MONTRÉAL METROPOLITAN AREA RESIDENTIAL CONSTRUCTION POSTS FIFTH STRAIGHT GAIN

The latest starts survey conducted this past August by Canada Mortgage and Housing Corporation (CMHC) revealed that 1,878 new dwellings were started in the Montréal census metropolitan area (CMA), for an increase of 7 per cent over August 2006.

While this was the fifth consecutive increase in starts this year, the pace did slow down, though, since this gain was less significant than the hikes registered in previous months.

The results varied depending on the geographic sectors but, at the CMA level, condominium and freehold home starts rose by 65 per cent and 20 per cent, respectively, while the rental housing segment registered a decrease of 22 per cent.

This past month, on the Island of Montréal, construction got under way on 50 single-detached, semi-detached and row houses, just like in August 2006. There were 21 times more rental housing starts, and the number of condominium units started more than doubled. Multi-family (rental and condominium) housing activity was supported by the start of construction on two major projects, one condominium project got under way downtown as well as a rental housing project for seniors on Île-des-Sœurs. In all, 720 dwellings were started, for a hike of 283 per cent over August 2006.

The North Crown unfortunately did not show as bright a performance, as starts there fell by 29 per cent. This decrease was practically inevitable, as the August 2006 results had been strongly supported by the start of construction on a major rental housing project for seniors comprising over 500 units in Laval.

Laval was therefore the only sector responsible for the decline in residential construction in the northern part of the metropolitan

area. The considerable increases in freehold and condominium housing activity could not offset the decrease in rental housing construction. Total starts fell by 73 per cent in Laval, to 167 units. In the North Shore municipalities, 520 dwellings were started, for a gain of 41 per cent over August 2006. Activity increased in all market segments, with rental housing showing the greatest gain (+178 per cent), thanks to the start of construction on a rental housing project for seniors in Blainville. In Saint-Jérôme, starts increased by 21 per cent. Freehold and rental housing starts doubled, but no condominiums got under way.

The small increase (+4 per cent) in condominium starts in the South Crown municipalities could not put a dent in the 35-per-cent decrease in activity observed in this large sector. The decline in freehold home building (-31 per cent) and especially the drop in rental housing activity (-54 per cent) were more significant. This past month, construction got under way on a rental housing project for seniors in Châteauguay, but this was not sufficient to equal

the performance posted in August 2006 since, last year, two new major rental housing projects had breathed new vigour into this market segment.

In all, in Vaudreuil-Soulanges, 100 units were started for a gain of 144 per cent over August 2006. Activities in the freehold home segment went up by 155 per cent, while rental housing activity increased by 100 per cent and condominium construction, by 50 per cent.

Since the beginning of the year, foundations have been laid for 14,581 units in the CMA, for a gain of 7 per cent over the corresponding period in 2006.

Elsewhere across Quebec, housing starts increased in the CMAs of Saguenay (+297 per cent) and Trois-Rivières (+10 per cent) but decreased in Québec (-16 per cent) and Gatineau (-5 per cent). The Sherbrooke CMA (including Magog) registered 79 starts this past month, compared to 55 in August 2006.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2001 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
