Introduction

This publication provides a statistical summary on the dairy industry in Canada and the provinces for current and previous calendar years.

Data include monthly, as well as year-to-date information, on farm sales of milk and cream for fluid and industrial purposes, cash receipts from milk and cream sold off farms, production, stocks, and supply and disposition of creamery butter, cheddar cheese and other dairy products and by-products. Data series are available on a historic basis since 1920.

The Dairy Review provides statistical information on the dairy products industry at national and provincial levels. Through co-operation between provincial departments of agriculture, milk marketing boards and Statistics Canada, dairy statistics are collected, compiled, disseminated and analyzed on a monthly basis.

Information on the volume of milk and cream sold off farms and commercial sales of fluid milk and cream by dairies are used by governments and provincial marketing boards in calculating provincial market sharing quota allotment and skim-off credit. These data are also important as an indicator of changes in the supply-managed dairy industry, a major contributor to total farm cash receipts.

Further information is available from the Livestock and Animal Products Section upon request.

Introduction

La présente publication fournit un résumé statistique de l'industrie laitière au Canada et dans les provinces pour l'année civile en cours et l'année civile antérieure.

Les données comprennent des informations mensuelles ainsi que des informations cumulées portant sur les ventes de lait et de crème à des fins de consommation et de transformation, les recettes monétaires provenant des ventes hors ferme de lait et de crème, la production, les stocks et le bilan d'approvisionnement et d'utilisation du beurre, du fromage cheddar et d'autres produits et dérivés du lait. Des séries de données sont disponibles sur une base chronologique depuis 1920.

La revue laitière fournit des renseignements statistiques sur l'industrie des produits laitiers aux échelons national et provincial. En collaboration avec les ministères provinciaux de l'agriculture, les offices de mise en marché du lait et Statistique Canada, des statistiques sur l'industrie laitière sont recueillies, compilées, diffusées et analysées sur une base mensuelle.

Les informations sur les volumes de lait et de crème vendus hors ferme et sur les ventes commerciales de lait et de crème de consommation par les laiteries sont utilisées par les gouvernements et les offices de mise en marché provinciaux pour calculer les contingentements provinciaux de mise en marché et le crédit sur l'écrémage. Ces données sont également importantes comme indicateurs des changements touchant l'industrie laitière, soumise à la gestion des approvisionnements et contribuant d'une manière significative à l'ensemble des recettes monétaires agricoles.

Des informations additionnelles sont offertes sur demande par la Section du bétail et des produits d'origine animale.
