HIGHLIGHTS

Receipts for livestock farmers continued to rise in the first nine months of 2001 while crop receipts grew marginally after falling for four consecutive January-to-September periods.

However, the financial outcome that may result from the adverse weather during the 2001 growing season are only starting to be reflected in the cash receipts released today, which may not be indicative of the final results for the year. The impact of this year's crop production on farmers' marketings will be seen more in the final quarter of 2001 and the first half of 2002.

POINTS SAILLANTS

Les recettes des éleveurs de bétail ont poursuivi leur progression au cours des neuf premiers mois de 2001, tandis que les recettes des cultures ont connu une légère augmentation, après avoir fléchi pendant quatre périodes de janvier à septembre consécutives.

Toutefois, les données sur les recettes monétaires dans le présent communiqué ne font que commencer à faire état des résultats financiers pouvant découler des conditions climatiques défavorables qui ont marqué la saison de croissance de 2001. Ces données pourraient ne pas représenter les résultats définitifs pour l'année. Les effets de la production des cultures de cette année sur les ventes des agriculteurs se verront davantage dans le dernier trimestre de 2001 et la première moitié de 2002.

NOVEMBER 2001

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses and governments. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

NOVEMBRE 2001

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises et les administrations canadiennes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

In total, farmers received \$26.6 billion from agricultural commodities and program payments in the first nine months of 2001. This was a 10.0% increase from the same period last year, and an 18.2% increase over the average for the previous five years, from 1996 to 2000. Farm cash receipts rose in every province, the largest percentage gain (+17.3%) in Manitoba.

Livestock receipts, boosted by strong cattle and hog markets, rose for the third consecutive January-to-September period to \$14.0 billion. This was an 11.6% increase over the same period last year and a 26.0% increase from the previous five-year average.

Cash receipts from crops increased 2.5% to \$10.0 billion, the first increase in five years during the January-to-September period. However, crop receipts remained 2.8% below the previous five-year average, as lower deliveries for some major commodities offset gains in prices.

In addition, cash receipts provide an overall measure of farm businesses' gross revenue. They do not account for expenses incurred by farmers. Cash receipts can vary widely for individual farm operations because of several factors, including commodities produced, prices and weather.

Program payments reached a record \$2.6 billion for the first nine months of the year. This was a 38.0% increase over the same period in 2000, and more than double the previous five-year average. The majority of this increase can be attributed to higher payments from income disaster programs and crop insurance, coupled with \$190 million from one-time program payments in Ontario.

Strong beef demand pushes up livestock prices

Cattle and calf receipts reached \$5.6 billion during the first nine months of 2001, up 14.9% over the same period in 2000 and 35.3% above the previous five-year average. Continued strong demand for beef has helped to push prices up 10.1% compared to the first nine months of 2000.

Receipts from slaughter cattle grew as price increases more than offset a decrease in the number of head sold. Revenue from cattle sold abroad rose 42.0%, the result of increased marketings and higher prices.

Hog receipts grew 17.7% to \$3.0 billion, 42.7% over the previous five-year average for the January-to-September period. Most of the increase was due to revenue generated from domestic hog slaughter as both prices and marketings increased. Receipts from sales of hogs exported internationally, mostly to the United States, rose 23.7%.

Au total, les agriculteurs ont tiré 26,6 milliards de dollars des produits agricoles et des paiements de programme au cours des neuf premiers mois de 2001. Il s'agit d'une hausse de 10,0 % par rapport à la même période de l'an dernier, et d'une augmentation de 18,2 % par rapport à la moyenne des cinq années précédentes, soit de 1996 à 2000. Les recettes monétaires agricoles ont augmenté dans toutes les provinces, la hausse la plus importante en pourcentage (+17,3 %) survenant au Manitoba.

Les recettes du bétail, ayant profité de la vigueur des marchés des bovins et des porcs, ont crû pour la troisième période de janvier à septembre consécutive, atteignant 14,0 milliards de dollars. Il s'agissait d'une hausse de 11,6 % par rapport à la même période de l'an dernier et d'une augmentation de 26,0 % par rapport à la moyenne quinquennale précédente.

Les recettes monétaires des cultures ont monté de 2,5 % pour atteindre 10,0 milliards de dollars, soit une première augmentation en cinq ans au cours de la période de janvier à septembre. Cependant, les recettes des cultures étaient de 2,8 % inférieures à la moyenne quinquennale précédente, la baisse des livraisons pour certains des principaux produits ayant annulé la hausse des prix.

En outre, les recettes monétaires constituent une mesure globale du revenu brut des entreprises agricoles. Elles ne tiennent pas compte des dépenses engagées par les agriculteurs. Les recettes monétaires peuvent varier considérablement d'une exploitation agricole à l'autre en raison de plusieurs facteurs, dont les productions élevées ou cultivées, les prix et les conditions climatiques.

Les paiements de programme ont atteint un record de 2,6 milliards de dollars dans les neuf premiers mois de l'année. Il s'agissait d'une hausse de 38,0 % comparativement à la même période de 2000, et de plus du double de la moyenne quinquennale précédente. La majeure partie de cette progression peut être attribuée à l'augmentation des paiements en vertu des programmes d'aide en cas de catastrophe liée au revenu et de l'assurance-récolte, qui s'ajoutent aux 190 millions de dollars versés en vertu de programmes à paiement unique en Ontario.

La vigueur de la demande de bœuf propulse les prix du bétail

Les recettes des bovins et des veaux ont atteint 5,6 milliards de dollars au cours des neuf premiers mois de 2001, en hausse de 14,9 % par rapport à la même période de 2000 et de 35,3 % par rapport à la moyenne quinquennale précédente. La vigueur soutenue de la demande de bœuf a contribué à faire bondir les prix de 10,1 % par rapport aux neuf premiers mois de 2000.

Les recettes des bovins d'abattage ont progressé, car la hausse des prix a largement compensé la diminution du nombre de bovins vendus. Les revenus des bovins vendus à l'étranger ont augmenté de 42,0 %, conséquence de l'augmentation des ventes et des prix.

Les recettes porcines ont crû de 17,7 % pour atteindre 3,0 milliards de dollars, soit 42,7 % de plus que la moyenne quinquennale précédente pour la période de janvier à septembre. La majeure partie de l'augmentation s'explique par les revenus générés par l'abattage de porcs au Canada, à la faveur d'une augmentation des prix et des ventes. Les recettes des ventes de porcs exportés à l'étranger, et surtout aux États-Unis, ont monté de 23,7 %.

Receipts in the supply managed sectors rose during the first nine months of 2001. Total revenue from milk and cream grew 2.7% to \$3.1 billion, primarily the result of higher prices.

Crop receipts halt four years of decline as prices rise

Despite lower marketings of major grains and oilseeds during the third quarter of 2001, crop receipts increased for the first time in five years in the January-to-September period due to price gains.

After two years of decline, canola receipts grew 18.0% to \$1.3 billion as prices rose 15.3% in tandem with a 2.4% increase in deliveries. This was still below the previous five-year average of \$1.4 billion. Sales to China early this year contributed greatly to the overall rise in deliveries for the first half of 2001. But deliveries fell in the third quarter as production hit its lowest level in 10 years.

Durum wheat receipts rose 16.0% to \$567 million in the first nine months of 2001 compared to 2000. An increase in Canadian Wheat Board (CWB) payments, along with stronger prices more than offset a slight decrease in marketings. However, durum receipts still remained 15.2% below the previous five-year average.

Barley receipts were \$522 million, up 16.8% over the first nine months of 2000 but 5.9% below the previous five-year average. Prices were up 23.1%, while deliveries remained virtually unchanged and CWB payments fell 14.1%. Tight supplies of feed barley in the western provinces pushed prices up.

Conversely, corn receipts fell for the second consecutive January-to-September period, to \$361 million. A decline in deliveries more than offset the increase in prices. Late planting, a cool summer and wet conditions at harvest led to a 25.5% decline in production in 2000, following records set in 1998 and 1999.

Receipts for wheat excluding durum fell to \$1.9 billion; deliveries declined 13.9%, while prices rose 11.6%, and CWB payments remained virtually unchanged. Lower production both last year and this year resulted in reduced deliveries in 2001 and lower exports.

Program payments reach record levels

Most of the substantial increase in program payments during the first nine months of 2001 can be attributed to higher payments in income disaster programs and crop insurance, accompanied by the additional \$190 million from one-time program payments implemented in Ontario.

Les recettes dans les secteurs assujettis à la gestion de l'offre ont augmenté au cours des neuf premiers mois de 2001. Les revenus totaux tirés du lait et de la crème ont progressé de 2,7 % pour atteindre 3,1 milliards de dollars, conséquence surtout d'une hausse des prix.

Une hausse des prix met fin à quatre années de recul pour les recettes des cultures

Malgré la diminution des livraisons des principales céréales et des principaux oléagineux au cours du troisième trimestre de 2001, les recettes des cultures ont augmenté pour la première fois en cinq ans au cours de la période de janvier à septembre, en raison d'une hausse des prix.

Après deux ans de recul, les recettes du canola ont crû de 18,0 % pour atteindre 1,3 milliard de dollars, les prix ayant augmenté de 15,3 %, parallèlement à l'accroissement de 2,4 % des livraisons. Cela reste néanmoins en deçà de la moyenne quinquennale précédente de 1,4 milliard de dollars. Les ventes à la Chine au début de l'année ont contribué pour beaucoup à la progression d'ensemble des livraisons pour la première moitié de 2001. Toutefois, les livraisons ont fléchi au troisième trimestre et la production est alors tombée à son plus bas niveau en dix ans.

Les recettes du blé dur ont monté de 16,0 % pour atteindre 567 millions de dollars au cours des neuf premiers mois de 2001 comparativement à 2000. Une augmentation des paiements de la Commission canadienne du blé (CCB), conjuguée à un raffermissement des prix, a plus que compensé le léger repli des écoulements. Cependant, les recettes du blé dur demeuraient de 15,2 % inférieures à la moyenne quinquennale précédente.

Les recettes de l'orge ont été de 522 millions de dollars, soit 16,8 % de plus qu'au cours des neuf premiers mois de 2000, mais 5,9 % de moins que la moyenne quinquennale précédente. Les prix étaient en hausse de 23,1 %, tandis que les livraisons sont demeurées relativement inchangées et que les paiements de la CCB ont fléchi de 14,1 %. Le resserrement des approvisionnements d'orge fourragère dans les provinces de l'Ouest a propulsé les prix.

Inversement, les recettes du maïs ont fléchi pour la deuxième période de janvier à septembre consecutive, tombant à 361 millions de dollars. Un recul des livraisons a plus qu'annulé l'augmentation des prix. L'ensemencement tardif, un été frais et la pluie au moment de la récolte ont provoqué une baisse de production de 25,5 % en 2000, après les records établis en 1998 et 1999.

Les recettes du blé, sauf le blé dur, sont tombées à 1,9 milliard de dollars; les livraisons ont baissé de 13,9 %, tandis que les prix ont monté de 11,6 %, et que les paiements de la CCB sont demeurés relativement inchangés. La baisse de production, l'an dernier comme cette année, a entraîné des diminutions des livraisons en 2001 ainsi que des exportations.

Les paiements de programme atteignent des niveaux records

La majeure partie de l'augmentation substantiel des paiements de programme au cours des neuf premiers mois de 2001 peut être attribuée à l'augmentation des paiements d'assurance-récolte et des programmes d'aide en cas de catastrophe liée au revenu, accompagnée des 190 millions de dollars supplémentaires venant des programmes à paiement unique mis en œuvre en Ontario.

Payments for income disaster programs, comprised of Agricultural Income Disaster Assistance program (AIDA), Canadian Farm Income Program (CFIP) and their related provincial disaster programs, reached \$532 million in the first nine months of 2001, double the same period last year.

Crop insurance payments rose to \$426 million, an 80.5% increase over the first nine months of 2000. This increase can be attributed to both the poor growing conditions experienced in 2000 and 2001, together with increases in the acreage of the crops insured.

Ontario producers received \$190 million through the Ontario Grain Stabilization Payment, Canada-Ontario Grains and Oilseed Payment and the Canada-Ontario Edible Horticulture Payment. These one-time programs were introduced to help offset the income losses seen in 2000 due to inclement weather and severely depressed commodity prices.

Farmers withdrew \$324 million from the government portion of the Net Income Stabilization Account (NISA) between January and September, down 3.9%.

Note to users: In the past, Statistics Canada used the assumption that payments (or "liquidations") of deferred grain and oilseed receipts (or "deferments") from the crops sold in one calendar year were all received in January of the following year. After conducting an examination of records provided by elevators, it was established that it was true for 90 to 95% of the cases. The series were revised accordingly, starting with 1998 data, to record more accurately in which month the liquidations occurred.

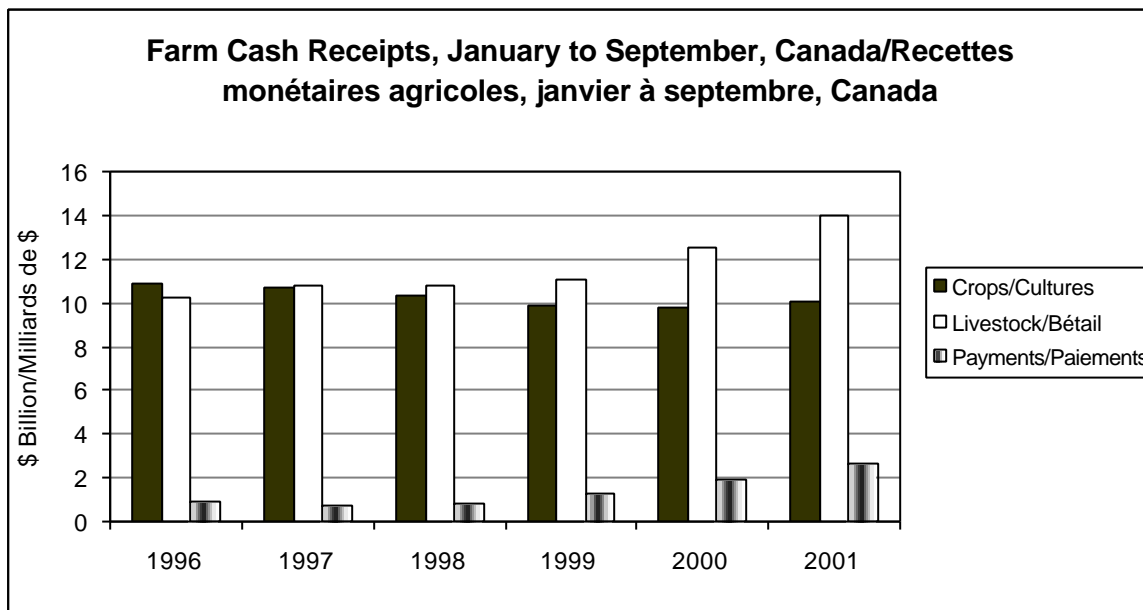

Les paiements pour les programmes d'aide en cas de catastrophe liée au revenu, formés du Programme d'aide en cas de catastrophe liée au revenu agricole (ACRA), du Programme canadien du revenu agricole (PCRA) et des programmes provinciaux connexes, ont atteint 532 millions de dollars au cours des neuf premiers mois de 2001, soit deux fois plus que pour la même période de l'an dernier.

Les paiements d'assurance-récolte ont atteint 426 millions de dollars, ce qui représente une hausse de 80,5 % par rapport aux neuf premiers mois de 2000. Cette progression peut être attribuée à la fois aux mauvaises conditions de croissance éprouvées en 2000 et 2001, ainsi qu'aux augmentations des superficies des cultures assurées.

Les producteurs de l'Ontario ont reçu 190 millions de dollars au titre du Paiement relatif à la stabilisation du revenu des producteurs de céréales de l'Ontario, du Paiement dans le cadre du programme Canada-Ontario des céréales et des oléagineux et du Paiement dans le cadre du programme Canada-Ontario des produits horticoles comestibles. Ces programmes à paiement unique visaient à compenser les pertes de revenu subies en 2000 du fait d'une combinaison de mauvais temps et d'effondrement des prix des produits.

Les agriculteurs ont retiré 324 millions de dollars de la partie gouvernementale du Compte de stabilisation du revenu net (CSRN) de janvier à septembre, soit 3,9 % de moins.

Note aux utilisateurs: Dans le passé, Statistique Canada s'appuyait sur l'hypothèse selon laquelle les paiements (ou la réalisation) des recettes différées pour les récoltes de céréales et d'oléagineux vendues au cours d'une année civile donnée étaient encaissés entièrement en janvier de l'année suivante. Un examen des dossiers fournis par les silos a démontré que cette hypothèse était exacte dans une proportion de 90 à 95 % des cas. Les séries ont été révisées en conséquence, en débutant avec les données de 1998, afin de comptabiliser de façon plus exacte dans quel mois les recettes ont été réalisées.

SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

This publication was prepared under the direction of:

Paul Murray, Chief
Farm Income and Prices Section

Introduction

This report presents, by commodity and by province, estimates of farm cash receipts from farming operations. Quarterly farm cash receipts are also available from 1971 to date in machine readable form through CANSIM II (Canadian Socio-Economic Information Management System) in table 20002. Users interested in accessing data via CANSIM should contact the Marketing Division, Statistics Canada, R.H. Coats Building, Ottawa, Ontario K1A 0T6 (telephone: (613) 951-8200).

Concepts

Farm cash receipts represent the cash income received from the sale of agricultural commodities as well as direct program payments made to support or subsidize the agriculture sector.

The farm cash receipts series includes agricultural products such as field crops, vegetables, fruits, floriculture and nursery products, sod, maple and forest products, livestock, dairy products, poultry, eggs, wool, fur and honey.

The direct program payments to producers included in farm cash receipts represent the amounts paid to individuals involved in agricultural production. The payments related to current agricultural production include subsidies to encourage production or to compensate producers for low market returns, payments to stabilize incomes and payments to compensate producers for crop or livestock losses caused by extreme climatic conditions, disease or other reasons.

The primary reason for compiling farm cash receipts is to estimate, on a provincial basis, the agriculture sector's contribution to gross domestic product. Consequently, all inter-farm sales within a province are excluded from farm cash receipts estimates as their inclusion would result in double counting. It should be noted, however, that farm-to-farm sales between provinces are included as are all sales outside the sector. Excluding inter-farm sales within a province means that farm cash receipts cannot be used as a measure of the gross output of the agriculture sector.

Farm cash receipts are estimated on a cash basis and represent the value of sales when they occur, that is, when ownership first changes hands. Thus, sales are only recorded when cash disbursements have actually occurred. The prices used to value transactions include any bonuses and premiums which can be attributed to specific commodities, but exclude fees deducted before the producer is paid (e.g. storage, transportation, marketing or administrative costs).

Introduction

Le présent bulletin comprend les estimations des recettes monétaires des entreprises agricoles, par produit et par province. Les recettes monétaires agricoles trimestrielles, pour la période allant de 1971 à ce jour, sont aussi disponibles sous forme lisible par machine dans CANSIM II (Système canadien d'information socio-économique) dans le tableau 20002. Les utilisateurs voulant obtenir des chiffres par l'intermédiaire de CANSIM peuvent communiquer avec la Division du marketing, Statistique Canada, immeuble R.-H.-Coats, Ottawa (Ontario) K1A 0T6 (téléphone : (613) 951-8200).

Concepts

Les recettes monétaires agricoles comprennent le revenu monétaire découlant de la vente de produits agricoles et les paiements directs de programmes au titre du soutien ou du financement du secteur agricole.

Au nombre des produits agricoles inclus dans la série des recettes monétaires agricoles, mentionnons les grandes cultures, les légumes, les fruits, les produits de floriculture et de pépinière, les produits de gazonnière, de l'éérable et forestiers, le bétail, les produits laitiers, la volaille, les œufs, la laine, la fourrure et le miel.

Les paiements directs versés aux producteurs en vertu de programmes et faisant partie intégrante des recettes monétaires agricoles comprennent les sommes accordées aux producteurs agricoles. Au nombre des paiements liés à la production agricole courante, on compte les subventions pour encourager la production ou pour dédommager les producteurs lorsque le produit des ventes est faible, les paiements de stabilisation du revenu et les paiements en vue de dédommager les producteurs pour les pertes de récoltes ou de bétail provoquées par des conditions climatiques extrêmes, les maladies ou d'autres raisons.

Le regroupement des recettes monétaires agricoles vise principalement à évaluer, sur une base provinciale, la contribution du secteur de l'agriculture au produit intérieur brut. Par conséquent, les ventes globales entre fermes dans une même province ne sont pas prises en compte dans les estimations des recettes monétaires agricoles étant donné que leur inclusion entraînerait un double comptage. Il faut toutefois noter que les ventes d'une exploitation à l'autre entre provinces sont incluses, de même que toutes les ventes à l'extérieur du secteur. L'exclusion des ventes entre fermes dans une même province signifie que les recettes monétaires agricoles ne peuvent servir de mesure de la production brute du secteur agricole.

Les recettes monétaires agricoles sont calculées selon la méthode de la comptabilité de caisse et elles représentent la valeur des ventes au moment où elles sont effectuées, c'est-à-dire au premier changement de propriété. Par conséquent, les ventes ne sont prises en compte que lorsqu'un débours a bel et bien été effectué. Les prix dont on se sert pour établir la valeur des transactions comprennent tout boni ou toute prime que l'on peut rattacher à des produits spécifiques, mais excluent les frais déduits avant que le producteur ne soit payé (par exemple: entreposage, transport, commercialisation ou frais d'administration).

In several cases, particularly where crops are concerned, producers receive a partial or an initial payment for their commodities at the time of sale. As the marketing of the crop progresses, an adjustment or final payment is made. These payments are only shown in cash receipts when producers receive the funds. Examples of such cases include Ontario Wheat Producers' Marketing Board (OWPMB) and Canadian Wheat Board (CWB) adjustment, interim and/or final payments for wheat, oats and barley. Oats ceased to be marketed through the CWB on July 31, 1989. Similar payment patterns also occur for sugar beets and dry beans.

Receipts from the sale of some agricultural products can be deferred. For example, producers in Western Canada have the option of deferring grain receipts to the next year. In order to be consistent with the cash basis for cash receipts, these deferrals are recorded when they are liquidated the following year. The amount deferred in a given year is recorded as an equal but negative amount. This is necessary to compensate for the fact that the amount deferred is included in the individual grain receipts.

All published commodity receipts represent receipts from the market. Thus, any subsidy or stabilization payment directed at a specific commodity is not included in the receipts for that commodity. In fact, all direct subsidies or payments to the agriculture sector are recorded separately.

Methods

Cash receipts are, for the most part, based on monthly marketings and prices of the various commodities. Direct program payments are based on data obtained from several sources on a monthly or quarterly basis.

Calculations of commodity cash receipts involve the use of many data sources which can vary by province and by commodity. Most of the prices for the monthly marketings are collected from administrative sources such as marketing boards, regulatory agencies and market information. Some prices are also provided by a monthly farm prices survey conducted by Statistics Canada. In all cases, the prices reflect those received by producers at the point when ownership first changes hands.

Monthly marketings are mostly obtained from administrative records of marketing boards, government agencies and private companies. Grain marketings, including durum wheat, wheat excluding durum, oats, barley, rye, flaxseed and canola for the Western provinces, are obtained from the Canadian Grain Commission.

Dans plusieurs cas, surtout dans celui des cultures, les producteurs reçoivent un paiement d'acompte ou un paiement partiel pour leurs produits au moment de la vente. Aux étapes ultérieures de la mise en marché de la récolte, ils touchent des paiements d'ajustement de campagne ou des paiements définitifs. Ces derniers ne sont pris en compte au titre des recettes monétaires que lorsque les producteurs reçoivent les fonds. Mentionnons comme exemple les paiements d'ajustement, les paiements provisoires et/ou les paiements définitifs de la Commission ontarienne de commerce du blé (COCB) et de la Commission canadienne du blé (CCB) au titre du blé, de l'avoine et de l'orge. L'avoine n'est plus commercialisée par l'entremise de la CCB depuis le 31 juillet 1989. Des modes de paiement similaires ont également été établis pour ce qui est des betteraves à sucre et des haricots secs.

Les recettes découlant de la vente de certains produits agricoles peuvent être reportées. Par exemple, les producteurs de l'ouest du Canada ont le choix de reporter à l'année suivante les recettes découlant des céréales. Les recettes monétaires étant calculées selon la méthode de la comptabilité de caisse, ces reports ne sont enregistrés qu'au moment où ils sont réalisés l'année suivante. Pour une année donnée, le montant reporté est inscrit comme étant une somme égale mais négative. Cela permet de contrebalancer le fait que la somme reportée fait partie des recettes individuelles découlant des céréales.

Toutes les recettes découlant de produits qui sont diffusées représentent les recettes tirées du marché. Par conséquent, toute subvention ou tout paiement de stabilisation versé au titre d'un produit spécifique n'entre pas en ligne de compte dans les recettes calculées pour ce produit. En fait, toutes les subventions ou paiements directs au secteur agricole sont pris en compte séparément.

Méthodes

Généralement, les recettes monétaires sont fondées sur les mises en marché et les prix mensuels des divers produits. Les paiements directs de programmes sont établis en fonction des données tirées de plusieurs sources, sur une base mensuelle ou trimestrielle.

De nombreuses sources de données, qui varient selon la province et le produit, sont mises à profit dans le calcul des recettes monétaires découlant d'un produit. Pour ce qui est des mises en marché mensuelles, la plupart des prix sont recueillis auprès de sources administratives, notamment les offices de commercialisation et les organismes de réglementation, et de renseignements sur les marchés. Certains prix sont également tirés d'une enquête mensuelle sur les prix agricoles menée par Statistique Canada. Dans tous les cas, ces prix sont le reflet de ceux que touchent les producteurs au premier changement de propriété.

Les mises en marché mensuelles proviennent surtout des enregistrements administratifs des offices de commercialisation, des organismes gouvernementaux et des entreprises privées. Dans les provinces de l'Ouest, les mises en marché des céréales, y compris le blé durum, le blé (sans le blé durum), l'avoine, l'orge, le seigle, la graine de lin et le canola, sont fournies par la Commission canadienne des céréales.

In Eastern Canada, the data are either obtained from marketing boards and producer associations, based on historical marketing patterns or agreed upon in consultation with provincial specialists.

Marketings for crops such as corn, soybeans, tobacco, sugar beets and dry beans are obtained from marketing boards and associations as well as private companies.

Cash receipts estimates for potatoes, fruits, vegetables, honey, maple and forest products, and greenhouse and nursery products are obtained through various surveys or censuses conducted by Statistics Canada, the provinces or other federal and provincial departments or agencies. These departments and agencies are also a major source of marketing data for mustard seed, sunflower seed, lentils, canary seed, dry peas, forage and grass seed, and hay and clover.

Livestock marketings, including cattle, calves, hogs, sheep, lambs, hens and chickens, and turkeys, are mainly based on market information from Agriculture and Agri-Food Canada and provincial departments and agencies. Marketings of eggs are also obtained from these sources. In the case of dairy products, producers' marketings of milk and cream are obtained from regulatory agencies and private companies.

Although the farm cash receipts series covers many commodities, it is not exhaustive. There is a "miscellaneous" category for crops and another for livestock. The cash receipts in these two categories are based on the quinquennial Census of Agriculture in order to account for commodities that are not estimated individually.

Since cash receipts are estimated on a cash basis, any amounts received after the sale of a product, whether in the form of a final or an adjustment payment, will be shown when the cash is received rather than when it was earned. Several items fall into this category, including payments by the CWB and the OWPMB, as well as deferments and liquidations of grain receipts. The information for these payments are obtained directly from the administrative bodies involved.

Direct program payments are tabulated quarterly. The agencies responsible for the disbursement of payments under the various programs provide the data on a monthly, quarterly and, in some cases, an annual basis. Only payments directly provided to producers are included in the series. These include payments under the Farm Income Protection Act (for the Gross Revenue Insurance Plan and the Net Income Stabilization Account), the Crop Insurance Act, the Western Grain Stabilization Act, the Agricultural Stabilization Act, Tripartite Plans, Provincial Stabilization Programs, the Canadian Dairy Commission Act and those made under ad hoc government programs.

Dans l'est du Canada, les données proviennent des offices de commercialisation et des associations de producteurs et s'inspirent des schémas de commercialisation historiques, ou font l'objet d'une entente en consultation avec les spécialistes provinciaux.

Les mises en marché des cultures telles que le maïs, le soya, le tabac, la betterave à sucre et les haricots secs, sont fournies par les offices de commercialisation et les associations, de même que par les entreprises privées.

Les estimations des recettes monétaires au chapitre des pommes de terre, des fruits, des légumes, du miel, des produits de l'éclaircie et forestiers, et des produits de serre et de pépinière proviennent des diverses enquêtes ou recensements menés par Statistique Canada, les provinces ou les ministères ou organismes fédéraux et provinciaux. Ces ministères et organismes constituent également une importante source de données sur les mises en marché de la graine de moutarde, de la graine de tournesol, des lentilles, de l'alpiste des Canaries, des pois secs, des graines fourragères, du foin et du trèfle.

Les mises en marché du bétail, y compris les bovins, les veaux, les porcs, les moutons, les agneaux, les poules et poulets et les dindes, sont surtout fondées sur les renseignements du marché fournis par Agriculture et Agroalimentaire Canada et par les ministères et organismes provinciaux. Les mises en marché des œufs proviennent également de ces sources. Dans le cas des produits laitiers, les mises en marché du lait et de la crème par les producteurs sont communiquées par les organismes de réglementation et les entreprises privées.

Bien qu'elle porte sur de nombreux produits, la série des recettes monétaires agricoles n'est pas exhaustive. Elle comporte une catégorie «divers» pour les cultures et une autre pour le bétail. Les recettes monétaires de ces deux catégories sont fondées sur le Recensement quinquennial de l'agriculture afin de prendre en compte les produits qui ne font pas l'objet d'estimations individuelles.

Étant donné que les recettes monétaires sont calculées selon la méthode de comptabilité de caisse, tout montant reçu après la vente d'un produit, sous forme de paiement définitif ou d'ajustement de campagne, sera pris en compte au moment de la réception de la somme plutôt qu'à celui où l'argent a été gagné. Plusieurs types de paiement font partie de cette catégorie, notamment les paiements de la CCB et de la COCB, de même que les paiements reportés ou réglés au titre des recettes découlant des céréales. Les renseignements ayant trait à ces paiements proviennent directement des entités administratives en cause.

Les paiements directs de programmes sont calculés sur une base trimestrielle. Les organismes responsables du versement de ces paiements au titre des divers programmes fournissent les données sur une base mensuelle, trimestrielle et, dans certains cas, annuelle. Les seuls paiements qui figurent dans les séries sont ceux qui sont versés directement aux producteurs. Font partie de cette catégorie les paiements au titre de la Loi sur la protection du revenu agricole (pour le Régime d'assurance du revenu brut et le Compte de stabilisation du revenu net), de la Loi sur l'assurance-récolte, de la Loi de stabilisation concernant le grain de l'Ouest, de la Loi sur la stabilisation des prix agricoles, des plans tripartites, des programmes provinciaux de stabilisation, de la Loi sur la Commission canadienne du lait et les paiements versés au titre de programmes spéciaux du gouvernement.

Data Comparability

The farm cash receipts series before and after January 1971 are not comparable.

Modifications have been made to the series in terms of format, content and concepts. Consequently, the preceding documentation is only relevant for the period 1971 to date. More details on these changes are available in the semi-annual publication entitled *Agriculture Economic Statistics*, Statistics Canada, catalogue number 21-603-XPE.

Data Quality

As indicated above, farm cash receipts are estimated using both administrative and survey sources of data. Where necessary, data are adjusted to ensure conceptual consistency with the receipts series. Much of the data obtained from administrative sources have been summarized from the financial transactions of individual producers. These summarized data are often subject to audit by independent professional accountants and/or are used to make payments to individual producers. As a result, the quality of these data is considered to be very good. The survey data used in the receipts series reflect typical Statistics Canada standards for quality assurance and, therefore, the quality of these data is considered to be good.

However, it is important to note that the receipts data are subject to error. Administrative data may contain non-sampling error such as keying mistakes, while survey data may suffer from both non-sampling and sampling error. Users should also note that the quality of individual estimates may not be consistent between commodities or between provinces because the data sources and their quality may vary. As well, the estimates of inter-farm sales between provinces are not strong as there are few sources for these data.

More detail on the quality of the crops and livestock data that are used to estimate farm cash receipts can be found in the publications listed on page A-6.

Data Revisions

Cumulative quarterly farm cash receipts are released seven to eight weeks after the end of each quarter. Receipts for the current calendar year are subject to revision each quarter. Revisions to previous years are released twice per year, in May and in November. Every five years, a historical revision is done based on the results of the Census of Agriculture. The most recent set of historical revisions was released at the end of May 1999, and covered the period from 1986 to 1998.

An indication of the expected size of revisions to farm cash receipts can be provided by a statistic known as Theil's Root Mean Square Prediction Error (RMSPE).

Comparabilité des données

Dans la série des recettes monétaires agricoles, les données qui précèdent janvier 1971 ne peuvent être comparées avec celles qui viennent après cette date.

Des modifications ont été apportées à la série, notamment au mode de présentation, au contenu et aux concepts. Par conséquent, les renseignements qui précèdent s'appliquent seulement pour la période allant de 1971 à ce jour. Des renseignements plus détaillés sur les modifications qui ont été apportées sont disponibles dans la publication semestrielle *Statistiques économiques agricoles*, Statistique Canada, numéro 21-603-XPB au catalogue.

Qualité des données

Comme nous l'avons mentionné, les recettes monétaires agricoles sont estimées à partir de données administratives et d'enquêtes. Au besoin, les données sont ajustées pour garantir la cohérence conceptuelle de la série. La plupart des données tirées de sources administratives sont résumées à partir des transactions financières individuelles. Ces données résumées font souvent l'objet de vérifications par des comptables professionnels indépendants et/ou sont utilisées pour faire des paiements aux producteurs eux-mêmes. Par conséquent, la qualité de ces données est considérée comme étant très bonne. La qualité des données d'enquête utilisées dans la série des recettes monétaires est typiquement caractéristique des normes de qualité de Statistique Canada, et, par conséquent, la qualité de ces données est considérée comme étant bonne.

Toutefois, il est important de signaler que des erreurs peuvent se glisser dans ces données. Dans le cas des données administratives, il peut se produire des erreurs non dues à l'échantillonnage, notamment des erreurs de frappe, et les données d'enquête peuvent être entachées d'erreurs à la fois attribuables ou non à l'échantillonnage. Les utilisateurs doivent également noter que la qualité des estimations individuelles peut varier selon les produits ou les provinces, étant donné qu'il est possible que les sources et la qualité des données varient. En outre, les estimations des ventes au niveau des fermes entre les provinces ne sont pas considérées très solides étant donné que les sources de ces données sont peu nombreuses.

Les publications énumérées à la page A-6 renferment plus de renseignements sur la qualité des données relatives aux cultures et au bétail qui sont utilisées pour estimer les recettes monétaires agricoles.

Révisions des données

Les recettes monétaires agricoles trimestrielles cumulatives sont diffusées dans les sept ou huit semaines suivant chaque trimestre. Les recettes pour l'année civile courante sont sujet aux révisions à chaque trimestre. Les révisions aux années précédentes sont diffusées deux fois par année, soit en mai et en novembre. Tous les cinq ans, on procède à une révision chronologique en se fondant sur les résultats du Recensement de l'agriculture. La dernière série de révisions chronologiques a été diffusée à la fin de mai 1999, et elle porte sur la période allant de 1986 à 1998.

On peut obtenir une indication de l'ampleur des révisions des recettes monétaires agricoles grâce à une méthode statistique connue sous le nom de la Méthode Theil de prévision de l'erreur quadratique moyenne.

This statistic represents the average percent difference between the initial and current estimates during the period in question.

For example, the table below indicates that, from 1986 to 2000, total farm cash receipts at the Canada level for the January to December period have so far been revised, either up or down, by about 2.1% from the first published estimate. It should be noted that the RMSPE for payments is much smaller after 1986 as a result of efforts to follow program payments more closely.

| | RMSPE 1986-2000 | RMSPE 1998-2000 |
|--------------------|--------------------|--------------------|
| Total receipts | 2.1% | 1.8% |
| Crop receipts | 3.3% | 2.7% |
| Livestock receipts | 1.2% | 1.2% |
| Payments | 10.8% | 3.9% |

Further information on Theil's RMSPE is available from [A Description of Theil's RMSPE Method in Agricultural Statistical Forecasts](#), Stuart Pursey, Working Paper #1, Agriculture Division, Statistics Canada, 1980.

Celle-ci consiste à déterminer l'écart moyen en pourcentage entre les estimations initiales et courantes pendant la période en question.

Par exemple, le tableau ci-dessous indique que, de 1986 à 2000, les recettes monétaires agricoles globales au niveau du Canada pour la période janvier à décembre jusqu'à présent fait l'objet d'une révision, à la hausse ou à la baisse, d'environ 2,1 % par rapport aux premières estimations diffusées. On doit noter que la prévision de l'erreur quadratique moyenne pour les paiements est d'une magnitude moins importante après 1986, une conséquence des efforts entrepris à suivre de plus près les paiements de programmes.

| | Prévision de l'erreur quadratique moyenne 1986-2000 | 1998-2000 |
|-----------------------|--|-----------|
| Recettes globales | 2,1 % | 1,8 % |
| Recettes des cultures | 3,3 % | 2,7 % |
| Recettes du bétail | 1,2 % | 1,2 % |
| Paiements | 10,8 % | 3,9 % |

Pour obtenir d'autres renseignements sur la Méthode Theil susmentionnée, consulter la [Description de la méthode Theil de prévision de l'erreur quadratique moyenne pour la statistique agricole](#), Stuart Pursey, document de travail n° 1, Division de l'agriculture, Statistique Canada, 1980.

Normes de service à la clientèle

Statistique Canada s'engage à fournir à ses clients des services rapides, fiables et courtois, et ce, dans la langue officielle de leur choix. À cet égard, notre organisme s'est doté de normes de service à la clientèle qui doivent être observées par les employés lorsqu'ils offrent des services à la clientèle. Pour obtenir une copie de ces normes de service, veuillez communiquer avec Statistique Canada au numéro sans frais 1 800 263-1136.
