Canada Mortgage and Housing Corporation

Date Released: July 2008

HOUSING STARTS IN THE MONTRÉAL AREA DECLINED IN JUNE

According to the latest starts survey conducted by Canada Mortgage and Housing Corporation (CMHC), housing activity in the Montréal census metropolitan area (CMA) was down 20 per cent in June. In all, 1,731 units were started last month, or 428 fewer than in June 2007.

Housing starts decreased in all market segments, except the condominium

segment. Rental housing was the hardest hit, as the volume of starts (124 units) was almost one quarter the level recorded in June 2007. The freehold home segment, for its part, registered a decrease of 21 per cent. Single-detached housing starts dropped by 23 per cent and semi-detached and row home starts, by 14 per cent. In all, 657 single-detached houses and 192 semi-detached and row houses were started in June. Condominium starts increased for the fifth month in a row, as foundations were laid

for 758 units of this type last month, or 24 per cent more than a year earlier.

As for the large geographic sectors, the South Crown stood out. This was the only sector where housing starts increased in June (+12 per cent), a gain that was due mainly to the rental housing and condominium segments. On the Island of Montréal and in the North Crown, starts showed similar decreases of 25 per cent and 27 per cent, respectively. However, it should be pointed out that, on the Island of Montréal, the vigorous growth posted in the condominium segment was entirely offset by the major decline registered in the rental housing segment. In the North Crown, only the semi-detached and row housing segment stayed on the same course (+14 per cent), since the other market segments were less active than in 2007. In Vaudreuil-Soulanges, housing starts fell by 44 per cent. Activity decreased significantly in all market segments, except in the condominium segment, where starts remained at almost the same level as last year. Even if starts were down in the North Crown, this sector was still the most active this past June, with 4 out of every 10 starts.

In the first half of 2008, residential construction in the Montréal area was up 4 per cent year-over-year. While the beginning of the year was characterized by strong activity, with a 26-per-cent increase in housing starts in the first quarter, starts eased off in the three months that

followed, posting a 9-per-cent decrease compared to the second quarter of 2007. Overall, 6,218 units were started from April to June, or 622 fewer than during the same period in 2007.

This result is in line with our forecast scenario, and we expect that new construction in the Montréal area will continue to edge lower over the next few months. The recent slowdown in economic growth and job creation will moderate the pace of housing construction. In addition, housing starts had made a significant jump of almost 40 per cent in the third quarter of 2007. While we are expecting fewer housing starts this year than last year, 2008 will still be a very active year. In all, 22,600 units will be added to the Montréal real estate landscape, for a decrease of 3 per cent compared to 2007.

From January to June, only freehold housing activity was behind last

year's results (5 per cent). Starts of single-detached houses were down by 13 per cent, while construction jumped by 32 per cent in the case of more affordable semi-detached and row houses. Condominiums, another type of affordable housing, also did well, posting a 12-per-cent gain in starts. Thanks to the vigorous retirement home construction, rental starts increased by 14 per cent.

Housing starts were up over last year everywhere except in Vaudreuil-Soulanges. For the first six months of the year, the Island of Montréal showed the strongest growth (+11 per cent), followed closely by the South Crown (+7 per cent). In the North Crown, housing starts increased by only 1 per cent. In fact, starts were up 37 per cent in Laval, but down 44 per cent in Saint-Jérôme and 6 per cent on the North Shore. In Vaudreuil-Soulanges, housing starts decreased by 11 per cent.

Figure 2

FIRST QUARTER OF 2008: YEAR OFF TO A SLOWER START

In the Montréal census metropolitan area (CMA), buyers of existing homes started off the year with slightly less enthusiasm. According to current Greater Montréal Real Estate Board (GMREB) MLS® system data, 11,951 properties changed hands in the Montréal CMA during the first quarter of 2008, for a decrease of 4 per cent from the first quarter of last year. This small decrease in sales noted in the first quarter of 2008 somewhat betrayed the current state of the market, as it had more to do with the frenzy that prevailed at the same time last year than a major decline in demand.

Listings therefore decreased for a fourth straight quarter, but more moderately than in previous quarters. The average price of homes sold continued to rise, but at a slower pace, as the growth rate went from 8 per cent in the fourth quarter of 2007 down to 6 per cent in the first quarter of 2008. Despite this slower growth in prices, the resale market remained favourable to sellers, for all three main types of properties, namely, single-family houses, condominiums and plexes.

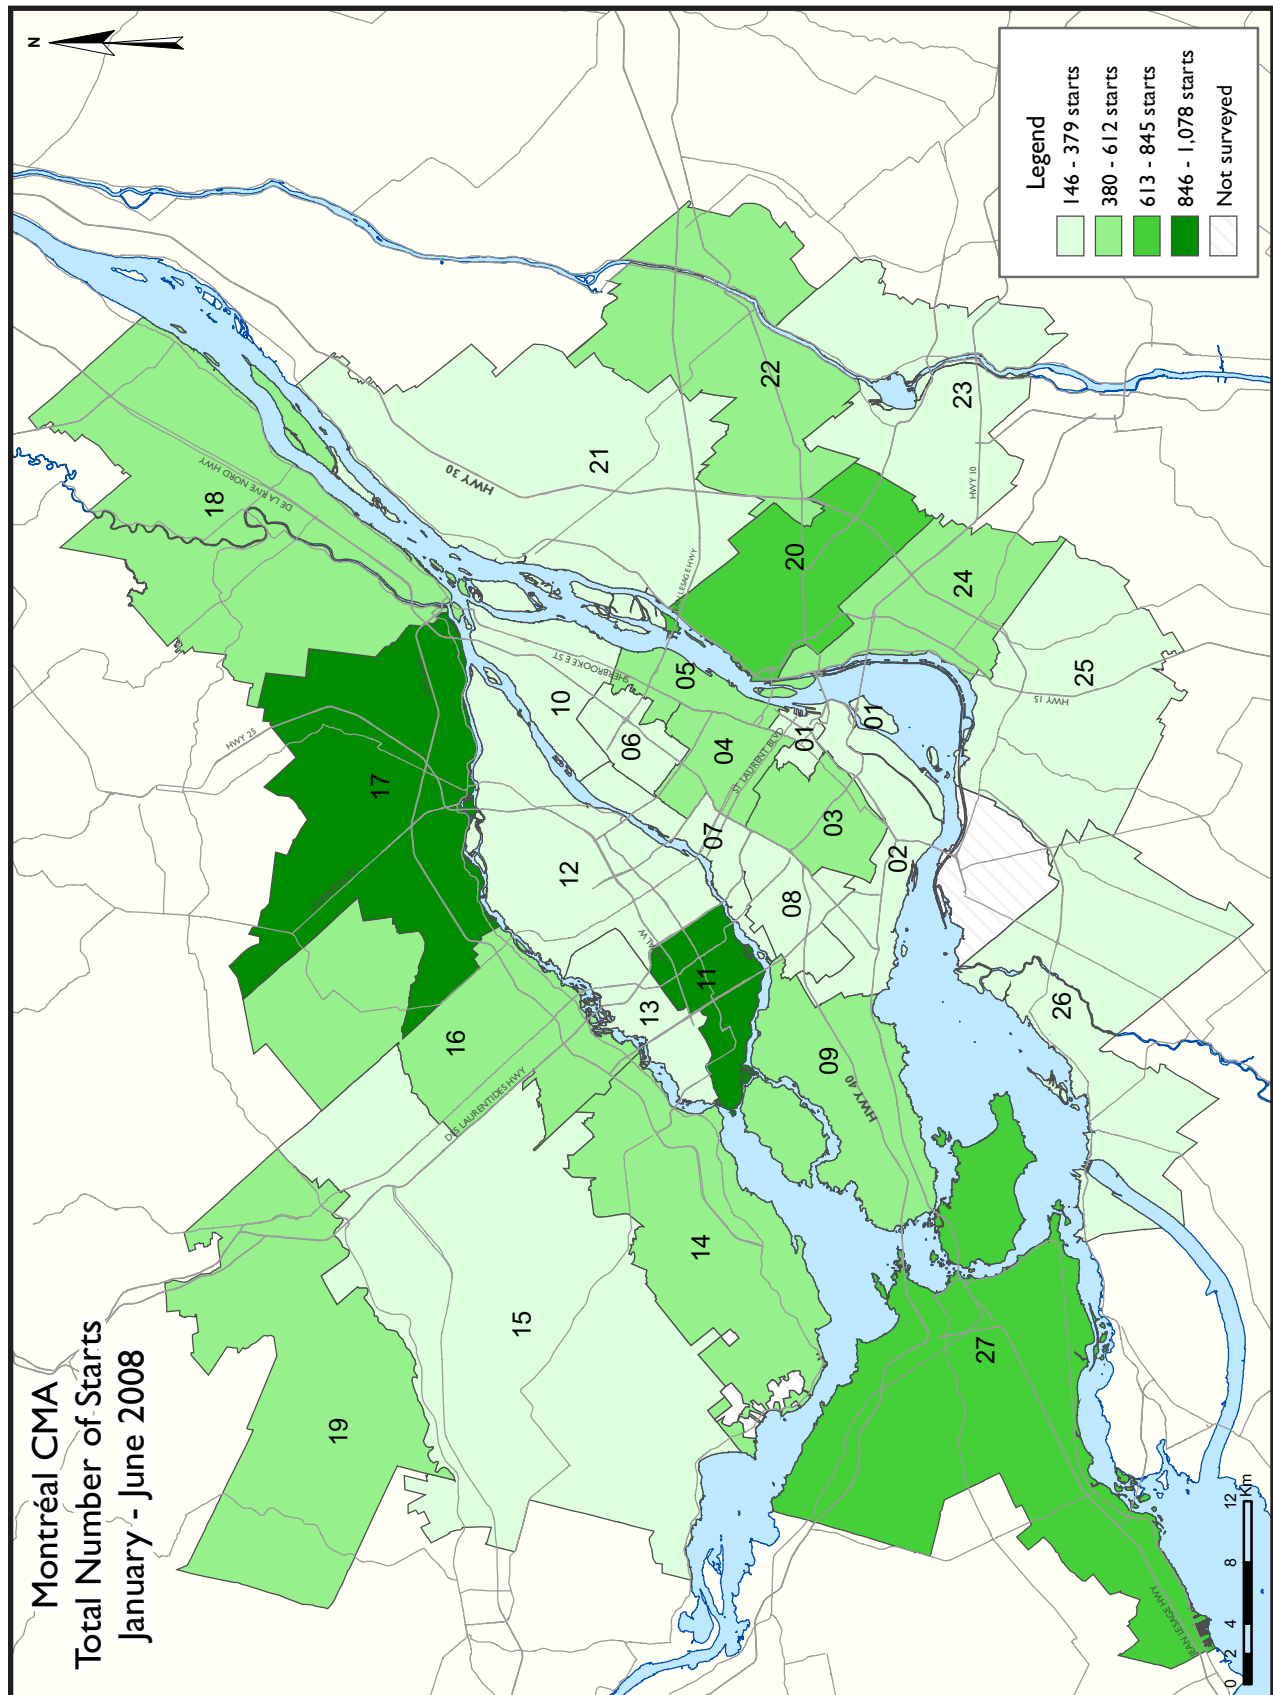

In the first quarter, 7,331 single-family homes changed hands, for a share of 61 per cent of all transactions registered during this period. The volume of sales fell by 8 per cent from the first quarter of 2007. Listings of single-family houses continued to decrease, falling by 4 per cent from the first quarter of 2007. In the Montréal CMA, the average price of single-family houses reached \$254,710, up by 8 per

cent over the same period last year. This increase in prices was similar to the average rise noted in 2007 (+7 per cent).

Even though transactions had risen significantly in the first quarter of 2007, the condominium market still got off to a strong start in 2008. In fact, during the first quarter of this year, 3,438 condominium sales were recorded, for an increase of 7 per cent over the first quarter of 2007 and a share of 29 per cent of all transactions registered during this period. In a context where prices have risen significantly, more affordable homes, like condominiums, managed to post a better performance. In fact, this was the only housing type for which sales continued to increase in the last quarter. Condominium listings decreased by 4 per cent from the first quarter of 2007. For the overall CMA, the average selling price of condominiums rose by 2 per cent this past quarter, compared to an increase of 6 per cent in 2007.

In the first quarter of 2008, there were 1,182 plex sales, or 11 per cent fewer than during the same period in 2007. This was the first quarter with a negative result following four straight quarterly increases in sales. The supply of plexes, for its part, grew by 10 per cent over the first quarter of 2007. In fact, this was the only housing type for which listings rose. On the Island of Montréal, the growth in prices was similar to the average increase for the overall CMA. The average price of plexes on the Island of Montréal rose by 7 per cent to \$363,425.

Given the more uncertain economic environment, the resale market will be calmer this year, but the level of activity will still remain high.

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
