard des salariés rémunérés à l'heure et des \*employés.

\*Les données pour les autres salariés et pour les employés sont disponibles soit dans la publication mensuelle (72-002-XPB) ou auprès de la division du travail au (613) 951-4090.

## Concepts & Methods

**The Help-Wanted Index** measures changes in the demand for labour relative to a base-year, currently 1996. The index (see Annex 1 for detail) is derived from a count of job advertisements published in the classified sections of 22 major metropolitan area newspapers. During a period of economic expansion, the demand for labour increases and employers place help-wanted ads in newspaper to attract workers. Similarly, during a downturn in the economy, demand for labour decreases and employers advertise less. Since the need to advertise job openings occurs early in the business cycle, an index aimed at measuring changes in the level of job ads can be considered an early indicator of labour market conditions and of general economic activity. While there exists a general relationship between the number of help-wanted ads and job vacancies, it has been found impossible to quantify this relationship.

In the past, attempts have been made to collect and publish information on job offers. However, since the cancellation of the Job Vacancy Survey in 1978, the Help-Wanted Index is the only indicator of labour demand which is released on a regular basis by Statistics Canada.

The Canadian Help-Wanted Index is patterned after an index developed and published by the Conference Board in the United States. A Canadian index was first constructed in 1973 by the Department of Finance. Statistics Canada assumed responsibility for its publication the following year.

### Methodology

The Help-Wanted Index compares the number of ads published in any given month with the respective average number of ads in the base-period. The ratio between the two values is then weighted according to the population residing in the metropolitan areas surveyed (see Annex 2 for the population figures and the weights). Following are the steps which are required to construct the Help-Wanted Index.

### Help-wanted advertisements:

The basic unit of measurement is a help-wanted advertisement published in the classified section of a newspaper surveyed. Data are collected for one

---

## Concepts et méthodes

**L'indice de l'offre d'emploi** mesure les changements dans la demande de main-d'oeuvre relativement à une année de base, actuellement 1996. L'indice (pour plus de détails sur le calcul d'un indice, voir l'annexe 1) est fondé sur le nombre d'annonces d'offres d'emploi paraissant dans 22 journaux des principales régions métropolitaines du Canada. Bien qu'il existe une relation générale entre la quantité d'offres d'emploi et la demande de travail, il est impossible de la quantifier en termes du nombre d'emplois disponibles ou du nombre d'emplois perdus à partir de cet indice. Durant une période d'expansion économique, la demande de travail augmente et les employeurs placent des annonces d'offres d'emploi dans les journaux afin d'attirer les travailleurs. De la même façon, durant une période de ralentissement économique, la demande de travail diminue et les employeurs ont alors peu recours aux annonces. Comme le besoin d'annoncer des offres d'emploi se fait sentir très tôt dans le cycle des affaires, un indice qui cherche à mesurer les variations dans le niveau des annonces d'offre d'emploi peut donc être considéré comme un indicateur avancé des conditions du marché du travail et de l'activité économique générale.

Depuis l'abolition de l'enquête sur les postes vacants en 1978, la disponibilité de données reliées à l'aspect de la demande de travail est très limitée. L'indice de l'offre d'emploi est le seul indicateur de la demande de travail publié sur une base régulière à Statistique Canada.

L'indice canadien de l'offre d'emploi est formé selon le modèle conçu par le Conference Board aux États-Unis. Un premier indice canadien a été diffusé en 1973 par le ministère des Finances. L'année suivante, Statistique Canada a pris en charge la publication de cet indice.

### Méthodologie

L'indice de l'offre d'emploi compare le nombre d'annonces publiées pour un mois donné à la moyenne annuelle du nombre d'annonces durant l'année de base. Le rapport entre ces deux valeurs est ensuite multiplié par le poids démographique approprié (voir l'annexe 2 pour les chiffres de la population et les poids). Les étapes nécessaires pour construire l'indice de l'offre d'emploi sont les suivantes.

### Annonces d'offres d'emploi:

L'unité de mesure de base est l'annonce d'offre d'emploi publiée dans la section des annonces classées. Les données sont recueillies pour un samedi chaque mois, soit celui

---

Saturday each month; usually the Saturday of the Labour Force Survey reference week.

Excluded from the survey are advertisements:

- ! which do not appear in the classified section,
- ! for "position wanted",
- ! for newspaper carriers,
- ! for lease operators,
- ! which relate to vacancies in the United States.

#### **Raw indices:**

The number of advertisements from each newspaper included in the survey are divided by their respective 12-month average in the 1996 base-period to derive raw indices for metropolitan areas.

#### **Weighted Help-Wanted Indices:**

The population within a region is calculated as the sum of the population residing in the metropolitan areas surveyed. For each region, the metropolitan area indices are weighted by their respective population weights (see Annex 2). The individual values are then summed to provide regional indices.

The Canada index is the sum of the weighted metropolitan area indices, adjusted for the proportion of the population residing in the twenty areas surveyed.

#### **Seasonally adjusted:**

The Canada and regional indices are first adjusted for seasonal variations, that is, for changes which repeat every year. This process involves an "endpoint" adjustment using the X-11 ARIMA seasonal adjustment program. In addition, the seasonally adjusted data are "smoothed" to reduce the irregular fluctuations in the series.

#### **Smoothed Seasonal Indices<sup>1</sup>**

The raw data of time series are sometimes difficult to interpret because they contain a trend-cycle component as well as the effects of seasonal and

qui correspond habituellement à la semaine de référence de l'enquête sur la population active.

Les annonces suivantes sont exclues de l'enquête:

- ! les annonces qui ne figurent pas dans la section des annonces classées;
- ! les annonces classées sous la section "emplois demandés";
- ! les annonces demandant des livreurs de journaux;
- ! les annonces demandant des opérateurs à contrat;
- ! les annonces offrant des emplois aux États-Unis.

#### **Indices bruts:**

Le nombre d'annonces obtenu de chaque journal est divisé par leur moyenne respective de 12 mois durant l'année de base en 1996. Cela permet d'obtenir les indices bruts des régions métropolitaines incluses dans l'enquête.

#### **Indices pondérés de l'offre d'emploi:**

La population régionale est égale à la somme des populations des régions métropolitaines comprises dans cette région. Pour chaque région, la valeur des indices des régions métropolitaines est multipliée par le poids de leur population respective dans la région (voir Annexe 2). Les valeurs pondérées de toutes les régions métropolitaines d'une région sont ensuite additionnées afin d'obtenir la valeur de l'indice régional.

L'indice national est la somme des valeurs des régions métropolitaines pondérées en fonction de leur population respective dans le Canada. La population canadienne est égale ici à la somme des populations des vingt régions métropolitaines incluses dans l'échantillon.

#### **Indices désaisonnalisés:**

Les données de l'indice de l'offre d'emploi pour le Canada et pour les régions sont ajustées pour les variations saisonnières qui se répètent chaque année. Ce procédé implique l'extrapolation des séries au moyen du modèle d'ajustement saisonnier X-11 ARMMI. De plus, les indices désaisonnalisés sont lissés afin de réduire les fluctuations irrégulières.

#### **Indices désaisonnalisés lissés<sup>1</sup>**

Les données originales sont parfois difficiles à interpréter parce qu'en plus de la tendance, elles incluent les effets saisonniers et les variations irrégulières. De façon générale, afin de

---

irregular variations. Commonly, to assist in the interpretation of month-to-month changes the data are adjusted, that is, the seasonal effects are removed.

The experience has been that the Help-Wanted Index displayed month-to-month variations which masked its trend. To reduce the influence of the irregular fluctuations it was decided to smooth the seasonally adjusted data. This process involves the following four steps:

- 1) A three-term moving average is applied to the last three observations of the seasonally adjusted data. The calculation is repeated each month as new data become available.
- 2) The month-to-month changes of the derived estimates are calculated. This procedure is commonly referred to as the derivation of "first differences".
- 3) Next, the standard deviation of the "first differences" is calculated.
- 4) If the absolute value calculated in Step 2 exceeds the standard deviation in Step 3, the difference is distributed to adjacent months.

The smoothing of the Help-Wanted Indices is an iterative process in that Steps 1 to 4 are repeated several times.

Graph on page 238 shows the effect of the smoothing technique and demonstrates the reduction of the month-to-month variations while preserving the trend of the Help-Wanted Index.

<sup>1</sup> *The "Smoothing technique" was developed by Guy Huot, Time Series Research and Analysis Center, Statistics Canada.*

#### **Revisions:**

The seasonally adjusted indices are revised each year when data for a complete calendar year become available. At this time, data for the past four years are revised.

#### **Missing data:**

Although uncommon, unforeseen events such as strikes and delivery problems may make it impossible to obtain certain newspapers. If necessary, the data are imputed as follows:

faciliter l'interprétation des variations mensuelles, les données sont ajustées, c'est-à-dire que la composante saisonnière de la série est éliminée.

L'indice de l'offre d'emploi désaisonnalisé indique des variations mensuelles qui rendent parfois difficile l'interprétation de la tendance. Afin de réduire l'importance de la composante irrégulière dans la série, on a décidé de lisser les données désaisonnalisées. Cette technique s'effectue en quatre phases.

- 1) Une moyenne mobile de trois mois est appliquée aux trois dernières observations de la série désaisonnalisée. Cette opération est répétée chaque mois au fur et à mesure que les données sont disponibles.
- 2) Les variations mensuelles des valeurs obtenues à la première phase sont calculées. Cette procédure est également connue sous le nom de "différence première".
- 3) L'écart-type de ces "différences premières" est calculé.
- 4) Lorsque la valeur absolue des variations mensuelles, calculée à la phase 2, est supérieure à l'écart-type de la phase 3, la différence est redistribuée sur les mois adjacents.

Le lissage des indices de l'offre d'emploi est une procédure itérative, c'est-à-dire que les phases 1 à 4 sont répétées plusieurs fois.

Le graphique à la page 238 montre les effets de la technique de lissage qui réduit les fluctuations mensuelles tout en préservant la tendance de l'indice d'offre d'emploi.

<sup>1</sup> *La "technique de lissage" a été développée par Guy Huot, Centre de recherche d'Analyse en séries chronologiques, Statistique Canada.*

#### **Révisions:**

Les indices désaisonnalisés sont révisés chaque année lorsque l'on dispose des données pour une année civile complète. Les données pour les quatre dernières années sont alors révisées.

#### **Données manquantes:**

Bien que peu fréquents, des événements imprévus tels que des grèves ou des problèmes de livraison, peuvent rendre impossible l'obtention de certains journaux. Lorsque cela s'avère nécessaire, les données sont alors imputées de la façon suivante:

- 
- a) If available, newspapers from the previous Saturday are used to construct the index.
  - b) If a newspaper from a previous Saturday cannot be obtained, the ad count for the missing paper is imputed as follows: the number of ads which have been published for the missing month and the preceding month in the past three years are averaged and are compared to the most current month available. A ratio is calculated and then applied to the most current month available deriving an ad count for the missing month. For example, if a newspaper is missing for the month of April 1990, we calculate the sum of ads separately for March and April for the years 1987 to 1989. A ratio is calculated between these two months and is then applied to March 1990 to derive the April 1990 estimates.

#### **Easter-weekend and December-holiday adjustments:**

The number of help-wanted ads usually declines significantly whenever the survey date falls Easter-weekend and when it is close to the Christmas holidays. On such occasions, to avoid erroneous interpretations, the following adjustments are made: 1) If the survey date falls on Easter-weekend, ad counts from the previous Saturday are used to construct the indices. 2) For the December survey, a Saturday is chosen which falls on or before the tenth day of the month.

#### **Charts:**

Chart 1 and 2 (see page 237) show the Help-Wanted Index for Canada together with the inverse of the unemployment rate and the employment-population ratio. The seasonally-adjusted indices have been "smoothed" to reduce irregular fluctuations.

#### **Newspapers included in the survey:**

##### ***Atlantic Provinces:***

Evening Telegram (St. John's)  
The Guardian (Charlottetown)  
The Chronical Herald (Halifax)  
The Telegraph Journal (Saint John)  
The Times Transcript (Moncton)

- a) Si elles sont disponibles, les données provenant du samedi précédent sont utilisées pour calculer l'indice.
- b) Si les journaux du samedi de la semaine précédente ne peuvent être obtenus, le nombre d'annonces manquant sera imputé en appliquant la méthode suivante: nous calculons une moyenne du nombre d'annonces qui ont été publiées durant les trois dernières années pour le mois manquant et le mois précédent celui-ci. Par la suite nous le comparons au mois le plus récent disponible. Un ratio est calculé et appliqué au mois le plus récent pour estimer la valeur du mois manquant. Par exemple, nous calculons indépendamment la somme des annonces pour les mois de mars et avril, pour les années 1987 à 1989. Par la suite nous calculons un ratio entre ces deux mois et l'appliquons au mois de mars 1990 afin d'estimer le mois d'avril 1990.

#### **Ajustements pour la fin de semaine de Pâques et le congé de Noël**

Le volume d'offres d'emploi diminue considérablement lorsque la date de référence de l'enquête tombe entre le Vendredi Saint et le dimanche de Pâques. Pour éviter une interprétation erronée de l'indice, les ajustements suivants sont faits: 1) si la date de référence tombe durant la fin de semaine de Pâques, les données du samedi précédent seront utilisées afin de construire l'indice. 2) De la même façon, lorsque la date de référence est près de la fête de Noël, les données du samedi publiées au plus tard le dixième jour du mois de décembre sont utilisées.

#### **Graphiques:**

Dans les graphiques 1 et 2 (voir page 237), l'indice de l'offre d'emploi pour le Canada a été tracé avec le taux de chômage et le rapport emploi-population. Afin de relier le taux de chômage à l'indice, il a été représenté en fonction d'une échelle inversée. Les données désaisonnalisées de l'indice ont été lissées afin de réduire les fluctuations irrégulières.

## Annex 1

### Calculation of an Index

---

Index numbers are statistical measures which show how something has changed over time. Perhaps best known is the Consumer Price Index which informs the reader about changes in consumer purchasing power or inflation. An index compares a base period value with a current value, and relates the two measures to each other in the form of a ratio or percentage change.

Help-wanted advertisements can be used to measure changes in the demand for workers over time, thus an index can be constructed based on counts of help-wanted ads published in twenty metropolitan centres. The base period selected for the index is the year 1996, and the **base value**, set equal to 100 by convention, is a 12-month average of the number of ads published in 1996. Each month, this value is compared with a current count of ads. For example, if the **base value** equalled 1,406 and the count of ads for the **current month** was 1,780, then the index would be:

$$\frac{1,780}{1,406} * 100 = 127$$

This value is interpreted as follows: for the newspapers surveyed, compared with the base period 1996, the index increased 27 points, or the number of help-wanted ads rose by 27%.

Each Help-Wanted Index measures changes over time specific to one region. For example, in December 1996, the seasonally adjusted Help-Wanted Index stood at 105 in the Atlantic provinces and 100 in Quebec. This means, compared with the 1996 base period, the number of help-wanted ads increased 5% in the Atlantic provinces and has unchanged in Quebec. Since the indices do not tell the reader how many ads were published, a direct comparison of the index between areas is impossible.

## Annexe 1

### Calcul d'un indice

---

Des indices sont des mesures statistiques qui permettent d'évaluer les variations dans le temps. L'indice le plus connu est peut-être l'indice des prix à la consommation qui informe le lecteur des variations du pouvoir d'achat des consommateurs ou de l'inflation. Un indice compare la valeur d'une période de référence à une valeur courante et relie les deux mesures par un ratio ou une variation en pourcentage.

Les offres d'emploi peuvent être utilisées pour mesurer, dans le temps, les changements de la demande de travailleurs. C'est ainsi que l'on procède pour élaborer l'indice qui est basé sur le nombre d'annonces d'offres d'emploi publiées dans 20 régions métropolitaines. La période de référence retenue pour l'indice est 1996 et la **valeur de base**, posée comme égale à 100 par convention, est une moyenne sur 12 mois du nombre d'annonces placées en 1996. Chaque mois, on compare cette valeur à un nombre courant d'annonces. Ainsi, si la **valeur de base** est égale à 1,406 et si le nombre d'annonces placées au cours du **mois courant** est de 1,780, l'indice sera de:

$$\frac{1,780}{1,406} * 100 = 127$$

L'interprétation est la suivante: pour les journaux enquêtés, par rapport à la période de base 1996, l'indice s'est accru de 27 points, c'est-à-dire que le nombre d'annonces d'offres d'emploi s'est accru de 27%.

Chaque indice de l'offre d'emploi mesure, dans le temps, les variations propres à une région. En décembre 1996, par exemple, l'indice désaisonnalisé s'établissait à 105 dans les provinces de l'Atlantique et à 100 au Québec. Autrement dit, par rapport à la période de base de 1996, le nombre d'annonces d'offres d'emploi publiées a augmenté de 5% dans les provinces de l'Atlantique et n'a pas changé au Québec. Comme les indices ne permettent pas de savoir combien d'annonces ont été publiées dans chacune des régions, il est impossible pour le lecteur de procéder à une comparaison directe de l'indice entre régions.

## Annex 2

Weights Used in the Construction of the Help-Wanted Index

## Annexe 2

Poids utilisés pour construire l'indice de l'offre d'emploi

	POPULATION (1996)	WEIGHTS/POIDS (1996)

# Your feedback is welcome!

We hope you found the electronic version of the **Annual Estimates of Employment, Earnings and Hours 1984 - 1996** to be both informative and easy to use. As we are always seeking new ways to develop more user-friendly products, we would appreciate your comments.

Please take a few minutes to complete and return the following mini-questionnaire

1. Please indicate which version you purchased:

F     Diskette            F     Diskette and Paper            F     Internet and Diskette

2. Overall, please indicate how easy it was to load the diskette and access the information. Would you say it was:

- Easy
- A few problems (specify the problems) \_\_\_\_\_
- Difficult (specify the problems) \_\_\_\_\_

3. This product comes with the capability to print your own paper copy locally, and also to use it electronically. Which version did you use most often?

- Electronic (why) \_\_\_\_\_
- Paper (why) \_\_\_\_\_

4. What were the main advantages to using the electronic version?

- The ability to manipulate data
- The ability to integrate with other data
- The ability to download product immediately
- The ability to review numerical data
- Other \_\_\_\_\_

5. Currently the electronic version is produced using Adobe Acrobat Reader software, accompanied by ASCII files. Are there any other format(s) / software that you would prefer to see used?

# Vos commentaires sont appréciés!

Nous espérons que vous avez trouvé le catalogue électronique “**Les estimations annuelles de l’emploi, des gains et de la durée du travail 1984-1996**” très utile et facile à utiliser. Nous sommes toujours à développer des produits conviviaux; alors si vous avez des commentaires, nous vous prions de nous en faire part.

Nous vous saurions gré de prendre quelques minutes afin de compléter ce bref questionnaire

1. Sur quel format votre choix s’est-il arrêté:

F Disquette F Disquette et papier F Internet et disquette

2. En général, pourriez-vous dire que l’installation et l’accès à l’information ont été:

- Simples
- Quelque peu difficiles (spécifier le problème) \_\_\_\_\_
- Difficiles (spécifier le problème) \_\_\_\_\_

3. Ce produit vous permet à la fois d’imprimer sur place et de visualiser l’information électroniquement. Quelle version avez-vous utilisée le plus souvent?

- Électronique (raison) \_\_\_\_\_
- Papier (raison) \_\_\_\_\_

4. Quelles ont été les avantages de la version électronique?

- La capacité de manipuler les données
- La capacité de réviser les données
- La capacité d’intégrer les données à d’autres données
- Autres \_\_\_\_\_
- La capacité d’accéder à l’information rapidement \_\_\_\_\_

5. Présentement la version électronique est créée à partir du logiciel Adobe Acrobat qui comprend aussi les fichiers ASCII. Indiquez s’il y a d’autres formats ou logiciels que vous auriez préféré utiliser?

\_\_\_\_\_  
\_\_\_\_\_

*Merci d’avoir pris le temps de répondre à ce questionnaire*
