## Ordering and subscription information

This product, Catalogue no. 85-226-XIE, is published in electronic format on the Statistics Canada Internet site at a price of CDN \$26.00. To obtain single issues or to subscribe visit our Web site at [www.statcan.ca](http://www.statcan.ca), and select Products and Services.

This product is also available in print through a Print-on-Demand service, at a price of CDN \$42.00. The following additional shipping charges apply for delivery outside Canada:

	<b>Single issue</b>
<b>United States</b>	CDN \$ 6.00
<b>Other countries</b>	CDN \$ 10.00

All prices exclude sales taxes.

The printed version can be ordered by

- Phone (Canada and United States) **1 800 267-6677**
- Fax (Canada and United States) **1 877 287-4369**
- E-mail **order@statcan.ca**
- Mail Statistics Canada  
Dissemination Division  
Circulation Management  
120 Parkdale Avenue  
Ottawa, Ontario K1A 0T6
- And, in person at the Statistics Canada Regional Centre nearest you.

When notifying us of a change in your address, please provide both old and new addresses.

## Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner and in the official language of their choice. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1 800 263-1136.

## Note of appreciation

*Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.*

## Symbols

The following symbols are used in the tables that follow:

.. figures not available.

... figures not appropriate or not applicable.

- nil or zero.

year all data are based on the fiscal year unless otherwise expressed.

## Preface

The production of national justice statistics is made possible through a federal-provincial partnership. These data tables are the product of a collaborative effort on the part of individuals from government agencies responsible for youth correctional services across Canada.

Appreciation is expressed to the many contributors who provided direct input to this endeavour and to those who continue to provide guidance and support to the Correctional Services Program.

The following staff members have contributed to this publication: Shannon Crowe, Carole Cummings, Dianne Hendrick, Theresa Hoffman, Tim Leonard, Michael Martin, Lorie Shinder.

## INTRODUCTION

The purpose of this publication is to provide corrections-based data on youth admissions to custodial facilities and to probation and the daily average number of young offenders in custody and probation across the country. As such, the information describes the case-flow and workload on the youth corrections system. In addition, admission data describe the characteristics of youth admissions to custody and probation by the most serious offence, the length of disposition ordered by the court and releases by length of actual time served. Demographic information is also presented for youth admissions to custody and probation (i.e., sex, age and Aboriginal status).

### Scope of the Youth Custody and Community Services Survey

Data presented in this publication are primarily drawn from the YCCS survey. The scope of the YCCS survey is to collect and analyse information on the application of dispositions under the *Young Offenders Act* from provincial and territorial agencies responsible for youth corrections and programs. The primary unit of analysis for the YCCS survey is the *admission*, which is the commencement of an uninterrupted period of supervision by the Provincial/Territorial Director within a specific status (e.g., secure custody).

The data in this publication are national in scope representing all of the provinces and territories across Canada except Nunavut. Work is underway to include Nunavut in the next survey cycle.

Jurisdictions provide data on the application of dispositions under the YOA on two levels. Newfoundland and Alberta provide case specific information (or micro level data) which are used to generate the aggregate admission counts reported in this publication. These respondents represent roughly 13% of the national caseload. The remaining jurisdictions report to the survey on an aggregate level. Because of the limited coverage provided by the microdata survey, analysis in this report has been limited to aggregated data. Future expanded coverage of the microdata survey will eventually permit more comprehensive analysis of the characteristics of youth cases in corrections. It should also be noted that as the survey has only previously released two years (1997-98 and 1998-99) of data, it is difficult to report on long term trends at this time. For more information on the YCCS survey and its methodology please refer to the methodology and glossary section contained in this publication.

### Youth Key Indicator Report

The youth key indicator data provide a different view of the youth correctional system when compared to admission data. While admission data represent the movement of young offenders in and out of supervision (or case-flow), the key indicator survey maintains data on the "daily average counts" (or caseload), which measures the volume of offenders held in custody or on probation at a given point in time. Although the key indicator data are rather general in nature, they are an important and well-established management tool for corrections officials. The use of such indicators is particularly important for monitoring trends in correctional populations and to assist policy makers and corrections officials in decision making. These data are also used by academics to study trends in the youth correctional system over time and across jurisdictions by examining incarceration and probation rates (per 10,000).

#### The National Justice Statistics Initiative

The data contained in this publication are the result of a partnership between federal, provincial and territorial governments. This partnership is referred to as the National Justice Statistics Initiative (NJSI) and is essential to reporting national and comparable data on youth crime and its administration. It is important to point out that the application of national and uniform definitions may result in differences between the data contained in this publication and those found in provincial and territorial reports.

## METHODOLOGICAL OVERVIEW

### YCCS Survey Methodology

This publication contains data collected from two different sources (i.e., Youth Custody and Community Services (YCCS) survey and the Key Indicator Report). The YCCS survey maintains both micro and aggregate level data, which are collected by provincial and territorial agencies responsible for the delivery of youth corrections and young offender programs.<sup>1</sup> These data are collected annually on a fiscal year basis (April 1 to March 31).

Jurisdictions providing aggregate data complete a set of standard data tables, which are used to compile national data on admissions and releases. Micro data, on the other hand, are extracted directly from provincial operational systems, through the use of interface programs. The interface programs are designed to extract specific data elements and values identified in the National Data Requirements developed by provincial/territorial and federal members of the National Justice Statistics Initiatives. Micro data received by the YCCS survey staff are processed by the YCCS Central System, which edits and loads clean micro data onto the YCCS database. The loaded data are later used to generate admission counts, which are tabulated in the aggregate standard data tables.

It is important to note that for both aggregate and micro level respondents, once the data are processed and compiled into the standard data tables, these data are analyzed and returned to the jurisdictions for final verification. The participation of the jurisdictions in the survey process is vital to ensuring data quality and understanding of the differences in provincial and territorial youth justice/correctional systems.

### Calculating the unit of analysis

The YCCS survey maintains two levels of data that describe the case-flow of youth within correctional facilities and programs: initial entry data and admission data.

Initial entry data indicate at what point or type of supervision the youth first enters the youth corrections system. The second level, admission data, measures the movement of young offenders as admissions to different types of supervision. The following example provides an illustration of how admissions for a unique young offender are calculated by the YCCS survey.

e.g. remand + secure + open + probation (all served consecutively, within one fiscal year)

- i) initial entry:           1 initial entry to remand
- ii) admissions:           1 admission to remand  
                                  1 admission to secure custody  
                                  1 admission to open custody  
                                  1 admission to probation

In this example, the individual youth would generate one initial entry to remand. Typically, one unique youth should always be associated with one initial entry in a given reporting year. However, it is important to point out that if a young offender completes his/her disposition and once again re-enters the system after re-offending in the same reporting year, he/she will generate more than one initial entry.

Four admission counts would be generated in this case: one admission to remand; one admission to secure custody; one admission to open custody; and, one admission to probation. Again, one unique youth could have multiple admissions to similar and different levels of supervision in one reporting period.

It is also important to point out that youth transferred from one facility to another while still under the same level of supervision are not counted as a new admission. As well, new admissions are not counted for young offenders placed in secure custody facilities for a period not exceeding 15 days following an administrative transfer from open custody, or for youth returning from a period of temporary absence.

<sup>1</sup> Those jurisdictions that submitted micro data were Newfoundland and Alberta. Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Manitoba, Saskatchewan, British Columbia, Yukon and the Northwest Territories provided aggregate data only. Nunavut was not able to provide data.

## YCCS Data Quality Statement

The measurement and assessment of data quality is a complex undertaking. There are several dimensions to the concept of quality, many potential sources of error and often no comprehensive measures of data quality.

Issues of data quality in the YCCS survey must be addressed at the provincial and territorial level as well as within the CCJS. Errors arising in the original recording, coding, keying and transmission of data are difficult to measure and assess. Most of the jurisdictional computer systems incorporate basic editing routines to ensure that data fall into acceptable ranges for quantitative data. In some jurisdictions, look-up tables are used to validate the criminal code offence data. These actions certainly reduce the number of incoming errors to the CCJS but they do not entirely eliminate the errors. Random errors are more difficult to locate and correct compared to the systematic type errors. This last type of error can usually be corrected within the CCJS and feedback is given to the jurisdictions for correction.

Errors in the YCCS are detected using several strategies. Data incoming to the CCJS are reviewed for the amount of change from one year to the next for the same jurisdiction (where possible). Ratios can be calculated to verify that basic relationships are not dramatically changing over time. For example, the ratio of males to females in some tables should be fairly consistent over time.

The CCJS has conducted a review of data quality using YCCS micro data from 1993-94. The summary report concentrates on the validity of coding of each variable on the five record types. For some variables, the amount of data appearing in the published tables is a fraction of the total possible. Data are missing for a variety of reasons. In some variables, the data element is simply not collected by a jurisdiction or it is collected but not available for use in the YCCS survey. Additional data can also be missing because of invalid responses or codes. Where possible, feedback is given to the jurisdictions in order to improve data quality procedures and processes. Little statistical imputation methodology is currently used to handle missing or inconsistent data. Only when the disposition commencement date is missing, is it imputed from the date the court ordered the disposition to take effect.

YCCS survey staff contact individual jurisdictions regarding problems discovered after initial data processing with the objective to increase the useable amount of data for publication. In some cases, the errors are quickly fixed (a re-coding is done). In other situations, the errors are more difficult to correct with the result being that data from the jurisdiction may not be included in the publication.

## Jurisdictional Reporting

Every province/territory represents a single jurisdiction in the YCCS survey, except Ontario, which is represented by two jurisdictions in the following data tables. The Ontario Ministry of Community and Social Services (Ontario MCSS) is responsible for all young offenders that were between the ages of 12 and 15 at the time of the offence. The Ontario Ministry of the Solicitor General and Correctional Services (Ontario MSGCS) has jurisdiction over all young offenders that were 16 or 17 years of age at the time of the offence.

## Youth Key Indicator Report Methodology

The Key Indicator Report data measure the average number of youth in custody (remand, secure, and open) and on probation. The data are collected annually on a fiscal year basis (April 1 to March 31). Jurisdictions submit monthly counts in aggregate format, which are compiled by Correctional Services Program staff at CCJS. Average counts include all youth on remand and temporary detention, sentenced offenders and other young offenders who are legally required to be at a facility and are present at the time the count is taken by correctional facility officials. Average counts for young offenders on probation include young offenders on supervised probation at the end of the month.

## Appendix

### Youth Population Figures, Canada, 1999

Jurisdiction	Total <sup>1</sup>	Percent
<b>Canada</b>	<b>2,449,097</b>	<b>100.0</b>
Newfoundland	48,300	2.0
Prince Edward Island	12,381	0.5
Nova Scotia	76,141	3.1
New Brunswick	61,135	2.5
Quebec	549,601	22.4
Ontario	914,502	37.3
Manitoba	98,222	4.0
Saskatchewan	96,286	3.9
Alberta	263,540	10.8
British Columbia	318,874	13.0
Yukon	2,968	0.1
Northwest Territories	3,976	0.2
Nunavut	3,171	0.1

<sup>1</sup> Youth population includes youth aged 12 to 17.

Source: Statistics Canada, Census and Demographic Statistics Branch, Demography Division (Updated postcensal estimates as of July 1, 1999).

## YCCS Glossary of Terms

**Aboriginal Status:** Indicates whether the youth is Aboriginal. Aboriginal status includes both individuals registered under the *Indian Act* and those that are non-registered. Please note that this variable is self-reported and data availability varies among jurisdictions.

**Admission:** Refers to the youth's commencement of an uninterrupted period of supervision by the Provincial/Territorial Director within a specific status (i.e., remand, secure and open custody and probation). For the YCCS survey, a new admission is counted each time an offender changes status.

**Admission Facility:** The facility to which a young offender is admitted into custody. Please note that the YCCS survey does not track facilities beyond the admitting facility (e.g., administrative and other transfers) unless the offender's status changes. When comparing jurisdictions, please note the following:

- a) facilities may be secure or open custody facilities according to the local designation, the level of supervision, and the extent to which the youths are detained through security measures;
- b) secure facilities in some jurisdictions may be comparable to open facilities in others and vice versa; and
- c) in some jurisdictions, secure custody, open custody and remand are all dealt with at the same facility.

**Age:** Refers to the age of the offender at the time of admission into a youth facility or community program.

**Custody:** A status that requires the young offender to spend time in a designated correctional facility, either in secure custody, open custody or remand as ordered by the youth court.

**Disposition:** A youth court orders a disposition upon finding a young person guilty of an offence. The type of dispositions include the following:

- a) Custodial dispositions: include secure custody and open custody; and
- b) Community service dispositions: include probation, community service order, personal service order, compensation, restitution, pay purchaser, fine, prohibition/seizure/forfeiture, other disposition deemed appropriate.

**Initial Entry:** Refers to the point or type of supervision that a youth first enters the youth corrections system regardless of supervision status.

**Most Serious Offence:** The YCCS survey categorizes "most serious offence" (MSO) according to the offence classification scheme currently being used by the Youth Court Survey. Offence types are categorized from most to least serious, as follows: violent, drug related, property, other *Criminal Code*, *YOA*, and provincial/municipal or other federal offences. The MSO categories include the following:

1. **Violent offences:** include offences such as murder, attempted murder, sexual assault, aggravated assault, common assault, robbery, kidnapping, and extortion. Violent offences involve the use or threatened use of violence against a person. Robbery is considered a violent offence because unlike other theft offences, it involves the use or threat of violence.
2. **Drug related offences:** include offences such as importing/exporting narcotics, trafficking in narcotics, possession of narcotics, cultivation, trafficking in drugs, and possession of drugs.
3. **Property offences:** include offences such as break and enter, theft, arson, motor vehicle theft, fraud, possession of stolen property, and mischief. Property offences involve unlawful acts to gain property, but do not involve the use or threat of violence against the person.
4. **Other Criminal Code offences:** include offences such as prostitution, impaired operation of a motor vehicle, escape custody, failure to appear, disorderly conduct, soliciting, and offences against the administration of justice.
5. **YOA offences:** include offences such as failure to comply with a disposition, and contempt against youth court. The *YOA* is primarily concerned with the process for dealing with youth accused of crime. However, youth can be charged under the *YOA* usually when they fail to comply with a court-ordered disposition.

**6. Provincial/Territorial, Municipal and Other Federal offences:** include offences such as provincial liquor offences, provincial/territorial traffic violations, violations of municipal by-laws, and violations of other federal statutes such as offences under the *Income Tax Act* and *Immigration Act*.

**Open custody:** The *Young Offenders Act* defines open custody as “custody in (a) a community residential centre, group home, child care institution, or forest or wilderness camp or (b) any like place or facility”. A facility is considered “open” when there is minimal use of security devices or perimeter security. The extent to which facilities are “open” varies across jurisdictions.

**Probation:** A common type of community-based disposition, where the offender is placed under the supervision of a probation officer or other designated person. This includes both supervised and unsupervised probation.

**Release:** Refers to the completion of an uninterrupted period of supervision by the Provincial/Territorial Director within a specific status (i.e., remand, secure and open custody and probation). For the YCCS survey, a new release is counted each time an offender changes status.

**Remand:** To hold a young person temporarily in custody, pursuant to a Remand Warrant, while awaiting trial or sentencing, or prior to commencement of a custodial disposition.

**Reporting Period:** The subject time period (e.g., fiscal year – April 1 to March 31) during which a youth must be active in order to be extracted for YCCS survey purposes. A youth is active if he/she is under the supervision of the Provincial/Territorial Director of youth corrections (e.g., serving a disposition).

**Secure Custody:** Under the *Young Offenders Act* a facility is considered secure when youths are detained by security devices, including those which operate with full perimeter security features and/or where youths are under constant observation. The extent to which facilities are “secure varies across jurisdictions.

**Sentence Length:** This refers to the aggregate sentence or total amount of days a young person is ordered to serve under the *Young Offenders Act*. The specific amount of days must be for an uninterrupted period of time during which the youth is under the authority of the Provincial/Territorial Director. For multiple **custodial sentences** (i.e., secure and open custody), if dispositions are concurrent then the sentence length is the longest sentence; if the dispositions are consecutive then the sentence length is the sum of all custodial sentence; and if dispositions are both concurrent and consecutive then the aggregate sentence is the sum of both types as calculated above.

**Sentenced Custody:** Refers to both secure and open custody

**Status of Supervision:** The status in which the young offender is serving a sentenced disposition (e.g., secure custody, open custody, probation or other community service) as ordered by a youth court or is held temporarily in remand before a court hearing.

**Time Served:** Refers to the aggregate time served or total amount of days a young person spent in custody upon completion of an uninterrupted period of time during which time the youth was under the authority of the Provincial/Territorial Director.

**Young Offender:** A person who is twelve years of age or older, but less than eighteen years of age, at the time of committing an offence.

## Y-KIR Glossary of terms

**Actual-in counts** - Includes all youths on remand and temporary detention, sentenced offenders and other young offenders who are legally required to be at a facility and are present at the time the count is taken.

**Calculation of rates of incarceration** - Rates of incarceration for “actual-in” counts for youth are calculated for each jurisdiction using the population at risk figures. That is, the provincial/territorial population aged 12 to 17 years. For those jurisdictions with split responsibilities, rates of incarceration reflect the respective population at risk. It should be noted that some jurisdictions may hold persons up to 20 years of age, if the offender was charged/sentenced while less than 18 years old, but has since reached the age of a legal adult. The average count for the month is divided by the Canadian youth population, then the result is multiplied by 10,000 to obtain the rate per 10,000 youths.

**Monthly average daily count calculation** - The data for monthly average daily counts are calculated by dividing the total days stay (or total “bed” days) for all correctional institutions within the jurisdiction by the number of days in the month.

**Month-end probation count** - Data are an indication of the current monthly caseload of young offenders on supervised probation.

**Remand/temporary detention counts** - Includes only those youths detained in custody under a Remand Warrant who are awaiting a further court appearance, and are not presently serving any type of sentence.

**Sentenced counts** - Includes all youths in custody under a Warrant of Committal serving a provincial/territorial or federal sentence, as well as those persons who have been sentenced on one charge but who are awaiting the completion of court hearings on another charge. Also includes youths that have completed a custodial sentence and have been returned to custody following a breach of conditions.

**Supervised probation** - Includes all youths who must, as a condition of a probation order “report to and be under the supervision of a probation officer or other person designated by the court”.
