

HOUSING MARKET OUTLOOK

Québec Region Highlights

Canada Mortgage and Housing Corporation

Date Released: Fourth quarter 2008

42,000 starts expected in 2009

Figure 1

Figure 2

Moderating economic growth in 2008 and 2009 combined with increased supply in certain segments of the housing market will contribute to lower levels of housing starts in 2009. Housing starts in 2009 will be 42,000 units. The province's economy, has been supported by household spending and public investment. Looking ahead, public spending on infrastructure projects will be relatively immune to external economic shocks, however, consumer spending may soften as a result of a softer labour market. The outlook for exports remains unchanged as the benefits of a lower dollar are offset by decreased global demand. On a different note, several demographic factors will help sustain housing demand next year. Higher immigration targets (55,000 by 2010) will push up net migration and population aging will continue to fuel demand for apartments.

Mortgage Rates

The Bank of Canada has cut the Target for the Overnight Rate by a total of 225 basis points since December 2007, bringing the rate down to 2.25 per cent. Mortgage rates are expected to be relatively stable throughout the last quarter of this year, remaining within 25-50 basis points of their current levels. Posted mortgage rates will decrease slightly in the first half of 2009 as the cost of credit to financial institutions eases. Rising bond yields, however, will nudge mortgage rates marginally higher in the latter half of 2009. For the last quarter of 2008 and in 2009, the one year posted mortgage rate will be in the 6.00-6.75 per cent range, while three and five year posted mortgage rates are forecast to be in the 6.50-7.25 per cent range.

In Detail

Single Starts: Single starts will decrease due to lower employment growth and the recently rising supply of existing homes listed for sale. Approximately 17,500 starts are expected in 2009.

Multiple Starts: Following a year of vigorous construction in 2007, starts of retirement homes will decrease. Total multi-family home starts will rise to 28,675 units in 2008 and fall to 24,500 units in 2009.

Resales: Sales of existing homes will decline in 2009 but will remain at a high level. Demand for condominiums (town houses or apartments) will remain an important component. The Multiple Listing Service (MLS) should thus record approximately 79,000 sales in 2009.

Prices: Cooling sales and rising inventories will continue to take pressure off prices. Cooling demand should keep price growth under the 2.5 per cent mark in 2009. As a result, the MLS average resale price will reach \$ 217,000 in 2009.

will pull activity to levels more in line with household formation estimates. To begin with, Québec's economy and labour market will grow moderately. Moreover, existing home markets will move from sellers' to more balanced conditions, thus reducing demand for new homes. Finally, the decrease, over several years, in the rate of growth of the population aged 75 years or older will take the pressure off the construction of retirement homes during the forecast horizon. As a result, housing starts in Québec will moderate from around 48,000 units in 2008 to 40,000 units in 2012. It follows that not all segments of the housing market will be impacted in the same way. While demand for new single detached homes is likely to follow economic conditions, that of new multi-family housing will be conditioned by the demographic factors mentioned above.

Outlook for Housing Starts 2008-2012

Despite remaining at relatively high levels, new home construction in Québec will moderate during the next five years. A number of factors

MLS® is a registered trademark of the Canadian Real Estate Association (CREA).

¹Changes to the Unemployment Rate and Employment Growth represent the **absolute** difference between current rates and the rates for the same period in the previous year.

²For the average MLS® price, the figure for the CMAs corresponds to the trend for the last four quarters, except in the case of Montréal. Also, the figure corresponds to the average price of freehold homes in the case of Montréal, Saguenay and Trois-Rivières and to the average price of all homes in the case of Gatineau, Québec and Sherbrooke.

³Data for MLS® sales and for MLS® average price refer to the second quarter of 2008
