

## HOUSING MARKET OUTLOOK

## London CMA

Date Released: Spring 2007

## New Home Market Starts Hold at High Level

Housing starts are expected to total 3,480 homes in 2007 in the London Census Metropolitan Area (CMA).

The slight downturn, five per cent from the 16-year high of 3,674 starts in 2006, will be mainly attributed to the decline in single-detached home construction.

The improvement in the job market has been pushing up real income

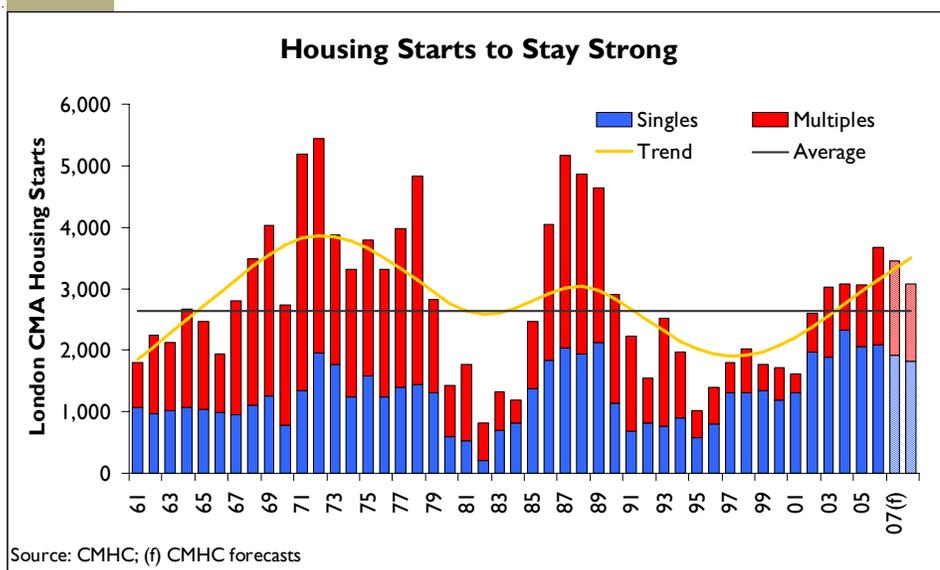

gains in the London area. Low mortgage rates coupled with strong home price appreciation since 2000 have kept Londoners optimistic about getting into the homeownership market.

Move-up buyers are the main force in the new home market which is dominated by single-detached homes. The average price<sup>1</sup> of newly-completed and sold single-detached homes will advance by nine per cent to \$297,600. New single-detached

Figure 2

homes priced under \$200,000, approximately the average price of existing homes, will represent only ten per cent of the new supply. This will drive the bulk of first-time home buyers into the resale market. There will be 1,950 single-detached dwellings started in 2007, down seven per cent from the 2,090 homes in 2006. London City will continue to account for the majority of these new homes. About two-thirds of them will be two-storey homes.

The apartment construction boom will continue in the London area, as builders respond to the strong inflow of young migrants as well as the increasing appetite for apartment-style living from the mature population. After the strong performance in this sector in 2006, starts in 2007 will level off with 1,100 units. Most of the new projects will be concentrated in London City. Expected annual apartment completions from 2007 to 2009 will be close to 1,000 units.

Townhouse and semi-detached home starts will remain at the similar

percentage, 12 per cent, of total starts in 2006. This will translate into 430 new homes.

## Resale Market

### Record Sales

The existing home market will see another record year. Sales through the Multiple Listing Service (MLS®) will top 9,100 homes, up two per

cent from the record of 8,960 sales set in 2006. First-time home buyers will continue to flock to the resale market and drive prices up. Homes priced under \$200,000 make up close to two-thirds of the pool in the resale market compared to ten per cent in the new home market.

More existing home owners, who have accumulated sizable equity gains through price appreciation, will list their homes for sale. Total new listings will grow four per cent to 15,280 homes. With the growth of supply outpacing demand, listed homes will stay on the market longer.

The resale home market will remain a seller's market with the sales-to-new listings ratio staying close to 60 per cent. London City will continue to account for 70 per cent of total home sales. The average resale home price is expected to increase by six per cent and surpass the \$200,000 mark for the first time. However, at this price level, homes are still afford-

Figure 3

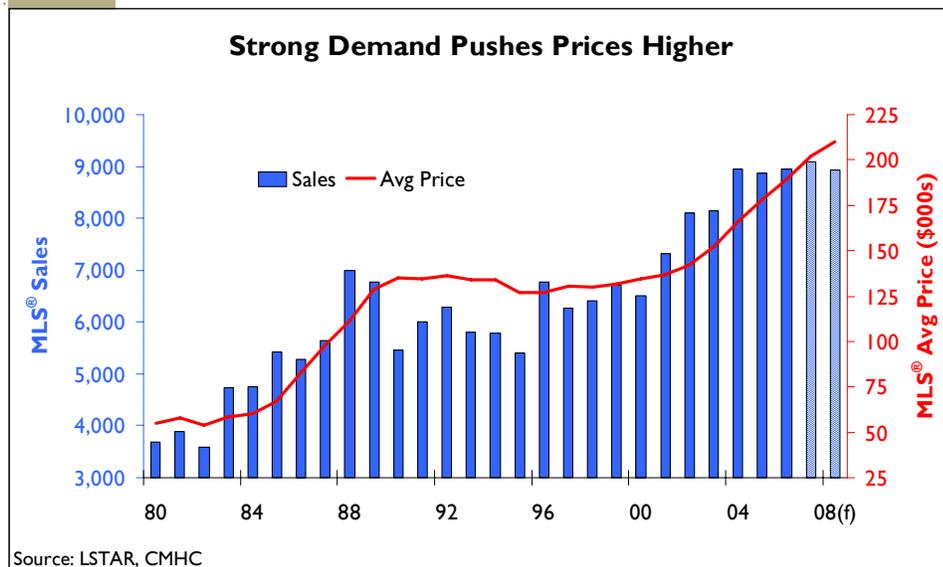

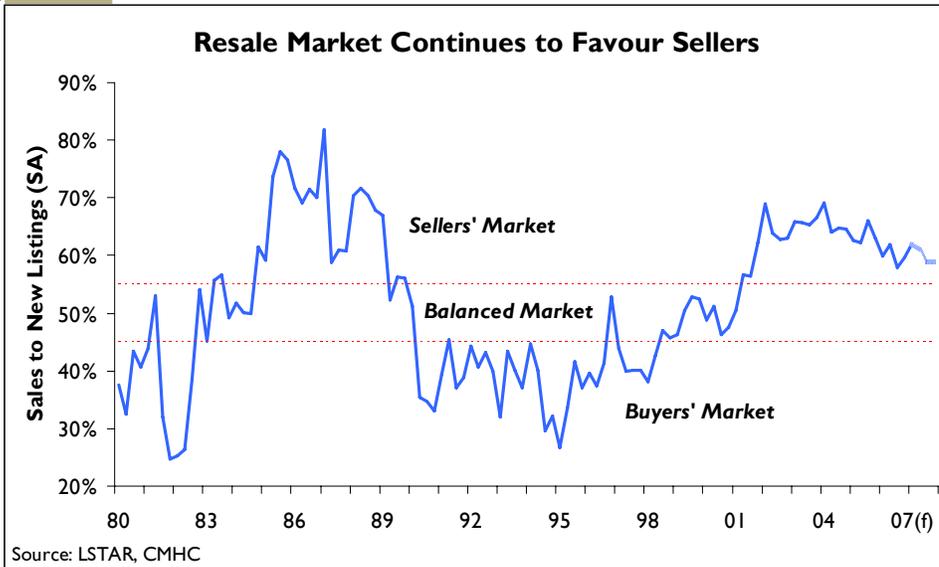

Figure 4

able because of conducive borrowing conditions.

St. Thomas, thanks to the rapid population growth, will set record sales of more than 800 units compared to 709 sales in 2006. The resale market in St. Thomas will remain the tightest in the London CMA.

With the 2007 average vacancy rate of 3.8 per cent, close to the 15-year average of 3.6 per cent, rent increases should remain close to the average rent increase in this period of 2.2 per cent. The forecasted average rent for a two-bedroom apartment will reach \$807 compared to \$790 in 2006.

## Economic Trends

### Job Growth Picks Up

Employment growth in the London area will pick up in 2007. More than three thousand new jobs will be created, pulling total employment up 1.3 per cent to 248,700. Unemployment rate will decline to 5.9 per cent from 6.2 per cent in 2006.

The service industry has been steadily creating new jobs since the late 1990s. Most of the new jobs are in sectors like accommodation and food, education, health care, information, culture and recreation, and professional and technical services. Employment in the goods-producing sector has been stable in recent years, although there were some downward swings from time to time. Employment in the goods-producing sector will trend higher. The Toyota plant in Woodstock will begin operation in 2008, but its construction will stimu-

## Rental Market

### Vacancy Rate Slightly Up

Moderately rising new supply and continuous strong home ownership demand from first-time buyers will cause the average vacancy rate for rental apartments to increase slightly to 3.8 per cent (in October 2007) from 3.6 per cent in 2006. Total rental apartment completions from July 2006 to June 2007 will be close to 500 units, which is higher than the 320-unit completions recorded in the previous period.

Figure 5

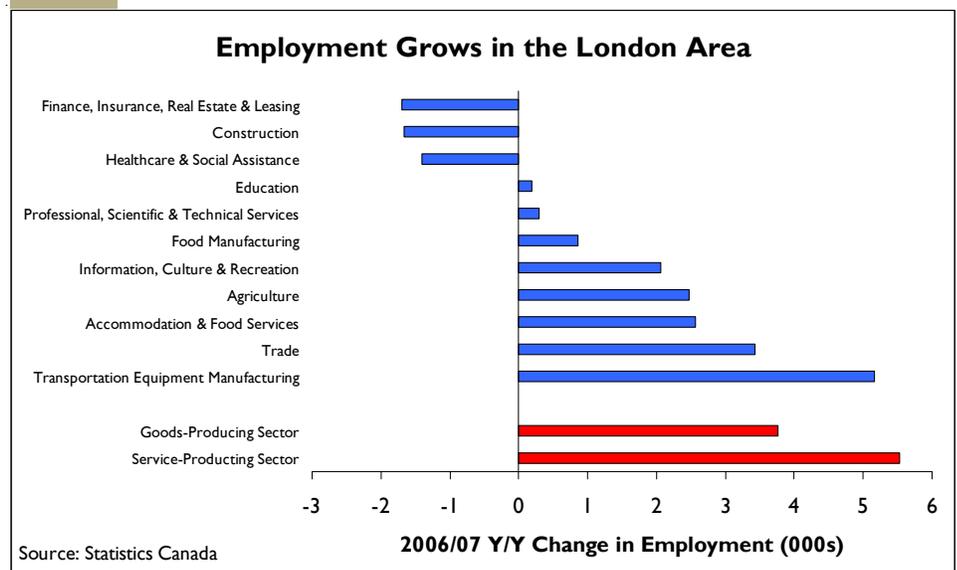

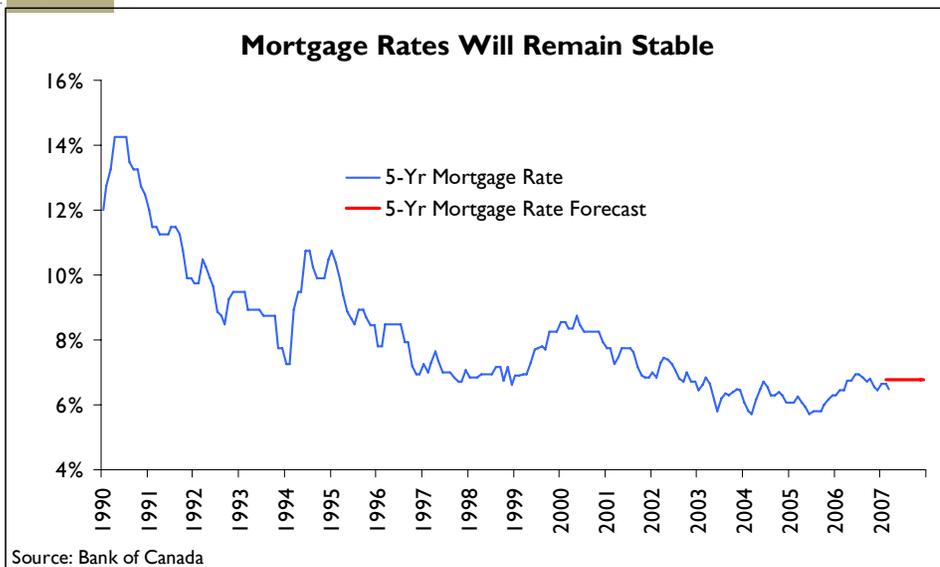

Figure 6

late employment in 2007 and bring auto parts manufacturing companies into the region.

Employment growth, especially growth in high-paid jobs, will continue to support demand for homeownership.

### Mortgage Rates Will Remain Low

A combination of a slowing economy, strong Canadian dollar vis-à-vis the U.S. dollar, and moderate inflation will help keep Canadian interest and mortgage rates low over the remainder of this year and in 2008.

Short-term mortgage rates will also ease as the prime rate nudges down over the next twelve months while the long-term mortgage rates will rise slightly in line with bond rates.

One, three and five-year posted mortgage rates are forecast to be in the 5.75-6.75, 6.00-7.00, and 6.25-7.25 per cent ranges respectively

over the rest of this year and in 2008.

## Demographic Trends

### Population Grows Faster

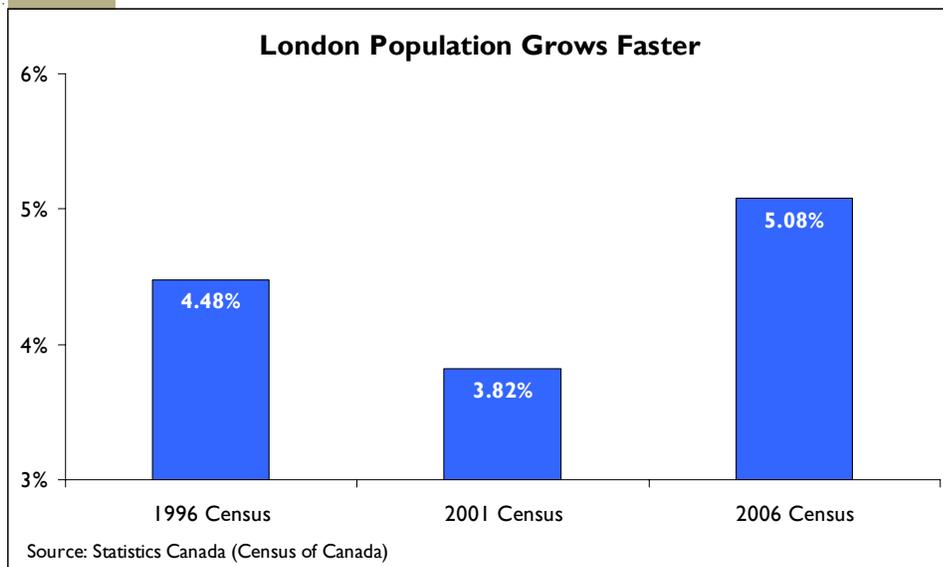

From 2001 to 2006, London gained a

total of 22,000 new residents, representing 5.1 per cent increase compared to the 3.8 per cent increase from 1996 to 2001. Migration contributed to most of the increase in the growth rate. Annual net migrants increased to 3,000 people versus 1,550 in the previous five-year period.

Faster population growth added to housing demand, especially ownership housing. Fuelled by low mortgage rates, average annual new ownership home sales increased by 40 per cent to 1,500 homes during 2001-2005 compared to 1,100 sales during 1996-2000. Annual average existing home sales increased by 30 per cent to 8,300 units from 6,300 units.

The projected faster employment growth in 2007 and 2008 will keep flows of net migrants strong in the coming years and help sustain housing demand at a high level.
