## Information to access the product

This product, catalogue no. $85-225-$ XIE, is available for free in electronic format. To obtain a single issue, visit our website at www.statcan.ca and select Publications.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service that its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1-800-263-1136. The service standards are also published on www.statcan.ca under About us > Providing services to Canadians.

## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## Symbols

The following standard symbols are used in Statistics Canada publications:

- not available for any reference period
.. not available for a specific reference period
... not applicable
0 true zero or a value rounded to zero
$0^{s}$ value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
$p$ preliminary
r revised
x suppressed to meet the confidentiality requirements of the Statistics Act
$E$ use with caution
F too unreliable to be published

## Preface

The report is divided into three parts. The first part contains information at the national, provincial/territorial and census metropolitan area (CMA) levels, as well as for the 30 largest municipal police forces. The second part contains summary 2006 personnel information at the level of the municipal police service. The third part of the report contains summary 2005 expenditure information at the level of the municipal police service.

## Highlights

- There were over 62,400 police officers in Canada in 2006, an increase of over 1,400 officers from the previous year. The rate of officers per 100,000 population increased $2 \%$, continuing the general increase since 1998.
- Despite recent increases, over the past 30 years police strength has remained relatively stable. The rate of 192 officers per 100,000 population in 2006 was $7 \%$ lower than the peak of 206 reached 30 years ago.
- Overall police clearance rates have remained relatively consistent since the mid-1970's. However, clearance rates for violent crime have generally decreased since the early 1990's.
- Saskatchewan continued to report the highest rate of officers per 100,000 population among the provinces in 2006 (205), followed by Quebec (198) and Manitoba (196). The lowest rates were reported in Newfoundland and Labrador (156) and Prince Edward Island (159).
- Among the census metropolitan areas, Thunder Bay reported the most officers per 100,000 population (201), followed by Winnipeg (185), Montréal (184), and Regina (180). The lowest rates were seen in Saguenay (122), Sherbrooke and Kingston (135) and Ottawa (138).
- The number of female officers continued to increase in 2006 (up 6\%), while the number of male officers increased by $2 \%$. Female officers now account for $18 \%$ of police officers in Canada, compared to $10 \%$ a decade ago.
- In 2005, expenditures on policing totalled $\$ 9.3$ billon, a $4 \%$ increase over 2004 after adjusting for inflation. This was the ninth consecutive constant dollar increase in policing costs.
- Ontario and Quebec reported the highest per capita costs for policing (\$252 and \$241, respectively), while the lowest were found in Prince Edward Island (\$140) and Newfoundland and Labrador (\$151).

## Part 1

# Police resources in Canada, provinces/territories and census metropolitan areas 

## Police personnel

## The number of police officers has been increasing since 1998

There were over to 62,400 police officers in Canada in 2006, an increase of more than 1,400 officers compared to 2005. This equals one officer for every 520 Canadians (Table 1).

The number of police officers per 100,000 population increased steadily during the 1960s and early 1970s, peaking at 206 police officers per 100,000 population in 1975. Between 1975 and 1991, the number of police officers increased at about the same pace as the Canadian population, maintaining an average of around 200 police officers per 100,000 population. However, between 1991 and 1998, the rate dropped by 10\%. It has generally been increasing since 1998 (Figure 1). It should be noted that overall police clearance rates have remained relatively consistent since the mid-1970's. However, clearance rates for violent crime have generally decreased since the early 1990's

## International comparison of police strength

Police forces are organized in different ways in different countries. Some countries have more than one police force; for example, state police, community or municipal police, judicial police or gendarmerie, all of which perform some policing duties. These differences should be borne in mind when making comparisons between countries.

International comparisons show that the number of police per 100,000 population is $16 \%$ lower in Canada than in the United States, where it is 230 (2005 data) ${ }^{1}$, 14\% lower than in Australia at 222 (2005 data) ${ }^{2,3}$ and 27\% lower than in England and Wales at 262 (2004 data). ${ }^{4,5}$ Canada and the U.S. reported very similar rates of police officers until the mid-1980s. While the number of officers per capita grew in the U.S. from 1989 to 1999, it fell in Canada from 1991 to 1998. The rate of police officers in England and Wales dropped by 5\% between 1993 and 2000, but hiring since 2001 has begun to reverse that trend. Between 2005 and 2006, the number of police officers in England and Wales remained stable.

Figure 1
Police officers per 100,000 population, Canada, 1962 to 2006

Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.

Violent crime rates were relatively stable in Canada ${ }^{6}$, United States ${ }^{7}$, and England \& Wales ${ }^{8}$ in 2005 while Australia ${ }^{9}$ reported a decline. Property crime rates decreased in all these countries in 2005.

In 2004, the United Nations ${ }^{10}$ presented statistical figures collected in the Eighth United Nations Survey of Crime Trends and Operations of Criminal Justice Systems. The data show that, among the countries of the Organization of Economic Co-operation and Development (OECD), Canada ranks 25th of 29 countries for the number of police officers per 100,000 population (Table 2 ).

## The rate of incidents per police officer falls slightly

The number of Criminal Code incidents (excluding traffic) per police officer may be used as one indicator of police workload. The rate is affected not only by the number of police officers, but also by changes in the number of crimes reported to the police. Trends in the number of incidents per police officer generally follow the trends in the crime rate. The number of Criminal Code incidents per police officer increased steadily from 20 in 1962 to a peak of 51 in 1991. Since 1991, the rate has generally been decreasing (Figure 2, Table 1). Similarly, the national crime rate had increased from the 1960's through the 1980's, peaking in 1991. Crime rates then declined throughout the rest of the 1990's, stabilizing somewhat in the early 2000's. The decline in the number of incidents per officer since 1991 was more a result of decreases in crime than increases in the number of police personnel.

## Saskatchewan reports the most police officers per capita among the provinces

For the sixth consecutive year, Saskatchewan had the most police officers per 100,000 population (205) in 2006. Quebec was next highest at (198) followed by Manitoba (196). Prior to 2000, Manitoba had recorded the highest rate for four consecutive years. In 2006, Newfoundland and Labrador (156) and Prince Edward Island (159) reported the lowest rates of police officers per capita. By comparison among the provinces, crime rates were the highest in Saskatchewan and British Columbia, while the lowest crime rates were recorded by Ontario and Québec. ${ }^{11}$

Figure 3 presents the number of police officers per 100,000 population by province. The three territories are not shown on this graph as their sparse populations over immense areas result in considerably higher police strengths than in the rest of Canada (Table 3).

As the number of police officers changes very little from year to year, trends are best examined over a longer period. Among the provinces, Saskatchewan experienced an increase of $10 \%$ in per capita police officer strength over the past decade while their crime rate increased $27 \%$ during the same time period. Other notable increases in the number of police officers were seen in British Columbia ( $8 \%$ ) and in Newfoundland \& Labrador, Prince Edward Island and Alberta (5\%) (Table 3). The rates increased slightly or remained relatively stable in all other provinces over this time period.

Figure 3
Police officers per 100,000 population, by province, 2006

1. This average excludes the territories and RCMP Headquarters and Training Academy.

Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.

## Thunder Bay records the most police officers per capita among the metropolitan areas

Table 4a presents the number of police officers per 100,000 population and the crime rates for the 27 census metropolitan areas (CMAs) ${ }^{12}$ in Canada. It includes police officers involved in municipal and provincial policing. RCMP federal police officers are not included.

In 2006, Thunder Bay reported the highest number of police officers per 100,000 population (201), while Saguenay had the fewest (122). In comparison, CMA crime rates were the highest in Saskatoon, while Saguenay reported the lowest rate. Among the largest CMAs (over 500,000 population), Winnipeg (185), Montreal (184), and Toronto (173) had the most police officers per 100,000 population, while Ottawa (138) and Québec (143) had the fewest. By comparison the highest crime rates in 2005 among the largest CMAs were reported by Vancouver, Winnipeg and Edmonton while Quebec and Toronto reported the lowest.

Table 4b presents data at the police force level for the 30 largest municipal police forces. This differs from Table $4 a$ in that a CMA generally includes more than one police force. While the CMA list should be used to compare major metropolitan areas, Table 4b presents the actual police strength of the major police forces in Canada.

## Women continue to increase their representation among police officers

In 2006, there were over 11,200 female police officers in Canada, up 6\% over the previous year. The proportion of female police officers in Canada has been increasing steadily since the mid-1970s (Table 5, Figure 4). While females represented 4\% of all police officers in 1985, their proportion had grown to 18\% by 2006.

Figure 4
Proportion of female police officers, Canada, 1966 to 2006

Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.
Comparing the percentage of female officers among 27 countries, Canada had the 7th highest percentage of females in 2002. Norway and Australia had the highest proportions of female officers, at $30 \%$, respectively. Canada's proportion was similar to the United Kingdom, New Zealand and France. The United States ranked 18th with $7 \%$ of their police officers being women ${ }^{13}$ (Table 6).

## British Columbia reports the highest proportion of female officers

In 2006, slightly over a fifth (21\%) of police officers in British Columbia were female, the highest proportion of any province or territory. Among the provinces, Quebec had the next highest proportion at $20 \%$, while the lowest proportions were in Prince Edward Island, New Brunswick and Manitoba, 14\% (Table 7).

The percentage of women at all levels of police officers has been steadily increasing since the 1980s (Table 8). In 2006, women represented more than $6 \%$ of senior officers, almost $11 \%$ of non-commissioned officers and $21 \%$ of constables, while in 1996 they accounted for less than $2 \%$ of senior officers, $3 \%$ of non-commissioned officers and only $13 \%$ of all constables. Compared to 2005, the largest increase in the number of female officers occurred in the non-commissioned officer ${ }^{14}$ category $(+12 \%)$.

## Civilians account for just over one-quarter of all police personnel

In 2006, there were almost 24,000 civilians, up $2 \%$ from 2005 (Table 1). Civilians accounted for $28 \%$ of all personnel in 2006. Clerical support personnel (41\%) represented the highest proportion of these employees, followed by management professionals ( $25 \%$ ) and communications and dispatch ( $15 \%$ ).

The ratio of police officers to civilians dropped from a high of 4.6 in 1963 to 2.6 in 2006 (Table 1, Figure 5). From 1962 to 1987, civilians were in a period of steady growth, as they were given some duties that were traditionally performed by police officers (such as dispatch and by-law enforcement). During that 25 -year period, the number of civilians more than tripled, while the number of police officers doubled. Between 1987 and 2001, the count of civilians remained fairly stable. However, since 2001, the number of civilian personnel has increased by $20 \%$.

Figure 5
Ratio of police officers to civilian personnel, Canada, 1962 to 2006

Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.
The distribution of men and women among civilians has also changed over the years. Prior to 1970, men outnumbered women. With steadily increasing numbers of female employees among civilian personnel, the number of women surpassed the number of men after 1970. Since the mid-1980s, females have accounted for around two-thirds of all civilian employees ( $68 \%$ in 2006).

## Policing expenditures

## Policing costs increase for the ninth consecutive year

For every dollar spent in all justice sectors, 62 cents is allocated to policing. ${ }^{15}$ In 2005, policing expenditures totalled $\$ 9.3$ billion, up $4 \%$ from 2004 after adjusting for inflation. This marks the ninth year in a row that constant dollar ${ }^{16}$ spending has increased (Table 9, Figure 7). The $\$ 9.3$ billion translates into a cost of $\$ 288$ per Canadian (Table 9).

In 2005, salaries, wages and benefits made up 79\% of police operating expenditures. Municipal policing accounted for about $57 \%$ of policing expenditures, provincial policing for about $23 \%$, and federal and other RCMP costs for the remaining 20\% (Table 10).

## Ontario and Quebec continue to report the highest per capita costs

Figure 7 shows per capita costs of municipal and provincial policing services by province for 2005. Only expenditures for municipal and provincial policing are included, as the provinces are not responsible for federal policing and other RCMP non-contract administrative expenditures. Per capita costs for Yukon, the Northwest

Territories and Nunavut were excluded from the graph as their sparse populations over immense areas result in per capita costs that are considerably higher than the rest of Canada (Table 10). Among the territories, the per capita cost was $\$ 660$ for Nunavut, $\$ 569$ for the Northwest Territories and $\$ 388$ for Yukon.

In 2005, the per capita cost of municipal and provincial/territorial policing in Canada was \$229. Among the provinces, all central and western provinces reported per capita costs of $\$ 200$ or more. Ontario and Quebec reported the highest per capita costs at $\$ 252$ and $\$ 241$ respectively, while Prince Edward Island had the lowest cost (\$140). The Atlantic provinces have generally had the lowest per capita costs in recent years.

Figure 7
Per capita spending on municipal and provincial policing, by province, 2005

1. This average excludes the territories (Table 10).

Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.

## Municipal policing expenditures

Provincial legislation can require that cities and towns, upon reaching a minimum population, maintain their own municipal police service. In 2005, there were 508 municipal police services in Canada, including 191 where services were provided through RCMP municipal contracts and 107 through contracts with the Ontario Provincial Police (OPP). Table 11 provides information on municipal policing expenditures.

In 2005, the RCMP employed 4,268 officers under contract to 191 municipalities in all provinces except Newfoundland and Labrador, Quebec and Ontario (Table 3, Table 11). Charges for RCMP municipal policing contracts are based upon the size of the municipality. During 2005, in most cases, policing contracts in municipalities with a population of under 15,000 were billed $70 \%$ of the cost of the contract, while municipalities of 15,000 and over were billed $90 \%$ of the contract cost. The costing formula takes into consideration the costs of providing federal and other RCMP policing duties while also performing municipal policing duties.

There were 107 Ontario municipalities that contracted with the OPP in 2005 to provide municipal policing, involving a total of 1,598 police officers. The remaining 210 Canadian municipal police services employed 35,138 officers, or $86 \%$ of municipal police officers in Canada. Non-RCMP municipal policing expenditures (OPP and other municipal police services) amounted to $91 \%$ of total municipal policing costs in 2005.

## Provincial/territorial policing expenditures

Table 12 contains provincial policing costs for the Ontario Provincial Police (Ontario), the Sûreté du Québec (Quebec) and the Royal Newfoundland Constabulary (Newfoundland and Labrador), as well as RCMP provincial contract costs in the remaining provinces and territories. For provinces that contract with the RCMP, costs are shared $70 \%$ by the province or territory and $30 \%$ by the federal sector. Provincial/territorial policing accounted for about one-quarter of both police personnel and policing expenditures.

## Federal policing and other RCMP expenditures

In 2005, the cost for expenditures on federal policing and other RCMP expenditures totaled almost $\$ 1.89$ billion, up 1\% over 2004 in constant dollars (Table 10). This includes $\$ 400$ million (the sum of the "Federal" columns in Tables 11 and 12) for the share of provincial and municipal policing services provided through RCMP contracts that are considered to be federal policing services. The RCMP is responsible for enforcing federal statutes as well as providing protection services in all provinces and territories.

Other RCMP expenditures include headquarters and divisional administration and the costs associated with providing national police services such as: forensic laboratory services; the Canadian Police College; informatics support for management and operation of the Canadian Police Information Centre, an automated national computer information system that is available to all police services; telecommunications services for data and radio transmissions to ensure all detachments receive current information; criminal intelligence and participation in United Nations peacekeeping services.

## Notes

## Comparing police statistics

## Data at the CMA level

A CMA is a large urban area with a core population of at least 100,000 and includes the surrounding suburban and rural areas that are socially and economically integrated with the urban centre. The areas that police services serve may differ in their mix of urban/suburban populations, and some inner-city police services are responsible for policing many more people than the resident population, as large numbers of people enter the urban core to work and shop during the day. For these reasons, it is difficult to compare crime rates among police services. This lack of comparability is addressed by analyzing crime rates by CMA. In order to present data at the CMA level, the data from all police services providing services within the boundary of the CMA, including urban, suburban and rural areas, have been combined. However, expenditures (per capita costs) are not available at the CMA level due to the number of provincial policing detachments within the CMA for which detachment-specific costs are not available.

## Data at the police force level

Part 2 of this report presents data for each individual municipal police service according to its actual police jurisdiction and budget. While these data accurately reflect the police resources and crime rates in these communities, they are not necessarily comparable across communities for a variety of reasons:
A. Each municipal police service has a different mix of urban, suburban, and rural areas, each with its own unique characteristics, geography and level of crime. Some municipal services are metropolitan or regional, while others may serve primarily inner-city areas and are surrounded by other suburban police services.
B. The expenditures presented in this section represent those costs included in the police operating budget of each municipality. The contents of these budgets tend to differ considerably from city to city. For example, some costs (e.g., accommodation, by-law enforcement, and court security) and some services (e.g., computing, personnel, and financial services) may be included within the police service's operating budget for some municipalities, but in other municipalities they may be paid for by other departments or through the service's capital budget, which is not included.
C. In some police services, there may be police officers who are funded by external agencies (e.g. an airport authority or a community organization). While these officers are included in this report, the related costs are not. As a result, the cost of policing in these communities is underestimated. In addition, these officers may be restricted to policing certain areas (e.g. a port or airport), and therefore it may appear that more officers are available for general policing than is the case in some communities. Where this information has been made available to the Canadian Centre for Justice Statistics, it has been footnoted in the appropriate tables.
D. Expenditure figures for the RCMP municipal contracts represent only the amount billed to the municipality and not the total cost of the contract, nor any additional policing costs (e.g., accommodation, support staff, etc.) incurred by the municipality. Civilian employees provided by the municipality are not included.

## Overview of policing in Canada

Policing in Canada is the responsibility of all three levels of government: federal, provincial/territorial and municipal. While the federal government is responsible for criminal law, under the Constitution Act, each province and territory assumes responsibility for its own policing at the provincial, territorial and municipal levels. Further, many First Nations communities also administer their own police service.

## Federal policing

The federal government, through the Royal Canadian Mounted Police (RCMP), is responsible for the enforcement of federal statutes in each province and territory, and for providing services such as forensic laboratories, identification services, the Canadian Police Information Centre (CPIC), and the Canadian Police College.

## Provincial/territorial policing

Provincial policing involves enforcement of the Criminal Code and provincial statutes within areas of a province not served by a municipal police service (i.e., rural areas and small towns). In some cases, police boundaries may overlap. For example, in some areas provincial police perform traffic duties on major provincial thoroughfares that pass through municipal jurisdictions.

Newfoundland and Labrador, Yukon, the Northwest Territories and Nunavut are the only areas in Canada without municipal police services. In Newfoundland and Labrador the Royal Newfoundland Constabulary, which is a provincial police service, provides policing to the three largest municipalities (St. John's, Corner Brook, and Labrador City) as well as to Churchill Falls. Newfoundland and Labrador contracts the RCMP to provide policing to the remaining municipalities and the rural areas.

The RCMP provides provincial/territorial policing and community policing services in all provinces and territories except Quebec and Ontario, which maintain their own provincial police services: the Sûreté du Québec and the Ontario Provincial Police, respectively. In Ontario and Quebec, the RCMP only provides policing at the federal level. Where a provincial policing contract is granted to the RCMP, the RCMP automatically assumes the provincial policing powers. In the provinces and territories where the RCMP are contracted to provide provinciallevel policing, the provinces are billed $70 \%$ of total contract costs in most cases. The remaining funds come from the federal government.

## Municipal policing

Municipal policing consists of enforcement of the Criminal Code, provincial statutes, and municipal by-laws within the boundaries of a municipality or several adjoining municipalities that comprise a region (e.g., Durham Regional Police in Ontario) or a metropolitan area (e.g., Montréal Urban Community). Municipalities have three options when providing municipal policing services: to form their own police force, to join an existing municipal police force, or to enter into an agreement with a provincial police force or the RCMP. In cases where the RCMP is granted a policing contract to police a municipality, under the billing agreement, municipalities with a population under 15,000 are billed $70 \%$ of total expenditures, and municipalities of 15,000 and over are billed $90 \%$ of total costs.

## First Nations policing

In addition to federal, provincial/territorial and municipal policing, there are various types of First Nations policing agreements for Aboriginal communities in place across Canada. The First Nations Policing Policy (FNPP) ${ }^{17}$, announced in June 1991 by the federal government, was introduced in order to provide First Nations across

Canada with access to police services that are professional, effective, culturally appropriate, and accountable to the communities they serve.

The FNPP is implemented across Canada through tripartite agreements negotiated among the federal government, provincial or territorial governments and First Nations. The agreements are cost-shared $52 \%$ by the Government of Canada and $48 \%$ by the province involved. Depending on the resources available, the First Nation may develop and administer its own police service, as is the case in most of Québec and Ontario, or it may enter into a Community Tripartite Agreement (CTA). Like self-administered agreements, CTAs are negotiated between the Federal government, the province or territory in which the First Nation is located, and the governing body of the First Nation. Under such agreements, the First Nation has its own dedicated contingent of officers from an existing police service (usually the RCMP). Best efforts are made for these police services to be staffed by Aboriginal police officers. Demand for more policing agreements has grown dramatically in recent years. The program currently serves 319 communities through 142 agreements.

## Major survey revisions

## 1986 revision

The Police Administration Survey was revised in 1986 to collect police department expenditures (beginning in 1985) as well as more detailed information on police personnel and functions. As both the old and revised surveys were run simultaneously in 1986, it was possible to examine the effects of the revised survey. An analysis of the data revealed that there were some minor differences in the distribution of police personnel between the two surveys. In order to correct for these methodological differences, the data presented in Table 1 prior to 1986 have been adjusted at the national level.

## 1996 revision

In 1996, changes were made to the effective date for collecting personnel strength, moving from September 30 to June 15. School crossing guards were added to the survey in 1996 as their numbers warranted a separate category. Prior to 1996, they were captured under the "other" category. Adjustments were made to civilian personnel to account for this change, back to 1986.

Also, expenses associated with the purchasing and leasing of vehicles were now to be included only if they were part of the operational budget of the police service. Prior to 1995, all expenses related to the purchase and lease of vehicles were included, regardless of the type of budget. Benefits were expanded to include those paid by other government sources. The removal of expenses due to the capital purchases of vehicles and the addition of expenses due to the inclusion of benefits paid by other government sources were examined in detail. It was estimated that these revisions accounted for an overall change of less than $1 \%$ in reported expenses.

## 2006 revision

In 2006, changes were made to the effective date for collecting personnel strength, moving from June 15 to May 15 . This date change should not have any impact on the continuity of 2006 data with previous years.

## Survey definitions and coverage

This report is based upon data collected through the Police Administration Survey conducted by the Canadian Centre for Justice Statistics. This survey collects data on police personnel and expenditures from each municipal, provincial and federal (Royal Canadian Mounted Police [RCMP]) police service in Canada. With the exception of "independent" First Nations police services, all First Nations police personnel and expenditures falling under the jurisdiction of the RCMP are reported under RCMP federal policing.

The following federal policing and security agencies are excluded from the survey: the Canadian Security Intelligence Service, railway and military police. Federal and provincial government departments deploying personnel to enforce specific statutes in the areas of income tax, customs and excise, immigration, fisheries and
wildlife are also excluded. As well, private security guards and private investigators are not included in this survey.

Data presented in this report represent police personnel as of May 15 and final expenditures for the year 2005 (or 2005/2006 for those services operating on a fiscal year). Most municipal police services operate on a calendar year while the provincial services and the RCMP operate on a fiscal year. Policing expenditures will be referred to as calendar year (i.e., 2005) throughout this report.

Personnel counts are based on permanent, full-time equivalents; part-time employees are converted to full-time equivalents (e.g., 4 employees working 10 hours per week would equal 1 full-time employee working a 40-hour week). Police officers include the actual number of sworn police officers available for active duty as of May 15. Other employees include all other non-police personnel (civilians and special constables) (e.g., clerical, dispatch, management, cadets, special constables, security officers, school crossing guards, by-law enforcement officers). Temporary police officers, auxiliary police and other volunteer personnel are not included in this report.

Counts for temporary officers are not included in any of the police officer counts, as only permanent, full-time officers (and full-time equivalents) are included. Temporary police officers are hired to fill in, as needed, for permanent police officers. The province of Quebec employs more temporary police officers than any other jurisdiction. Of the 900 temporary officers reported in 2006, 680 or $76 \%$ were employed in Quebec.

Police expenditures are actual operating expenditures and include: salaries and wages, benefits, and other operating expenses such as accommodation costs, fuel, maintenance, etc. Capital expenditures, funding from external sources, revenues and recoveries are not included.

Population figures used in this report are provided by the Demography Division of Statistics Canada and represent postcensal or intercensal estimates. Population data are regularly updated and, as such, rates published in this report may differ slightly from rates published in earlier reports. Text and headings indicate the population figures used.

Data from the Uniform Crime Reporting (UCR) Survey are also included in this report to provide appropriate caseload context for the police in terms of the volume of criminal incidents coming to their attention. The UCR Survey collects crime and traffic offences reported by all police services in Canada, dating back to 1962.

| 2006 | 32,501 | 62,458 | 23,908 | 86,366 | 2.61 | 520.4 | 192.2 | .. | .. |  |

1. A new survey was implemented in 1986. To maintain historical continuity, figures prior to 1986 have been adjusted.
2. 1962-1970 final intercensal estimates at June 1st, without adjustment for net census undercounts; from 1971 onward estimates are adjusted to July 1st and include adjustments for net census undercoverage, non-permanent residents and returning Canadians; 1971-1995 revised intercensal estimates; 1996-2000 final intercensal estimates; 2001-2002 final postcensal estimates; 2003-2005 updated postcensal estimates; 2006 preliminary postcensal estimates. Population estimates provided by the Demography Division of Statistics Canada.
3. Data provided from the Uniform Crime Reporting Survey, Canadian Centre for Justice Statistics. Excludes Criminal Code traffic incidents.
Source: Statistics Canada, Canadian Centre for Justice Statistics, Police Administration Survey.

Table 2
Police officers per 100,000 population, international ranking, 2002

| Ranking | Country | Police officers ${ }^{\mathbf{1}}$ per <br> $\mathbf{1 0 0 , 0 0 0}$ population | Ranking | Country |
| :---: | :--- | :---: | :---: | :---: | | Police officers ${ }^{\mathbf{1}}$ per |

1. Represents actual police officer strength as of May 15, 2006.
2. Preliminary postcensal estimates for 2006, Demography Division, Statistics Canada.
3. Includes National Police Services and Departmental and Divisional Administration.
4. Newfoundland and Labrador does not have any municipal police services. The Royal Newfoundland Constabulary (a provincial police force) provides policing to the larger municipalities.
5. Excludes personnel from RCMP Headquarters. The Ontario Provincial Police deploy 1,598 officers to provide municipal policing services under contract and these are included as municipal, not provincial policing.
6. Excludes personnel from RCMP Training Academy.
7. Yukon, Northwest Territories and Nunavut do not have any municipal police services. The RCMP is responsible for providing policing to the territories.
8. Represents the percentage change in rate from 1999 to 2006, due to the creation of Nunavut in 1999.

| Saguenay | 147,071 | 179 | 122 | 822 | 3,723 |

1. The numbers in this table will not agree with the numbers in Part II of this report (which report data at the level of individual police services) because most CMAs are policed by more than one police service. The CMA of Oshawa is not included due to differences in policing jurisdiction and CMA boundaries. Crimes investigated by RCMP federal personnel within CMAs are included; however police officer counts do not include RCMP federal police officers. While the CMA table should be used to compare major metropolitan areas, table 4b presents the actual police strength of the major police forces in Canada.
2. Populations are based on July 1st preliminary postcensal estimates for 2005 (based on 2001 Census boundaries), Demography Division, Statistics Canada but are adjusted to follow policing boundaries. 2006 populations for CMAs are not yet available.
3. Represents actual police officer strength as of May 15th, 2006.
4. Based on the number of police officers in 2006 and CMA populations for 2005. CMA populations for 2006 are not yet available.
5. Crime rate represents the number of Criminal Code incidents (excluding traffic) per 100,000 population. Crime data for 2006 were not available at the time of publication.
6. Police officer counts include officers deployed to contract positions (e.g. airport, port, U.N. mission).
7. Represents the Québec portion of the Ottawa-Gatineau CMA.
8. Represents the Ontario portion of the Ottawa-Gatineau CMA.

| Sherbrooke Regional Police | 148,225 | 200 | 135 | 741 | 3,723 |
| Saguenay Police | 147,071 | 179 | 122 | 822 | 5,042 |

1. This table differs from Table 4 a in that it presents police officers and crime rates at the level of the police service, not the CMA.
2. Police service populations were derived from the July 1st preliminary postcensal estimates for 2005 ( 2001 Census boundaries),

Demography Division, Statistics Canada. 2005 populations were used since populations were not yet available for 2006.
3. Represents actual police officer strength as of May 15th, 2006.
4. The police officers per 100,000 population is based on the number of police officers in 2006 and police force population for 2005.
5. Crime rate represents the number of Criminal Code incidents (excluding traffic) per 100,000 population.
6. The police services listed under the Toronto, Montreal and Vancouver CMA's do not represent all the police services in the CMA. In some cases, only portions of a police service are included in the CMA.
7. Police officer counts include officers deployed to contract positions (e.g. airport, port, U.N. mission).
8. Richmond RCMP moved from the aggregate to the micro-data UCR survey in 2003. A lack of functionality within their RMS to distinguish between established and unestablished offences has affected Richmond's crime reporting. This is having the net effect of artificially inflating their crime rate and lowering their clearance rate. A workaround solution is being developed to solve the problem for future reporting periods.
9. Note that $60 \%$ of the crime handled by Halton Regional Police, and $35 \%$ of the crime handled by Durham Regional Police fall within Toronto CMA boundaries.

Table 10
Total expenditures ${ }^{1,2}$ on policing, 2005

1. Totals may not add up due to rounding.
2. Expenditure figures represent gross operating expenditures and include costs that are paid from police department budgets and benefits paid from other sources. Revenues, recoveries and capital expenditures are excluded.
3. Updated postcensal estimates for 2005. Demography Division, Statistics Canada.
4. Figures include the amount billed to the province, territory or municipality for RCMP contract policing and not the total cost of the contract. See Tables 11 and 12 for details. In some provinces, provincial policing is paid for by the municipalities.
5. Per capita cost calculation for provinces and territories excludes the federal portion of RCMP expenditures as these are not paid for by the municipality or the province/territory. The per capita cost for Canada includes municipal, provincial/territorial and federal expenditures.
6. Federal expenditures include all other RCMP contract expenditures which are not paid for by the municipality or the province/territory for those provinces and territories with contracts with the RCMP (see footnote 11).
7. Includes municipal, provincial/territorial, federal and other RCMP expenditures (see footnote 11).
8. Provincial policing figures include both the Royal Newfoundland Constabulary and the RCMP.
9. Excludes RCMP Headquarters.
10. Excludes RCMP Training Academy.
11. Municipal policing expenditures can be found in Table 11 (see footnote 7 in Table 9). Total provincial policing expenditures can be found in Table 12 (see footnote 7 in Table 10).

1. Totals may not add up due to rounding.
2. Expenditure figures represent gross operating expenditures and include costs that are paid from police department budgets and benefits paid from other sources. Revenues, recoveries and capital expenditures are excluded.
3. Under the RCMP contract, most municipalities with populations of less than 15,000 were billed $70 \%$ of total costs, while municipalities with populations of 15,000 and over were billed $90 \%$ of total costs in most cases. The remaining costs are shown as "Federal Expenditures". Contract costs exclude employees the municipality provides to the RCMP.
4. July 1st, 2005 preliminary postcensal estimates for 2005 at the Census Subdivision (CSD) level. Demography Division, Statistics Canada.
5. Newfoundland and Labrador, Yukon, Northwest Territories and Nunavut do not have any municipal police forces. See Table 10 for policing costs.
6. Expenditures for OPP municipal contracts are included under "Municipal (Non-RCMP)".
7. Total municipal policing expenditures referred to in Table 10 includes both the total Municipal Non-RCMP expenditures (Column 4) plus the total RCMP Municipal Cost (Column 7).

| Quebec ${ }^{5}$ | 718,962 | ... | ... | ... | 718,962 |
| Ontario ${ }^{6}$ | 577,625 | $\ldots$ |  |  | 577,625 |
| Manitoba | ... | 69,177 | 29,647 | 98,824 | 98,824 |
| Saskatchewan | ... | 77,635 | 33,272 | 110,907 | 110,907 |
| Alberta | ... | 140,521 | 59,215 | 199,736 | 199,736 |
| British Columbia | ... | 241,253 | 103,394 | 344,647 | 344,647 |
| Yukon | $\ldots$ | 12,034 | 5,157 | 17,191 | 17,191 |
| Northwest Territories | ... | 24,471 | 10,488 | 34,959 | 34,959 |
| Nunavut | $\ldots$ | 19,783 | 8,478 | 28,261 | 28,261 |
| Canada ${ }^{7}$ | 1,328,929 | 763,048 | 326,011 | 1,089,059 | 2,417,988 |

1. Totals may not add up due to rounding.
2. Expenditure figures represent gross operating expenditures and include costs that are paid from police department budgets and benefits paid from other sources. Revenues, recoveries and capital expenditures are excluded.
3. In most cases, the provincial/territorial portion of policing contracts is $70 \%$ and the federal portion is $30 \%$; however some administrative costs have been added to the federal portion, therefore the provincial/territorial portion may appear slightly lower than $70 \%$ in this table. In some provinces the cost of provincial policing is paid for by the municipalities.
4. The Royal Newfoundland Constabulary (RNC) shares provincial policing in Newfoundland with the RCMP. The RNC polices $40 \%$ of the population and the RCMP the remaining 60\%.
5. The Sûreté du Québec provides all provincial policing in Quebec.
6. The Ontario Provincial Police provides all provincial policing in Ontario.
7. Total provincial policing expenditures referred to in Table 10 includes both the total Provincial Police Non-RCMP expenditures (Column 2) plus the total RCMP Provincial expenditure (Column 3).

## Part 2

## Police personnel in municipal police services 2006

## Introduction

Municipal police services employ 66\% of all police officers in Canada and provide policing services to almost 25 million Canadians ( $79 \%$ of the Canadian population). Summary information on Canada's municipal police services is presented in this part of the report. Municipal policing includes all police services that are paid for by the municipalities including contract policing provided to municipalities by provincial police services and the RCMP. It also includes self-administered First Nations police services. It should be noted that offences investigated by federal RCMP personnel within a municipal policing jurisdiction are included in the crime statistics for that municipal police service; however, personnel and expenditures associated with the federal RCMP are not included.

Part II of the report is organized by province. Within each province, municipal police services are grouped into one of five population ranges and the municipalities within each group are listed alphabetically. Within these groupings, municipalities that are policed by the RCMP or OPP under municipal contracts are separated by a blank line from the other municipal police services.

Part II includes only personnel in municipal police services that existed on May 15, 2006. Municipal police services that ceased to exist and/or were amalgamated by other new police services on or before May 15, 2006 are not included.

Part III includes only operating expenditures from municipal police services that existed on June 15, 2005. Municipal police services that ceased to exist and/or were amalgamated by other new police services on or before June 15, 2005 are not included.

Part II of the report presents detailed data on the number of police officers reported for 2006. Crime data and expenditure data for 2006 are not yet available, therefore data presented in Part III of the report are for the year 2005.

## Important notes

## Population

Most municipal populations are derived from postcensal estimates for July 1 (based on 2001 Census boundaries) as provided by Demography Division, Statistics Canada. The population estimates are based on usual place of residence. Population data are updated regularly and figures published in this report may differ slightly from figures published in earlier reports. In 2005, populations for all police forces were calculated based on estimates using the 2001 Census sub-division boundaries.

Populations for British Columbia municipalities were provided by the province. In the case of First Nation police services, the populations are provided by the Department of Indian and Northern Affairs by band. This includes registered band populations only. Some Aboriginal police services may police larger populations comprising both band and non-band members. Hence the actual population policed by some forces may be higher than indicated in this report. Comparisons should be made with caution.

Municipalities are grouped according to the following population ranges:

- 100,000 and more
- 50,000 to 99,999
- 15,000 to 49,999
- 5,000 to 14,999

## Population density (exclusive to Part 2 of the report)

In order to provide context for the relative urban or rural composition of a municipality, a population density figure is provided. Population density refers to the number of persons per square kilometre. The calculation for population density is total population divided by land area.

Land area is the area in square kilometres of the land-based portions of the census geographic area, in this case the census subdivision (municipality). The land area measurements for the census subdivision reflect the boundaries in effect on January 1, 2001 (the geographic reference date for the 2001 Census of Canada). Since the population density is a summary calculation of total municipal population divided by total municipal land area, it will not reflect the distribution of urban and rural segments within a municipality. However, it can be descriptive of the general urban or rural structure; for example, a highly centralized city such as Vancouver, British Columbia. has a population density of 4,888 persons $/ \mathrm{km}^{2}$ whereas an expansive city such as Greater Sudbury, Ontario. has a population density of 48 persons $/ \mathrm{km}^{2}$.

## Police officers

Counts represent the "actual" number (full-time equivalents) of permanent sworn police officers of all ranks as of May 15, 2006 data. This number also includes officers who are deployed to contract positions (e.g. airport policing, U.N. missions) and who are not available for general policing duties in their community. Police officers on long-term leave (e.g. secondment-out, disability, education leave) who are not being paid by the police service's annual budget are excluded.

## Population per police officer

Counts represent the population of the area serviced by the police service divided by the number of police officers. For some services, particularly those patrolling cottage or tourist areas, the population policed can fluctuate dramatically throughout the year, usually peaking during the summer months. Correspondingly, the number of police officers assigned to these services may also fluctuate to accommodate these peak periods. Because the personnel data are collected for a specific point in time (May 15, 2006) and the population estimates are based on usual place of residence only, these aspects are not captured.

## Police officers per 100,000 population

Figures represent the total number of police officers per 100,000 population. This is simply an alternative way of presenting the population per police officer.

## Other personnel

Counts include civilian and other personnel (e.g., clerical, dispatch, management, cadets, special constables, security officers, school crossing guards, by-law enforcement officers) on the police department's payroll as of May 15, 2006. There are no "other personnel" included in the counts for the RCMP municipal policing contracts. The municipality may hire other personnel, but they are not included in this report.

## Total operating expenditures (exclusive to Part 3 of the report)

Figures include salaries, wages, benefits, and other operating expenses that are paid from the police service budget, as well as benefits paid from other government sources. They have been rounded to the nearest thousand. Revenues, recoveries, and those costs that fall under a police service's capital expenditures are excluded.

Under the RCMP billing agreement, most municipalities with a population under 15,000 are billed 70\% of total expenditures, and those with a population of 15,000 and over are billed $90 \%$ (in most cases) of total costs. The costing formula takes into consideration the costs of providing federal and other RCMP policing duties while also performing municipal policing duties. First Nations Policing Program (FNPP) agreements are cost-shared 52\% by the Government of Canada and $48 \%$ by the relevant province or territory.

As operational situations may vary considerably between police services, so will the operational costs that result. For example, some costs (accommodation, by-law enforcement, court security) and some services (computing, personnel, and financial services) may be included within the police service's operational budget for certain
municipalities, but in other municipalities they may be paid for by other departments or through the police service's capital budget (which is excluded). In some police services, there may be police officers who are funded by external agencies (e.g. an airport authority or a community organisation). While these officers are included in this report, the expenditure of these funds is not. Conversely, some police forces provide costrecovery services (e.g. 911 call-takers and dispatchers). Revenues and recoveries from such services are excluded from this report. Therefore comparisons should be made with caution.

## Per capita cost (exclusive to Part 3 of the report)

Figures represent expenditures divided by the population of the area serviced by the police service (rounded to the nearest dollar). For the reasons described above, comparisons should be made with caution.

## Major expenditure categories (exclusive to Part 3 of the report)

This section examines five major expenditure categories which may, or may not, be part of the police service's operational budget. The purpose of this section is to highlight differences in costs between forces due to different accounting policies and practices.

## Rate, total Criminal Code (C.C.) (exclusive to Part 3 of the report)

Figures represent the total number of incidents per 100,000 population. This rate reflects both violent and property crimes, as well as other Criminal Code offences (e.g., damage to property, prostitution). Criminal Code traffic incidents are excluded.

## Percentage change in Criminal Code rate (exclusive to Part 3 of the report)

This figure represents the year-over-year percent change in the rate of total Criminal Code incidents (excluding traffic) per 100,000 population.

## Clearance rate (\%) (exclusive to Part 3 of the report)

When a police investigation leads to the identification of a suspect against whom a charge could be laid, then that incident can be cleared. Criminal incidents can either be "cleared by charge" or "cleared otherwise". When an information is laid against the suspect (i.e., the person is formally charged), then from a statistical point of view the related actual incident can be cleared by charge. In cases where the police do not lay a charge, even though they have identified a suspect and have enough evidence to support the laying of such, the incident is cleared otherwise. Examples include instances where extrajudicial sanctions (formerly known as alternative measures) are recommended by the police, where police issue a warning or caution, where the complainant declines to proceed with charges or cases where the alleged offender dies before he or she can be formally charged.

The clearance rate reflects the total number of incidents cleared (by charge, or otherwise) during the year divided by the total number of incidents during the year. Since the process of solving crime is often timeconsuming, a criminal incident may be solved months or even years after it was reported to police and recorded by the UCR Survey. Therefore, it is possible for the number of incidents cleared in a year to be greater than the total number of "actual" incidents that year, and thus for the clearance rate to exceed $100 \%$.

Any comparison of clearance rates among police services should be made with caution. The reporting practices of some agencies could result in high levels of citizen reporting, including minor offences, to help track neighbourhood crime trends. These minor, generally less-serious offences (e.g. mischief, minor thefts) tend to be high-volume and, by their very nature, tend to have low clearance rates. Police services reporting higher levels of these minor offences will tend to have lower than average overall clearance rates.

## Note

The statistical tables included in Part 3 utilize 2005 crime data from the Uniform Crime Reporting (UCR) Survey. For more information regarding the UCR Survey and crime statistics, please refer to Canadian Crime Statistics (Catalogue no. 85-205-XIE).

## Part 2 Tables

## Police personnel in municipal police services 2006

Table 13
Police personnel in municipal police services 2006 - Newfoundland and Labrador

|  | Population ${ }^{1}$ | Population density | Police officers |  |  | Other personnel | Population per police officer | Police officers per 100,000 population |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Male | Female | Total |  |  |  |
| persons/km ${ }^{2}$ |  |  |  |  |  |  |  |  |
| Population (100,000 and more) |  |  |  |  |  |  |  |  |
| St. John's (R.N.C.) | 181,527 | 240 | 237 | 35 | 272 | 76 | 667 | 150 |
| Population (15,000 to 49,999) |  |  |  |  |  |  |  |  |
| Corner Brook (R.N.C.) | 20,486 | 138 | 36 | 5 | 41 | 6 | 500 | 200 |
| Population (5,000 to 14,999) |  |  |  |  |  |  |  |  |
| Labrador City (R.N.C.) ${ }^{2}$ | 9,639 | 171 | 16 | 2 | 18 | 4 | 536 | 187 |

1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography

Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
2. The area previously covered by Churchill Falls is excluded from the population density calculations.

Note: There are no municipal police services in Newfoundland. The Royal Newfoundland Constabulary (R.N.C.), a provincial police service, is responsible for providing policing to the three largest municipalities and, for the purposes of this report, they have been included above.

Table 14
Police personnel in municipal police services 2006 - Prince Edward Island

|  | Population ${ }^{1}$ | Population density | Police officers |  |  | Other personnel | Population per police officer | Police officers per 100,000 population |

1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography

Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
2. Personnel data for 2006 were not available; therefore 2005 personnel data were substituted.
3. This police force employs Native Special Constables. Native Special Constables are personnel with limited law enforcement authority. They provide a restrictive policing role within Aboriginal communities and act as liaison between fully-sworn police officers and Aboriginal members of the community.
Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).

1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
2. In August 2005, Mnjikaning Police Service became a fully stand-alone First Nation police service.
3. This police service opened in 2006.

Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).

1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography

Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
2. The population reported for the Lethbridge Police Service is based on preliminary postcensal populations provided by Demography Division and is $6 \%$ less than the populations produced for Lethbridge by the Government of Alberta.
Note for the RCMP municipal contracts: Civilian employees provided by the municipality are not included under "Other Personnel". Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).

Table 21
Police personnel in municipal police services 2006 - Alberta (continued)

|  | Population ${ }^{1}$ | Population density | Police officers |  |  | Other personnel | Population per police officer | $\begin{array}{r} \hline \text { Police officers } \\ \text { per } 100,000 \\ \text { population } \\ \hline \end{array}$ |

| Tsuu T'ina Nation ${ }^{3}$ | 1,321 | 5 | 6 | 1 | 7 | 2 | 189 | 530 |

1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography

Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
2. This police service became a Royal Canadian Mounted Police Detachment in September 2006.
3. Personnel data for 2006 were not available; therefore 2005 personnel data were substituted.

Note for the RCMP municipal contracts: Civilian employees provided by the municipality are not included under "Other Personnel". Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).

## Part 3

Police operating expenditures in municipal police services 2005

Table 23
Police operating expenditures in municipal police services 2005 - Newfoundland and Labrador

|  | Operating expenditures |  |  |  |  |  |  | 2005 crime - total Criminal Code |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Per | Included in police service operational budget |  |  |  |  | $\begin{array}{r} \hline \text { Rate per } \\ 100,000 \\ \text { population } \\ \hline \end{array}$ | $\begin{array}{r} \text { \% change in } \\ \text { crime rate } \\ 2004-2005 \end{array}$ | Clearance rate |
|  | operating expenditures | capita costs | Vehicle purchases | Vehicle leasing | Computer services | Accomodations | Emergency 911 service |  |  |  |
|  | \$ | \$ |  |  |  |  |  |  | \% | \% |
| Population (100,000 and more) |  |  |  |  |  |  |  |  |  |  |
| St. John's (R.N.C.) | 27,123,512 | 149 | no | yes | no | yes | yes | 6,492 | -4 | 24 |
| Population (15,000 to 49,999) |  |  |  |  |  |  |  |  |  |  |
| Corner Brook (R.N.C.) | 3,235,850 | 158 | no | yes | no | yes | yes | 4,818 | -1 | 38 |
| Population (5,000 to 14,999) |  |  |  |  |  |  |  |  |  |  |
| Labrador City (R.N.C.) | 1,983,069 | 206 | no | yes | no | yes | yes | 3,258 | -14 | 25 |

Note: There are no municipal police services in Newfoundland. The Royal Newfoundland Constabulary (R.N.C.), a provincial police service, is responsible for providing policing to the three largest municipalities and, for the purposes of this report, they have been included above.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

Table 24
Police operating expenditures in municipal police services 2005 - Prince Edward Island

|  | Operating expenditures |  |  |  |  |  |  | 2005 crime - total Criminal Code |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total | $\begin{array}{r} \text { Per } \\ \text { capita } \\ \text { costs } \end{array}$ | Included in police service operational budget |  |  |  |  | $\begin{array}{r} \hline \text { Rate per } \\ 100,000 \\ \text { population } \end{array}$ | \% change incrime rate$2004-2005$ | Clearance rate |
|  | operating expenditures |  | Vehicle purchases | Vehicle leasing | Computer services | Accomodations | Emergency 911 service |  |  |  |
|  | \$ | \$ |  |  |  |  |  |  | \% | \% |
| Population (15,000 to 49,999) |  |  |  |  |  |  |  |  |  |  |
| Charlottetown | 5,900,872 | 181 | no | yes | yes | no | yes | 12,807 | -8 | 16 |
| Summerside | 2,679,224 | 178 | no | yes | yes | yes | yes | 10,874 | 6 | 22 |
| Population (5,000 to 14,999) Royal Canadian Mounted Police (RCMP) |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Stratford | 344,076 | 50 | .. | .. | .. | .. | . | 5,043 | -6 | 31 |
| Population ( $<5,000$ ) |  |  |  |  |  |  |  |  |  |  |
| Borden | 135,132 | 171 | yes | no | yes | yes | no | 4,949 | $\ldots$ | 46 |
| Kensington | 356,000 | 252 | no | yes | yes | no | no | 5,795 | -46 | 30 |
| Royal Canadian Mounted Police (RCMP) |  |  |  |  |  |  |  |  |  |  |
| Montague | 243,065 | 128 | .. | .. | .. | .. | .. | 22,140 | 15 | 39 |

Note for the RCMP municipal contracts: Expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs.
Use caution in comparing police services: Operational expenditures may vary considerably between police services for many reasons. See "Total Operating Expenditures" under the "Important Notes" section preceding these tables for details.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

1. Expenditures for 2004 were based on a projection; however 2005 expenditures are based on actuals.

Note for the RCMP municipal contracts: Expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs.
Use caution in comparing police services: Operational expenditures may vary considerably between police services for many reasons. See "Total Operating Expenditures" under the "Important Notes" section preceding these tables for details.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

1. Expenditures for 2005 were not available therefore 2004 expenditures were substituted.

Note for the RCMP municipal contracts: Expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs.
Use caution in comparing police services: Operational expenditures may vary considerably between police services for many reasons. See "Total Operating Expenditures" under the "Important Notes" section preceding these tables for details.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

1. Operational expenses for Richmond include the Vancouver International Airport.
2. Richmond RCMP moved from the aggregate to the micro-data survey in 2003. A lack of functionality within their RMS to distinguish between established and unestablished offences has affected Richmond's crime reporting. This is having the net effect of artificially inflating their crime rate and lowering their clearance rate.
Note for the RCMP municipal contracts: Expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs.
Use caution in comparing police services: Operational expenditures may vary considerably between police services for many reasons. See "Total Operating Expenditures" under the "Important Notes" section preceding these tables for details.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

Note for the RCMP municipal contracts: Expenditures include only the cost billed to the municipality and not the total cost of the contract, nor any additional policing costs.
Use caution in comparing police services: Operational expenditures may vary considerably between police services for many reasons. See "Total Operating Expenditures" under the "Important Notes" section preceding these tables for details.
Use caution in comparing clearance rates among police services. See "Clearance Rate (\%)" under "Important Notes" section preceding these tables for details.

[^0]:    1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
    Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).
[^1]:    1. Populations are based on July 1st preliminary postcensal populations for 2005 (based on 2001 Census boundaries), Demography

    Division, Statistics Canada. Populations are adjusted to follow policing boundaries. Populations for 2006 are not yet available.
    Note for the RCMP municipal contracts: Civilian employees provided by the municipality are not included under "Other Personnel". Use caution in comparing police services: The number of officers may not reflect the number available for general community policing because some officers in certain communities are restricted to specific locations (e.g. ports, airports).
