Wage Settlements

Wage Settlements Covering 500 or More Employees February 2007

Major collective bargaining settlements reached in February 2007 provided base-rate wage adjustments averaging 3.2% annually over the contract term.

The results for February 2007 are based on a review of 8 settlements reached and cover 8,640 employees. The number of settlements is below the normal monthly range (which averaged 28–29 per month during 2006). For these reasons, the February data should be interpreted with care.

When the parties to these February settlements previously negotiated, the resulting wage adjustments averaged 2.8%, lower than in their current settlements. Contract duration in February 2007 averaged 45.1 months, compared to 36.1 months in the previous round of settlements.

Wage adjustments in the public sector were higher than those in the private sector. The

public-sector average for 5,200 employees in 4 agreements was 4.3%. The relatively high public-sector figure was influenced in large part by a University of Montréal agreement covering 2,500 lecturers and averaging 5.2%. The private-sector average for 3,440 employees

in 4 agreements was 1.6%. The low private-sector figure was largely a result of the Olymel (meat processing plant) settlement in Quebec, averaging -0.8% (includes a 14% wage cut in the first year of an 87-month agreement).
