This is the 90th Data Report
from the Central and Arctic Region, Winnipeg

PREFACE

This study was funded by the Northern Oil and Gas Action Program (NOGAP), through the Department of Fisheries and Oceans, Central and Arctic Region. It is one of a series of projects executed under NOGAP B.2, to provide background data for assessing the implications of hydrocarbon development and production on critical estuarine and marine habitats of the Canadian Arctic Coastal Shelf. This document constitutes NOGAP Report B2.46.

ABSTRACT

Hopky, G.E., M.J. Lawrence, S.M. McRae, and D.B. Chiperzak. 1994. NOGAP B.2; List of scientific names of algae, invertebrates, and vertebrates captured under NOGAP Subprojects B.2.1 and B.2.3, 1984 to 1988. Can. Data Rep. Fish. Aquat. Sci. 924: iv + 76 p.

A summary of the scientific names of all algae, invertebrates, and vertebrates captured from the Canadian Beaufort Sea shelf area under the Northern Oil and Gas Action Program (NOGAP) Subprojects B.2.1 and B.2.3 is given in three forms: 1) according to phylogenetic relationships; 2) ordered numerically by species codes assigned according to a species catalogue developed exclusively for these Subprojects; and 3) alphabetically by species name or taxonomic group name. A total of 787 taxonomic identifications were assigned to specimens captured from these Subprojects. Five phyla, seven classes, and 127 genera and/or species under the Kingdom Protista and 24 phyla, 39 classes, 96 orders, 261 families, and 518 genera and/or species under the Kingdom Animalia were represented in the organisms captured.

Key words: Arctic; Beaufort Sea; Mackenzie River; taxonomy; species list; species catalogues; marine; estuarine; freshwater.

RÉSUMÉ

Hopky, G.E., M.J. Lawrence, S.M. McRae, and D.B. Chiperzak. 1994. NOGAP B.2; List of scientific names of algae, invertebrates, and vertebrates captured under NOGAP Subprojects B.2.1 and B.2.3, 1984 to 1988. Can. Data Rep. Fish. Aquat. Sci. 924: iv + 76 p.

On a dressé une liste des noms scientifiques de toutes les algues et de tous les invertébrés et vertébrés capturés sur la plateforme continentale de la mer de Beaufort dans le cadre des sous-projets B.2.1 et B.2.3 du Programme d'initiatives pétrolières et gazières dans le Nord (PIPGN). Cette liste es présentée sous les trois formes suivantes: 1) en fonction d'un code d'espèce assigné selon le mode de classement d'un catalogue élaboré spécialement pour ces sous-projets et 3) par ordre alphabétique en fonction du nom de l'espèce ou du groupe taxinomique. On a associé les spécimens capturés dans le cadre de ces sous-projets à un total de 787 groupes taxinomiques. Cinq phylums, sept classes et 127 genres ou espèces du règne des Protistes, de même que 24 phylums, 39 classes, 96 ordres, 261 familles et 518 genres ou espèces du règne animal, étaient représentés parmi les organismes capturés.

Mots-clés: Arctique; mer de Beaufort; fleuve Mackenzie; taxinomie; liste d'espèces; catalogues d'espèces; marin; estuaire; potamique.

INTRODUCTION

This report lists the scientific names of all organisms captured as part of the Beaufort Shelf Fish Habitat Research Subproject (B.2.1) and the Nearshore Benthic Monitoring Subproject (B.2.3). These studies are components of the Critical Estuarine and Marine Habitat Project (B.2) undertaken by staff of the Department of Fisheries and Oceans (DFO), Central and Arctic Region, as part of the Northern Oil and Gas Action Program (NOGAP). NOGAP is a multi-disciplinary study to provide background data for assessing the potential effects of hydrocarbon development and production on the critical marine and estuarine habitats of the Canadian Arctic coastal shelf. This report is a supplement to and reference companion for existing and forthcoming reports documenting the biological data collected in Subprojects B.2.1 and B.2.3.

Subproject B.2.3 was conducted in March 1985 to 1988, in Tuktoyaktuk Harbour and Mason Bay, which are located on the eastern side of the Mackenzie River estuary (Fig. 1). Subproject B.2.1 was conducted throughout the seasons of 1984 to 1988 on the Canadian Beaufort Sea shelf and Mackenzie River estuary in an area extending from the inshore reaches of the Mackenzie River estuary, including Tuktoyaktuk Harbour and Mason Bay, out to about the 200 m isobath and bounded to the west by Herschel Island and to the east by Amundsen Gulf (Fig. 1).

Details on Subproject objectives, sampling and analytic methodologies, and results, including species abundance, distribution and life history data are reported elsewhere, or in reports presently in preparation for the algae, zooplankton, and benthos (Hopky, pers. comm.), and ichthyoplankton (e.g. Chiperzak et al. 1990) and adult fish (e.g. Chiperzak et al. 1991; Hopky, pers. comm.). In summary, Subproject B.2.1 involved the collection of algae from the underice surface, of zooplankton and ichthyoplankton during ice cover with 63 µm Wisconsin gear, and during open water with 763 µm Wisconsin, 500 µm neuston, and 85 and 500 µm bongo gear, and of fish with gillnets in winter and otter and mid-water trawls during open water, with incidental catches of invertebrates in the trawl gear. Subproject B.2.3 involved the collection of macrobenthos (>500 µm screen) and meiobenthos (64 and 212 µm screen), with Van Veen grabs and cores, respectively.

Two points are relevant to understanding the background preparation and reporting of the data with respect to the scientific names identified in this report. Firstly, with the exception of the ichthyoplankton and winter fish catches, the counting and identification of all samples collected for these Subprojects was undertaken by contract laboratories. All laboratories used the species catalogue and coding system described below; however, there was no inter-calibration of specimen identifications between laboratories. One laboratory was responsible for all algal identifications. A second laboratory was responsible for identifications of zooplankton samples for all 63 µm Wisconsin and 85 µm bongo gear, and for all the stomach content analyses of ichthyoplankton captured in neuston and 500 µm bongo gear. The third laboratory was responsible for identifications of zooplankton from all 763 µm Wisconsin, virtually all 500 µm bongo and neuston gear samples, of zoobenthos from all Subproject B.2.3 samples and of zooplankton, and fish and their stomach contents from the various otter and mid-water trawl sampling programs. A fourth laboratory was responsible for a limited number of the neuston and 500 µm bongo gear samples.

Secondly, all contract laboratories had a demonstrated expertise in systematics of polar species, and followed standard protocols, including the use of keys, reference texts, and reference collections. Table 1 identifies the reference texts for the major taxonomic groups collected, while Table A1.1 (Appendix 1) gives the citation for each reference. Verifications of zoo- and ichthyoplankton specimens were also made, as required, by consulting with noted authorities.

In conjunction with development of the species list, specimens collected from these Subprojects have resulted in, or contributed to, increased understanding of the taxonomy and distribution of invertebrates in the study area (Higgins and Korczynski 1989; Keast and Lawrence 1990a, b; Korczynski 1989, 1990; Korczynski et al. 1989; Lawrence and Keast 1990). Samples of many of the invertebrate (number of samples = 254) and vertebrate (number of samples=31) specimens, including the urochordates and ichthyoplankton, are stored in reference collections at DFO, Winnipeg.

The scientific names reported here are organized using three formats: 1) according to phylogenetic relationships; 2) numerically by a six-

digit species identification code from a catalogue developed for these Subprojects; and 3) alphabetically by species or higher taxonomic level names.

SPECIES CATALOGUE

To facilitate organization and manipulation of the biological data a six-digit numeric code was assigned to each unique organism identified. The first two digits represented the taxonomic group with which the organism was associated (Table 1). Assignment of group taxonomic level varied from suborder to kingdom depending on several criteria, including the relative abundance of different species within a taxonomic level (e.g. to Phylum for poriferans versus to Class, Order, or Suborder for the many species within Subphylum Crustacea), the target level of systematic identification for specimens (e.g. to species for copepods versus Phylum for nematodes), and on what may be referred to as 'common' names for groupings of species, such as copepods, cladocerans, mysids, isopods, etc. Taxonomic group codes were assigned to different taxonomic divisions at the same level of taxonomy within a higher systematic level. For example, the three groups 80000, 90000 and 100000 represent different Classes of the Phylum Cnideria. The exception to this is with the Order Tanadacea (code 400000), which is systematically 'nested' within another group, the Class Ostracoda (code 350000). The second pair of digits represents the intermediate taxonomic group which varied from Family to Class. The third pair of digits represents the genus and/or species. Revisions to the coding system were required throughout the study period as additional species were identified and understanding of the classification of species evolved.

PHYLOGENETIC LISTING

Table 2 is a phylogenetic classification for the organisms caught under Subprojects B.2.1 and B.2.3 in the study area. Organisms that were caught and identified are those which have a species code assigned in the right hand margin of Table 2. Table 2 includes all the major taxonomic divisions (Phylum, Class, Order, and Family) pertinent to all specimens identified during the study. Secondary divisions (Subphylum, Suborder, Super-

family, etc.) were included only in those instances when an organism was captured and identified specifically to that level (e.g. Suborder Rotaliina). Six additional codes (870000-940000) were assigned to miscellaneous non-phylogenetic groups.

This listing is not based on any one comprehensive classification source or even a number of sources using the same scheme because taxonomic classification is constantly changing and there is no broadly accepted classification system incorporating all taxonomic levels. Thus, several references were consulted in devising the phylogenetic listing presented in Table 2. Phyla of the Kingdom Protista are ordered according to Round (1966). Phyla and Classes within the Kingdom Animalia were listed in the phylogenetic order proposed in Barnes (1987) for the invertebrates and urochordates, while Nelson (1984) was used for the vertebrates (i.e. fish). Lower taxonomic levels were ordered alphabetically as no source outlining the relationships between all taxa was available. The phylogenetic relationship (i.e. the Class, Order and Family to which each genus belonged) and spelling for each organism were determined from the sources identified in the References column in Table 3, with corresponding citations listed in Table A1.1 (Appendix 1).

A total of 787 identification codes were assigned throughout the course of the B.2.1 and B.2.3 Subprojects, including six miscellaneous non-taxonomic groups. Five phyla, seven classes, and 127 genera and/or species were represented from the Kingdom Protista. Twenty-four phyla, 39 classes, 96 orders, 261 families, and 518 genera and/or species were represented from the Kingdom Animalia. Various subphyla, subclasses, etc. were also included in the taxonomic list when necessary.

SPECIES CODE LISTING

The species list is presented in Table 3 ordered by the numeric species code assigned to a specimen when it was identified.

ALPHABETICAL LISTING

Table 4 is an alphabetical list of taxonomic names of specimens captured under Subprojects B.2.1 and B.2.3. For specimens that are systematically

higher than genus and/or species, taxonomic level is indicated in parentheses (e.g. Acari (Order)). Phylum, taxonomic group, and species code are also included as cross references.

ACKNOWLEDGMENTS

Many individuals assisted in the collection, identification, and verification of the specimens identified in this report. The authors wish to gratefully acknowledge their many collective efforts, time, and expertise. Of note, however, were the contributions by staff of North/South Consultants Inc., Winnipeg, MB, LGL Limited Environmental Research Associates, Sidney, BC, and Dr. C. Mackenzie, Memorial University, St. John's, NFLD, for their contribution to sample identification and verifications. Ms. M. Keast and Mr. T. Byers prepared background material essential to completion of this report.

Many authorities kindly assisted in specimen verification. We appreciate this contribution from individuals affiliated with the following institutions: Arctic Biological Station, DFO; Dalhousie University; Freshwater Institute, DFO; Institute of Oceanographic Sciences, DFO; Manitoba Museum of Man and Nature; McGill University; Museum National d'histoire Naturelle, Laboratoire de Biologie des Invertebres Marins, National Museum, Paris; National Museum of Canada, National Museum of National Sciences; Royal Ontario Museum; Smithsonian Institute; University of British Columbia; University of Manitoba; and University of Winnipeg.

Ms. D. Laroque assisted in typing of the report.

780000	Gadidae (Family)	Chordata	Vertebrata	Osteichthyes	Dunn and Matarese (1984); Dunn and Vinter (1984); Fahay and Markle (1984); Markle (1982); Scott and Crossman (1973)
790000	Gasterosteidae (Family)	Chordata	Vertebrata	Osteichthyes	McPhail and Lindsey (1970); Scott and Crossman (1973)
800000	Cottidae (Family)	Chordata	Vertebrata	Osteichthyes	Andriyashev (1954); Khan (1971); Ratynski (1983); Washington, Eschmeyer and Howe (1984); Washington et al. (1984)
810000	Agonidae (Family)	Chordata	Vertebrata	Osteichthyes	Andriyashev (1954); Fahay (1983); Washington, Eschmeyer and Howe (1984); Washington et al. (1984)
820000	Cyclopteridae (Family)	Chordata	Vertebrata	Osteichthyes	Able and McAllister (1980); Able, Markle and Fahay (1984)
830000	Zoarcidae (Family)	Chordata	Vertebrata	Osteichthyes	McAllister, Anderson and Hunter (1981)
840000	Stichaeidae (Family)	Chordata	Vertebrata	Osteichthyes	Almukhov (1981); Andriyashev (1954)
850000	Ammodytidae (Family)	Chordata	Vertebrata	Osteichthyes	Fahay (1983); Scott (1972a; 1972b); Stevens, Matarese and Watson (1984)
860000	Pleuronectidae (Family)	Chordata	Vertebrata	Osteichthyes	Ahlstrom et al. (1984); Andriyashev (1954); Hensley and Ahlstrom (1984); Ratynski (1983)
870000	Unidentified fish larvae				
880000	Unidentified fish egg				
910000	Unidentified invertebrate				
920000	Unidentified egg				
930000	Plant/Vegetative matter				
940000	Stones, pebbles				

Table 2. List of scientific names of all organisms identified under NOGAP Subprojects B.2.1 and B.2.3, 1984 to 1988, ordered according to phylogenetic relationships.

Scientific Name and Phylogenetic Relationship	Authority	Species Code
Kingdom Protista		020000
Phylum Chrysophyta		
Class Bacillariophyceae		020001
<i>Achnanthes taeniata</i>	Grunow 1880	021011
<i>Amphiprora alata</i>	(Ehrenberg 1840) Kutzning	021021
<i>Amphiprora gigantea</i> var. <i>septentrionalis</i>	(Grunow) Cleve 1880	021022
<i>Amphiprora kjellmani</i>	Cleve	021023
<i>Amphiprora kjellmani</i> var. <i>striolata</i>	(Grunow) Cleve 1880	021024
<i>Amphiprora paludosa</i>	Wm. Smith 1853	021025
<i>Amphiprora paludosa</i> var. <i>hyperborea</i>	(Grunow) Cleve 1880	021026
<i>Amphiprora paludosa</i> var. <i>punctulata</i>	(Grunow) Cleve 1880	021027
<i>Amphora cf. laevis laevissima</i>	(Gregory 1857) Cleve 1895	021031
<i>Amphora proteus</i>	Gregory 1857	021032
<i>Caloneis brevis</i>	(Gregory 1857) Cleve 1894	021041
<i>Caloneis liber</i>	(Wm. Smith 1853) Cleve 1894	021042
<i>Cerataulina pelagica</i>	(Cleve 1889) Hendey 1937	021051
<i>Chaetoceros ceratosporum</i>	Ostenfeld 1910	021061
<i>Chaetoceros gracilis</i>	Paulsen 1905	021062
<i>Chaetoceros septentrionalis</i>	Ostrup 1895	021063
<i>Coccconeis placentula</i> var. <i>euglypta</i>	(Ehrenberg 1854) Grunow 1884	021071
<i>Coccconeis scutellum</i> var. <i>stauroneiformis</i>	Rabenhorst 1864	021072
<i>Coscinodiscus</i> sp.		021080
<i>Coscinodiscus kuetzingii</i>	Schmidt 1878	021081
<i>Cyclotella comta</i>	(Ehrenberg 1844) Kutzning	021091
<i>Cylindrotheca closterium</i>	(Ehrenberg 1839) Reimann et Lewin	021101
<i>Diatoma elongatum</i>	(Lyngbye 1819) Agardh 1824	021111
<i>Dipioneis incurvata</i>	(Gregory 1856) Cleve	021121
<i>Dipioneis litoralis</i> var. <i>clathrata</i>	(Ostrup 1895) Cleve	021122
<i>Dipioneis vacillans</i>	(A. Schmidt 1875) Cleve	021123
<i>Eunotia lunaris</i>	(Ehrenberg 1831) Brebisson	021131
<i>Fragilaria construens</i>	(Ehrenberg 1841) Grunow	021141
<i>Fragilaria islandica</i>	Grunow in Van Heurck 1881	021142
<i>Fragilaria pinnata</i>	Ehrenberg 1841	021143
<i>Fragilaria striatula</i>	Lyngbye 1819	021144
<i>Gomphonema</i> sp.	Agardh 1824	021150
<i>Gomphonema exiguum</i>	Kutzning 1844	021151
<i>Gomphonema kamschaticum</i>	Grunow 1878	021152
<i>Gyrosigma cf. kuetzingii</i>	(Grunow 1860) Cleve	021161
<i>Hantzschia weyprechtii</i>	Grunow 1880	021171
<i>Licmophora gracilis</i> var. <i>anglica</i>	(Kutzning) Peragallo	021181
<i>Melosira arctica</i>	Dickie in litt.	021191
<i>Navicula</i> sp.	Bory 1822	021200
<i>Navicula algida</i>	Grunow 1884	021201
<i>Navicula bahusiensis</i>	(Grunow in Van Heurck 1880)	021202
<i>Navicula directa</i>	(Wm. Smith 1856) Ralfs	021203
<i>Navicula directa</i> var. <i>cuneata</i>	Ostrup 1895	021204
<i>Navicula gastrum</i>	(Ehrenberg 1841) Kutzning	021205
<i>Navicula glacialis</i>	(Cleve 1873) Grunow	021206
<i>Navicula gracilis</i>	Ehrenberg 1830	021207
<i>Navicula kariana</i>	Grunow in Cleve & Grunow 1880	021208
<i>Navicula maculosa</i>	Donkin 1871	021209
<i>Navicula marina</i>	Ralfs in Pritchard 1861	021211
<i>Navicula pelagica</i>	Cleve 1896	021212
<i>Navicula pygmaea</i>	Kutzning 1849	021213
<i>Navicula rhynchocephala</i>	Kutzning 1844	021214
<i>Navicula salinarum</i>	Grunow in Cleve & Muller 1878	021215
<i>Navicula scopulorum</i>	Brebisson in Kutzning 1849	021216
<i>Navicula spicula</i>	(Hickie 1874) Cleve	021217
<i>Navicula vanhoeffenii</i>	Gran 1897	021218
<i>Navicula vitrea</i>	Grunow in Cleve & Muller 1879	021219
<i>Neidium bisulcatum</i>	(Lagerstedt 1873) Cleve	021221
<i>Neidium bisulcatum</i> cf. var. <i>undulata</i>	Muller 1898	021222

Table 2. List of scientific names of all organisms identified under NOGAP Subprojects B.2.1 and B.2.3 (CONTINUED).

Scientific Name and Phylogenetic Relationship	Authority	Species Code
<i>Nitzschia</i> sp.	Hassal 1845	021230
<i>Nitzschia acicularis</i>	(Kutzing 1844) Wm. Smith	021231
<i>Nitzschia cf. acuminata</i>	(Wm. Smith 1853) Grunow	021232
<i>Nitzschia angularis</i>	Wm. Smith 1853	021233
<i>Nitzschia closterium</i>	(Ehrenberg 1839) Wm. Smith	021234
<i>Nitzschia cylindrus</i>	(Grunow) Hasle	021235
<i>Nitzschia frigida</i>	Grunow 1880	021236
<i>Nitzschia laevissima</i>	Grunow in Cleve & Muller 1882	021237
<i>Nitzschia longissima</i>	(Brebisson in Kutzing) Grunow	021238
<i>Nitzschia cf. palea</i>	(Kutzing 1844) Wm. Smith	021239
<i>Nitzschia plana</i>	Wm. Smith 1853	021241
<i>Nitzschia polaris</i>	Grunow in Cleve & Muller 1882	021242
<i>Nitzschia seriata</i>	Cleve 1883	021243
<i>Nitzschia sigma</i>	(Kutzing 1844) Wm. Smith	021244
<i>Nitzschia sigmoides</i>	(Nitzsch 1817) Wm. Smith	021245
<i>Nitzschia cf. thermalis</i>	(Ehrenberg 1841)	021246
<i>Pinnularia cf. gibba</i>	Ehrenberg 1841	021251
<i>Pinnularia quadratarea</i>	(A. Schmidt 1874) Cleve	021252
<i>Pinnularia quadratarea</i> var. <i>constricta</i>	(Ostrup 1895) Heiden	021253
<i>Pinnularia quadratarea</i> var. <i>minor</i>	(Grunow 1880) Cleve	021254
<i>Pleurosigma angulatum</i>	(Quenstedt 1848) Wm. Smith	021261
<i>Pleurosigma angulatum</i> var. <i>strigosum</i>	(Wm. Smith 1852) Van Heurck	021262
<i>Pleurosigma clevei</i>	Grunow 1880	021263
<i>Pleurosigma elongatum</i>	Wm. Smith 1852	021264
<i>Pleurosigma longum</i>	Cleve 1873	021265
<i>Pleurosigma salinarum</i>	(Grunow 1878) Grunow	021266
<i>Stauroneis</i> sp.	Verrill 1900	021270
<i>Stauroneis</i> cf. <i>linearis</i>	Wm. Smith 1853	021271
<i>Stauroneis quadripedis</i>	(Cleve-Euler 1952) Hendey	021272
<i>Stauroneis septentrionalis</i>	Grunow 1884	021273
<i>Stephanodiscus astraea</i>	(Ehrenberg 1844) Grunow	021281
<i>Synedra acus</i>	Kutzing 1844	021291
<i>Synedra camtschatica</i>	Grunow 1862	021292
<i>Synedra hyperborea</i>	Grunow 1884	021293
<i>Synedra pulchella</i>	(Ralfs 1844) Kutzing	021294
<i>Synedra tabulata</i>	(Agardh 1832) Kutzing	021295
<i>Synedra tabulata</i> var. <i>fasciculata</i>	(Lyngbye 1819?) Hustedt	021296
<i>Tabellaria flocculosa</i>	(Roth 1797) Kutzing	021301
<i>Thalassionema nitzschiofides</i>	(Grunow 1862) Van Heurck	021311
<i>Thalassiosira baltica</i>	(Grunow 1880) Ostenfeld	021321
<i>Thalassiosira gravida</i>	Cleve 1896	021322
<i>Thalassiosira lacustris</i>	(Grunow) Hasle	021323
<i>Thalassiosira nordenskioldii</i>	Cleve	021324
<i>Thalassiothrix frauenfeldii</i>	(Grunow 1863)	021331
<i>Thalassiothrix longissima</i>	Cleve & Grunow in Cleve & Muller 1878	021332
Class Chrysophyceae		
<i>Chrysochromulina</i> sp.	Lackey 1938	024010
<i>Chrysococcus</i> sp.	Klebs	024020
<i>Ochromonas</i> sp.	Wysotzki	024030
Class Dictyophyceae		
<i>Ebria tripartita</i>	Lemmermann	025011
Phylum Chlorophyta		
Class Chlorophyceae		
<i>Carteria</i> sp.	Diesing	023010
<i>Chlamydomonas</i> sp.	Ehrenberg 1833	023020
<i>Chlorococcus</i> sp.	Fries	023030
<i>Kirchneriella lunaris</i>	(Kirchner) Moebius	023041
<i>Koliella</i> sp.		023050
<i>Pyramimonas grossi</i>	Parke	023061
<i>Schroederia</i> sp.	Lemmermann	023070
Phylum Euglenophyta		

Table 2. List of scientific names of all organisms identified under NOGAP Subprojects B.2.1 and B.2.3 (CONTINUED).

Scientific Name and Phylogenetic Relationship	Authority	Species Code
Class Euglenophyceae		
<u>Euglena proxima</u>	Dangeard 1901	027011
<u>Euglena viridis</u>	Ehrenberg 1830	027012
Phylum Pyrrhophyta		
Class Dinophyceae		
<u>Ampidinium</u> sp.	Claparide and Lachmann	022010
<u>Gymnodinium</u> sp.	Stein	022020
<u>Oxytoxum</u> sp.	Stein	022030
<u>Peridiniella catenata</u>	(Levander) Balech	022041
<u>Prorocentrum rampi</u>	Sournia	022051
<u>Protoperidinium bipes</u>	(Paulsen 1908) Balech	022061
<u>Protoperidinium globulus</u> var. <u>ovatum</u>	(Diwald) Balech	022062
<u>Protoperidinium grenlandicum</u>	(Wołoszynska) Balech	022063
<u>Protoperidinium pellucidum</u>	Berg	022064
Phylum Cryptophyta		
Class Cryptophyceae		
<u>Cryptomonas</u> sp.	Ehrenberg	026010
Kingdom Animalia		
Phylum Sarcomastigophora		
Subphylum Mastigophora		
Class Phytomastigophora		
Order Dinoflagellida		050000
Subphylum Sarcodina		
Class Granuloreticulosa		
Order Foraminiferida		060000
Suborder Miliolina		
Family ??		
<u>Pseudopolymorphina</u> sp.	Suzin	060440
Family Miliolidae		
<u>Quinqueloculina</u> sp.	d'Orbigny 1826	060410
<u>Quinqueloculina seminulum</u>	Linnaeus	060411
Family Nodosariidae		
<u>Dentalina</u> sp.	d'Orbigny 1826	060420
<u>Dentalina trujilloi</u>	Loeblich & Tappan	060421
Family Polymorphinidae		
<u>Eoguttulina anglica</u>	Cushman & Ozawa 1930	060431
Suborder Rotalina		060450
Family Elphidiidae		060400
Family Globigerinidae		
<u>Globigerina</u> sp.	d'Orbigny 1826	060471
Suborder Textulariina		060460
Phylum Ciliophora		
Order Tintinnida		040100
Phylum Porifera		
Class Demospongiae		
Order Haplosclerida		070610
Phylum Cnidaria		
Class Hydrozoa		080000
Order Hydroida		
Family Aeginidae		
<u>Aeginopsis</u> sp.	Brandt 1835	080700
<u>Aeginopsis laurentii</u>	Brandt 1838	080701
Family Bougainvilliidae		
<u>Bougainvillia</u> sp.	Lesson 1836	080880
<u>Bougainvillia britannica</u>	Forbes 1841	080883
<u>Bougainvillia yoldiaeearcticae</u>	Birula	080882

Table 2. List of scientific names of all organisms identified under NOGAP Subprojects B.2.1 and B.2.3 (CONTINUED).

Scientific Name and Phylogenetic Relationship	Authority	Species Code
Family Calyptidae		
<u>Eumedusa</u> sp.	Bigelow 1920	080760
<u>Eumedusa birulai</u>	(Linko 1913)	080761
Family Campanulariidae		
<u>Obelia</u> sp.	Peron & Lesueur 1807	080820
<u>Obelia longissima</u>	(Pallas 1766)	080821
<u>Phialidium</u> sp.	Leuckart 1854	080870
<u>Phialidium languidum</u>	Mayer 1910	080871
Family Corynidae		
<u>Sarsia</u> sp.	Lesson 1843	080830
<u>Sarsia princeps</u>	(Haeckel 1879)	080831
<u>Sarsia tubulosa</u>	(M. Sars 1835)	080833
Family Euphyidae		
<u>Euphyxa</u> sp.	Forbes 1948	080770
<u>Euphyxa flammæa</u>	(Linko 1905)	080771
Family Haleciidae		
<u>Halecium</u> sp.	Oken 1815	080780
Family Meliceridae		
<u>Melicertum</u> sp.	Agassiz 1862	080800
<u>Melicertum octocostatum</u>	(M. Sars 1835)	080801
Family Mitrocomidae		
<u>Cosmetira</u> sp.	Forbes 1848	080890
<u>Cosmetira pilosella</u>	Forbes 1848	080891
Family Pandeidae		
<u>Catablema</u> sp.	Haeckel 1879	080730
<u>Halitholus</u> sp.	Hartlaub 1913	080790
<u>Halitholus cirratus</u>	Hartlaub 1913	080791
<u>Halitholus pauper</u>	Hartlaub 1913	080792
<u>Leuckartiara</u> sp.	Hartlaub 1913	080900
<u>Leuckartiara nobilis</u>	Hartlaub 1913	080901
Family Rathkeidae		
<u>Rathkea octocostatum</u>		080922
<u>Rathkea octopunctata</u>	(M. Sars 1835)	080921
Family Rhopaloniematidae		
<u>Aglantha</u> sp.	Haeckel 1879	080710
<u>Aglantha digitale</u>	(Muller 1776)	080711
Family Sertulariidae		
<u>Sertularia</u> sp.	Linnæus 1758	080850
<u>Sertularia plumosa</u>	(Clark 1876)	080851
Order Siphonophora		
Family Diphyidae		
<u>Dimophyes</u> sp.	Moser 1925	080750
<u>Dimophyes arctica</u>	(Chun 1897)	080751
Class Scyphozoa		
Order Semaeostomeae		
Family Cyaneidae		
<u>Cyanea</u> sp.	Peron & Lesueur 1809	090010
<u>Cyanea capillata</u>	(Linnæus 1758)	090011
		100000
Class Anthozoa		
Order Actiniaria		
Family Actiniidae		
<u>Actinia</u> sp.	Browne 1756	101150
Family Edwardsiidae		101120
Family Hormathiidae		
<u>Hormathia</u> sp.	Gosse 1859	101100
<u>Hormathia</u> sp. (? nodosa)	Fabricius 1780	101101
Family Metridiidae		
<u>Metridium</u> sp.	Oken 1815	101140
Order Alcyonacea		
Family Nephtheidae		
<u>Gersemia rubiformis</u>	(Ehrinberg 1834)	101111
Order Ceriantharia		
Family Cerianthidae		

Table 2. List of scientific names of all organisms identified under NOGAP Subprojects B.2.1 and B.2.3 (CONTINUED).

Scientific Name and Phylogenetic Relationship	Authority	Species Code
<u>Cerianthus</u> sp.	Delle Chiaje 1830	101130
Phylum Ctenophora		120000
Class Tentaculata		
Order Cydippida		
Family Pleurobrachiidae		
<u>Mertensia</u> sp.	Lesson 1836	121220
<u>Mertensia ovum</u>	Fabricius 1780	121221
<u>Pleurobrachia</u> sp.	Fleming 1822	121230
<u>Pleurobrachia pileus</u>	(O.F. Muller 1776)	121231
Class Nuda		
Order Beroida		
Family Beroidae		
<u>Beroe</u> sp.	Browne 1756	121200
<u>Beroe cucumis</u>	Fabricius 1780	121201
Order Lobata		
Family Bolinopsidae		
<u>Bolinopsis</u> sp.		121250
<u>Bolinopsis infundibulum</u>	(O.F. Muller 1776)	121251
<u>Mnemiopsis</u> sp.	Bovard & Osterud 1918	121210
Phylum Platyhelminthes		130000
Class Trematoda		
Order Digenea		
Family Hemiuridae		
<u>Brachyphallus</u> sp.	Odhner 1905	131420
<u>Brachyphallus crenatus</u>	(Rudolphi 1802)	131400
<u>Lecithaster</u> sp.	Luke 1901	131401
Class Cestoda		131430
Phylum Nemertea		140000
Class Anopla		
Order Heteronemertea		
Family Lineidae		
<u>Cerebratulus</u> sp.	Renier 1804	141500
<u>Heteronemertea</u> sp.		141530
Class Enopla		
Order Hoplonemertea		
<u>Hoplonemertea</u> sp.		141520
Phylum Nematoda		180000
Phylum Rotifera		150000
Class Monogononta		
Order Flosculariacea		
Family Conochilidae		
<u>Conichilus</u> sp.	Ehrenberg 1834	151620
Family Testudinellidae		
<u>Filinia</u> sp.	Bory de St. Vincent 1824	151660
Order Ploima		
Family Asplanchnidae		
<u>Asplanchna</u> sp.	Gosse 1850	151610
Family Brachionidae		
<u>Kellicottia</u> sp.	Ahlstrom 1938	151630
<u>Keratella</u> sp.	Bory de St. Vincent	151600
<u>Keratella cochlearis</u>	(Gosse 1851)	151601
<u>Keratella quadrata</u>	(Muller 1786)	151602
Family Synchaetidae		
<u>Polyarthra</u> sp.	Ehrenberg 1838	151640
Phylum Kinorhyncha		170000
Order Homalorhagida		
Family Pychnophyidae		

Table 2. List of scientific names of all organisms identified under NOSAP Subprojects B.2.1 and B.2.3 (CONTINUED).

Scientific Name and Phylogenetic Relationship	Authority	Species Code
<u>Pycnophyes</u> sp.	Zelinka 1907	171700
<u>Pycnophyes canadensis</u>		171701
Phylum Priapulida		190000
Order Priapulomorpha		
Family Priapulidae		
<u>Halicyrptus</u> sp.	von Siebold 1849	191800
<u>Halicyrptus spinulosus</u>	von Siebold 1849	191801
<u>Priapulus</u> sp.	Lamarck 1816	191810
<u>Priapulus bicaudatus</u>	Danielssen 1868	191811
<u>Priapulus caudatus</u>	Lamarch 1816	191812
Phylum Annelida		
Class Polychaeta		230000
Order Capitellida		
Family Capitellidae		
<u>Capitella</u> sp.	Blainville 1828	232170
Family Maldanidae		
<u>Maldane sarsi</u>	Malmgren 1865	232451
Order Cirratulida		
Family Cirratulidae		
Order Cossurida		
Family Cossuridae		
<u>Cossura</u> sp.	Webster & Benedict 1887	232220
<u>Cossura longocirrata</u>	Webster & Benedict 1887	232222
Order Eunicida		
Family Dorvilleidae		
<u>Schistomerings</u> sp.	Jumars 1974	232710
<u>Schistomerings caeca</u>	(Webster & Benedict 1884)	232711
Family Lumbrineridae		
<u>Lumbrineris minuta</u>	Theel 1879	232422
Family Omphididae		
<u>Nothria conchylega</u>	M. Sars 1835	232901
Order Opheliida		
Family Opheliidae		
<u>Ophelina cylindricaudatus</u>	(Hansen 1879)	232871
Order Orbiniida		
Family Orbiniidae		
<u>Scoloplos</u> sp. cf. <u>puggettens</u>	Pettibone 1957	232730
Order Phyllodocida		
Family Hesionidae		
<u>Nereimyra</u> sp.	Blainville 1828	232510
<u>Nereimyra aphroditoides</u>	Fabricius	232511
Family Nephtyidae		
<u>Micronephthys</u> sp.	Friedrich 1939	232480
<u>Micronephthys minuta</u>	(Theel 1879)	232481
<u>Nephtys</u> sp.	Cuvier 1817	232500
<u>Nephtys ciliata</u>	(Muller 1789)	232501
<u>Nephtys neotena</u>	(Noyes 1980)	232482
Family Nereidae		
<u>Nereis</u> sp.	Linnaeus 1758	232520
<u>Nereis pelagica</u>	Linnaeus 1758	232521
Family Pholoidae		
<u>Pholoe</u> sp.	Johnston 1839	232590
<u>Pholoe longa</u>	(Muller)	232592
<u>Pholoe cf. longa</u>		232593
Family Phyllodocidae		
<u>Eteone</u> sp.	Savigny 1817	232860
<u>Eteone flava</u>	(Fabricius 1780)	232862
<u>Eteone longa</u>	(Fabricius 1780)	232271
<u>Eteone spetzbergensis</u>	Malmgren 1865	232861
<u>Pelagobia</u> sp.	Greeff	232940
<u>Phyllocoete groenlandica</u>	Oersted 1842	232601
