### SEPTEMBER 2008: HOUSING CONSTRUCTION DOWN IN THE MONTRÉAL CMA

According to the latest starts survey conducted by Canada Mortgage and Housing Corporation (CMHC), construction got under way on 1,670 dwellings in the Montréal census metropolitan area (CMA) this past September, for a decrease of 52 per cent from the 3,492 units started in September 2007. The decline

registered in September was not surprising given the very high number of starts recorded in the same month last year, especially in the retirement home segment, where foundations had been laid for six retirement homes representing more than 1,300 housing units. Despite this decline, total starts for last month remain above the September historical average. It should be noted that, for the first nine months of this year, residential construction was 8 per cent less than the same period last year.

Freehold home starts were down for the fourth month in a row. This past September, construction began on 674 dwellings of this type, for a drop of 15 per cent from the same month in 2007. This decrease was due to a decline in single-detached home building. With 496 starts enumerated last month, construction of this type was down by 20 per cent compared to September 2007. Semi-detached and row housing starts, for their part, remained stable last month. Foundations were laid for 178 such units, compared to 177 a year earlier. Since the beginning of the year, freehold semi-detached and row houses have posted the biggest increase, with starts up by 23 per cent.

Rental housing starts decreased sharply in September. In all, 296 rental dwellings got under way. This is six times fewer than a year ago. This decrease brought down total year-to-date starts in this segment, which were down by 27 per cent at the end of September, compared to a year earlier. In addition, the drop in rental starts has largely contributed to the overall market decline seen thus far in 2008.

Condominium activity fell by 23 per cent in September. Foundations were laid for 700 units of this type, compared to 908 a year ago. However, just like freehold semi-detached and row houses, this more affordable housing type has been doing well since the beginning of the year. In fact, there were 7 per cent more condominium starts from January to September of this year than during the same period in 2007.

A review of the market performance in the different geographic sectors reveals that starts were down in all sectors in September, mainly on account of the decrease in rental housing construction. The Island of Montréal, where a slowdown in condominium activity was also observed, posted the biggest year-over-year drop (-68 per cent). This sector also registered the greatest decrease in housing starts for the first nine months of the year (-16 per cent).

In the North Crown, starts were down 43 per cent in September, compared to a year ago. The decline was particularly notable in Laval, where

activity fell by 77 per cent. While total starts from January to September decreased by 3 per cent year-over-year, the North Crown remains the most dynamic geographic sector.

In the South Crown, starts dropped by 40 per cent last month from a year earlier. In particular, they decreased by 15 per cent in the freehold home segment. For the first nine months the year, starts on the South Crown were down by 6 per cent from the same period last year.

Lastly, in Vaudreuil-Soulanges, a 34-per-cent year-over-year decrease in starts was observed last month, as a result of a 41-per-cent decline in the freehold home segment. It should be noted that construction got under way on 11 condominiums in September, compared to none during the same month in 2007. Starts in Vaudreuil-Soulanges were down 10 per cent for the first nine months of the year.

ZONE DESCRIPTIONS - MONTRÉAL CMA	
Zone 1	Downtown Montréal (bordered on the east by Amherst Street, on the west by Guy Street and on the north by Chemin Remembrance and Des Pins Avenue), Île-des-Soeurs.
Zone 2	Dorval, L'Île-Dorval, Montréal (Lachine, LaSalle, Le Sud-Ouest, Verdun).
Zone 3	Côte-Saint-Luc, Hampstead, Montréal (Côte-des-Neiges, Notre-Dame-de-Grâce, Outremont), Montréal-Ouest, Mont-Royal, Westmount.
Zone 4	Montréal (Parc-Extension, Plateau Mont-Royal, Rosemont (including La Petite-Patrie), Saint-Michel, Villeray).
Zone 5	Montréal (Mercier, Hochelaga-Maisonneuve, Centre-Sud).
Zone 6	Montréal (Anjou, Saint-Léonard).
Zone 7	Montréal (Ahuntsic, Cartierville, Montréal-Nord).
Zone 8	Montréal (Saint-Laurent).
Zone 9	Beaconsfield, Baie-d'Urfé, Dollard-des-Ormeaux, Kirkland, Pointe-Claire, Sainte-Anne-de-Bellevue, Senneville, Montréal (L'Île-Bizard, Pierrefonds, Roxboro, Sainte-Genève).

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
