#### Housing starts lose steam

- Single-detached housing starts in the Windsor Census Metropolitan Area (CMA) were off less than 2 per cent in the third quarter of 2003 to 477 units compared to the same period a year earlier.
- The third quarter's starts activity, while slightly lower is still on par with third quarter activity in 2001 and 7 per cent above the ten-year third quarter average of 446 homes. The seasonally adjusted trend is upward between Q2 and Q3 2003.
- Single-detached starts in the City of Windsor fell by 16 per cent to 225 units in the third quarter. This was partially offset by a strong showing in multiple construction of 111 units versus 87 units in third quarter 2002, for a decline in total starts activity of 6 per cent. Lakeshore, Amherstburg and Essex

submarkets all showed an increase in single starts in the third quarter however only Lakeshore and Amherstburg have gains year-to-date.

- By the end of the third quarter employment growth in the Windsor CMA had slowed and was only 1.5 per cent above year earlier levels. the smallest gain in 15 months. The slowdown in the labour force growth was even greater resulting in a drop of the unemployment rate to 6.9 per cent.
- Total starts were up 1.5 per cent on a year-over-year basis during the third quarter in 2003, but down 1.9 per cent for the first nine months of the year.
- The supply of new single detached homes completed and available for sale has increased slightly to 13 units, following strong sales activity in the third quarter. In the third

quarter 509 homes were absorbed, just off the record of 522 homes absorbed in the third quarter of 1998.

- Low borrowing costs have enabled people to buy larger homes. As such the average price of new homes completed and sold in the third quarter rose 12.8 per cent to \$215,870 compared to year earlier levels. Windsor City has finally broken through the \$200,000 price ceiling reaching \$201,420.
- Consumer confidence remains solid as demand for new homes priced over \$250,000 rose to 23.1 per cent of all units completed and absorbed in the third guarter.

#### Resale Market

## Demand for resale homes surges in Windsor during third quarter

- •The pace of sales surged ahead in the third quarter of the Windsor-Essex County Real Estate Board jumping to 1,517 units or a 21 per cent gain above third quarter 2002 activity. Sales were buoyed by continuing low mortgage rates and stable employment.
- •An all time high of 601 sales for the month of July contributed to the outstanding performance. This was also only the third time that monthly sales surpassed the 600 unit sales threshold. Third quarter sales were also the third highest, coming behind 1985 and 1988 third quarter sales. On a seasonally adjusted basis, quarterly sales increased by 17 per cent in Q3 over Q2 to 1,517 sales which translates into over 6,000 sales annually, far above the 5,000 unit mark which represents a good year.
- •Homeowners, encouraged by activity and price growth over the last 18 months, listed their homes resulting in significantly more new listings in the third quarter. Third quarter 2003 new listings averaged 6 per cent higher than the same period in 2002. Even so the sales to new listings ratio jumped to 64 per cent, seller's market territory, versus the 58 per cent recorded in the third quarter of 2002 because of the increased sales pace.
- While sales continue to be brisk, the added supply has lessened the upward pressure on prices. The average price in the third quarter was \$152,547, up less than 1 per cent from third quarter 2002. This pace is settling down following monthly year over year increases averaging over 6 per cent in 2002.

### RENTAL MARKET SURVEY 2003

The rental market information you need as fast as you want it!

To suceed in today's market, you need the INFORMATION EDGE.

CMHC is the source for expert analysis and comprehensive data on the rental market in your community.

Rental Market Survey FastFaxes are available on November 26, 2003. In Ontario, 32 FastFaxes are available ginving summarized rental survey results. Only \$30 + gst.

The more comprehensive Rental Market Reports for 11 Ontario CMAs will be available for a cost of \$40 + gst.

To obtain more information or to order your Rental Market FastFaxes or Reports, please call 1-800-493-0059.

#### **Definitions**

- 1. Starts: refers to units where construction has advanced to a stage where full (100%) footings are in place. For multiple dwellings (semi-detached, row housing and apartments) the definition of a start applies to the structure or block of row units rather than to the project as a whole.
- 2. Under Construction: those units which have been started but which are not complete.
- 3. Completions Single-detached/semi-detached units: this generally is the stage at which all proposed construction work is complete. A unit may be completed at the 90% stage where the remaining work is largely cosmetic. Row housing/ Apartment: completions means that 90% or more of the dwelling units within a block of row units or an apartment structure are completed and ready for occupancy
- 4. Completed and Not Absorbed: all completed units of new construction (excluding model homes not available for sale) which have never been sold or leased.
- 5. Absorptions: the number of completed units (excluding model homes) that have been sold or leased.
- 6. Seasonally Adjusted (SA): Actual monthly (or quarterly) figures adjusted to remove normal seasonal variation.
- 7. Seasonally Adjust Annual Rates (SAAR): Seasonally adjusted monthly figures multiplied by 12 (or quarterly figures multiplied by 4) to reflect annualized levels of activity.
- 8. Definitions for CMA, NHPI, CPI, and Inflation Rate can be found in the Statistics Canada website http://www.statcan.ca

#### MAKING A MOVETOWARD SUSTAINABILITY

CMHC offers a wide cross-section of information products to consumers and the housing industry to allow for informed purchasing and decision-making. CMHC information products include publications on sustainability.

With the help of CMHC, consider sustainability when choosing the next neighbourhood to call your home. To order a copy of "Your Next Move: Choosing a Neighbourhood With Sustainable Features" and other research publications, call 1-800-668-2642 or click on www.cmhc-schl.gc.ca.

#### **Ontario Retirement Homes Report**

The 2003 issue of the Ontario Retirement Homes Report is now available. Order your report today! To order your copy contact Ontario Market Analysis at 1 800 493-0059. Remember, you can receive all our reports in electronic PDF format with coloured graphs.

Housing Now is published four times a year. An annual subscription to the Windsor Housing Now is \$55+ GST. The subscription also includes a 4-page Forecast Summary supplement included with the 1st and 3rd quarter Housing Now reports. For more information and to order, please call Ontario Market Analysis at 1 800 493-0059.

## SUMMARY

Canada Mortgage and Housing Corporation

ISSUE: FALL 2003

# New Home Market Housing starts to edge down in 2004

Moderate increases in borrowing rates in 2004 will impact homebuying in spite of continued job growth, resulting in no increase in single detached housing starts in the Windsor Census Metropolitan Area (CMA). The rapid pace of job creation in 2002 and early 2003 has begun to moderate. During the first three quarters of 2003 single starts in the Windsor CMA have fallen by 4 per cent from comparable figures in 2002. By year end single starts will be 7.3

per cent lower, totalling 1,600 units. While slightly lower, 2003 is part of a 5 year period of strong housing starts in the Windsor area. Factors contributing to this strong activity include rising incomes, a vibrant resale market with limited number of listings from which to choose, low mortgage rates, job growth and strong in migration.

Increasing popularity as a move-down option will once again lead to over 200 semi-detached housing starts this year

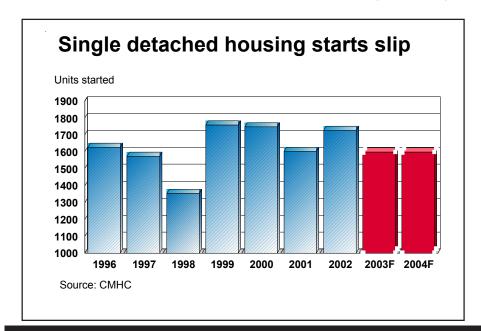

- 2 Resale Market
- 3 Economic Overview
- **4 Forecast Summary**

and just under 200 in 2004. The average price of a completed and sold semi-detached home hit \$161,185 in the third quarter; up 4 per cent from third quarter 2002 average prices, indicative of a product in demand.

Construction of homeownership apartments and townhouses will decrease 18 per cent to 340 this year but recover to 410 starts in 2004 with the bulk as freehold townhomes. A growing 55+age group segment will continue to look towards this type of maintenance-free accommodation.

The tight resale market has encouraged many homebuyers to look to the new home market to satisfy their needs. Rising incomes have become evident in the higher prices achieved in the new home market. In 2003 the average price

of a new home will reach \$206,000 an increase of 7.6 per cent and the first time to break through the \$200,000 ceiling. In 2004 this will rise a further \$6,000. However, price increases are the result of larger, upper end homes as the New Housing Price Index in Windsor shows less than a one per cent annual increase. The average price of a new home completed and sold in the Windsor CMA surged ahead in the second and third quarter of this year reaching \$215,870, a jump of 12.8 per cent over the third quarter of 2002. Homes absorbed in the \$250,000+ price range have grown in market share representing 23 per cent in the third quarter versus 15.3 per cent last year. The gain was at the expense of homes priced under \$150,000 which fell to 6.9 per cent in the first three quarters from 20.8 per cent in the first three quarters of 2002.

# Resale Market Equity gains entice listings

At the beginning of the year the Windsor-Essex resale market struggled to keep pace with last year's sales activity. A very active summer made up for a slow spring and was able to propel sales 7 per cent ahead by the end of the third quarter of 2003. This pace will continue and sales will finish the year at 5,300 units.

Several years of strong sales have satisfied much of the built up demand accumulated during the late 90's. This fact combined with interest rate increases in 2004 will result in a 4 per cent pull back in sales activity. Higher mortgage rates impact the carrying cost of a home and decrease the number of people that can afford to purchase. The carrying cost on the average priced home in Windsor was \$656 in September. The carrying cost will rise as borrowing charges

increase in 2004. Despite a decline in 2004, the resale market is expected to achieve the second highest level in the last 14 years.

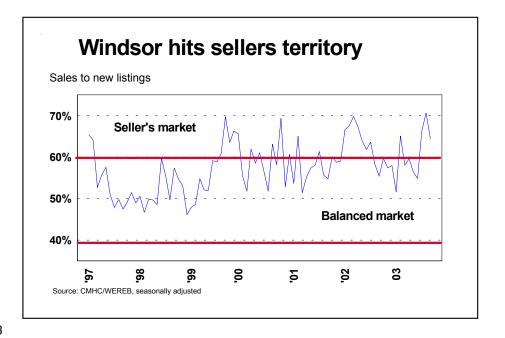

The market crossed over into a seller's market in July due to the low level of new listings available with a sales to new listings ratio just above the 60 per cent mark. Following an average price increase of 6.3 per cent to \$147,218 in 2002, the increased supply will result in an average price increase of 3.9 per cent this year.

Owners have responded to rising equity by listing their homes for sale. Active listings have continued to rise throughout the year. At the end of the September 2,657 homes were available for sale. This is the highest number for the month of September since 1993. As owners continue to list their homes the market will return to a balanced position by the first

quarter of 2004. Prices will continue to increase in 2004, lagging the sales peak, reaching \$158,000.

# RENTAL MARKET Rental Market oversupplied in 2003

Windsor's apartment vacancy rate hit 3.9 per cent in October 2002 from 1.9 per cent two years before and is expected to come in slightly higher in 2003. A large number of renters entered the homeownership market enticed by historically low mortgage rates. Both the resale and new home markets were hot in 2003. Many of these purchasers came from the rental market

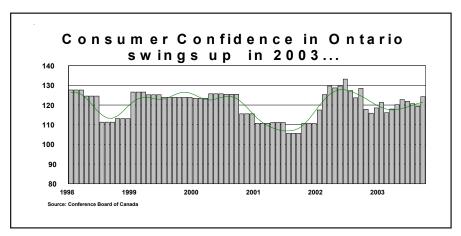

resulting in an increased supply of rental units available. The census also revealed that over 40% of young adults aged 20-29 are choosing to remain in the family home. This indicates a shift from the traditional life cycle model where young adults rent first before entering home ownership. Now young adults are saving more equity and able to bypass the rental option all together:

Despite the fact of very little rental construction vacancies continue to rise. The impact of the double cohort of students was not as severe as anticipated. Many students decided to postpone post secondary education and the addition of new dormitory beds in Windsor more than met any increased demand.

On the supply side there have been no rental completions in 2003 and no units under construction. Less than 100 units are expected to start in 2004.

Due to the rising vacancy rate the pace of average rental increases for 2 bedroom apartment units will slow to 1.4 per cent to in 2003 following a 3.7 per cent rise in 2002. Average 2 bedroom apartment rents are expected to hit \$776.

# **Economic Overview**

The Windsor labour market continued to expand albeit at a slower pace in 2003. Unfortunately negotiations for a new Daimler Chrysler plant have been shelved and the DCX truck plant on Pillette Road closed in June impacting about 500 net full time jobs.

Employment grew by 2.7 per cent in 2002 and is on track to gain another 2.6 per cent in 2003 and 2.8 per cent in 2004. This level of job growth has lured approximately 5,000 people to the area last year. Stronger growth in full-time versus part time employment will result in ongoing demand for housing in the Windsor-Essex area.

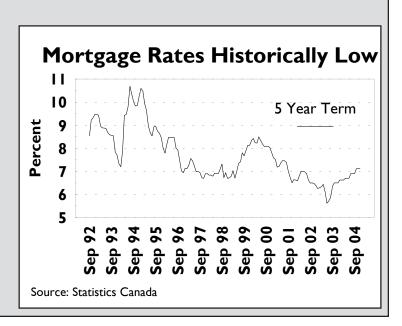

# Consumer confidence remains high

After soaring to a 14 year high in the summer of 2002, consumer confidence in Ontario took a hit from geopolitical and health concerns. Since then confidence levels have moved higher, reaching a one year high in September. While jobs give people the means to buy and low mortgage rates keep home ownership affordable, consumer confidence is a key indicator in peoples willingness to follow through with a purchase. Consumer confidence is expected to remain high in the near future, thereby continuing to support the strong housing market.

# Mortgage rates on the rise - still low by historical standards

A decelerating inflation rate and lingering trade, health, and geopolitical risks will keep Canadian interest and mortgage rates low in the near future. Short-term Canadian interest rates are forecast to remain low over the next few months prior to rising 25-75 basis points in 2004. Long-term yields are forecast to continue their upward trend later this year and rise by 25-50 basis points both this year and in 2004.

One, three and five-year posted closed mortgage rates are expected to be in the 4.25-5.25, 5.25-6.25, and 6.00-6.75 percent range respectively this year. The mortgage rates are forecast to rise by 0.50-0.75 percent next year. Discounts from posted rates will be in the 0.5-1.5 percent range.
