Note of appreciation

Canada owes the success of its statistical system to a long standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- P preliminary
- r revised
- X confidential to meet secrecy requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

Statistical tables

1 Domestic and international shipping - Tonnage loaded and unloaded, 1992-2001 30

2 Domestic and international shipping - Containerized cargo tonnage loaded, unloaded and percentage share of total, 1992-2001 30

3 International shipping - TEUs (Twenty foot Equivalent Units) handled at leading Canadian ports, 1992-2001 31

4 International shipping - Cargo tonnage loaded and unloaded, annual variation and containerization rate by Canadian region, 1992-2001 32

5 International shipping - Cargo tonnage loaded, unloaded and annual variation by foreign region, 1992-2001 33

6 Domestic and international shipping cargo tonnage loaded and unloaded at leading Canadian ports by commodity, 2001 35

7 International shipping – Major commodities loaded by Canadian region, tonnage and top port of loading, 2000 and 2001 42

8 International shipping – Major commodities unloaded by Canadian region, tonnage and top port of loading, 2000 and 2001 44

Table of contents – continued

9	International shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region and by foreign region, 2000-2001	46
10-1	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Agriculture and food products, 2000-2001	47
10-2	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Minerals, 2000-2001	48
10-3	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Coal, 2000-2001	49
10-4	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Fuels and basic chemicals, 2000-2001	50
10-5	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Forest and wood products, 2000-2001	51
10-6	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Pulp and paper products, 2000-2001	52
10-7	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Primary and fabricated metal products, 2000-2001	53
10-8	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Machinery and transportation equipment, 2000-2001	54
10-9	Domestic and international shipping - Cargo tonnage loaded, unloaded and annual variation by Canadian region - Manufactured and miscellaneous goods, 2000-2001	55
11	International shipping - Cargo tonnage loaded, unloaded and annual variation, by province and foreign region, 2000-2001	56
12-1	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Newfoundland and Labrador, 2001	58
12-2	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Prince Edward Island, 2001	58
12-3	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Nova Scotia, 2001	59
12-4	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - New Brunswick, 2001	59

Table of contents – continued

12-5	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Quebec, 2001	60
12-6	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Ontario, 2001	61
12-7	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Manitoba, 2001	62
12-8	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - British Columbia, 2001	63
12-9	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Northwest Territories, 2001	63
12-10	International shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Nunavut, 2001	64
13-1	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Newfoundland and Labrador, 2001	65
13-2	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Prince Edward Island, 2001	65
13-3	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Nova Scotia, 2001	66
13-4	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - New Brunswick, 2001	66
13-5	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Quebec, 2001	67
13-6	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Ontario, 2001	68
13-7	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Manitoba, 2001	69
13-8	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - British Columbia, 2001	70
13-9	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Northwest Territories, 2001	71

Table of contents – continued

13-10	Domestic shipping - Number of movements, vessel capacity and tonnage transported by province or territory and port - Nunavut, 2001	72
14	Domestic and international shipping - Cargo tonnage loaded and unloaded at 50 leading Canadian ports by sector, 2001	73
15	International shipping vessel capacity (gross tons (GT)), cargo tonnage transported and number of movements by flag of registry, 1992, 2000 and 2001	74
16-1	International shipping - Cargo tonnage loaded and annual variation by commodity and by Canadian region, 2000-2001	75
16-2	International shipping - Cargo tonnage unloaded and annual variation by commodity and by Canadian region, 2000-2001	82
17-1	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Wheat	89
17-2	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Corn	90
17-3	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Barley	91
17-4	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Rye, oats and other cereal grains	92
17-5	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Fresh, chilled or dried vegetables	93
17-6	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Fresh, chilled or dried fruit and nuts	94
17-7	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Colza seeds (canola)	95
17-8	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Other oil seeds and nuts and other agricultural products	96
17-9	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Feed, cereal straw, eggs and other animal products	97
17-10	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Meat, fish, seafood, and preparations	98
17-11	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Milled grain products and preparations, and bakery products	99

Table of contents – continued

17-12 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Animal or vegetable fats, oils and flours	100
17-13 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Sugar	101
17-14 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Prepared foodstuffs (not elsewhere classified)	102
17-15 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Alcoholic and non-alcoholic beverages	103
17-16 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Limestone	104
17-17 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Stone, sand, gravel and crushed stone	105
17-18 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Salt	106
17-19 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Sulphur	107
17-20 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Other non-metallic minerals	108
17-21 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Iron ores and concentrates	109
17-22 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Copper ores and concentrates	110
17-23 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Aluminum ores (bauxite)	111
17-24 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Other metallic ores and concentrates	112
17-25 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Coal	113
17-26 International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Crude petroleum	114

Table of contents – continued

17-27	International shipping - Cargo tonnage loaded and annual variation by Canadian region and foreign region of unloading, 2000-2001 - Fuel oils	115

Highlights

Canada relies on ocean, coastal and inland shipping to facilitate international and interprovincial commerce. *Shipping in Canada* presents a comprehensive and historical overview of the domestic and international shipping activity, focusing on commodity flows and Canada's major ports.

A slowing North American economy in 2001 led to a decline in the quantity of cargo handled at Canada's ports and marine terminals:

- The total tonnage of cargo handled 2001 decreased 2.3% from 2000, down to 393.4 million tonnes (Mt.).
- International cargo declined 2.3% from 293.8 Mt. in 2000 to 286.9 Mt. in 2001. Loadings of international cargo were down 7.0% to 174.7 Mt. while unloadings of international cargo were up 5.9% to 112.1 Mt. in 2001.
- Domestic cargo handled declined 2.3% from 109.0 Mt. in 2000 to 106.6 Mt. in 2001.
- Canada's marine traffic to and from the United States declined slightly (0.8%) to 108.0 Mt. in 2001. Shipments to the United States declined 4.2% to 62.0 Mt. while shipments from the United States increased 4.2% to 45.9 Mt.
- Ships registered in Canada handled 50.3% of the Canada-United States cargo in 2001. Ships registered in the United States handled 9.9% of this trade and foreign-flagged ships carried the remaining 39.8%.
- Canadian registered ships dominated the Canada-United States shipments on the Great Lakes, transporting 87.5% of the cargo that crossed the Great Lakes.
- Canada's marine traffic to and from overseas ports declined 3.3% to 178.9 Mt. in 2001. Shipments to overseas ports decreased 8.5% to 112.7 Mt. while shipments from overseas ports increased 7.0% to 66.2 Mt.
- Nineteen Canadian Port Authorities handled 59.8% of the international and 45.5% of the domestic cargo in 2001.
- Canada's busiest port, Vancouver, handled 72.0 Mt. or 18.3% of Canada's marine cargo in 2001.

Shipping in Canada - Annual review, 2001

The cargo handled at Canada's ports and marine terminals declined in 2001 due to a slowing of the North American economy. Canada's economy expanded for a tenth consecutive year, however, the growth rate in real gross domestic product declined from 5.3% in 2000 to 1.9% in 2001. This slowing was accompanied by a decline in international merchandise trade, an essential component of the demand for marine transport. Merchandise trade with the United States decreased 3.0% to \$607.0 billion on a balance of payments basis, due to a slowing U.S. economy and heightened border-security following the September 11th terrorists' attacks. Merchandise trade with countries other than the United States decreased 1.0% to \$161.6 billion.¹

The total tonnage of cargo handled by Canadian ports and marine terminals in 2001 decreased 2.3% from 2000, down to 393.4 million tonnes (Mt.). International cargo (between Canadian and foreign ports) declined 2.3% from 293.8 Mt. in 2000 to 286.9 Mt. in 2001, and domestic cargo (between two Canadian ports) declined 2.3% from 109.0 Mt. to 106.6 Mt. Note that domestic cargo is handled twice by the Canadian port and terminal system, once when loaded and again when unloaded.

The decline in international traffic represents a departure from the trend of the decade from 1992 to 2001. International marine traffic increased 28.5% over the decade from 223.2 Mt. in 1992, with growth in each year prior to 2001 except for 1998 when there was another slight decline from a peak year in 1997. Domestic traffic grew by just 1.9% over the decade. Domestic traffic trended downward from 104.5 Mt. in 1992 to a low of 93.4 Mt., in 1997. It then grew to a decade high of 109.0 Mt. in 2000.

1. All statistics in this paragraph can be found in the *Canadian Economic Observer, Historical statistical supplement 2002/03, July 2003, Statistics Canada cat.no. 11-210-XIB.*

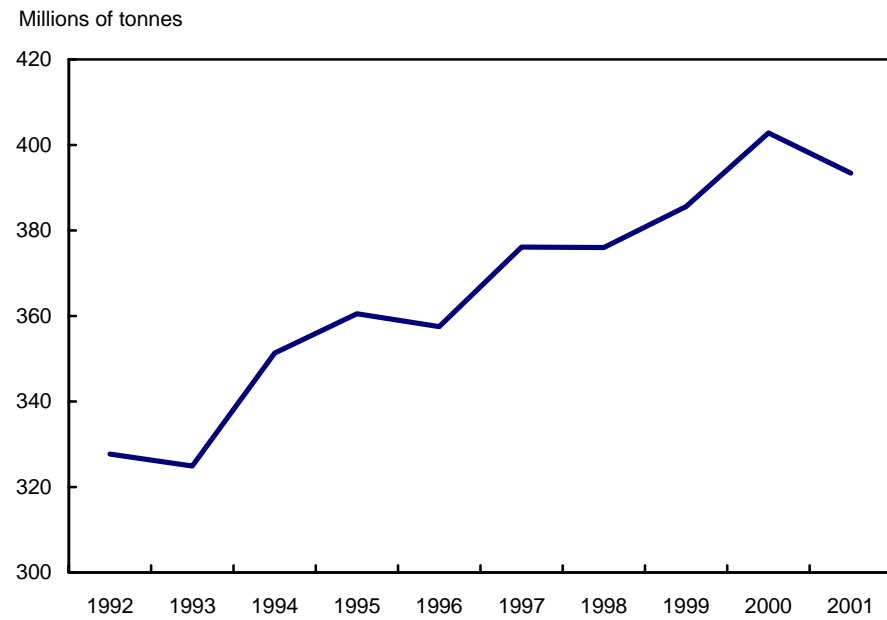

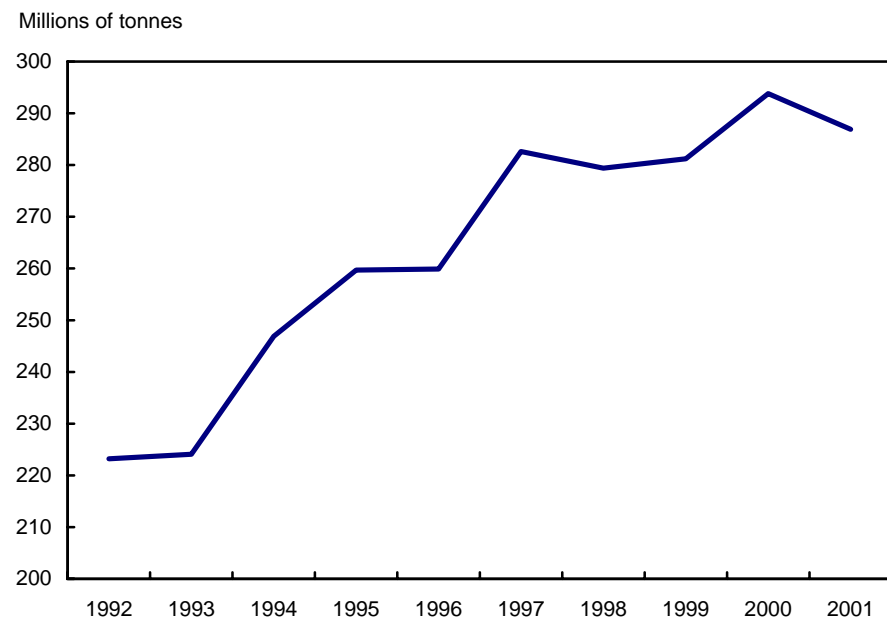

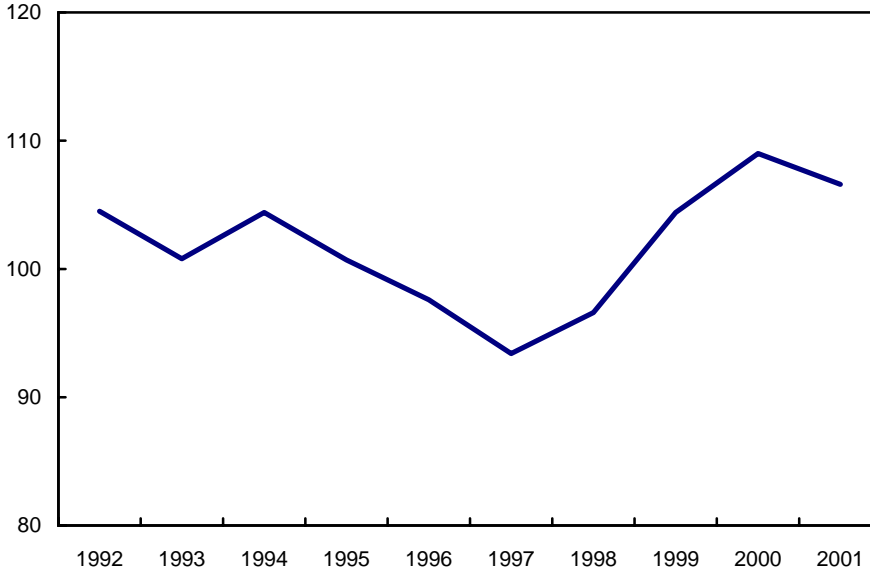

Chart 1**Total cargo handled at Canadian ports and marine terminals****Chart 2****International cargo handled at Canadian ports and marine terminals**

Chart 3

Domestic cargo handled at Canadian ports and marine terminals

Millions of tonnes

**International marine cargo**

Over 174.7 Mt. of cargo destined for foreign countries, including the United States, was loaded at Canadian ports and marine terminals in 2001, a decrease of 13.1 Mt. (7.0%) from 2000. There were significant declines in outbound shipments of major bulk commodities, particularly iron ores, coal, wheat, crude petroleum and sand, stone and gravel. Canadian ports and marine terminals unloaded 112.1 Mt. of international cargo in 2001, 6.2 Mt. (5.9%) more than in 2000. Inbound shipments of crude petroleum, coal, gasoline and aviation turbine fuel accounted for most of the increase.

Canada - United States cargo

Canada's marine traffic to and from the United States declined slightly (0.8%) from 108.8 Mt., in 2000 to 108.0 Mt. in 2001. This decline was driven by cargo shipped to the United States which dropped 4.2% to 62.0 Mt. as cargo arriving from the United States increased 4.2% to 45.9 Mt.

The decline in United States' bound cargo was driven by shipments of iron ore and concentrates which plunged from 9.6 Mt. in 2000 to just over 5.0 Mt. in 2001. Most of this iron ore originated in Labrador and was shipped from lower St. Lawrence ports of Sept-Îles/Pointe-Noire and Port-Cartier. Adding to the decline were crude petroleum shipments to the United States, which dropped from 12.3 Mt. in 2000 to 11.0 Mt in 2001 due to less transshipment² of Hibernia crude through the port of Come-by-Chance. Limestone shipments to the United

2. *Transhipped cargo is cargo that is unloaded from a vessel at a port and reloaded on to another vessel. It is therefore handled twice by the same port, sometimes after a period of storage.*

States also decreased by almost 1 million tonnes from 2.4 Mt. in 2000 to 1.5 Mt. in 2001. Pacific coast ports which shipped almost 90% of the limestone, were mainly affected by this decline. These declines were partially offset by shipments of gasoline and aviation fuel which soared 63.1% over 2000 to almost 7.7 Mt. in 2001 with record shipments from ports in the Maritime provinces, particularly Saint John and Port Hawkesbury. United States' bound shipments of stone, sand, gravel and crushed stone were up 19.7% to 7.9 Mt. in 2001 and shipments of fuel oil also rose 20.2% to 6.2 Mt.

Inbound coal shipments from the United States increased by 2.0 Mt. over 2000 to 22.1 Mt. in 2001 due mainly to unloadings of coal at the Great Lakes ports of Nanticoke, Courtright and Port Credit. There were also significant increases in shipments of fuel oil, salt, gasoline and aviation turbine fuel, and crude petroleum from the United States. These increases were partially offset by a 1.9 Mt. decline in the quantity of iron ores and concentrates received from United States' ports. Canadian ports unloaded 4.5 Mt. of iron ores from the United States in 2001. The main ports affected by this decline were Sault-Ste-Marie and Hamilton.

Ships registered in Canada handled 50.3% of the Canada-United States cargo in 2001, down from 51.5% in 2000. Canadian-flag ships were especially dominant on the Great Lakes with 87.5% of the cargo exchanged with United States' Great Lakes ports. United States-flag ships carried 9.9% of all Canada-United States cargo, up from 7.5% in 2000. Foreign-flag ships carried the remaining 39.8% of Canada-United States cargo in 2001.

Canada - Overseas cargo

Canada's marine traffic to and from overseas ports fell to 178.9 Mt., in 2001 down 3.3% from 2000. Cargo shipped to overseas ports decreased 8.5% to 112.7 Mt. while cargo arriving from overseas ports increased 7.0% to 66.2 Mt.

Shipments of Canadian iron ores and concentrates to Europe declined by over 4.0 Mt. This decline was partially offset by a 1.6 Mt increase in iron ore shipments to other continents, resulting in total iron ore shipments to overseas ports of 17.6 Mt. in 2001 compared to 20.2 Mt. in 2000. Shipments of Canadian coal to overseas ports declined to 27.8 Mt. in 2001 due to a decrease in shipments to Asia of 3.2 Mt. Canadian wheat shipments also fell to 15.3 Mt. in 2001 due to a 1.7 Mt. decrease in wheat bound for the Middle East and Africa.

Crude petroleum, gasoline and aviation turbine fuel and fuel oil were the three main commodities that caused the 7.0% increase in cargo arriving from overseas ports. Crude petroleum rose to 31.5 Mt. in 2001 due to increased shipments from Europe and the Middle East. Shipments of gasoline and aviation turbine fuel from overseas ports more than doubled from 2000 to 2.8 Mt. in 2001, driven by increased shipments from Europe. The quantity of fuel oil received from overseas ports reached 1.9 Mt. due to increased shipments from Central America and Antilles.

Canadian-flag ships handled just 0.1% of the cargo exchanged with overseas ports in 2001, about the same share as in 2000.

Domestic cargo

The 106.6 Mt. of domestic freight handled by the ports in 2001, which was the second highest quantity recorded over the past decade, was 2.3% less than the record year of 2000. The decline in domestic tonnage was due mainly to a slowdown in the forestry sector arising from the softwood lumber dispute with the United States. Canada's ports handled domestic shipments of 19.7 Mt. of forest and wood products in 2001, 4.5 Mt. less than in 2000.

The decline in domestic forest and wood products movements drove a 14.3% decline in the total domestic cargo handled at Pacific ports in 2001. Pacific ports handled 28.3 Mt. of domestic cargo in 2001, 4.7 Mt. less than in 2000. Ports in the Great Lakes region handled 30.1 Mt. of domestic cargo in 2001, 2.2 Mt. more than in 2000, due mainly to increased traffic in coal between Great Lakes ports. Ports in the St. Lawrence region handled 25.6 Mt. of domestic cargo in 2001 or 3.2% less than the previous year, due mainly to a decline in shipments of iron ores and concentrates and other non-metallic minerals between ports within the region. Domestic cargo handled by ports in the Atlantic region increased 4.4% from 2000 to 22.3 Mt in 2001, due mainly to increased loadings of crude petroleum bound for ports in the St. Lawrence region.

Canadian port traffic

Nineteen Canadian Port Authorities³ (CPAs) were created under the Canada Marine Act of 1998 based on their potential to be financially self-sufficient. The 19 CPAs handled 59.8% of the total international and 45.5% of the total domestic cargo handled by Canadian ports and marine terminals in 2001.⁴

The international cargo handled by the CPA's grew over the past decade from 149.2 Mt. in 1992 to 171.7 Mt. in 2001, but exhibited a significant level of year-over-year volatility. The volatility was attributable to bulk commodities, particularly coal and wheat. International tonnages peaked in 1997 at 184.3 Mt. when CPA ports handled a record 39.7 Mt. of coal, almost 90% of which was exported from the ports of Vancouver and Prince Rupert, BC. Coal exports from those ports declined by almost 20% from 1997 to 2001 as Asian steelmakers found less expensive sources and coal mines in northeastern British Columbia neared the end of their economic lives. International shipments of wheat at CPA ports also spiked in 1997 to their third highest level of the decade. While wheat traffic trended downward during the decade it was nonetheless volatile as demand for Canadian wheat and annual crop yields varied. Vancouver and Prince Rupert were again the most affected ports as they were the main export ports for wheat averaging 76% of the annual throughput of this product. Containerized cargo which typically is comprised of consumer goods and higher valued commodities was among the fastest growing sectors of the CPA international traffic. The weight of cargo carried in containers almost doubled during the decade from 12.5 Mt. in 1992 to 23.4 Mt. in 2001. Most of this cargo was handled by the ports of Vancouver, Montreal and Halifax.

3. Vancouver, Saint John, Montréal, Sept-Îles, Québec, Halifax, Prince Rupert, Hamilton, Fraser River, Thunder Bay, Windsor, Ont., Belledune, Trois-Rivières, Nanaimo, Toronto, Saguenay (Chicoutimi), Port Alberni, St. John's, North Fraser River.

4. The quantity of cargo reported to Statistics Canada may vary, in some cases quite significantly, from the statistics reported by individual port authorities due to differences in coverage and information sources. Users should consult the section on Survey Methodology and Data Quality for further information.

Chart 4

International cargo handled by the nineteen Canadian Ports Authorities

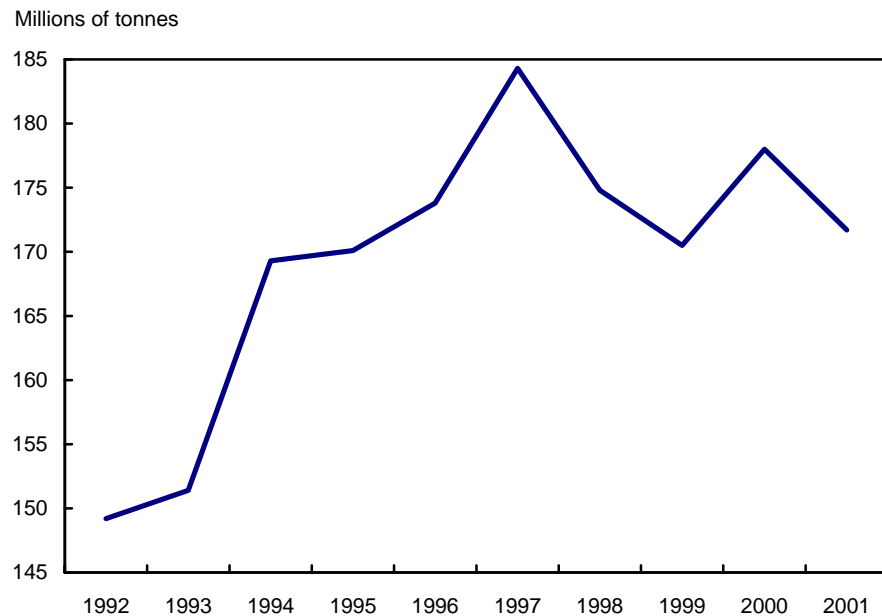

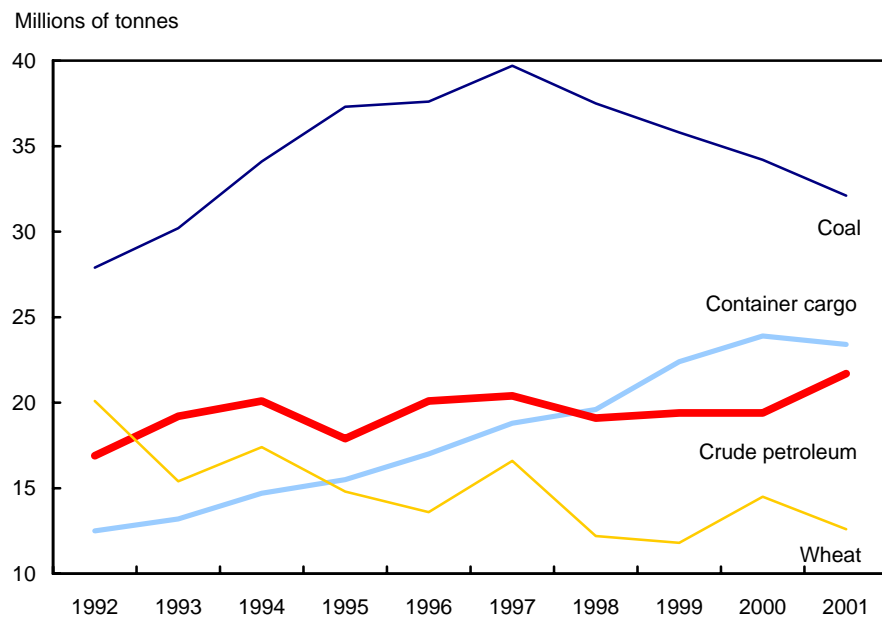

Chart 5

Main international commodities handled by nineteen Canadian Ports Authorities

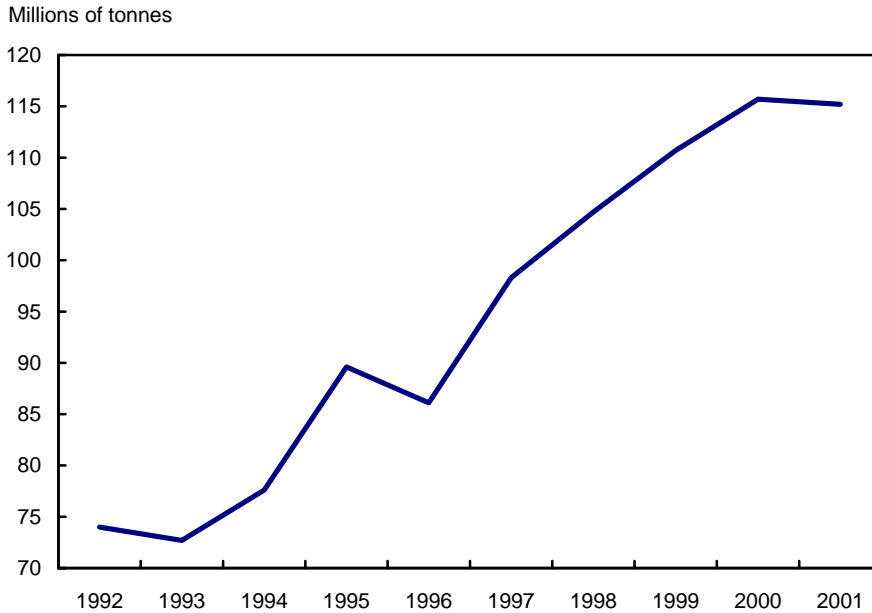

The international traffic handled at non-CPA ports and terminals grew 55.7% from 74.0 Mt. in 1992 to 115.2 Mt. in 2001. This rapid growth of international traffic at non-CPA facilities was due to: transshipments of North Sea crude petroleum via an Atlantic port to the U.S. eastern seaboard; increased imports of U.S. coal

for electricity generation at a Great Lakes' facility, and crude petroleum exports from offshore wells and ports on the east coast.

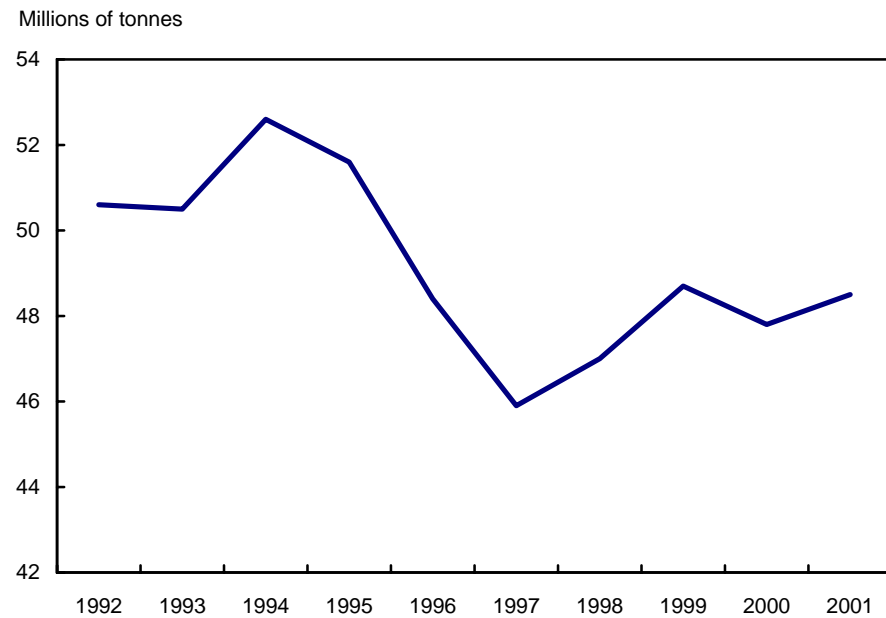

Chart 6

International cargo handled at non-CPA ports

The domestic cargo handled by the 19 CPAs remained fairly steady over the past decade, with a slight decline from 50.6 Mt. in 1992 to 48.5 Mt. in 2001. This decline was most noticeable for wheat shipments and petroleum products (fuel oil, gasoline and aviation turbine fuel). Domestic wheat shipments at CPA ports generally declined over the decade from 9.7 Mt. in 1992 to 5.5 Mt. in 2001 from except for a single spike in 1997 when the quantity reached 10.0 Mt. The ports of Thunder Bay and Quebec were the principal CPA ports affected by this decline. Combined domestic cargoes of fuel oil and gasoline and aviation turbine fuel handled by the CPA ports declined from 10.7 Mt. in 1992 to 7.8 Mt. in 2001 due to the rationalization of small refineries in Vancouver, Montreal and Halifax and a modal shift to the rail mode for these products in the Quebec to Montreal corridor. The declines in these commodities was partially offset by growth in domestic shipments of wood chips, limestone and stone, sand, gravel and crushed stone.

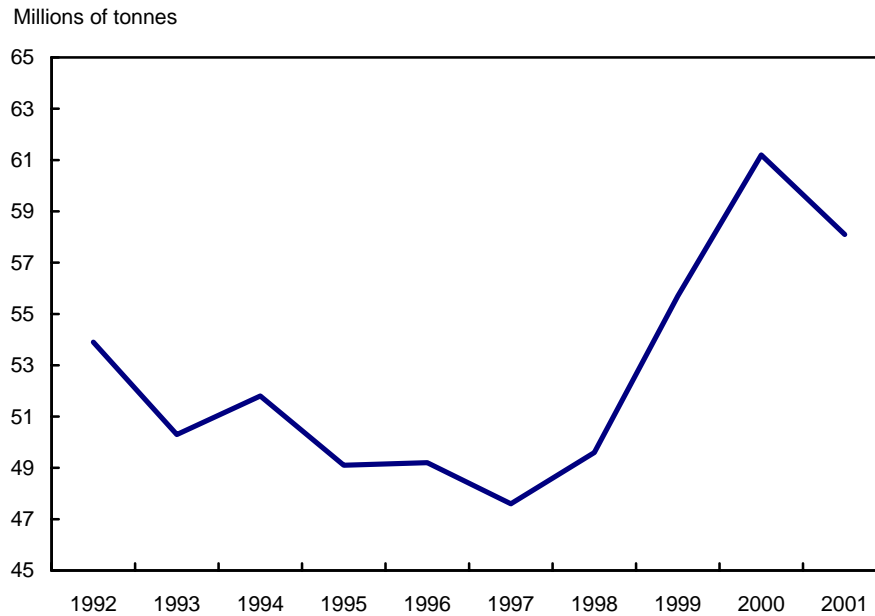

Chart 7

Domestic cargo handled by the nineteen Canadian Ports Authorities

In contrast to the decline in domestic traffic at the CPAs, non-CPA ports and terminals saw an increase in their domestic cargo of 7.7% over the decade, from 53.9 Mt. in 2000 to 58.1 Mt. in 2001. The increase was due mainly to domestic shipments of crude petroleum that rose dramatically from the fourth quarter of 1998 with the start of production off the Newfoundland coast. In 2001, non-CPA ports handled 10.0 Mt. of crude petroleum compared to just 70 thousand tonnes in 1992. This increase was partially offset by declines in domestic shipments of logs and other wood in the rough and coal at non-CPA ports.

Chart 8

Domestic cargo handled at non-CPA ports

Vancouver handled 72.0 Mt. of marine cargo in 2001, a decline of 4.4% from the record year of 2000 due to a drop in outbound international cargo. Vancouver continued to be the leading Canadian port for both bulk cargo and containerized freight, handling 18.3% of Canada's marine cargo in 2001. Four bulk commodities accounted for almost 60% of Vancouver's total tonnage: coal (26.5 Mt.); wheat (7.3 Mt.); sulphur (5.2 Mt.); and potash (3.2 Mt.). The four products were almost exclusively for export and all declined from 2000. The coal shipments declined by 1.7% as demand for Canadian coal in Asia declined and were only partially offset by increased demand in Europe. The quantity of wheat handled by the port also declined by 1.1 Mt. (12.9%) from 2000 due to a poor harvest on the Prairies the previous summer and decreased shipments to the Middle East, particularly Iran and Iraq. While shipments of sulphur to the People's Republic of China continued to grow, total sulphur shipments declined by 3.2% due to a drop in shipments to Central and South America. Lower shipments of Canadian potash to the People's Republic of China resulted in a 16.0% decrease in potash shipments compared to 2000.

The number of international containers handled at Vancouver declined by 1.7% from the record level set in 2000 to 1.1 million twenty-foot equivalent units (TEUs) in 2001. Vancouver handled 43% of the containers handled at Canada's ports. Over 90% of these containers were laden with cargo weighing a total 10.1 Mt., a slight increase (0.9%) over 2000. The tonnage of containerized cargo received from foreign ports increased 5.8% to 3.5 Mt. due to continued strong North American demand for consumer goods from Asia, while outbound container cargo dropped 1.5% to 6.5 Mt. due to decreased containerized shipments to Asia of lumber, newsprint and other wood products.

Sept-Îles (including Pointe-Noire) handled 20.8 Mt. of cargo in 2001 a decrease of 10.7% from 2000. International cargo handled by the port declined 19.2%

from 2000, down to 15.4 Mt. in 2001. This decline was due mainly to lower shipments of iron ore and concentrates to the United States (down 40.2% to 4.3 Mt.) and Europe (down 14.4% to 6.4 Mt.). Domestic cargo handled at Sept-Îles/Pointe-Noire rose 26.9% to 5.5 Mt. due mainly to a 42.2% increase in domestic shipments of iron ore to Hamilton and Nanticoke.

Montréal (including Contrecoeur) handled 18.9 Mt. of cargo in 2001, down 5.8% from 2000 due mainly to decreased unloadings of iron ore and concentrates, iron and steel, other basic chemicals and other non-metallic minerals. The number of international containers handled by the port declined in 2001, down to 919,257 TEUs and the weight of cargo in those containers dropped 5.4% down to 8.4 Mt. Despite the decline in container tonnage, Montreal continued to be the number one North American gateway port for European containerized cargo, handling 8.0 Mt. of this freight in 2001. (The port of New York/New Jersey was the second port with 7.9 Million tonnes of European container cargo in 2001 based on data provided by Marine Administration of the U.S. Department of Transportation⁵).

The total tonnage handled by the port of Saint John, New Brunswick, increased 27.1% from 2000 to 24.5 Mt. in 2001. Three commodities, crude petroleum, fuel oils, gasoline and aviation turbine fuel, accounted for almost 90% of the tonnage handled by the port and were primarily responsible for the increase. Crude petroleum shipments increased 21.7% to 10.8 Mt. in 2001 with almost 97% of the crude petroleum unloaded from foreign ports. Fuel oils shipments increased 33.1% to 6.0 Mt., 81.9% of which was shipped to foreign ports. Gasoline and aviation turbine fuel increased 55.0% to 4.9 Mt., 87.6% of which was sent to foreign ports. Seventy-five percent of the inbound crude petroleum came from the North Sea, the rest came from Saudi Arabia, while 96% of the foreign outbound petroleum products were sent to ports on the United States Atlantic and Gulf coasts. Saint John handled 298.9 kilotonnes (Kt.) of international containerized cargo in 2001, down 6.0% from 2000.

Total cargo handled by the port of Québec (including Lévis) fell 3.1% from 2000 to 15.2 Mt. in 2001. International cargo, which accounted for almost 79% of the total cargo, declined 9.8%, down to 11.9 Mt. The decline in international cargo was due primarily to a decline in transshipments of iron ore and concentrates from Australia and South America through Québec to the United States Great Lakes and to a decline in inbound shipments of crude petroleum. The port handled 3.2 Mt. of domestic cargo in 2001, up 33.2% over 2000 due to unloadings of crude petroleum from Atlantic Canada.

The total tonnage handled at the port of Halifax increased 1.3% over 2000 to 13.9 Mt. in 2001. International cargo which accounted for 80.6% of the total cargo was up 2.1% over 2000 to 11.2 Mt. The increase was mainly attributable to crude petroleum shipments from Venezuela. Halifax handled 4.2 Mt. of containerized international freight in 2001, slightly less (0.8%) than the record quantity handled in 2000.

Hamilton handled 10.6 Mt. of marine cargo in 2001, down 10.2% from 2000. The decline was entirely due to international traffic which decreased 23.3% to 4.3 Mt. This decline was due mainly to lower shipments of iron ore and concentrates from the United States and less iron and steel from Asia and Europe. Domestic traffic

5. For more information on container ports in Canada and the United States see "The Future for Canada-U.S. Container Port Rivalries" <http://www.statcan.ca/english/research/54F0001XIE/54F0001XIE.pdf>

was up 1.9% to 6.3 Mt. in 2000 due to increased unloadings of domestic iron ore and concentrates.

Fraser River Port handled 11.5 Mt. of marine cargo in 2001, an increase of 4.5% over 2000. Domestic cargo accounted for 7.9 Mt. or 68.9% of the total tonnage handled by the port. A 6.3% increase in domestic traffic was driven by increased shipments of limestone. The port handled a record 3.6 Mt. of international cargo, up slightly (0.8%) over the previous record year of 2000. Fraser River Port continued to be the fourth largest container port in Canada, handling 476.6 kilotonnes and 49,197 TEUs of international containerized freight.

A jump in both domestic and international coal shipments helped the Thunder Bay Port Authority realize a 3.2% gain in marine cargo handled in 2001. Total tonnage handled was 9.1 Mt. in 2001 compared to 8.8 Mt. in 2000. Wheat shipments were down slightly by 4.4% over 2000 levels, and totaled 4.7 Mt. handled. Wheat shipments make up over 52% of all cargo handled at the port. Coal rebounded from a low of 563 kilotonnes in 2000, as 1,501 kilotonnes were shipped from the port in 2001. Domestic coal shipments were 69% of this total with shipments destined for Courtright, Hamilton, Sault Ste Marie and Nanticoke.

The total cargo handled at Prince Rupert declined 34.7% from 7.2 Mt. in 2000 to 4.7 Mt. in 2001. Following the closure of a B.C. coal mine in September 2000, outbound foreign coal shipments through the terminal were 53.0% lower, going from 3.5 Mt. in 2000 to 1.6 Mt. in 2001. Wheat, the leading cargo handled, decreased to 2.0 Mt., 18.9% lower than the 2.5 Mt. handled in 2000. Forest and wood products handled also declined from 569 kilotonnes in 2000 to 415 kilotonnes in 2001, a drop of 27.1%. Over 95% of cargo handled at the Prince Rupert Port Authority is destined for foreign ports.

The port of Windsor (Ontario) handled 4.7 Mt. of marine cargo in 2001, down 12.1% from 2000, marking the third consecutive year of reduced traffic. Both domestic and international sectors were affected. International cargos of iron and steel – primary and semi-finished, dropped 85.6% from 2000. Last year, the port handled 445 kilotonnes representing 15% of the total international cargo handled compared to just 64 kilotonnes in 2001 with a share of 2%. Partially offsetting this drop were gains in agriculture and food products (27.7%), fuels and basic chemicals (38.4%) and minerals (5.9%). In the domestic sector, lower shipments of agriculture and food products and minerals resulted in a drop of cargo handled from 2.5 Mt. in 2000 to 2.1 Mt. in 2001.

****The total tonnage reported for the North Fraser River port dropped 13.5% over 2000 to 3.6 Mt. in 2001, all of which was reported as domestic traffic. The three main commodities handled at the port were wood chips (1.4 Mt.), logs and other wood in the rough (1.1Mt.) and stone, sand, gravel and crushed stone (872 kilotonnes). The North Fraser River is the major port for tug and barge and log boom traffic on the Pacific coast. Some of this traffic is loaded and unloaded within the port while some of it is transported through the port to other points on the Fraser River. There are significant differences between the statistics reported by the North Fraser Port Authority and this publication.⁶

6. These differences are due to differences in the coverage (e.g., Statistics Canada's survey is a threshold survey that may exclude some traffic operating on the river), survey definitions (Statistics Canada survey counts cargo that is actually loaded onto or unloaded off from a marine conveyance within the port) and differences in the levels of response from the marine community.

The port of Trois-Rivières handled 2.4 Mt. of marine cargo in 2001, a 5.5% increase over 2000. Domestic cargo, which accounted for 22% of the total, rose 12.1% from 484 kilotonnes to 543 kilotonnes. Increased shipments of fuel oils, gasoline and aviation turbine fuel and salt arriving at Trois-Rivières resulted in this gain. International cargo handled increased 3.8% in 2001 to 1.9 Mt. Alumina (543 kilotonnes), other non-metallic minerals (252 kilotonnes) and wheat (245 kilotonnes) were the main commodity groups contributing to the increase in foreign cargo handled for 2001.

A total of 2.2 Mt. of marine cargo were handled by the port of Nanaimo in 2001, up 12.3% from 2000 with increases in both domestic and international cargo. The total domestic cargo handled rose 2.8% to 1,192 kilotonnes while international cargo handled increased 26.1% to 993 kilotonnes. Forest and wood products accounted for 75% of all shipments and pulp and paper products made up another 15% of the total cargo handled in 2001.

The total cargo handled at the port of Belledune increased 20.7% from 2000 to 2.0 Mt. in 2001. This increase was mainly a result of increased shipments of coal and fuel and basic chemicals from the United States Atlantic and Great Lakes regions as well as increased shipments of minerals to European destinations. The port handled 2.0 Mt. of international cargo and 247 kilotonnes of domestic cargo.

Toronto handled 1.8 Mt. of marine cargo in 2001, up 4.2% over 2000 activity levels. Salt, sugar and cement made up over 87% of the cargoes handled at Toronto. Domestic activity accounted for 962 kilotonnes compared to 839 kilotonnes of foreign cargoes handled in 2001. The predominant foreign regions shipping products through the Toronto port facilities were the United States Great Lakes, South America and Central America.

The port of St. John's, Newfoundland and Labrador, handled 1.3 Mt. of marine cargo, in 2001, an increase of 25.8% over 2000. Most of this increase can be attributed to the growth in offshore supply activity. Nearly 97% of total cargo or 1.2 Mt. was domestic cargo with the main contributors being shipments of manufactured and miscellaneous goods (445 kilotonnes) from Montreal and Halifax and fuels and basic chemicals (363 kilotonnes) originating in Saint John and Halifax.

Saguenay Port (Chicoutimi) handled 411 kilotonnes of marine cargo in 2001, compared to 414 kilotonnes in 2000. International cargo accounted for over 80% of the ports activity. In 2001, Saguenay Port handled 331 kilotonnes of international cargo, down 1.3% from a year earlier. The port handled fewer foreign shipments of forest and wood products, primary and fabricated metal products and machinery and transportation equipment during the year; activity increased for foreign shipments of pulp and paper products, coal and fuels and basic chemicals. Domestic tonnage increased slightly by 2.0% to 79.9 kilotonnes due to increased salt shipments.

The port of Port Alberni handled 330 kilotonnes of cargo in 2001, down 62% from 874 kilotonnes handled in 2000. The domestic activity fell from 683 kilotonnes to 217 kilotonnes and the international activity dropped from 191 kilotonnes to 114 kilotonnes. Forest and wood products were their sole product class in 2001 and include shipments of lumber and logs and other wood in the rough.

Data quality, concepts and methodology

Introduction

The statistics in this publication were collected under the authority of the *Statistics Act* (Revised Statutes of Canada, 1985, chapter S19). The statistics are derived from two surveys: the Coastwise Shipping Survey (Survey Number 2751) and the Marine International Freight Origin Destination Survey (Survey Number 2791).¹ The purpose, populations, data sources, and data quality for these surveys are discussed in the following sections.

Purpose of the surveys

These surveys collect data on:

- Coastwise or domestic marine transport - the carriage of cargo by ships between Canadian ports in Canadian waters; and,
- International marine transport – the carriage of cargo between Canadian ports and foreign ports in the United States or overseas.

The information collected in these surveys includes the description and quantities of commodities loaded and unloaded at Canadian ports and marine terminals by vessels calling at those facilities, and the origin and destination of those commodities. Data are aggregated for publication of commodity traffic by Canadian port and foreign country of origin or destination.

Statistics Canada uses these data as one input to Canada's System of National Accounts. The data are also used by Transport Canada, other federal departments, provincial ministries, transportation companies, consulting firms, universities and foreign governments. This information is used to analyse transportation activities, for marketing and economic studies, and to assess the industry's performance.

Survey populations

For each survey it is possible to define a target population as all the units (e.g., ships) for which data were intended to be collected and a survey population as all the units for which the survey actually provides data. The survey population may differ from the target population when it is not possible to identify or to survey all of the units within the target population.

The target populations of the Coastwise Shipping Survey and the Marine International Freight Origin Destination Survey are all ships that carry cargo between Canadian ports or between Canadian ports and foreign ports.

1. For more information see Coastwise shipping survey <http://www.statcan.ca/english/sdds/2751.htm>; and International Freight Origin Destination Survey: <http://www.statcan.ca/english/sdds/2791.htm>

The Coastwise Shipping Survey population is somewhat different from the target population. It consists of ships engaged in domestic shipping at Canadian ports, with the exception of:

- i. cargo vessels less than 15 net register tons (NRT);
- ii. tugs or other vessels under 15 gross register tons (GRT);
- iii. Canadian naval ships;
- iv. fishing vessels;
- v. research vessels;
- vi. ballast movements for towboat and ferry operators on the West Coast ports;
- vii. cargo carried in trucks and rail cars on domestic vehicle ferries.

This limited survey field may have a significant impact on the statistics reported for some commodities, regions and ports such as the Pacific Coast, where a number of tugs that are under the GRT threshold are engaged in the towing log booms. The exclusion of ferry traffic will also affect the statistics for cargo transported to and from islands such as Newfoundland, Prince Edward Island and Vancouver Island. However, this cargo should be reflected in statistics collected for freight transported by the truck and rail modes.

The survey population for the Marine International Freight Origin Destination Survey includes vessels engaged in international shipping at Canadian ports with the exception of (i) fishing boats registered in Canada or abroad, (ii) maintenance and service ships such as icebreakers, (iii) research vessels and (iv) other non-commercial vessels such as hospital ships.

Data sources

Data for the Coastwise Shipping Survey are collected directly from the owners, operators, agents or officers of ships engaged in domestic shipping. The data are reported on one of two questionnaires, either the *S.1, Domestic Shipping Report* or the *S.4, Towboat and Ferry Operators Shipping Report*. The operators of cargo-carrying ships arriving and departing Canadian ports or marine terminals complete these reports for each such arrival and departure. The S.1 Report provides the following information: vessel name, country of registration, the vessel's gross and net registered tonnage, cargo description, tonnage and ports of loading and unloading. The S.4 Report is used only on the West Coast by operators of tugs, cargo barges and ferries for monthly reporting of coastal shipping. These operators do not report ballast movements. The S1 and S4 Reports are sent to Statistics Canada each month.

Information on international shipping is collected from the A6 General Declaration and manifests required by the Canada Customs and Revenue Agency (CCRA) for each ship loading or unloading cargo in Canada that either originated in or is destined to a foreign country. Local CCRA employees send copies of these documents to Statistics Canada. In some cases, shipping lines or port authorities send equivalent reports to Statistics Canada. Form A6 and its annexes provide information on: the vessel's name and country of registration, registered gross and net tonnage, and information such as the description of the cargo, tonnage and

ports where commodities will be loaded and unloaded. These variables constitute the database for statistics on international shipping.

Data quality

All statistical surveys are subject to errors. The total error of a survey is defined as the difference between the survey estimate and the actual value for the target population. Survey errors can be classified as “sampling” or “non-sampling” errors. The marine transport surveys are censuses and are therefore not subject to sampling errors.

There are four main types of non-sampling errors:

- i. Coverage errors (when the survey frame does not thoroughly cover the target population);
- ii. Response errors (when a respondent provides inaccurate information);
- iii. Non-response errors (when a respondent does not respond to all or part of the questionnaire) and,
- iv. Processing errors (errors made during data capture, coding, and editing).

The Coastwise Shipping Survey is thought to be more affected by coverage errors than the Marine International Freight Origin Destination Survey. The survey population is smaller than the target population due to the size threshold and the various ship types that are exempted (e.g., vehicle and rail ferries) and the practical difficulty of identifying the fleet of all ships that are active in the domestic transport of cargo. With respect to the Marine International Freight Origin Destination Survey, customs rules apply to all ships arriving from or departing for foreign ports. However, Statistics Canada has only limited tools for identifying missing shipping documents.

Both surveys have significant exposure to response error, particularly in terms of the reported commodities. The marine carrier of domestic and international cargo is not always able to provide descriptions that are sufficiently detailed to accurately code the commodity. Terms such as general cargo are often used in cases where the carrier is unsure of the exact contents of a container or when there are a number of commodities being transported in one shipment. As result, residual categories such as “Other manufactured and miscellaneous goods” and “Other chemical products and preparations” may be overestimated while the true commodity is understated. Respondents may also use incorrect conversion factors in estimating the weight of a shipment.

Non-response errors are expected to have more of an effect on the Coastwise Shipping Survey. Shipping reports are not submitted for all vessel traffic Canadian ports. It is known that there is a significant amount of under-reporting for the Pacific Coast and the Mackenzie River. While it is assumed that the reporting to the Canada Customs and Revenue Agency of international traffic is fairly comprehensive, there are occasions when reports are not forwarded to Statistics Canada, particularly for ports in the Canadian Arctic and other remote areas that do not have local customs offices.

Both surveys are subject to processing errors during data entry, including errors in transcribing and coding information and in converting cargo quantities from non-weight units (e.g., barrels or cubic metres to kilograms). Errors may also

be introduced during editing and imputation procedures that are used to correct data that appear to be erroneously reported or partially reported. A number of techniques are used to detect and resolve these errors including micro and macro analysis of the data for congruency and consistency with information acquired from other sources (e.g., cargo statistics from port authorities and economic statistics from other Statistics Canada divisions).

Appendix I

Glossary

Terms related to reporting forms

A6 General declaration: A6 General Declaration: This is an administrative document which is submitted along with supporting cargo reports to Canada Customs and Revenue Agency (CCRA) for every vessel arriving from or departing for any port or place outside Canada. The A6 General Declaration provides such information as name and nationality of vessel, net and gross register tonnage, next/last port of call, and cargo particulars such as tonnage loaded or unloaded, and handling port.

S.4 Towboat and ferry operators shipping report: This report is used principally by members of the British Columbia Council of Marine Carriers to report the domestic shipping activities of tug, barge, scow and ferry operators on the west coast. The report is filed on a monthly basis and excludes ballast movements.

S.1 Domestic shipping report: This report is completed by ships' officers or operators of vessels engaged in domestic shipping arriving at or departing from Canadian ports. It contains such information as: vessel name, net and gross register tonnage, commodity description and tonnage, ports of loading and unloading. This is the principal source of data for the production of domestic shipping statistics.

Terms related to cargo

Ballast movement (arrival or departure): An arrival at a port is considered ballast if there is no cargo unloaded from the vessel at that port. A departure from a port is considered ballast if there is no cargo loaded on the vessel at that port. Ferry (passenger and cars) movements also count as ballast movements since there is no loading/unloading of commercial cargo.

Commodity: Cargo loaded or unloaded is classified according to a structure based on Statistics Canada's Standard Classification of Transported Goods (SCTG).

Lightering: This term refers to the loading/unloading of cargo in a harbour rather than at a dock or wharf. Cargo tonnage is included with port totals.

In-transit cargo: Foreign cargoes handled at Canadian ports en route for or from a third country. Since tonnages are included in port totals, the statistics do not necessarily reflect import and export tonnages, but are rather focused on port activity.

Terms related to ports

Destination: The port of unloading of cargo is considered the port of destination. This is not necessarily the point of ultimate destination of cargo, which may be

inland. Relative to the international shipping sector, this is the foreign port or country of unloading and not necessarily the ultimate country of destination.

Origin: The port of loading of cargo is considered the port of origin. This is not necessarily the point of actual origin of cargo, which may be inland. Relative to the international shipping sector, this is the foreign port or country of loading and not necessarily the actual point of origin.

Handling port: The Canadian port of loading/unloading of cargo. This does not necessarily coincide with the Customs Port, or the municipality of the same name.

Atlantic region: This region consists of Canadian ports on the Atlantic Ocean and Arctic Waters, and that portion of the Gulf of St. Lawrence which is east of the inland waters as defined in the Canadian Shipping Act.

Great Lakes region: This region consists of Canadian ports located along the St. Lawrence river west of the Ontario-Quebec border, and on the Great Lakes.

Pacific region: This region consists of Canadian ports located on the Pacific Coast.

St. Lawrence River region: This region consists of Canadian ports located on the St. Lawrence river from the Ontario-Quebec border eastward, along the north shore to 63° west longitude and along the south shore to Cap des Rosiers.

Terms related to vessels

Gross register tonnage: The capacity in cubic feet of the spaces within the hull and of the enclosed spaces above the deck of a vessel, divided by 100. This is the figure as reported on the A6 General Declaration or the S1 and S4 reporting forms.

Net register tonnage: The gross register tonnage (as defined above) minus the capacity utilized by propelling machinery, fuel, and personnel accommodation.

In ballast: A vessel is considered arriving or departing "in ballast" if no cargo is loaded when leaving a Canadian port or no cargo is unloaded when arriving at a Canadian port.

LO LO: an acronym for "load on, load off".

RO RO: An acronym for "roll on, roll off".
