SLOW MONTH OF JUNE FOR RESIDENTIAL CONSTRUCTION

According to our latest starts survey, housing starts fell by 21 per cent in June in the Montréal census metropolitan area (CMA). Builder started construction on a total of 1,568 dwellings, or 415 fewer than during the same period last year.

It was mainly on the Island of Montréal that activity showed signs of weakness, with a drop of 64 per cent. The rental housing segment was the hardest hit, as construction got under way on only II new units, compared to 396 in June 2005. There were also fewer condominium starts in this sector, with a decrease of 15 per cent. As well, foundations were laid for 54 freehold homes (versus 51 in 2005), which completes these meagre results for the Island of Montréal.

The picture was brighter in the northern suburbs, where starts registered a small gain (+2 per cent). The Laval sector posted good results in June, with 263 starts, for an increase of 60 per cent. The rental and condominium housing segments were the most active. On the North Shore, however, there were fewer new job sites than a year ago, as total starts decreased from 610 units in June 2005 to 530 units in June of this year. As usual, freehold (single-family)

homes dominated, with this segment garnering two thirds of the activity. Finally, in Saint-Jérôme, the month of June was just like last year's (-2 per cent).

The South Crown, for its part, registered a small decrease in activity (-4 per cent) this past month. In Longueuil, 68 starts were enumerated, half of them (36 units) in the condominium segment. In the rest of the South Shore, the 282 starts made for a slight decline (-5 per cent), even though the condominium segment posted a notable increase (92 versus 55 units).

Lastly, in the Vaudreuil-Soulanges sector, construction went down by 6 per cent, with III starts, practically all freehold homes.

The mid-year results (cumulative volume from January to June) show an overall decrease of 13 per cent in residential construction in the Montréal metropolitan area. Freehold home starts are down slightly (-7 per cent), while condominium construction is holding steady. The rental housing segment is therefore bearing the brunt of the decline, with a drop of 35 per cent since the beginning of the year. However, rental

housing starts are expected to rebound over the coming months. In fact, several major retirement housing projects will be getting under way very shortly.

Elsewhere across Quebec, it was in Sherbrooke that builders were the busiest in June, with 392 housing starts, for an impressive leap of 178 per cent. Otherwise, only the Saguenay CMA had comparable results, with construction getting under way on 78 new dwellings, for an increase of 90 per cent. The areas of Trois-Rivières (-35 per cent), Québec (-28 per cent) and Gatineau (-13 per cent) did not follow suit, in terms of growth.

Seasonally Adjusted Annual Rates - Montréal CMA

Major Housing Job Sites Started in June

The following are the major multiple housing job sites started in June 2006 in Greater Montréal, along with the intended market segment announced for the projects at the time they got under way:

Number of units	Intented segment	City (Sector)
89	Rental	Laval (Fabreville)
41	Condominiums	Saint-Léonard
21	Condominiums	Montréal (NDG)

CMHC Montréal Housing Outlook Conference

REAL ESTATE FEVER COOLING DOWN: WHERE DO WE GO FROM HERE?

November 21, 2006 • Palais des Congrès de Montréal - 7:30 a.m. to 11:30 a.m.

For more information or to register, call 1 800 668-2642, or register on-line at http://www.cmhc.ca/od/?pid=63679

In the meantime, here is a preview of the topics that will be addressed:

- The provincial outlook: economic and demographic conditions, household debt
- Montréal area: time for a new health check
- Which market niches seem the best positioned and which appear to be the most vulnerable?
- Renovation, a prosperous market
- All the forecasts for 2007

	Definitions and Concepts
Intended Markets	The freehold market refers to single-family houses (detached, semi-detached and row) owned under freehold tenure; the condominium segment comprises houses and apartments held under divided co-ownership; and finally, the rental market encompasses apartment dwellings.
Housing Starts	Refer to the beginning of construction work on a building, usually when the concrete has been poured for the entire footing around the structure, or at an equivalent stage where a basement will not be a part of the structure.
Under Construction	Units started but not completed. The number of units under construction at the end of a period may take into account certain adjustments that took place, for various reasons, after the starts were reported.
Completions	Refer to units where all the proposed construction work has been performed or, in some cases, where ninety percent of all the construction work has been completed and the structure is fit for occupancy.
Unoccupied	Refer to new completed units that have remained unoccupied.
Absorptions	Newly completed units sold or rented. The number of absorptions is obtained from a survey initiated when the structure is completed. Units presold or pre-leased are not included until the completion stage. The number of absorbed units is the number of completed and unoccupied units from the previous month plus the completions for the current month minus the completed and unoccupied units for the current month.
Duration of Inventory	Refer to the period necessary for the absorption of the unoccupied units, that is, the ratio between unoccupied units and absorbed units (average for the last 12 months). This figure is expressed in month.
Short-Term Supply	Refer to the total supply of new units and includes units under construction and units that are completed but not occupied.
Duration of Supply	This is the period required to absorb the units under construction and unoccupied, that is, the ratio between the total supply and the absorbed units (average for the last 12 months). This figure is expressed in months.

CANADIAN WOOD-FRAME

This national best-selling guide to constructing a wood-frame house is the ideal learning tool and job-site manual. The new edition of Canadian Wood-Frame House Construction has been updated to reflect the residential requirements of the 2005 National Building Code of Canada. In addition, many changes have been made to bring the book in line with current building science research, construction methods and construction materials. Order now at www.cmhc.ca or call I 800 668-2642
