## How to Use this Electronic Guide

This guide was created in Adobe Acrobat, and provides you with some convenient tools for finding your way around this document.

### Hypertext Links

Click on any section of the Table of Contents and you are taken to the corresponding page. By clicking on underlined words, you will be moved automatically to the corresponding area of the document.

While browsing product descriptions, go to the sample table by clicking on the table number. Return to the product description anytime by clicking on the title area of the table.

### Tool Bar Buttons

The button bar located at the top of the screen contains a number of tools which you can use to view the document. Included are several buttons to search for specific words, to move to the next or previous pages or to move to the beginning or end of the document.

For more information on these and other tools, select **Help** from the menu at the very top of the screen.

### Printing

From the **File** menu at the top left hand corner of the screen, choose **Print** or **Print Setup**. These menus allow you to select printer destination and specify print options.

## New and Improved

### Neighbourhood Income and Demographics

A new standard table is available starting with the 2002 data. This table shows an after-tax income distribution for individuals by age and sex. You can now compare before and after-tax median income. Take a look at this new table—Table 7: Taxfilers and Dependents with Income by After-Tax Income, Sex and Age Group.

[Product Description](#)  
[Sample Table](#)

This table can be requested for the following geography:

#### [Postal Geography](#)

Postal walks  
Urban forward sortation areas  
Rural towns  
Urban cities

#### [Census Geography](#)

Census tracts  
Census divisions  
Economic regions  
Census agglomerations  
Census metropolitan areas  
Federal electoral districts

## Small Area Data: An Introduction

From the income tax forms submitted each year by Canadians, the Small Area and Administrative Data Division produces a wealth of economic and demographic information for use by both the private and public sectors. Over 23 million records are processed each year to provide the most detailed and accurate data possible. In fact, the information represents approximately 96% of the Canadian population.

These data are matched to a number of geographic files providing clients the opportunity to request data for areas as small as a letter carrier's walk.

A variety of databanks have been designed to allow for quick retrieval of information based on the specific needs of a client.

### **RRSPs and Investment Income**

Each fall, information is released for use by the financial community based on the previous year's income tax returns. Data for 2004 were released in October 2005, based on returns filed in April 2005.

After the Canada Revenue Agency provides Statistics Canada with the data, they are processed over a three-week period to produce a timely and accurate picture of the saving, investing and retirement planning habits of individuals throughout Canada. Released just before the RRSP season, the data provide the information needed to help pinpoint marketing campaigns.

### **Charitable Donors**

Data for charitable donors across the country are released annually in the fall. Many charitable organizations, both local and national, use these data to target their fundraising efforts.

### **Families and Individuals**

Each winter, production efforts are concentrated on fine-tuning the data to generate comprehensive information on Canadians and Canadian families. These data are released throughout the following spring. Data for 2003 were released in May 2005 from returns filed in spring 2004.

Data on families and on individuals (aggregated to protect the confidentiality of Canadian citizens) cover everything from the types of families to the dependency of taxfilers and families on government transfer payments. They have proven to be an invaluable source of information for marketers, policy makers, small businesses, researchers and others.

## Why Small Area Data?

Increasingly, demands are made for data at smaller geographic levels. The Small Area and Administrative Data Division was formed to meet these demands. Data are available for over 30,000 postal areas, selected census areas, provinces, territories and Canada.

Clients may also designate user-defined areas. Special areas could include branch service or school catchment areas, trade areas, neighbourhoods or almost any other region. For more information, see [Special Orders for Small Area Data](#).

Data are available for areas as small as a letter carrier's walk in urban cities or postal code areas in rural towns. For a detailed description of the geography available, see [Geographic Indicators](#).

Data at all levels of geography are subject to confidentiality restrictions.  
Confidentiality of Canadians is always protected.

### With Small Area Data you can:

- ▶ Find areas matching characteristics of your target market
- ▶ Focus your marketing campaigns with postal walk information
- ▶ Combine income data with your client database
- ▶ Request data for your own special areas based on postal codes
- ▶ Evaluate effectiveness of programs or services in your area

Our clients have realized a wide range of benefits by using small area data.

- ▶ Financial institutions use family income data to identify best branch office locations. They also use data on investing to target their direct marketing.
- ▶ Municipalities and towns use family and individual data to make policy decisions.
- ▶ Economic development officers use the Economic Dependency and Labour Income Profiles to measure the health of their communities.
- ▶ Government agencies at all levels use Migration Estimates for urban and economic planning. Some clients incorporate these data into their own population models.

## High Quality and Timely Data

Each year, the Small Area and Administrative Data Division examines and processes over 23 million tax and other administrative records in an effort to offer clients the most reliable information possible.

The data are highly accurate as they are a direct count from the taxfile – not a sample. The file contains 100% of all taxfilers and the data cover approximately 96% of all Canadians. Edits and imputations are performed to ensure data quality and consistency.

All statistical information products are released on an annual basis to provide some of the timeliest sources of economic and demographic data available.

## Confidentiality Restrictions

### Confidentiality of Canadians is always protected.

Only aggregate data are provided. All data are subject to strict confidentiality procedures of rounding and suppression.

Data are suppressed to avoid disclosure when geographic areas comprise fewer than 100 taxfilers. Data are also suppressed when characteristics are shared by fewer than 15 persons or families. All data are rounded and tested for dominance and residual disclosure.

## Tailor your Order to Fit Your Needs

A series of standard tables are available for each data product. Choose the combination of tables of interest to you. If, for example, you want Family Data but do not need all 18 tables, select just those tables you require. Or, choose a combination of tables from the different data series. You can also order data tables for almost any geographic area, right down to the postal walk.

## Format and Medium

Statistical tables can be provided to you in many formats. We can supply you with electronic data files and/or present the data in tabular format on paper.

When ordering data files, the information will be provided in the format that best suits your needs, such as Excel, ASCII or Access.

Need data fast? Electronic tables can be sent via electronic mail for fast delivery (size allowing). Prefer paper? We can fax the tables directly to you.

## Products and Services

Small area data are available through the following data products and special services. Our standard databank products have been designed so you can choose only those tables which best suit your needs. And by ordering tables from several different sources, you can get even more power from the data.

## Family Data

**Product 13C0016**

---

The Family databank approximates the total Canadian population and provides a detailed portrait of families. It contains demographic indicators and a wealth of information on sources of income. The data, released each spring, are based on the income tax returns filed in April of the preceding year (2003 data were released in May 2005 from returns filed in April 2004).

The development of small area family data is based on the census family concept. This concept, specific to Statistics Canada, is similar to the traditional family concept.

Taxfilers from the same family, including children, are matched using common links (e.g., same name, same address). When there are indications that one or several members of the family are missing (for instance children), those members are imputed. The remaining taxfilers who have not been matched in the family formation process become non-family persons.

Choose from 18 tables on families:

<a href="#">Table 1</a>	Summary table
<a href="#">Table 2</a>	Number of persons by age group and by family type
<a href="#">Table 3</a>	Number of families by age of older partner/parent and by number of children
<a href="#">Table 4</a>	Distribution of total income by family type and age
<a href="#">Table 5</a>	Number of families by total income and by number of children
<a href="#">Table 6</a>	Sources of income by family type
<a href="#">Table 7</a>	Economic dependency profile of couple families
<a href="#">Table 8</a>	Economic dependency profiles of lone-parent families and non-family persons
<a href="#">Table 9</a>	Labour income profile of couple families
<a href="#">Table 10</a>	Labour income profile of lone-parent families and non-family persons
<a href="#">Table 11</a>	Labour income by age group and gender
<a href="#">Table 12</a>	Employment Insurance by age group and gender
<a href="#">Table 13</a>	Single-earner and dual-earner families by number of children
<a href="#">Table 14</a>	Husband-wife families by percentage of wife's contribution to husband-wife employment income
<a href="#">Table 15</a>	Number of family units and children by age of children
<a href="#">Table 16</a>	Number of family units and persons by language of tax form
<a href="#">Table 17</a>	Low income (based on before-tax Low Income Measures, LIMs)
<a href="#">Table 18</a>	After-tax low income (based on after-tax Low Income Measures, LIMs)

## Family Data (continued)

---

### Historical availability

The first 14 tables of this series are available since 1990, with some changes to the table contents and/or layout over time. Tables 15 and 16 are available starting with the 1993 data; table 17 is available starting with the 1995 data and table 18 with the 1997 data. Limited information on husband-wife families is available previous to 1990.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions and census metropolitan areas. Tables 1-16 can be requested for census tracts, economic regions and federal electoral districts starting with the 1999 data, and Tables 17 and 18 for federal electoral districts. Starting with 2000 data, Tables 17 and 18 are available for census tracts and economic regions. With the release of 2001 data, all tables are offered for census agglomerations.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4105.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=13C0016>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Tables [111-0009 to 111-0023](#).

---

## Seniors

**Product 89C0022**

---

The Seniors databank contains demographic information on senior families and senior individuals. Aggregated data are provided for families and individuals from 55 years of age to give more comprehensive information on the ageing population. A senior family is defined as one in which the eldest family member is 55 years of age and older. The data, released each spring, are based on the income tax returns filed in April of the preceding year (2003 data were released in May 2005 from returns filed in April 2004).

Five tables are available from which to choose:

- [Table 1](#)      Number of senior family units by age group
- [Table 2](#)      Number of individuals in senior family units by age and gender
- [Table 3](#)      Sources of income of senior husband-wife families
- [Table 4](#)      Sources of income of senior lone-parent families and non-family persons
- [Table 5](#)      Sources of income of senior individuals by age group

### Historical availability

Tables 1 to 4 from this databank are available starting with 1990 data and Table 5 with the 1994 data, with some changes to the table contents and/or layout over time.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions and census metropolitan areas. Starting with the 1999 data, all tables can be requested for census tracts, economic regions and federal electoral districts. With the release of the 2001 data, all tables are available for census agglomerations.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4105.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=89C0022>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Tables [111-0032 to 111-0035](#).

---

## Neighbourhood Income and Demographics

Product 13C0015

---

This product characterizes the Canadian population by income and demographics. Income information is generated for all taxfilers and dependents with income in the reference year. Demographic data, provided for the entire population, include marital status, gender, age groups and single years of age. The data, released each spring, are based on the income tax returns filed in April of the preceding year (2003 data were released in May 2005 from returns filed in April 2004).

Six tables are available:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Taxfilers and dependents by marital status and by age group
<a href="#">Table 3</a>	Taxfilers and dependents by single year of age
<a href="#">Table 4</a>	Taxfilers and dependents with total income by source of income
<a href="#">Table 5</a>	Taxfilers and dependents with total income by income, sex and age group
<a href="#">Table 6</a>	Income taxes, selected deductions and benefits
<a href="#">Table 7</a>	Taxfilers and dependents with income by after-tax total income, sex and age group

### Historical availability

The data for standard tables 1, 2, 4 and 5 are available from this databank starting with 1986 data, with some changes to the table contents and/or layout over time. Table 3 is available starting with 1989 data, table 6 with the 1999 data and table 7 with the 2002 data.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up). Data for census divisions became available in 1989 and census metropolitan areas in 1991. Starting with the 1999 data, all tables can be requested for census tracts, economic regions and federal electoral districts. With the release of the 2001 data, all tables are available for census agglomerations.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4105.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=13C0015>).

---

## **Neighbourhood Income and Demographics (continued)**

---

### **Further information (continued)**

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See [Tables 111-0004 to 111-0008](#), [111-0026](#) and [111-0043](#).

---

## Economic Dependency Profile

Product 13C0017

---

A region's dependency on government transfer payments is demonstrated through the Economic Dependency Ratio (EDR). This ratio is defined as the ratio of transfer payment dollars to every \$100 of employment income reported for the area. The data, released each spring, are based on the income tax returns filed in April of the preceding year (2003 data were released in May 2005 from returns filed in April 2004).

The data are presented in a single [table](#), by gender, and include:

- the number of taxfilers, type of transfer payments and employment income
- the amount of income reported by type of transfer payment
- the Economic Dependency Ratio (EDR) – the ratio of transfer payment dollars to every hundred dollars of employment income
- the EDR for the area expressed as a percentage of the provincial or Canadian EDR

### Historical availability

The Economic Dependency Profile is available starting with 1989 data, with some changes to the table contents and/or layout over time.

### Geographic availability

This table is available for postal areas (letter carrier routes and up), census divisions and census metropolitan areas. Starting with the 1999 data, the Profile can be requested for census tracts, economic regions and federal electoral districts. With the release of the 2001 data, the Profile is available for census agglomerations.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4105.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=13C0017>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0025](#).

---

## Labour Income Profile

Product 71C0018

---

Profiled here are Canadians who report income from employment or from Employment Insurance. The data, released each summer, are based on the income tax returns filed in April of the preceding year (2003 data were released in May 2005 from returns filed in April 2004).

The data are presented in a single [table](#), by gender, and include:

- the number of taxfilers reporting total income and labour income <sup>1</sup>
- the number of taxfilers reporting wages, salaries and commissions only
- the number of taxfilers reporting self-employment income only
- the number of taxfilers reporting income from wages, salaries, commissions *and* from self-employment
- the amount of each type of income
- the median total income and the median employment income
- the index of median income for the area compared to the provincial and national incomes

### Historical availability

The Labour Income Profile is available starting with 1989 data, with changes to the table contents and/or layout over time.

### Geographic availability

This table is available for postal areas (letter carrier routes and up), census divisions and census metropolitan areas. Starting with the 1999 data, the Profile can be requested for census tracts, economic regions and federal electoral districts. With the release of the 2001 data, the Profile is available for census agglomerations.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4105.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=71C0018>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0024](#).

---

<sup>1</sup> *Labour Income*: income from wages, salaries and commissions, self-employment and/or Employment Insurance benefits.

---

## Migration Estimates

Product 91C0025

---

The movements of people to Canada and within Canada are tracked in this databank. Updated annually from comparisons of two consecutive years of tax files, the preliminary data on international migration and final data on internal migration are generally available 15 to 18 months after the April tax filing deadline. International data are usually revised the following year.

The data are estimates of migration flows between census divisions (CDs) or census metropolitan areas (CMAs) by gender and broad age groups.

Five tables are offered:

- [Table A](#) By province of origin/destination (includes five years of data)
- [Table B](#) By age group (includes five years of data)
- [Table C](#) By type of migration and sex (includes five years of data)<sup>1</sup>
- [Table D](#) Flows by census division of origin/destination, or by census metropolitan area of origin/destination (includes five years of data)
- [Table E](#) Median income of migrant taxfilers (includes current year data only)

### Historical Availability

Tables A to D are available from this databank starting with 1976-77 data. Table E is available starting with 2000-01 data.

### Geographic Availability

Data are available for provinces<sup>2</sup>, territories, census divisions and since 1992-93, census metropolitan areas. Provincial and territorial totals are not provided for Table D.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4101.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=91C0025>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Tables [111-0027 to 111-0031](#).

---

<sup>1</sup> *Types of migration* are: intraprovincial (movements within the province), interprovincial (movements to/from other provinces) or international (movements to/from outside Canada).

<sup>2</sup> Provincial and territorial totals include movements within the province.

---

## RRSP Contributors

Product 17C0006

---

This databank provides information on taxfilers who contributed to an RRSP during the tax year under review. The data are released each fall based on the previous year's income tax returns (2004 data were released in October 2005 from returns filed in April 2005).

**Registered Retirement Savings Plan (RRSP)** is an individual retirement savings plan that is registered by the Canada Revenue Agency. It permits limited contributions, and income earned in the RRSP is exempt from tax until payments are received from the plan.

Four tables show data for RRSP Contributors:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Age Groups
<a href="#">Table 3</a>	Sex
<a href="#">Table 4</a>	Income Groups

### Historical availability

Table 1 is available from this databank starting with 1990 data. Tables 2 and 3 were first introduced with the 1994 data series and Table 4 with the 1997 data. Some changes have been made to the table contents and/or layout.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions (since 1994) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0006>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0039](#).

---

## RRSP Contributions Limits

Product 17C0011

---

This product provides information on the RRSP contribution limit (room) available to individuals for a particular tax year. Released months before the closing date for contributions, the data are a valuable resource tool.

The room is determined from the earned income of the previous year, to a maximum, reduced by a pension adjustment. For example, the earned income of 2004 determines the contribution limit for 2005. The Canada Revenue Agency has allowed contributions for a tax year to be made up to and including January and February of the subsequent year. The data are released each winter based on the previous year's income tax returns (Contribution limits for 2005 were released in October 2005 from 2004 returns filed in April 2005).

The data provided consist of 3 different variables: new room, unused room and total room.

**New room** is the maximum amount of dollars (contribution limit) a taxfiler is eligible to contribute and deduct for RRSPs for the tax year based on only the previous year's earned income. This amount *excludes* unused room.

**Unused room** is the amount of eligible dollars a taxfiler did *not* deduct for RRSPs on previous tax returns. Unused room can be carried forward to subsequent years. The first year of unused room is 1991.

**Total room** is the sum of new and unused room, and is the cumulative amount a taxfiler can contribute and deduct in the tax year.

There are two RRSP room tables:

[Table 1](#) People with Room (provides a breakdown of RRSP Room by total, new and unused room)

[Table 2](#) Characteristics of people with new Room (provides income and demographic characteristics of people with new Room)

### Historical availability

Both tables are available starting with 1993 data.

### Geographic availability

Both tables are available for postal areas (letter carrier routes and up), census divisions (since 1994) and census metropolitan areas (since 1995).

---

## RRSP Contribution Limits (continued)

---

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0011>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0040](#).

## Canadian Savers

Product 17C0009

Savers are identified as taxfilers who reported interest and other investment income on line 121 of their personal income tax return, and reported no dividend income on line 120. These data are released each fall based on the previous year's income tax returns (2004 data were released in October 2005 from returns filed in April 2005).

For information on line 120 see [Canadian Investors](#).

**Interest income and other investment income** sources include interest from Canada Savings Bonds, bank accounts, treasury bills, investment certificates, term deposits, earnings on life insurance policies as well as foreign interest and foreign dividend income.

There are four tables available for Canadian Savers:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Age Groups
<a href="#">Table 3</a>	Sex
<a href="#">Table 4</a>	Income Groups

### Historical availability

Standard tables are available from this databank starting with 1990 data. Tables 2 and 3 were first introduced with the 1995 data series and Table 4 with the 1997 data. Some changes have been made to the table contents and/or layout.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions (since 1995) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0009>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0036](#).

## Canadian Investors

Product 17C0007

Investors are persons who reported dividend income on line 120 of their personal tax return; they may also have interest or other investment income on line 121. When income is reported on line 121 it is added to the amount of dividend income received. The sum becomes the investment income of the investor.

These data are released each fall based on the previous year's income tax return (2004 data were released in October 2005 from returns filed in April 2005).

For information on line 121, see [Canadian Savers](#).

**Dividend income** is defined as dividends from taxable Canadian corporations, such as stocks or mutual funds. This is the adjusted amount that was received by the individual, not the inflated taxable amount.

There are four tables available for Canadian Savers:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Age Groups
<a href="#">Table 3</a>	Sex
<a href="#">Table 4</a>	Income Groups

### Historical availability

Standard tables are available from this databank starting with 1990 data. Tables 2 and 3 were first introduced with the 1995 data series and Table 4 with the 1997 data. Some changes have been made to the table contents and/or layout.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions (since 1995) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0007>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0037](#).

---

## Canadian Investment Income

Product 17C0008

---

Canadian Investment Income is the sum of the dividend income reported on line 120 and the interest and other investment income reported on line 121 of the tax return. These data are released each fall based on the previous year's income tax returns (2004 data were released in October 2005 from returns filed in April 2005).

Four tables are offered:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Age Groups
<a href="#">Table 3</a>	Sex
<a href="#">Table 4</a>	Income Groups

### Historical availability

Standard tables are available from this databank starting with 1990 data. Tables 2 and 3 were first introduced with the 1995 data series and Table 4 with the 1997 data. Some changes have been made to the table contents and/or layout.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions (since 1995) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0008>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See table [111-0038](#).

---

## Canadian Capital Gains

Product 17C0012

---

These data provide a first look at taxfilers who report capital gains. Canadians report capital gains following the sale or disposal of property, such as the sale of real estate, farm property, corporation shares, bonds and other types of properties.

These data are released in the fall and are based on the previous year's income tax returns (2004 data were released in October 2005 from returns filed in April 2005).

The data are presented in a single [table](#):

- the number of taxfilers
- the number of taxfilers reporting capital gains
- the percentage of receivers of capital gains by income group
- the total value of capital gains reported
- the percentage of capital gains associated to each income group

### Historical availability

Canadian Capital Gains is available starting with 1998 data.

### Geographic availability

The table is available for postal areas (letter carrier routes and up), census divisions and census metropolitan areas.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0012>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0042](#).

---

## Canadian Taxfilers

Product 17C0010

---

This databank provides a demographic and income profile of all Canadians who filed a personal tax return in the reference year. The data are released each fall based on the previous year's income tax returns (2004 data were released in October 2005 from returns filed in April 2005).

Two standard tables are available:

[Table 1](#) Summary Table

[Table 2](#) Income Groups

### Historical availability

Table 1 is available starting with 1990 data and Table 2 with 1997 data.

### Geographic availability

Both tables are available for postal areas (letter carrier routes and up), census divisions (since 1995) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services

(<http://www.statcan.ca/bsolc/english/bsolc?catno=17C0010>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Table [111-0041](#).

---

## Charitable Donors

Product 13C0014

---

These data profile individuals who reported donations to registered charitable organizations on line 340 of the tax return. Charitable donations can be claimed on tax returns up to 5 years after the donation was made. Persons who make donations but do not claim them on their tax return are not included in this databank.

Information on charitable donations is released each fall based on the previous year's income tax returns (2004 data were released in November 2005 from returns filed in April 2005).

Choose from three standard tables:

<a href="#">Table 1</a>	Summary Table
<a href="#">Table 2</a>	Age and Sex
<a href="#">Table 3</a>	Income Groups

### Historical availability

The summary table is available starting with 1990 data. Table 2 was introduced with the 1995 data and Table 3 with the 1997 data. Some changes have been made to the table contents and/or layout.

### Geographic availability

All tables are available for postal areas (letter carrier routes and up), census divisions (since 1995) and census metropolitan areas (since 1993).

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4106.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=13C0014>).

The latest summary statistics for Canada, the provinces and the territories are available free of charge on Statistics Canada's web site. See *Canadian Statistics* (<http://www.statcan.ca/english/Pgdb/famil90.htm>).

Data for census metropolitan areas can be accessed from the Cansim II database on Statistics Canada's web site. See Tables [111-0001 to 111-0003](#).

---

## Longitudinal Administrative Data

Product 13C0019

---

The Longitudinal Administrative Databank (LAD) is a powerful research tool for longitudinal socioeconomic analyses. By following the same individuals over several years, longitudinal data allow you to explore the changes Canadians experience over time.

The LAD is a 20% longitudinal file of taxfilers from 1982 to 2003, with additional years added as they become available. The data are a wide variety of income and demographic variables such as employment and self-employment income, social assistance benefits, age, gender and family composition. Diverse variables such as RRSP contributions and alimony are also available.

Each selected individual in the study is represented by a record comprised of individual, parent (or spouse) and family information. The individuals represented either filed a personal tax return or are the spouse of a filer. The characteristics of these individuals are then recorded for every year they appear.

Data can be produced for individuals and census families. Custom retrievals for our clients are the output form. We work with each client to determine their specific data requirements and to assist in data interpretation. All tabulations are subject to confidentiality restrictions.

### Geographic Availability

Data can be derived for provinces, territories and Canada. Availability of sub-provincial data for smaller areas is dependent on sample size and confidentiality restrictions.

### Further information

Further information on methodology, data quality, historical availability, variable definitions and geography descriptions can be found in the Integrated Meta Data Base, on Statistics Canada's web site (<http://www.statcan.ca/english/sdds/4107.htm>).

Browse the Statistics Canada's online catalogue of products and services (<http://www.statcan.ca/bsolc/english/bsolc?catno=13C0019>).

A complete glossary of LAD variables is included in the *Longitudinal Administrative Data Dictionary*. This document is available free of charge on Statistics Canada's web site (<http://www.statcan.ca:8096/bsolc/english/bsolc?catno=12-585-X>).

---

## Special Orders

Product 61C9956

---

Custom tables can be designed to meet your data requirements.

1. You may purchase any of the standard tables and have the information adapted to your specifications. For example, we can sort and or rank the data by different variables.
2. Most standard tables can be produced for your own areas (such as branch service areas or school catchment areas). A user-defined area is any non-standard area specified by the client. It could include a combination of standard areas or a combination of postal codes.

Simply provide us with the postal codes associated with each area. The postal code listing required is called a conversion file. This electronic file is used to aggregate the different postal areas that make up the special area. Two columns of information are required: the first contains the six-character postal code (no space) and the second shows the area to which each postal code is assigned. The user-defined area is identified by a code of one to four digits. A third field may contain the area name.

3. If the data in the standard tables do not meet your needs, other tax variables can be tabulated. Custom tabulations are processed for the standard or custom geography required. All tabulations are subject to confidentiality restrictions.

All special orders are priced on a cost recovery basis and vary with the complexity of each request. These data can be produced at any time of the year, subject to the release dates of our standard products.

### **Geographic availability**

Data are available for any area that comprises one or more postal codes, anywhere in Canada. Data are subject to confidentiality restrictions to ensure the confidentiality of Canadians.

## Geographic Indicators – Postal Areas

Small area data are available for the following levels of postal geography:

Level of Geography (L.O.G.)	Postal Area	Description
12	Canada	This level of data is an aggregation of the provincial/territorial totals (code 11). The national total is identified by the region code Z99099.
11	Province or Territory Total	<p>This level of data is an aggregation of the following geographies within a province:</p> <p>City Totals..... Code 08  Rural Postal Codes..... Code 09  Other Provincial Totals ..... Code 10</p> <p>These totals are identified by a provincial/territorial postal letter, then a "990" followed by the province/territory code, as follows:</p> <p>Newfoundland and Labrador ..... A99010  Nova Scotia ..... B99012  Prince Edward Island..... C99011  New Brunswick ..... E99013  Quebec ..... J99024  Ontario..... P99035  Manitoba..... R99046  Saskatchewan ..... S99047  Alberta ..... T99048  British Columbia ..... V99059  Northwest Territories ..... X99061  Nunavut ..... X99062  Yukon ..... Y99060</p>

[Next](#)

Level of Geography (L.O.G.)	Postal Area	Description
10	Other Provincial Total ("P" Pot)	<p>This level of data is an aggregation of small communities in the province that had less than 100 taxfilers, where these communities are combined into a "pot". Before 1992, it was identified by the same codes as the provincial/territorial totals, and only the "Delivery Mode" codes 2 and 3 distinguished between the two. To avoid this problem, starting with the 1992 data, an "8" appears after the provincial/territorial letter instead of a "9". The "9" will be reserved for the provincial/territorial total, as explained in 11 above. These "pot" codes are as follows:</p> <p>Newfoundland and Labrador ..... A89010  Nova Scotia ..... B89012  Prince Edward Island..... C89011  New Brunswick ..... E89013  Quebec ..... J89024  Ontario..... P89035  Manitoba..... R89046  Saskatchewan ..... S89047  Alberta ..... T89048  British Columbia ..... V89059  Northwest Territories ..... X89061  Nunavut ..... X89062  Yukon ..... Y89060</p>
09	Rural Postal Code (Not in City )	<p>This level of geography pertains to rural communities that have one and only one rural postal code. These stand-alone rural postal codes can be identified by a "zero" in the second position of the postal code and a level of geography code 09.</p> <p>The 2003 databanks contain 4,100 areas coded as level of geography 09.</p>

[Next](#)

Level of Geography (L.O.G.)	Postal Area	Description
08	City Total	<p>This level of data is an aggregation of the following geographies for unique place names within a province/territory:</p> <p>Urban FSA (Residential)..... Code 03  Rural Route ..... Code 04  Suburban Services ..... Code 05  Rural Postal Code (within city)..... Code 06  Other Urban Area ..... Code 07</p> <p>They have the following format: e.g., Edmonton = T95479; Regina = S94876. The pattern is the postal letter of the city plus "9" in the second position (indicating a total), followed by a 4 digit numeric code for the community (often called "CityID").</p> <p>Postal cities are based on Canada Post definitions and may not coincide with municipal or legal boundaries.</p> <p>The 2003 databanks contain 978 areas coded as level of geography 08.</p>
07	Other Urban Area (City Pot)	<p>This aggregation of data (or "pot") covers non-residential addresses within an urban centre and all other data not otherwise displayed. Commercial addresses, post office boxes and general delivery are included, as are residential addresses with too few taxfilers to report separately. They can be recognized by codes that are similar to the city totals, with a distinguishing difference: an "8" will follow the city postal letter rather than the "9" of the city total (e.g., Edmonton = T85479; Regina = S84876).</p> <p>The 2003 databanks contain 474 areas coded as level of geography 07.</p>

[Next](#)

Level of geography (L.O.G)	Postal Area	Description
06	Rural Postal Code (Within City)	<p>These data pertain to rural postal codes that belong to communities with more than one rural postal code. These occur in areas that were formerly serviced by rural delivery service and changed by Canada Post to urban delivery service or in communities served by more than one rural postal code. Rural postal codes of this type can be identified by a "zero" in the second position of the postal code and a level of geography code 06.</p> <p>The 2003 databanks contain 402 areas coded as level of geography 06.</p>
05	Suburban Service	<p>Sparsely populated fringe areas of urban centres may receive their postal service from an urban post office by delivery designated as "suburban service". Their region code retains all six characters of the postal code. Suburban Services are usually near or on the perimeters of urban centres, and mail is delivered by a contractor to group mail boxes, community mail boxes and/or external delivery sites (e.g., kiosks, miniparks).</p> <p>The 2003 databanks contain 19 areas coded as level of geography 05.</p>
04	Rural Route	<p>Reasonably well settled rural areas may receive their postal service from an urban post office by delivery designated as "rural route". Mail is delivered by a contractor to customers living along or near well-defined roads. Their region code retains all six characters of the postal code.</p> <p>The 2003 databanks contain 837 areas coded as level of geography 04.</p>

[Next](#)

Level of Geography (L.O.G.)	Postal Area	Description
03	Urban FSA (Residential Area)	<p>The urban Forward Sortation Area (FSA, identified by the first three characters of the postal code) includes all residential addresses covered by the first three characters of a postal code in a particular urban area (not including levels 04 and 05). Only residential FSAs are considered for these databanks. This level of data is an aggregation of:</p> <p>Postal Walk                    Code 01 Other Postal Walk        Code 02</p> <p>An Urban FSA of this type can be identified by the FSA followed by three blanks.</p> <p>The 2003 databanks contain 1,872 areas coded as level of geography 03.</p>
02	Other Postal Walk	<p>This level of data is an aggregation of urban residential postal codes unallocated to a letter carrier route and postal walks with less than 100 taxfilers. A postal walk record of this type can be identified by the FSA followed by three blanks, and the postal walk number "XXXX".</p> <p>The 2003 databanks contain 291 areas coded as level of geography 02.</p>
01	Postal Walk	<p>This is the finest level of data and is an aggregation of urban residential postal codes allocated to a letter carrier route. A postal walk of this type can be identified by a region code which is the FSA followed by three blanks, and the postal walk number. An average FSA contains 11 walks.</p> <p>Data for postal walks are accompanied by a <a href="#">concordance file</a> and <a href="#">old walk/new walk file</a>.</p>

## Geography Reference Files

### Concordance File

Every purchase of data at the postal walk level includes a concordance file. This file lists all of the urban residential postal codes related to the data and identifies the postal walk to which each is assigned.

The [report](#) includes the following:

- City identification number
- Postal area
- Postal walk
- Postal code

### Old Walk / New Walk File

The old walk/new walk file shows the changes in Canadian postal walks between two points in time. Users can compare the walks used at the time the data were produced against more current walks (updated monthly).

The [report](#) includes the following:

- City identification number
- Postal area
- Old postal walk
- New postal walk
- % of old walk that is included in the new walk
- % of new walk that is derived from the old walk

## Geographic Indicators – Census Areas

Level of Geography	Name	Description
61	Census Tract	<p>Census Tracts (CTs) are small geographic units representing urban or rural neighbourhood-like communities in census metropolitan areas (see definition below) or census agglomerations with an urban core population of 50,000 or more at time of 1996 Census. CTs are delineated by a committee of local specialists (such as planners, health and social workers and educators) in conjunction with Statistics Canada.</p> <p>The 2003 data banks contain 4,730 areas coded as level of geography 61, based on 2001 Census.</p>
51	Economic Region	<p>An economic region is a grouping of complete census divisions (see definition below) with one exception in Ontario. Economic regions (ERs) are used to analyse regional economic activity. Within the province of Quebec, ERs are designated by law. In all other provinces, they are created by agreement between Statistics Canada and the provinces concerned. Prince Edward Island and the territories each consist of one economic region.</p> <p>The 2003 databanks contain 76 areas coded as level of geography 51, based on 2001 Census.</p>
42	Census Agglomeration	<p>The general concept of a census agglomeration (CA) is one of a very large urban area, together with adjacent urban and rural areas that have a high degree of economic and social integration with that urban area. CAs have an urban core population of at least 10,000, based on the previous census.</p> <p>The 2003 databanks contain 109 areas coded as level of geography 42, based on 2001 Census.</p>

[Next](#)

Level of Geography	Name	Description
41	Census Metropolitan Area	<p>The general concept of a census metropolitan area (CMA) is one of a very large urban area, together with adjacent urban and rural areas which have a high degree of economic and social integration with that urban area. CMAs have a population of at least 100,000 based on the previous census. Once designated a CMA, the area remains so even if the population falls below 100,000.</p> <p>The 2003 databanks contain 28 areas coded as level of geography 41, based on 2001 Census.</p>
31	Federal Electoral District	<p>A federal electoral district (FED) refers to any place or territorial area represented by a member of Parliament elected to the House of Commons. There are 308 FEDs in Canada according to the 2003 Representation Order. The Representation Order is prepared by the Chief Electoral Officer describing, naming and specifying the population of each electoral district established by the Electoral Boundaries Commission and sent to the Governor in Council.</p> <p>The 2003 databanks contain 308 areas coded as level of geography 31, based on 2001 Census.</p>
21	Census Division	<p>A census division (CD) is a group of neighbouring municipalities joined together for the purposes of regional planning and managing common services (such as police or ambulance services). A CD might correspond to a county, a regional municipality or a regional district.</p> <p>The 2003 databanks contain 288 areas coded as level of geography 21, based on 2001 Census.</p>

## Pricing: Standard Tables

Pricing of small area data is determined according to the number of tables, the levels of geography and the number of geographic areas required. All prices below are subject to change without notice and do not include GST.

Choose from the following geographic units:

### Postal Areas:

Forward sortation areas (FSAs)  
Rural postal codes (RPCs)  
Cities

Postal walks

### Census Areas:

Census divisions (CDs)  
Census agglomerations (CAs)  
Census metropolitan areas (CMAs)  
Economic regions (ERs)  
Federal electoral districts (FEDs)  
Census tracts (CTs)

Tables showing **FSAs, RPCs, Cities, CDs, CAs, CMAs, ERs or FEDs** are priced using the following standard formula:

\$ 60	Flat fee (retrieval and delivery)
Add \$ 1.15	Per table per area for the first 100 areas
Add \$ 0.0575	Per table per area thereafter

### Pricing Example:

As mentioned above, the pricing starts at a base price of \$60. Each table is priced at \$1.15 per table for each of the first 100 areas and at \$0.0575 per area for each additional. For example, choose any three tables for 250 specified FSAs. The price is calculated as follows:

$$\begin{aligned}
 & \$ 60.00 \text{ (flat fee) +} \\
 & \$ 345.00 \text{ (3 tables * 100 FSAs * \$1.15) +} \\
 & \underline{\$ 25.88} \text{ (3 tables * 150 FSAs * \$0.0575) =} \\
 & \$ 430.88
 \end{aligned}$$

### Electronic Data Profiles:

Discounted [prices](#) are available when data are ordered for all higher-level geographic areas within Canada, a province or a territory.

- Families (18 tables)
- Seniors (5 tables)
- Individuals (8 tables)
- Migration Estimates (5 tables)
- RRSP and Investment Income (21 tables)
- Charitable Donors (3 tables)

## Electronic Data Profiles

<i>Prices include the \$60 setup fee. Prices include Excel and/or CSV tables, User's Guides and record layouts (provided in electronic format only)</i>						
<b>Geography</b>	<b>Families (18)</b>	<b>Seniors (5)</b>	<b>Individuals (8)</b>	<b>Migration<sup>1</sup> Estimates (5)</b>	<b>RRSP &amp; Investments<sup>2</sup> (21)</b>	<b>Donors<sup>2</sup> (3)</b>

*Notes:*

1 – Tables available for CDs and CMAs only

2 – Tables available for postal areas, CDs, CMAs and FEDs.

Tables showing **postal walks** are priced using the following standard formula:

\$ 150	Flat fee (retrieval and delivery)
Add \$ 10	Per table per FSA (showing all postal walks in each FSA)

**Pricing Example:**

As mentioned above, the pricing starts at a base price of \$150. Each table is priced at \$10 per FSA. For example, choose four tables for postal walks in 12 specified FSAs. The price is calculated as follows:

$$\begin{array}{r} \$ 150.00 \text{ (flat fee) +} \\ \underline{\$ 480.00} \text{ (4 tables * 12 FSAs * \$10) =} \\ \$ 630.00 \end{array}$$

---

**All postal walks in a province or territory:**

Discounted prices are available when data are ordered for all postal walks within Canada, a province or territory. Rates are determined according to the number of tables and the geographic region requested.

[Price Group A](#): Tables from Families, Seniors, Neighbourhood Income and Demographics, Labour Income Profiles and Economic Dependency Profiles

[Price Group B](#): Tables from RRSP Contributors, RRSP Contribution Limits, Canadian Savers, Canadian Investors, Canadian Investment Income, Canadian Taxfilers, Canadian Capital Gains and Charitable Donors

---

**All postal walks in a census metropolitan area:**

Rates are determined according to the number of tables and the census metropolitan area requested.

[Price Group C](#): All tables (excluding Migration Estimates)

Tables showing **census tracts** are priced using the following standard formula:

\$ 150	Flat fee (retrieval and delivery)
Add \$ 10	Per table per CT

**Pricing Example:**

As mentioned above, the pricing starts at a base price of \$150. Each table is priced at \$10 per CT. For example, choose four tables for postal walks in 12 specified FSAs.

The price is calculated as follows:

$$\begin{array}{r} \$ 150.00 \text{ (flat fee) +} \\ \underline{\$ 480.00} \text{ (4 tables * 12 FSAs * \$10) =} \\ \$ 630.00 \end{array}$$

---

**All census tracts in a province or territory:**

Discounted prices are available when data are ordered for all census tracts within Canada, a province or territory. Rates are determined according to the number of tables and the geographic region requested.

[Price Group D](#): Tables from Families, Seniors, Neighbourhood Income and Demographics, Labour Income Profiles and Economic Dependency Profiles

---

**All census tracts in a census metropolitan area or census agglomeration:**

Discounted prices are available when data are ordered for all census tracts within a census agglomeration or census metropolitan area. Rates are determined according to the number of tables and the census area / census metropolitan area requested.

[Price Group E](#): Tables from Families, Seniors, Neighbourhood Income and Demographics, Labour Income Profiles and Economic Dependency Profiles

**Pricing: Historical Data**

Savings are available when you order more than one year of data at once. Data for the most current year are regular price. Data for previous years are priced at **30%** of the current year price. This 70% discount applies to standard products only.

**Pricing Example:**

Your order consists of three tables for 250 FSAs in specified cities. In addition to the 2003 data, you are requesting data for 2000, 2001 and 2002. The price is calculated as follows:

**Current Data:**

\$ 60.00 (flat fee) +  
\$ 345.00 (3 tables \* 100 FSAs \* \$1.15) +  
\$ 25.88 (3 tables \* 150 FSAs \* \$0.0575) =  
\$ 430.88

**Historical Data:**

\$ 387.80 (3 years \* 0.3 \* \$430.88)

**Total:**

\$ 818.68

## END-USE LICENCE AGREEMENT

### COPYRIGHT

The Government of Canada (Statistics Canada) is the owner or a licensee of all intellectual property rights (including copyright) in this data product. In consideration of your payment of the requisite fee, you (hereinafter referred to as the "licensee") are granted a non-exclusive, non-assignable and non-transferable licence to use this data product subject to the terms below. This licence is not a sale of any or all of the rights of the owner(s).

### TERMS OF USE

1. All copyright and proprietary notices and all conditions of use associated with the data product must be communicated to all users of the data product.
2. The licensee shall not transfer this data product to or store the data product in any electronic network for use by more than three (3) users unless it obtains prior written permission from Statistics Canada and pays any additional fees.
3. The licensee shall not lend, rent, lease, sub-licence, transfer or sell any part of the data product nor any right granted under this agreement to any person outside the licensed organisation or to any other organisation.
4. The licensee shall not disassemble, decompile or in any way attempt to reverse engineer any software provided as part of the data product.
5. The licensee shall not use any part of the data product to develop or derive any other data product or data service for distribution or commercial sale.
6. The licensee is granted reasonable rights of use of the content of this data product only for personal, corporate or public policy research, as well as for educational purposes. This permission includes the use of the content in analyses and the reporting of results and conclusions, including the citation of limited amounts of supporting data extracted from the data product in such documents. In such cases, the source of the data must be acknowledged in all such documents and communications by providing the following source citation at the bottom of each table and graph:  
*Source (or "Adapted from," if appropriate): Statistics Canada, name of product, catalogue number of product, reference date of product.*
7. The Licensee shall obtain approval from Statistics Canada, before publishing any significant volumes of material extracted from the data product in any medium.
8. Any violation of this licence renders it void and of no effect. This agreement will terminate automatically without notice if the licensee fails to comply with any term of this agreement. In the event of termination, the licensee must immediately return the data product to Statistics Canada or destroy it and certify this destruction in writing to Statistics Canada.

### WARRANTIES AND DISCLAIMERS

This data product is provided 'as-is,' and Statistics Canada makes no warranty, either express or implied, including but not limited to, warranties of merchantability and fitness for a particular purpose. In no event will Statistics Canada be liable for any direct, special, indirect, consequential or other damages, however caused.

### ACCEPTANCE OF TERMS

It is *YOUR RESPONSIBILITY* to ensure that your use of this data product complies with these terms and to seek prior written permission from Statistics Canada for any uses not permitted or not specified in this agreement. Any infringement of Statistics Canada's rights may result in legal action.

**ANY USE WHATSOEVER OF THIS DATA PRODUCT SHALL CONSTITUTE YOUR ACCEPTANCE OF THE TERMS OF THIS AGREEMENT. ANY VIOLATION OF THESE TERMS MAY RESULT IN TERMINATION OF THIS LICENCE.**
