

# Farm Cash Receipts

## Agriculture Economic Statistics

**November 2004**

Statistics Canada  
Agriculture Division  
Farm Income and Prices Section

Catalogue No. 21-011-XIE is a semi-annual publication available free on the Internet at <http://www.statcan.ca>

### Highlights: 2003

#### Cash receipts lowest in three years

In total, farmers received \$34.2 billion from all revenue sources last year, down 5.4% from 2002. It was the lowest level since 2000, yet was still above the average for the previous five years (1998 to 2002).

Revenue from livestock dropped 11.0% to \$16.2 billion, lowest since 1999. Receipts for crop producers fell 9.5% to \$13.2 billion, lowest since 2000. In contrast, program payments rose 41.2% to a record \$4.8 billion, shattering the previous record of \$3.8 billion set in 1992.

Cattle receipts fell by around one-third last year to \$4.5 billion, as marketings and prices both dropped in the wake of the May 20 export ban on cattle and beef products after the bovine spongiform encephalopathy (BSE) diagnosis. Revenues from international exports of live cattle plunged by more than two-thirds to \$569 million. Almost all exports go to the United States, and this market has closed.

On the other hand, hog farmers reported cash receipts of \$3.4 billion, up 3.4%. The number of hogs sold abroad last year rose by almost 30%, helping to push marketings to record levels, while the average price for the year was similar to the average price for 2002.

---

#### Note of Appreciation

Canada owes the success of its statistical system to a long standing co-operation between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued co-operation and goodwill.

December 2004

La version française de cette publication est disponible (n° 21-011-XIF au catalogue).

On the supply-managed side, which accounted for over 40% of livestock revenue in 2003, receipts for milk and cream continued to climb. Revenues from chicken rebounded, while receipts for eggs dipped.

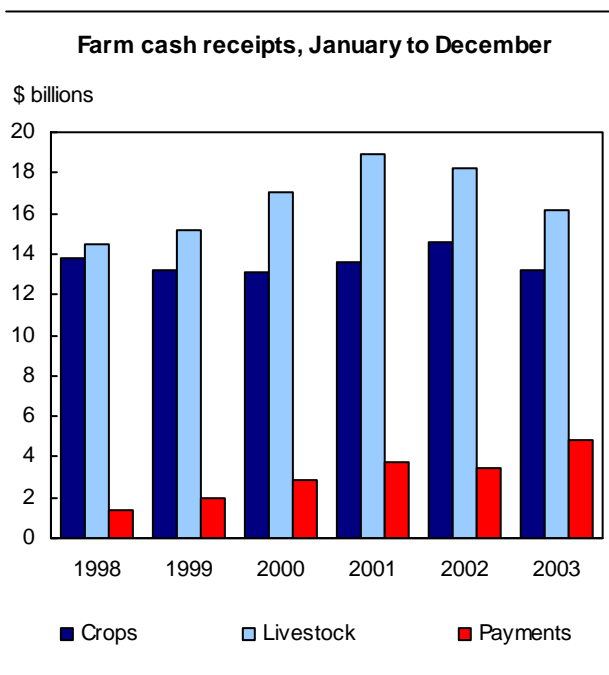

Crop receipts in 2003 fell 3.4% below the previous five-year average despite improved growing conditions in western Canada. Two consecutive droughts slashed production and sharply curtailed grain and oilseed inventories by the end of 2002. Consequently, producers had little to sell until they harvested the 2003 crop.

The 2003 production of most crops surpassed levels in 2002. During the second half of 2003 in particular, higher deliveries were offset by lower prices for most of the major grains and oilseeds, as well as lower Canadian Wheat Board (CWB) payments.

Hardest hit were producers of wheat (excluding durum) and barley. Revenues from wheat (excluding durum) fell 29.8% to \$1.8 billion in the wake of lower deliveries and CWB payments.

The majority of the 41.2% jump in program payments last year occurred in the form of payments delivered through three separate types of programs. These were: the 2003 Transition Funding program; assistance programs provided to help offset the impact of the BSE-related ban; and crop insurance programs.

Canadian farmers received almost \$1.0 billion through both the 2003 Transition Funding and the BSE-related programs. (The Transition Funding program was implemented to support the agricultural industry during the period of transition to the new Agricultural Policy Framework.)

## Symbols

The following standard symbols are used in Statistics Canada publications:

- . not available for any reference period
- .. not available for a specific reference period
- ... not applicable
- 0 true zero or a value rounded to zero
- 0<sup>s</sup> value rounded to 0 (zero) where there is a meaningful distinction between true zero and the value that was rounded
- P preliminary
- r revised
- x suppressed to meet the confidentiality requirements of the *Statistics Act*
- E use with caution
- F too unreliable to be published

## Concepts and methods

### Introduction

This publication is part of a series of bulletins that also includes:

- [Net farm income - Agriculture economic statistics \(21-010-XIE\)](#),
- [Farm operating expenses and depreciation charges - Agriculture economic statistics \(21-012-XIE\)](#),
- [Value of farm capital - Agriculture economic statistics \(21-013-XIE\)](#),
- [Farm debt outstanding - Agriculture economic statistics \(21-014-XIE\)](#),
- [Direct payments to agriculture producers - Agriculture economic statistics \(21-015-XIE\)](#),
- [Balance sheet of the agriculture sector - Agriculture economic statistics \(21-016-XIE\)](#),
- [Agriculture value added account - Agriculture economic statistics \(21-017-XIE\)](#),
- [Farm business cash flows - Agriculture economic statistics \(21-018-XIE\)](#).

This particular publication presents annual estimates of farm cash receipts by commodity starting from 1926. Data highlights are provided for the most current year.

All series can be obtained free on the internet at the Statistics Canada web site ([www.statcan.ca](http://www.statcan.ca)). Notes on concepts and methods are also included for each data series.

The electronic publication is first available in June. It includes preliminary estimates for the calendar year just ended. The following January, the publication is re-issued with revisions to the preliminary estimates. Revisions to the June issue can extend back two years, while those in January generally apply to three years. The date provided at the top right corner of each table is the last time that a revision was made to that table.

Most data appearing in this publication are available through the Canadian Socio-Economic Information Management System (CANSIM), Statistics Canada's corporate computerized data base network and information retrieval service.

The Client Services, Agriculture Division, Statistics Canada can be contacted at 1 (800) 465-1991 or by email at [agriculture@statcan.ca](mailto:agriculture@statcan.ca) for further information and/or to obtain data in a different medium.

Statistics Canada is committed to ensuring that there is no disclosure of confidential material and therefore all data are subjected to restrictions prior to release.

### *Farm cash receipts*

This publication presents farm cash receipts by commodity and by calendar year from 1926 to date for every province except Newfoundland and Labrador. Data for Newfoundland and Labrador are only available from 1972. However, since Newfoundland and Labrador's agricultural production is small, this break is not significant at the Canada level. For the period 1950 to 1970, data are also available through the CANSIM database on a monthly basis and on a quarterly basis for the period 1971 to date.

### Concepts

Farm cash receipts measure the gross revenue of farm businesses in current dollars. They include sales of crops and livestock products (except sales between farms in the same province) and program payments. Receipts are recorded when the money is paid to farmers before any expenses are paid.

The farm cash receipts series includes agricultural products such as field crops, vegetables, fruits, floriculture and nursery products, sod, maple and forest products, livestock, dairy products, poultry, eggs, wool, fur, and honey.

The direct program payments to producers included in farm cash receipts represent the amounts paid under various **government** and **private** programs to individuals involved in agricultural production. The payments related to current agricultural production include subsidies to encourage production or to compensate producers for low market returns, payments to stabilize incomes and payments to compensate producers for crop or livestock losses caused by extreme climatic conditions, disease or other reasons.

The primary reason for compiling farm cash receipts is to estimate, on a provincial basis, the agriculture sector's contribution to gross domestic product. Consequently, all inter-farm sales within a province are excluded from farm cash receipts estimates as their inclusion would result in double counting. It should be noted, however, that farm-to-farm sales between provinces are included as are all sales outside the sector. Excluding inter-farm sales within a province means that farm cash receipts cannot be used as a measure of the gross output of the agriculture sector.

Farm cash receipts are estimated on a cash basis and represent the value of sales when they occur, that is, when ownership first changes hands. Thus, sales are only recorded when cash disbursements have actually occurred. The prices used to value transactions include any bonuses and premiums which can be attributed to specific commodities, but exclude fees deducted before the producer is paid (e.g. storage, transportation, marketing or administrative costs).

In several cases, particularly where crops are concerned, producers receive a partial or an initial payment for their commodities at the time of sale. As the marketing of the crop progresses, an adjustment or final payment is made. These payments are only shown in cash receipts when producers receive the funds. Examples of such cases include Ontario Wheat Producers' Marketing Board (OWPMB) and Canadian Wheat Board (CWB) adjustment, interim and/or final payments for wheat, oats and barley. Oats ceased to be marketed through the CWB on July 31, 1989. Similar payment patterns also occur for sugar beets and dry beans.

Receipts from the sale of some agricultural products can be deferred. For example, producers in Western Canada have the option of deferring grain receipts to the next year. In the past, Statistics Canada used the assumption that payments ("liquidations") of deferred grain and oilseed receipts ("deferments") from the crops sold in one calendar year were all received in January of the following year. After conducting an examination of records provided by elevators, it was established that it was true for 90 to 95% of the cases. The series were revised accordingly, starting with 1998 data, to record more accurately in which month the liquidations occurred.

All published commodity receipts represent receipts from the market. Thus, any subsidy or stabilization payment directed at a specific commodity is not included in the receipts for that commodity. In fact, all direct subsidies or payments to the agriculture sector are recorded separately.

### Methods

Cash receipts are, for the most part, based on monthly marketings and prices of the various commodities. Direct program payments are based on data obtained from several sources on a monthly or quarterly basis.

Calculations of commodity cash receipts involve the use of many data sources which can vary by province and by commodity. Most of the prices for the monthly marketings are collected from administrative sources such as marketing boards, regulatory agencies and market information. Some prices are also provided by a monthly farm prices survey conducted by Statistics Canada. In all cases, the prices reflect those received by producers at the point when ownership first changes hands.

Monthly marketings are mostly obtained from administrative records of marketing boards, government agencies and private companies. Grain marketings, including durum wheat, wheat excluding durum, oats, barley, rye, flaxseed and canola for the Western provinces, are obtained from the Canadian Grain Commission. In Eastern Canada, the data are either obtained from marketing boards and producer associations, based on historical marketing patterns or agreed upon in consultation with provincial specialists.

Marketings for crops such as corn, soybeans, tobacco, sugar beets and dry beans are obtained from marketing boards and associations as well as private companies.

Cash receipts estimates for potatoes, fruits, vegetables, honey, maple and forest products, and greenhouse and nursery products are obtained through various surveys or censuses conducted by Statistics Canada, the provinces or other federal and provincial departments or agencies. These departments and agencies are also a major source of marketing data for mustard seed, sunflower seed, lentils, canary seed, dry peas, forage and grass seed, and hay and clover.

Livestock marketings, including cattle, calves, hogs, sheep, lambs, hens and chickens, and turkeys, are mainly based on market information from Agriculture and Agri-Food Canada and provincial departments and agencies. Marketings of eggs are also obtained from these sources. In the case of dairy products, producers' marketings of milk and cream are obtained from regulatory agencies and private companies.

Although the farm cash receipts series covers many commodities, it is not exhaustive. There is a miscellaneous category for crops and another for livestock. The cash receipts in these two categories are based on the quinquennial Census of Agriculture in order to account for commodities that are not estimated individually.

Since cash receipts are estimated on a cash basis, any amounts received after the sale of a product, whether in the form of a final or an adjustment payment, will be shown when the cash is received rather than when it was earned. Several items fall into this category, including payments by the CWB and the OWPMB, as well as deferments and liquidations of grain receipts. The information for these payments are obtained directly from the administrative bodies involved.

Direct program payments are tabulated quarterly. The agencies responsible for the disbursement of payments under the various programs provide the data on a monthly, quarterly and, in some cases, an annual basis. Only payments directly provided to producers are included in the series. These include payments under the Farm Income Protection Act (for the Gross Revenue Insurance Plan and the Net Income Stabilization Account), the Crop Insurance Act, the Western Grain Stabilization Act, the Agricultural Stabilization Act, Tripartite Plans, Provincial Stabilization Programs, the Canadian Dairy Commission Act and those made under ad hoc government programs.

Payments made under private programs such as private hail insurance and livestock insurance are included in the Farm Cash Receipts series under the categories "Private hail insurance payments" and "Other payments", respectively. In the publication [Direct payments to agriculture producers – Agriculture economic statistics, Statistics Canada Catalogue 21-015-XIE](#), "Crop

insurance payments" and "Other payments" do not include private program payments.

### Data comparability

The farm cash receipts series before and after January 1971 are not comparable. Modifications have been made to the series in terms of format, content and concepts. Consequently, the preceding documentation is only relevant for the period 1971 to date. The following is a list of the changes made to the cash receipts series effective January 1971.

- Cash advances and repayments under the Prairie Grain Advance Payments Act and the Advance Payments for Crops Act were removed from the series.
- Wheat receipts were disaggregated into wheat excluding durum and durum wheat receipts.
- Estimates were published for commodities previously included in the "miscellaneous crops" category such as lentils and canary seed.
- Fruit receipts were disaggregated into four separate categories.
- All direct payments enhancing receipts were grouped together. Farm cash receipts are presented with three sub-groupings - crops, livestock and payments.
- Poultry receipts have been disaggregated into hens and chickens, and turkey receipts.

Two new commodities were added to farm cash receipts effective January 1997 under the new North American Industry Classification System (NAICS): Christmas trees and poultry hatcheries. With poultry hatcheries becoming part of the agriculture sector:

- Inter-provincial sales and exports of chicks and poults are included in poultry hatchery receipts.
- Eggs sold to hatcheries in the same province are now considered as inter-farm sales and were removed from egg receipts.
- Inter-provincial sales and exports of eggs sold for hatching are still included in egg receipts along with receipts for table eggs.

As of the June 1999 intercensal revision, horse receipts are estimated using slaughter data from the Canadian Food Inspection Agency combined with international exports of slaughter horses.

### Data quality

As indicated above, farm cash receipts are estimated using both administrative and survey sources of data. Where necessary, data are adjusted to ensure conceptual consistency with the receipts series. Much of the data obtained from administrative sources have been summarized from the financial transactions of individual producers. These summarized data are often subject to

audit by independent professional accountants and/or are used to make payments to individual producers. As a result, the quality of these data is considered to be very good. The survey data used in the receipts series reflect typical Statistics Canada standards for quality assurance and, therefore, the quality of these data is considered to be good.

However, it is important to note that the receipts data are subject to error. Administrative data may contain non-sampling error such as keying mistakes, while survey data may suffer from both non-sampling and sampling error. Users should also note that the quality of individual estimates may not be consistent between commodities or between provinces because the data sources and their quality may vary. As well, the estimates of inter-farm sales between provinces are not strong as there are few sources for these data.

More detail on the quality of the crops and livestock data that are used to estimate farm cash receipts can be found in the following Statistics Canada publications.

1. Field crop reporting series, Cat. No. 22-002-XPB/XIB
2. Cereals and oilseeds review, Cat. No. 22-007-XPB/XIB
3. Canadian potato production, Cat. No. 22-008-UIB
4. Fruit and vegetable production, Cat. No. 22-003-XIB
5. Greenhouse, sod and nursery industries, Cat. No. 22-202-XIB
6. Production and value of honey and maple products, Cat. No. 23-221-XIB
7. Hog statistics, Cat. No. 23-010-XIE
8. Sheep statistics, Cat. No. 23-011-XIE
9. Cattle statistics, Cat. No. 23-012-XIE
10. The dairy review, Cat. No. 23-001-XPB/XIB
11. Production of poultry and eggs, Cat. No. 23-202-XIB
12. Farm product price index, Cat. No. 21-007-XIB.

### Data revisions

Annual farm cash receipts data are published twice each year, at the end of May and at the end of November. In May, receipts for the previous two calendar years are subject to revision. In November, receipts for the previous three years may be revised. Every five years a historical revision is done based on the results of the Census of Agriculture. The results of the latest intercensal revision, based on the 2001 Census of Agriculture, have been included with the November 2003 publication, and apply to the period 1991 to 2002. For more information about intercensal revisions, please refer to [Farm cash receipts – Agriculture economic statistics \(21-011-XIE Vol.2, No.2\)](#).

An indication of the expected size of revisions to farm cash receipts can be provided by a statistic known as Theil's Root Mean Square Prediction Error (RMSPE). This statistic represents the average percent difference between the initial and current estimates during the period in question. For example, the table below indicates that, from 1993 to 2002, total farm cash receipts at the Canada level have so far been revised, either up or down, by about 1.5% from the first published estimate.

	RMSPE 1994-2003
Total receipts	1.4%
Crop receipts	1.7%
Livestock receipts	1.2%
Payments	11.1%

Further information on Theil's RMSPE is available from [A Description of Theil's RMSPE Method in Agricultural Statistical Forecasts](#), Stuart Pursey, Working Paper #1, Agriculture Division, Statistics Canada, 1980.
