New Home Market

EDMONTON'S HOUSING STARTS OPEN 2007 WITH A STRONG SHOWING

New housing activity across Greater Edmonton began 2007 on a firm footing thanks to a surge in multiple unit starts. Total housing starts across the Edmonton Census Metropolitan Area (CMA) increased by 30 per cent over January 2006 to 1,098 units. Much of these improvements occurred within the city of Edmonton, where total starts increased by 43 per

cent over the same month last year to 725 units. In the suburban areas outside of Edmonton City, total starts grew by a more moderate 11 per cent over last January to 373 units.

Following a steep year-over-year decline in December, multiple unit starts climbed to 487 units in January compared with only 144 multiple

dwelling starts in the first month of 2006. Row and apartment starts both increased by a wide margin over January of last year, while semi-detached starts fell by 75 per cent to 26 units. The apartment activity was centred entirely within Edmonton City, with all 178 units targeted at the condominium market. Row (townhouse) starts were more widely dispersed throughout the region, with only four of the 283 units aimed at the rental market and the balance intended for condominium occupancy.

Multiple unit completions hit 700 units in January compared with the 223 semi, row and apartment units that finished construction in January 2006. Due to the upswing in completions, multi-unit absorptions also surged, more than doubling last January's tally to 665 units. As such, multiple unit inventories remained largely unchanged from the previous month of December. At 453 units, the inventory of unabsorbed multiples represented a 53 per cent drop from the first month of 2006.

Single-detached starts reached 611 units in January, representing a 13 per cent decline from the same month

last year. However, last month's activity still represented the second best January performance on record and last year's tally was aided by exceptionally mild winter weather.

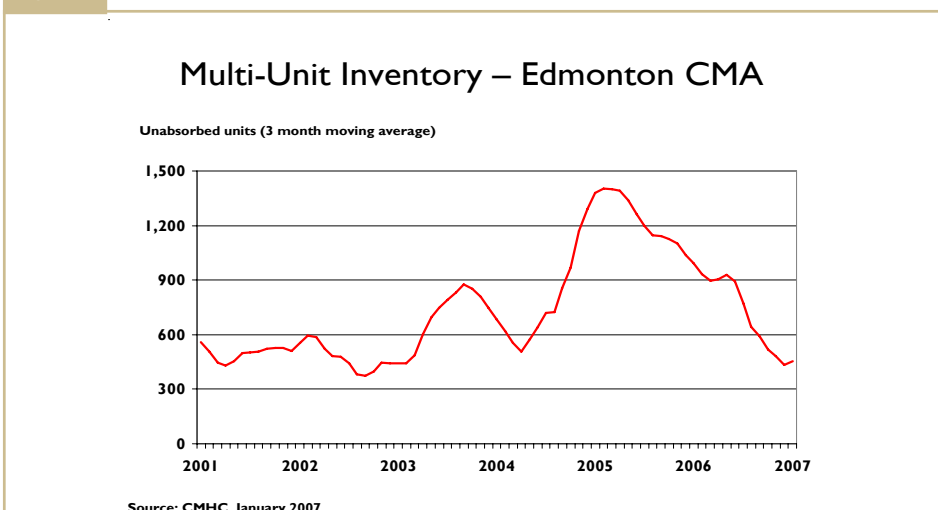

January's single-detached completions increased by 16 per cent over the same month last year to 674 units. Meanwhile, absorptions rose by 17 per cent year-over-year to 682 units. With completions outpacing absorptions, the inventory of completed and unoccupied units, including show homes, dropped from 476 units in the previous month of December to 468 units in January. January's inventory was 18 per cent below the level reported at the beginning of 2006.

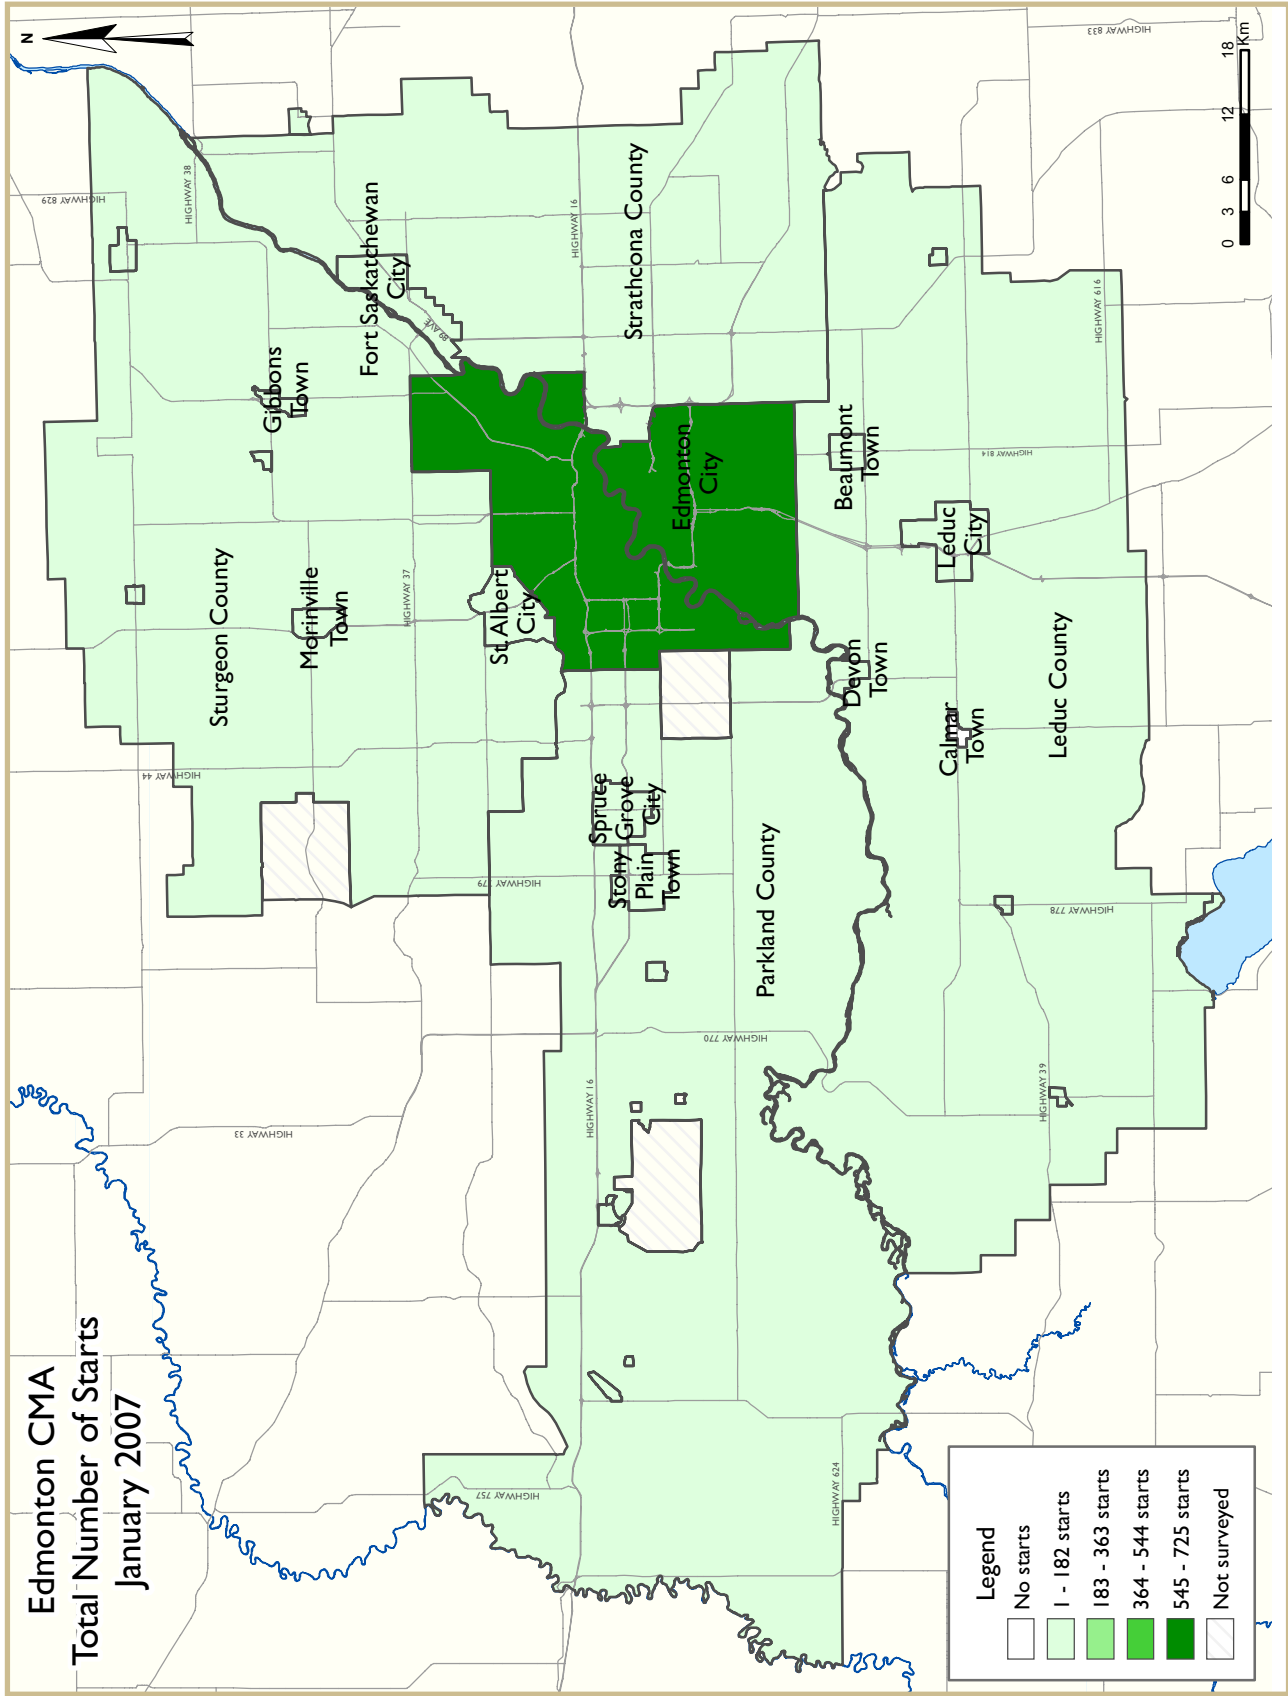

With completions outpacing starts in January, single-detached units under construction declined for the first time since October 2005. Nonetheless, units under construction were still 46 per cent higher than the number of singles underway in January of last year.

New home prices continue to soar this year. Following a 35 per cent year-over-year increase in December, the

average price for a new single-family home absorbed in January rose by 32 per cent over the same time last year to \$362,297. This compares with a 52 per cent gain in the price of existing single-family homes sold in January, which averaged \$357,325 according to the Edmonton Real Estate Board.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2001 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that Canada maintains one of the best housing systems in the world. We are committed to helping Canadians access a wide choice of quality, affordable homes, while making vibrant, healthy communities and cities a reality across the country.

For more information, visit our website at <http://www.cmhc.ca/>

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.

Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is now available for **free** on CMHC's website. You can now view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to <http://www.cmhc.ca/housingmarketinformation>
