## Table 12

## Tableau 12

---

**Quarterly and Annual Estimates of Average Weekly Hours by Size of Enterprise, for Hourly Paid Employees, for Selected Industries, Canada, Provinces and Territories (2004-2007).**

**Estimations trimestrielles et annuelles des heures hebdomadaires moyennes par taille d'entreprise, des salariés rémunérés à l'heure, pour une sélection d'industries, Canada, provinces et territoires (2004-2007).**

---

In the fourth quarter of 2007, average hours for hourly paid employees stood at 31.0, a decrease of 0.5 hour from the third quarter 2007 and a decrease of 0.6 hour compared to the same period in 2006. The decline was consistent for all employee size groups.

Au cours du quatrième trimestre de 2007, le nombre d'heures hebdomadaires moyennes des salariés rémunérés à l'heure s'est établi à 31,0 heures, une baisse de 0,5 heure par rapport au troisième trimestre de 2007 et une baisse de 0,6 heure par rapport à la même période en 2006. La baisse a été enregistrée dans tous les groupes de tailles d'emploi.

Labour Statistics Division  
**Business Payrolls Survey**  
 Your Survey Reporting Record

Confidential when completed

Collected under the authority of the *Statistics Act*, Revised Statutes of Canada, 1985, Chapter S19.

**REPORT FOR:**  
**RETURN BY:**

//    / / / / / -

This survey measures the month-to-month trends of payroll employment, paid hours and earnings. Your participation is critical to ensure an accurate reflection of your industry, region and business size. As with most business surveys, completion of this survey is a legal requirement under the Statistics Act.

Statistics Canada has entered into data sharing agreements pursuant to Section 11 of the Statistics Act, with the statistical agencies in the provinces of British Columbia, Ontario, Québec and New Brunswick and under Section 12 with the Northwest Territories Bureau of Statistics and the Nunavut Bureau of Statistics. Under Section 12 of the Statistics Act, respondents in the Northwest Territories and Nunavut may refuse to share their data with their respective bureaus of statistics by writing to the Chief Statistician and returning a letter of objection with their completed questionnaire.

Strictly for statistical purposes, Statistics Canada will combine your responses to this survey with your business' monthly payroll deduction files received from the Canada Revenue Agency. The combined information permits the publication of the total number of paid employees, payrolls and hours at detailed industrial and geographic levels.

**A. ALL EMPLOYEES**

|  |      |   |    |   |
|--|------|---|----|---|
| <b>1a. Gross monthly payroll</b><br>This is the total remuneration <b>PAID</b> to employees during the survey reference month, before deductions. It includes any amount subject to appear in Box 14 of T4 slips. (regular pay, overtime pay and special payments) |      |   |    |   |
| <b>1b. Start and end dates of the Gross Monthly Payroll. (reported in item 1a)</b><br>The first day of the first regular pay period and the last day of the last regular pay period paid out within the reference month.   | From |   | To |   |
|  | D    | M | D  | M |
| <b>1c. Total number of employees in the last pay period paid out within the reference month.</b><br>(employees receiving pay for work performed or for paid absence for the last pay period of the month.) This must include part-time employees.                  |      |   |    |   |
| <b>1d. Number of part-time employees</b> (those that work less than 30 hours a week)<br>This number must be included in item 1c.   |      |   |    |   |

**For sections B, C, D and E record your information in the first column. Only use the additional columns when recording more than one payroll within an employee category.**

**B. EMPLOYEES PAID BY THE HOUR**

|   |        |   |    |   |        |   |    |   |        |   |    |   |        |   |    |   |
|---|--------|---|----|---|--------|---|----|---|--------|---|----|---|--------|---|----|---|
| <b>2. Number of employees paid by the hour</b> receiving pay for work performed or paid absence for the last pay period of the month. |        |   |    |   |        |   |    |   |        |   |    |   |        |   |    |   |
| <b>3. Last pay period in the month.</b><br><br>Start and end dates  | From   |   | To |   | From   |   | To |   | From   |   | To |   | From   |   | To |   |
|   | D      | M | D  | M | D      | M | D  | M | D      | M | D  | M | D      | M | D  | M |
| <b>4a. Regular gross pay</b> payable for the last pay period of the month, including overtime pay for the same period.                | \$ .00 |   |    |   | \$ .00 |   |    |   | \$ .00 |   |    |   | \$ .00 |   |    |   |
| <b>4b. Overtime pay</b> payable for the last pay period of the month included in Item 4a.   | \$ .00 |   |    |   | \$ .00 |   |    |   | \$ .00 |   |    |   | \$ .00 |   |    |   |
| <b>5a. Total number of hours payable</b> for the last pay period of the month, including overtime hours for the same period           | .0     |   |    |   | .0     |   |    |   | .0     |   |    |   | .0     |   |    |   |
| <b>5b. Total number of overtime hours</b> worked in the last pay period of the month included in Item 5a                              | .0     |   |    |   | .0     |   |    |   | .0     |   |    |   | .0     |   |    |   |

|  |                 |                |   |   |    |   |        |             |
|--|-----------------|----------------|---|---|----|---|--------|-------------|
| <b>6. Special payments PAID at anytime during the month to employees paid by the hour</b> (e.g., accumulated leave, bonuses, retroactive payments, termination pay, commissions, etc.) This includes all special payments subject to appear in Box 14 of the T4 slips. | Type of Payment | Period Covered |   |   |    |   |        | Amount Paid |
|  |                 | From           |   |   | To |   |        |             |
|  |                 | D              | M | Y | D  | M | Y      | \$ .00      |
|  |                 |                |   |   |    |   |        | \$ .00      |
|  | D               | M              | Y | D | M  | Y | \$ .00 |             |
|  |                 |                |   |   |    |   | \$ .00 |             |
|  | D               | M              | Y | D | M  | Y | \$ .00 |             |
|  |                 |                |   |   |    |   | \$ .00 |             |

**C. SALARIED EMPLOYEES (EXCLUDING WORKING OWNERS)**

Cette enquête mesure les tendances mensuelles de l'ensemble des salariés inscrits sur la liste de paye, des heures rémunérées, et des gains. Votre participation est essentielle à l'obtention de résultats qui reflèteront correctement votre industrie, votre région et la taille des entreprises. En vertu de la Loi sur la statistique, vous êtes tenu, comme pour la plupart des enquêtes entreprises, de répondre à cette enquête.

Statistique Canada a conclu des ententes de partage de données en vertu de l'article 11 de la Loi sur la statistique avec les agences statistiques des provinces suivantes: la Colombie-Britannique, l'Ontario, le Québec et le Nouveau-Brunswick et aux termes de l'article 12 avec le Bureau de la statistique des Territoires du Nord-Ouest et le Bureau de la statistique du Nunavut. En vertu de l'article 12 de la Loi sur la statistique, les répondants des Territoires du Nord Ouest et du Nunavut peuvent refuser de partager leurs données avec leur bureau de la statistique respectif en communiquant par écrit au statisticien en chef et en retournant une lettre d'objection avec le questionnaire rempli.

Strictelement pour des besoins statistiques, Statistique Canada fera un appariement de vos réponses à cette enquête avec vos fichiers mensuels des versements du registre de paye reçus de l'Agence du revenu du Canada. La combinaison de ces informations permet la publication du nombre total d'employés rémunérés, de la rémunération et des heures à des niveaux industriels et géographiques détaillés.

**A. TOUS LES SALARIÉS**

|   |               |               |
|---|---------------|---------------|
| 1a. <b>Rémunération brute mensuelle</b> Il s'agit du montant total de la rémunération <b>VERSÉE</b> aux salariés au cours du mois de référence avant les retenues. Ceci inclut tout montant susceptible d'apparaître dans la case 14 du feuillet T-4. (salaires réguliers, rémunération des heures supplémentaires ainsi que les paiements spéciaux). |               |               |
| 1b. <b>La date de début et la date de fin de la rémunération brute mensuelle. (déclarée à la question 1a)</b><br>(La première journée de la première période régulière de paye et la dernière journée de la dernière période régulière de paye versée pendant le mois de référence.)  | Du            | Au            |
|   | J   M   J   M | J   M   J   M |
| 1c. <b>Nombre total de salariés dans la dernière période de paye versée pendant le mois référence.</b><br>(Les salariés recevant une rémunération pour un travail effectué ou pour un congé payé au cours de la dernière période de paye du mois.) Ce nombre doit inclure les employés travaillant à temps partiel.                                   |               |               |
| 1d. <b>Nombre de salariés à temps partiel</b> (ceux qui travaillent moins de 30 heures par semaine). Ce nombre doit être inclus dans 1c.  |               |               |

**Pour les sections B, C, D et E, inscrivez vos renseignements dans la première colonne.  
Utilisez les colonnes additionnelles si vous avez plus d'un registre de paye pour une catégorie de salariés.**

**B. SALARIÉS RÉMUNÉRÉS À L'HEURE**

**Administrative data:** data derived from the monthly payroll deduction forms (PD7 forms) from Revenue Canada. There are two types of payroll deduction (PD) accounts.

- **PD7A** refers to monthly remitters (small businesses reporting once a month).
- **TM** refers to accelerated remitters (medium and large businesses reporting more than once a month).

**Données administratives:** données provenant des formulaires de retenue sur la paye (formulaires PD7) de Revenu Canada. Il existe deux genres de comptes de retenues sur la paye (RP).

- **PD7A** se rapporte aux remises mensuelles (petites entreprises effectuant une remise par mois).
- **TM** se rapporte aux remises accélérées (moyennes et grandes entreprises effectuant plus d'une remise par mois).

**Indicators of the Coefficients of Variation by Industry, Canada, Provinces and Territories, 2007**
**Indicateurs des coefficients de variation par industrie, Canada, provinces et territoires, 2007**
**Abbreviations:**
**Abbréviations:**
**Variables:**

awe = average weekly earnings

sww = standard work week

awh = average weekly hours

ahe = average hourly earnings

**NAICS non standard classification code:**

11-33N = Goods producing industries

41-91N = Service producing industries

Non-Dur = Non-durable goods manufacturing

Durable = Durable goods manufacturing

41-45N = Trade

11-91N = Industrial aggregate (excluding unclassified)

00-91N = Industrial aggregate (including overtime)

**Variables:**

rhém = rémunération hebdomadaire moyenne

snt = semaine normale de travail

hhem = heures hebdomadaires moyennes

rhom = rémunération horaire moyenne

**SCIAN classification non standard:**

11-33N = Branches productrices de biens

41-91N = Branches productrices de services

Non Dur = Fabrication de biens non durables

Durable = Fabrication de biens durables

41 - 45N = Commerce

11-91N = Ensemble des industries (sauf les entreprises non classifiées)

00-91N= Ensemble des industries (y compris les entreprises non classifiées)

# 1. BACKGROUND AND OBJECTIVES

## Objectives

The monthly Survey of Employment, Payrolls and Hours (SEPH) is designed to provide monthly estimates of the levels and month-to-month trends in payroll employment paid hours and earnings. The data are compiled at detailed industrial levels for Canada, the provinces and territories. The target population is composed of all employers in Canada, except those primarily involved in agriculture, fishing and trapping, private household services, religious organizations and the military personnel of the defence services.

## Survey Background

Canada's monthly payroll employment survey was begun in 1918 by the Department of Labour and taken over in 1922 by the Dominion Bureau of Statistics. The survey has continued to the present without change in basic purpose. Initially, estimates were restricted to those employers with 15 or more employees and covered only certain industries. Earnings data were added in 1941. In 1961, the employment size threshold was raised to 20 employees and a sample survey was conducted to collect employment services data from firms below the threshold. In 1968, the non-commercial services industries were added, so that except for agriculture, fishing and trapping, and military services, industrial coverage for employment was complete.

In the early 1970's, differences between an external benchmark and establishment-based estimates for Labour Income, as well as large and erratic revisions to the monthly estimates caused concern. The problems were thought to result from the absence of earnings data for the entire universe. This, together with a desire to reduce survey response burden and to resolve conceptual and definitional problems, prompted a major review of the surveys. An integrated survey (Survey of Employment Payroll and Hours) was developed, adding earnings and hours data to the small business and non-commercial institutions components.

The results of SEPH were first published for the April 1983 reference month and the program was improved and developed throughout the next decade. By the summer of 1992, the Labour Division was able to release detailed industry data on a consistent basis back to 1983 and had developed new data products including the fixed-weighted earnings indices, the dispersion indices together with seasonally-adjusted data. The data were released in a redesigned publication with the April 1992 reference month.

## A Proposal to Reduce Response Burden through Statistics Canada Revenue Agency

Concerns with response burden led the Canadian Organization of Small Businesses to write to Canada Revenue Agency in the late 1980's, suggesting the addition of payroll employment and gross monthly payrolls information on the payroll deductions remittance (PD7) forms. In 1989 a joint Canada Revenue Agency /Statistics Canada working group concluded that it would be feasible to add two questions on numbers of employees and total payrolls to the monthly PD7 remittance form. (Employers who remit less than \$15,000 need only to remit monthly; larger employers usually remit twice monthly or more frequently). In early 1992, the cost picture was re-examined. Focus group testing to gauge the reaction of potential respondents revealed that adding employment and total payrolls questions to the PD7 form was not perceived to pose any significant additional burden on respondents. It was agreed to add the questions to the Revenue Canada Agency forms beginning in January 1993. To the extent that the PD7 data could be used in place of SEPH questionnaires, there would be a net reduction in total response burden.

## SEPH redesign

Starting in the mid-1990's, SEPH was engaged in an extensive multi-phases redesign process. The major objectives of the redesign were to improve the quality of the estimates and to reduce the response burden imposed on the business community.

Throughout the three phases of the redesign, administrative data have been gradually included in the survey sample to replace survey questionnaires. The administrative sample used to derive employment and monthly payroll was supplemented with a small sample survey (Small Business Payrolls Survey) of establishments to derive the weekly component of payrolls, the employment categories and the hours paid.

Phase I of the survey redesign was implemented with the March 1994 reference month when administrative records were used for small sized employers. As a result, the SEPH monthly sample size was reduced by approximately 30,000 respondents (from approximately 70,000). At the same time a sample of 2,500 establishments was drawn for the Small Business Payrolls Survey<sup>1</sup>.

In May 1996, the use of administrative data was extended to cover medium and large sized businesses that operated in a unique combination of industrial activity and province. The implementation of Phase II resulted in a further reduction of some 22,000 respondents in the monthly survey. The Business Payrolls Survey (BPS) sample was then increased to 6,000 establishments.

The last phase of the redesign (PHASE III) was implemented in May of 1998. The most significant change was the extension of the use of administrative records to businesses engaged in multiple industrial activities (SIC-3<sup>2</sup>) and in different provinces. With this change, the sample survey portion of the SEPH process was reduced to the 10,000 establishments of the BPS.

With the completion of the survey redesign, the SEPH monthly sample size was reduced from 70,000 to 10,000 establishments. This represents a reduction of 720,000 contacts on an annual basis.

With the January 2001 data, the SEPH program has switched from Standard Industrial Classification 1980 to the North American Industrial Classification System 1997. The increased number of domains of estimation has necessitated a slight increase to the BPS sample size, which now stand at 11,000 establishments.

With the January 2004 data, SEPH has switched from the North American Industrial Classification System 1997 to the North American Industrial Classification System 2002 version.

With January 2008 data, current and historical estimates from the Survey of Employee Payroll and Hours (SEPH) are using the 2007 North American Industry Classification System (NAICS) instead of NAICS 2002.

## SEPH's Future

The Labour Statistics Division's Program of Employment, Payrolls and Hours data has a bright future. With the collaboration of the Canada Revenue Agency in providing valuable administrative data, the survey program will result in better quality data produced at less cost. These data will continue to be crucial to the understanding of Canada's labour markets.

---

<sup>1</sup> In 1996 the Small Business Payrolls Survey was renamed Business Payrolls Survey.

<sup>2</sup> First three digits of the 1980 Standard Industrial Classification

## 2. SURVEY METHODOLOGY

### Survey Population

The target population is composed of all employers in Canada, except those primarily involved in agriculture, fishing and trapping, private household services, religious organizations and the military personnel of the defence services. SEPH draws its samples from the Business Register (BR) maintained by the Business Register Division of Statistics Canada and from a list of all businesses registered in Canada Revenue Agency's Business Number program, with one or more active payroll deduction accounts.

The Business Register is a list of all businesses in Canada and is updated each month using data from various surveys, business profiling and administrative data. The Business number is a unique identifier assigned by Canada Revenue Agency to businesses participating in one or more of the following programs: Payroll Deduction, Goods and Services Tax, Importer and Exporter Tax, and Corporation Tax. The payroll deduction source includes all employers with remittances for employee income taxes, CPP/QPP and Employment Insurance contributions.

### Reference Period

The survey reference period for SEPH is the pay period that includes the last seven days of the month. When the reported pay period is longer than one week, the data are reduced to a weekly equivalent using the number of days the respondent usually operates during a week divided by the number of working days covered by the reported pay period. Reference week adjustments are also made for strikes, lockouts and layoffs.

### Methodology

The statistics produced by SEPH are based on a census of administrative records (provided by Canada Revenue Agency) for all employers' establishments that are in-scope for the survey and are present on the Business Register<sup>3</sup>. The monthly payroll and employment estimates are derived from the administrative source.

The Business Payrolls Survey (BPS) is conducted monthly to collect data by a CATI (Computer Assisted Telephone Interviews) collection system to estimate SEPH variables not available on administrative records. The estimates derived from the administrative source are combined with the results of the BPS to produce estimates for the full range of SEPH variables.

### Administrative Survey

An arrangement between Canada Revenue Agency and Statistics Canada allows Statistics Canada to access information on the total gross monthly payrolls and the total number of employees for the last pay period of the month from the payroll deduction forms completed by employers who remit on the PD7 form.

The use of administrative data contributes to the reduction of survey costs and response burden. They also enhance the overall estimates of SEPH payroll employment, and the estimates of wages and salaries of the Income and Expenditure Division of Statistics Canada. These improvements are due to the timeliness of administrative data and to a better coverage of the surveyed population.

### There are three types of payroll deduction (PD) accounts:

**Quarterly or monthly remitters** represent small businesses with remittances of less than \$15,000 monthly (\$12,000 or less per year for quarterly remitters).

**Accelerated remitters** who generally represent larger businesses remit more often than once a month.

Canada Revenue Agency, transfers to Statistics Canada information on the number of employees and the total gross monthly payroll for these PD7 accounts. Because of the census nature of the survey, the administrative sample is always made up of the same units except when new businesses are created and existing businesses cease their activities.

---

<sup>3</sup> Except for data for general government services at the provincial and federal levels which are provided by the Public Institution Division

### **The Business Payrolls Survey (BPS)**

The BPS provides the basis for the estimation of additional variables not reported on the PD7 form. These include the weekly component of gross monthly payrolls, total hours and the allocation of hours, earnings and employment for categories of employees (paid by the hour, salaried and other). Sample allocation is oriented towards maximizing the accuracy of the weekly earnings and total hours estimates for the NAICS sub-sectors for Canada, the provinces and the territories.

The BPS draws a sample of 11,000 from the 915,000 establishments that are potentially in business and classified to an industry and a province. The BPS sample is stratified using a combination of province, sub-sector, and size. Allocation is determined using an approach which initially specifies a target coefficient of variation (CV) for estimated weekly earnings and total hours at the Canada level. The CVs at the geographical level and the industrial level are then derived from the overall CV.

Estimates for payroll employment and gross monthly payrolls from the Administrative Survey are produced using a census of administrative records, while estimates for other SEPH variables are derived via a regression or a ratio estimation procedure.

Each month, the BPS frame is updated to reflect new establishments created and those that no longer exist. Generally, sampled units leave the BPS sample after 12 months and are not eligible for re-selection for one year. Approximately 1/12 of the BPS sample is replaced every month.

## 3. DATA COLLECTION AND DATA PROCESSING

### Data Collection

The BPS uses a combination of methods for data collection to permit maximum flexibility for the respondent. For mail units, questionnaires are mailed to the payroll office of employers each month. Telephone interviews are used for respondents who express a preference for being surveyed by telephone. Respondents can also report their data electronically.

Reporting units which are non-respondents to the initial mailing are followed up by telephone by the staff of the regional offices of Statistics Canada. Establishments that do not report data diminish the accuracy of the estimates.

At the Canada level, less than one percent of establishments surveyed refuse to report data and about ten percent report too late to be included in the estimation process.

Administrative data for total gross monthly payrolls and the total number of employees for the last pay period in the month are obtained from payroll deduction (PD7) accounts maintained by Canada Revenue Agency.

Finally, the Public Institutions Division of Statistics Canada provides information on general government services at the provincial, territorial and federal levels.

### Data Processing

#### Data Edits and Corrections

Once the returned questionnaires are captured, extensive edit procedures are used to check for accuracy and consistency. The edit procedures include the comparison of the values of key characteristics (e.g. number of employees, hours worked, salary per employee, etc.) reported for consecutive months by the same unit to detect large changes or errors in reporting. Whenever there is a large change or the data appear inconsistent, the record is: either manually corrected by editors, imputed, or confirmed with the respondent.

### Imputation Methods

#### Administrative Survey

There are three main methods of imputation:

- imputing zero where the PD7 has indicated to Canada Revenue Agency that there will be no employees in the month;
- imputing previous month information with a month-to-month change ratio where there are indications that the units have activity in the current month;
- imputing based on current month stratum averages in some cases where only one value has been reported

The administrative data are received for about 80% of the PD7 forms. The remaining 20% are from business that are either temporarily or seasonally closed or do not respond to the 2 questions (employment and payroll) on PD7 forms. The later cases of a non-response are imputed.

## 4. DATA QUALITY

### Reliability

The estimates obtained from sample surveys are subject to both **sampling** and **non-sampling errors**.

**Sampling errors** occur because observations are obtained from a sample rather than from the entire universe. Estimates based on a sample can differ from those that would have been obtained if a complete census had been taken using the same questionnaires, instructions, interviewers and processing techniques. This difference is called the sampling error of the estimate.

The true sampling error is unknown. However, it can be estimated from the sample itself by using a statistical measure called the standard error. When the standard error is expressed as a percent of the estimate, it is known as the relative standard error or coefficient of variation. Tables of indicators of the coefficients of variation are available upon request along with an explanatory note on how to use them to judge the quality of the estimates contained in SEPH January publication 72002XIB.

**Non-sampling errors** are those which may occur in survey operations for many reasons such as non-response, coverage and classification errors, differences in the interpretation of the question, incorrect information from respondents, and mistakes in recording, coding and processing of data. Efforts to reduce non-sampling errors include careful design of questionnaires, editing of data, follow-up, imputation for non-respondents, and thorough control of processing operations.

SEPH has a statistical quality control program at the data capture, business structure updating and data editing stages to minimize non-sampling errors. These programs monitor and control the completeness, accuracy and consistency of the reported survey data. Procedures are in place to follow up for non-response and to impute for those late responses.

The SEPH program has a head-office Quality Assurance unit that is mandated to study and reduce non-sampling errors and ensure that concepts and definitions are respected.

### Coverage Errors

Two sources of coverage errors associated with survey frames are duplication and under coverage. Duplication occurs on the frame when payroll deduction records cannot be linked to their associated businesses residing on the frame. Therefore a second statistical business is created. Under-coverage arises when new businesses are not classified on the Business Register.

The administrative portion of the survey is continuously updated with the most recent new businesses.

The survey publication contains a separate estimate for the "unclassified businesses" for overall employment by province. The other SEPH variables cannot be estimated since the "unclassified businesses" are not represented in the BPS. There is no industry split for the "unclassified businesses", but they are included in the overall employment estimate, thereby depicting a payroll employment total, that better reflect economic reality.

### Seasonal Adjustment

It is common practice to publish most economic indicators in seasonally adjusted and unadjusted forms. Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one for which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as usual changes in weather, reduced or expanded production and the opening and closing of schools. Since these seasonal events follow a regular pattern each year, their influence on trends can be eliminated by adjusting the data.

Seasonal adjustment is imperfect, so if a time series has irregular variations that are larger than the seasonal variation, the seasonally adjusted series will be a poor estimate. In the opinion of the Time Series Division of Statistics Canada, the unadjusted series will probably be a better estimate than the poorer seasonally adjusted series.

### Fixed-Weighted Earnings Index

The fixed-weighted average hourly earnings index has been constructed to deal with the impact of changes in the paid hours and employment mix among industries, provinces, and territories, salaried and hourly paid employees. This index provides a better indicator of the underlying trends in wage rates than the variable-weighted earnings series.

This data series adjusts for compositional changes in employment by re-aggregating SEPH survey information using fixed rather than variable weights for the paid hours and employment. Overtime is excluded because it is an important source of compositional change in some industries. The base year for this index is, 2002 (2002=100). Thus, for consistency purposes, the time base year for the fixed-weighted earnings index is the same.

### Diffusion Index

The diffusion index can be used to assess how broadly based a change is for SEPH variables such as employment or average weekly hours for the Industrial Aggregate. The diffusion index measures the dispersion of change for the SEPH variables by indicating the fraction of industries which had year-over-year increases in the value of a variable. The SEPH diffusion index, is calculated at the Canada level, and is available for selected industry groups for employment, payrolls average weekly hours, average hourly earnings and average weekly earnings adjusted for inflation. The index is particularly useful in analyzing trends in cyclically sensitive industries such as manufacturing and trade.

### Revision

Towards the end of each month, the SEPH program publishes statistics for two successive months. The most current month is known as preliminary and the previous month is revised. Preliminary estimates are released two months later therefore have a two month lag to the calendar month. Revised estimates have a 3 month lag to the calendar month. For example July 2002 revised estimates and August 2002 preliminary estimates are available in October 2002 calendar month. Revisions are necessary to account for any late survey returns or newly identified reporting or processing errors.

Further revisions can be placed in the context of periodic *historical revisions which may be conducted yearly* and are usually made available at the end of March. These revisions can consist of corrections warranted by further analysis and data validation.

Historical revisions can also, include statistical adjustments to historical figures required to maintain their comparability with current data. Some important changes can affect the program, for example, conversion to the new administrative data source (CRA payroll remittance forms) and to the North American Industrial Classification System (NAICS) in January 2001 necessitated a complete revision back to January 1991. In order to re-calibrate employment and earnings levels measured historically to ones that would be comparable with the new survey methods and data sources.

The process of historical revision and correction is always on-going and normal in the context of a large survey program, and it should always be taken into consideration by users of SEPH statistics.

### Confidentiality

Seph data is reviewed every year to ensure that the confidentiality of business responses is respected at all time. Any aggregated employment estimate that could reveal information about a specific respondent is declared confidential, and consequently not published.

## 5. DATA COMPARABILITY

### Comparability with other Data Sources

#### Employment

SEPH payroll employment estimates are frequently compared to the employment estimates provided by the Labour Force Survey (LFS). When comparing the enterprise-based SEPH employment estimates to the household-based LFS data, some differences can be quantified and others not. The quantifiable adjustments to the LFS include the addition of multiple job holders and the subtraction of the following: unpaid family workers, self-employed, unpaid absentees (such as workers on strike), incorporated businesses, working partners without employees and the industries excluded from SEPH. The adjustments, which are not easily quantifiable, include errors in NAICS coding, differences in reference periods, survey procedures and the unrecorded economy. Also, SEPH covers the Territories while the LFS does not. The LFS data, which focus on demographic characteristics of the labour force, are reasonable measures of trends within broad industry and occupational groups. The SEPH estimates are more suitable as indicators of employment change over detailed industry group levels.

According to the North American Industrial Classification System 2007 (NAICS 2007), public administration (NAICS 2007- 91) contains only those establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. SEPH does not produce data on defence services (NAICS 2007- 9111) but includes civilian defence workers in federal administration. Thus, SEPH publishes public administration data that essentially conforms to this definition. Government establishments engaged in activities such as health and education services and transportation and communication services are classified to the appropriate industries. The Public Institutions Division (PID) publishes government employment data that represent all employees of non-commercial entities under the control of a government.

The quantifiable adjustments to the PID data include the addition of Statistics Canada interviewers and the exclusion of military personnel, government personnel working outside of Canada, employees on unpaid absences and government employees assigned to industries other than public administration. The adjustments, which are not easily quantifiable, include differences in reference periods, survey procedures and the treatment of extra pay periods. The Labour Statistics Division and the Public Institution Division conduct a reconciliation process to ensure that the public administration data are compatible.

#### Earnings

The user community focuses on two earnings indicators, which are often compared to the average weekly and hourly earnings data produced by SEPH. These two earnings indicators are referred to as the Human Resource Development Canada (HRDC) base wage rate settlements and the estimates of Wages and Salaries and Supplementary Labour Income produced by the Income and Expenditure Accounts Division in Statistics Canada.

HRDC's wage rate indicator data include only unionised workers covered by major collective agreements representing 500 or more employees. For instance, the base wage rate, as an indicator of wage change, covers about 10% of the overall SEPH employment. Therefore, the value and relevance of the HRDC base wage rate as an indicator of wage change should be carefully considered.

The SEPH data for average weekly/hourly earnings are imperfect indicators of wage rate changes because they are subject to compositional shifts by industry, by provinces and changes in underlying rates of pay.

The estimates of wages and salaries produced by the Income and Expenditure Accounts Division are primarily based on annual T4 supplementary administrative records provided by Canada Revenue Agency Taxation which are projected forward on a monthly or quarterly basis using SEPH and LFS data. Supplementary Labour Income (SLI), which accounts for about 11% of total Labour Income, is not measured by SEPH. SLI includes employer contributions to pension's plans, medical and other welfare plans, Canadian and Quebec Pension Plan and workers' compensation. The labour income estimates, which are a more comprehensive source of employment compensation, do not provide any information on wage rates.

**Comparability over time**

SEPH data have been historically corrected to produce consistent time series from **January 1991 to date**.

## 6. TERMS AND DEFINITIONS

### Terms and Definitions

**Enterprise:** An enterprise is any business or institution whether incorporated or not; it comprises sole proprietorships, partnerships, companies and other forms of organizations. An enterprise is considered to be simple if all its establishments operate in the same province/industry classification; otherwise, an enterprise is classified as complex.

**Establishment:** For statistical purposes it is the smallest entity capable of reporting statistics of economic production, typically a factory, a mine, a store or a similar unit.

**Industrial coverage:** The SEPH survey covers of all industries in Canada, except those primarily involved in agriculture, fishing and trapping, private household services, religious organisations and the military personnel of the defence services.

**Industry classifications:** The North American Industrial Classification System 2007 (NAICS2007) is based on the supply side or on production oriented principles. Each establishment is assigned an industry code according to the NAICS 2007. A description of the various industries and groups of industries is contained in the "North American Industrial Classification System 2007 manual, Catalogue #12-501XPE. For analytical purposes, we have created special groupings that are not part of the NAICS 2007 classification.

#### Special Industrial grouping:

- a) **Industrial aggregate** (00-91N) represents the sum of all the industries included in the survey. Since March 1994, the employment estimates for the industrial aggregate include the unclassified businesses (0000). The variables earnings and hours are excluded from the unclassified businesses (0000).
- b) **Unclassified businesses** (0000) represents the businesses that have not yet been classified to a NAICS 2007, a province or to a territory. This industry is available since March 1994. Data for this industry are calculated only for employment for all employees. All other variables are not compiled for this industry.
- c) **Goods-producing industries** (11-33N) comprise forestry, mining, utilities, construction and manufacturing.
- d) **Service-producing industries** (41-91N) consists of trade, transportation and warehousing, information and cultural industries, finance and insurance, real estate and rental and leasing, professional, scientific and technical services, management of companies and enterprises, administrative and support, waste management and remediation services, educational services, health care and social assistance, arts, entertainment and recreation, public administration (except for military personnel and other government services) and other services (except religious organizations and private households).
- e) **Durable goods manufacturing** (321N) includes wood products manufacturing (321), non-metallic mineral products manufacturing (327), primary metal manufacturing (331), fabricated metal products manufacturing (332), machinery manufacturing (333), computer and electronic products manufacturing (334), electrical equipment, appliances and components manufacturing (335), transportation equipment manufacturing (336), furniture and related products manufacturing (337) and miscellaneous manufacturing (339).
- f) **Non-durable goods manufacturing** (311N) is the sum of food manufacturing (311), beverage and tobacco products manufacturing (312), textiles mills (313), textile products mills (314), Clothing manufacturing (315), leather and applied products manufacturing (316), paper manufacturing (322), printing and related support activities (323), petroleum and coal products manufacturing (324), chemical manufacturing (325), and plastics and rubber products manufacturing (326).
- g) **Education special aggregation** (611N) includes elementary and secondary schools (6111), community college and CEGEP(s) (6112), universities (6113), business schools and computer management training (6114) and technical and trade schools (6115).
- h) **Public Administration** (91) contains only the establishments engaged in activities that are governmental in character and those serving as internal service agencies of the public service. Government owned establishments primarily engaged in activities assigned to other industries are classified in those industries along with similar establishments owned by non-government bodies. Therefore, data included in this industry division do not represent the actual number of persons employed by government at any level.

**Geographic classification:** The reporting units are assigned to a province or territory. The statistics published by SEPH are based on the 1996 version of the Standard Geographic Classification.

**Paid absence** includes, statutory holidays, paid holidays, sick leave including industrial injury and personal leave such as bereavement leave, jury duty, etc.

### Employee

Any person drawing pay for services rendered or for paid absences and for whom the employer must complete a Canada Revenue Agency T-4 Supplementary Form is deemed to be an employee. The "employee" concept comprises full-time employees, part-time employees (those who regularly work fewer hours than the standard workweek of the establishment) and casual or temporary employees. It also comprises working owners, directors, partners and other officers of incorporated businesses.

**The employee concept excludes** owners or partners of unincorporated businesses and professional practices, the self employed, unpaid family workers, persons working outside Canada, military personnel, and casual workers for whom a T-4 is not required. It also excludes persons who did not receive any pay from the employer for the entire survey reference period (e.g. persons on strike, persons on unpaid holidays, persons receiving remuneration from an insurance plan, workers compensation or related fund, etc.). However, employees paid by the employer for a part of the reference period and unemployed or on strike for the rest are counted as employed.

#### *The employees are classified into the following categories:*

- a) **All employees:** is the sum of employees paid by the hour, salaried employees and other employees.
- b) **Employees paid by the hour:** any employee whose basic wage is expressed as an hourly rate.

For Elementary and Secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and Computer management training (6114) and Technical and Trade schools (6115) industries, this category of employment represents **Non-teaching Staff:** all employees other than teachers and academic staff i.e. president, vice-president, librarian, registrar, bursar, accountant, guidance counsellor, laboratory technician, personnel officer, and other services (janitor, bus driver etc).

- c) **Salaried employees:** any employee whose basic remuneration is a fixed amount for at least one week.

For Elementary and secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and computer management training (6114) and Technical and trade schools (6115) industries, this category of employment represents **Teaching Staff:** those classified as teachers, instructors or academics in the payroll records (e.g. principal, professor, dean, head of department, master, teacher, etc.) whether they teach during the day or evening. Supply or substitute teachers are excluded.

- d) **Other employees:** Those employees, whose basic remuneration is in the form of commissions, piece rates, mileage allowances, etc. Although information for other employees is not published it remains available.

For Elementary and secondary schools (6111), Community colleges and CEGEP(s) (6112), Universities (6113), Business schools and computer management training (6114) and Technical and trade schools (6115) industries, this category of employment represents **Supply or Substitute Teachers:** teachers who are called in to teach whenever their services are needed either to augment the existing staff or as a short-term replacement for a full-time or part-time teacher.

### Earnings

**Weekly payrolls:** Weekly payrolls are defined as the portion of gross taxable monthly payrolls that reflect work performed during the reference week. It represents the gross dollar value before deductions for income taxes, employment insurance contributions etc., including regular pay, overtime and a portion of bonuses, commissions and other type of special payments. The payroll concept excludes dollar amounts that are taxable allowances and benefits, certain types of non-wage compensation as well as employer contributions to employment insurance, Canada/Quebec pension plans, provincial medical plans, workers compensation and other welfare plans. Some annual special payments are excluded while other lump sum special payments are adjusted to coincide with the reference week period. The gross monthly payrolls are derived from administrative records. It is calculated for all types of employees.

**Weekly overtime pay:** is defined as all pay received for paid work in excess of the standard workday or workweek. It is calculated for all, hourly and salaried employees.

**Average weekly earnings (including overtime):** is obtained by dividing the gross taxable payrolls (including overtime) by the number of employees. It is calculated for all types of employees.

**Average weekly earnings (excluding overtime):** is obtained by dividing the gross taxable payrolls (excluding overtime) by the number of employees. It is calculated for all, hourly paid and for salaried employees.

**Average hourly earnings for hourly paid employees (including or excluding overtime):** is obtained by dividing the gross taxable payroll (including or excluding overtime) by the total number of weekly paid hours (including or excluding overtime).

**Average hourly earnings for salaried employee (including or excluding overtime):** is obtained by dividing the total gross taxable payrolls (including or excluding overtime) by the total hours (note that hours for salaried employees does not include overtime).

## Hours

**Total hours paid for hourly paid employees (including or excluding overtime):** are defined as all hours worked including or excluding overtime hours and hours of paid absence (e.g. holidays, sick leave, jury duty, etc.).

**Total hours for salaried employees:** are obtained by multiplying the average Standard workweek hours (note that this variable does not include overtime) by the number of salaried employees.

**Overtime hours for hourly paid employees:** are defined as hours for which overtime was paid. This represent actual hours worked.

**Average weekly hours for hourly paid employees (including or excluding overtime):** are obtained by dividing total number of weekly paid hours (including or excluding overtime) by the number of hourly paid employees.

**Average weekly hours (average standard workweek) for salaried employees:** are obtained by dividing the total weekly (derived) hours by the number of salaried employees.

## Response/Non-response

- a) **Response rate:** includes all units which during the collection phase responded by providing "usable information".
- b) **Refusal rate:** includes those units which were contacted but have refused to participate in the survey.
- c) **No contact rate:** includes those units which were contacted but were unable to provide the required information.
- d) **Residual non-response rate:** includes those units for which the data have not been received on time for the monthly closing date and other types of non-response

## 7. SEPH DATA BY SIZE OF ENTERPRISE

On a quarterly and annual basis, SEPH produces estimates for employment, average weekly earnings and hour data by employment size of enterprises for Canada, provinces and territories. Provincial and territorial employment is thus allocated to the size of employment of the enterprise in Canada. The employment size of an enterprise is calculated as an average of the monthly employment levels reported for the reference period. The data are produced at the sector level of the North American Industrial Classification 2002 and for the Industrial aggregate level.

**The employment sizes are:**

0 to 4 employees,  
5 to 19,  
20 to 49,  
50 to 99,  
100 to 299,  
300 to 499  
500 and plus  
All sizes

***SEPH also produces data by for the following sizes:***

0 to 49  
50 to 299  
300 and plus

The data produced by size of enterprises will generally be more volatile than the estimates produced for the SEPH monthly production. For example, the levels published for smaller size of employment cells may be affected by the movements of enterprises from one size to another from quarter to quarter. Other events such as strikes, temporary closures, changes in the enterprise structures on the Business Register will also cause volatility to the more detailed sizes series. In addition, data by size produced for quarters prior to year 2001 should be used with caution since they were estimated from the previous production based on the SIC-1980 and backcasted on the new NAICS classification. It should be noted that while the data by employment can be a useful research tool, should not be used in contract escalation because of the potential for higher level volatility associated with this product.

## 8. PRODUCTS AND SERVICES

- **Employment, Earnings and Hours; Catalogue 72-002XIB  
Monthly (Internet)**

This monthly publication is available via the Internet. It provides current estimates for employment, earnings, and hours at the national, provincial/territorial level, for detailed industry groupings, based upon the North American Industrial Classification System 2007. Further more this publication includes data by size of enterprise for selected industries and variables. This electronic publication has been produced with the Adobe Acrobat software, it allows user to browse the information on screen and print any or all pages.

- **Annual Estimates of Employment, Earnings and Hours 1991-2007; Catalogue 72F-0023XCB  
(Monthly and Annual 1991-2007) CD-Rom**

This CD-ROM using the Beyond 20/20 data viewer provides an annual and monthly historical perspective for employment, earnings, and hours data for the years 1991 to 2007. This reference tool will help you identify, retrieve and process essential information for detailed industry groupings at national, provincial and territorial levels, based upon the North American Industrial Classification System 2007. Further more this product includes data by size of enterprise for selected industries and variables. This publication is normally available in May.

- **CANSIM**

Over 80,000 data series are also available through CANSIM, Statistics Canada's electronic online database. The SEPH survey can be found on CANSIM in tables 281-0023 to 281-0046. Series are updated monthly and revised when appropriate. Data are release at the same time as the Statistics Canada's official release bulletin, The Daily, catalogue number 11-001-XIE. You can access CANSIM via Statistics Canada's website at [www.statcan@ca](http://www.statcan@ca) under Products and Services.

- **Custom Requests and our Client Services Centre**

Custom tabulations can be arranged on an ad hoc or regular basis. This service allows you to specify the tables and variables that best meet your own requirement. The cost for this service varies depending on the request. If you have any questions or simply need data, contact our Centre by: Telephone: (613) 951-4090 or Toll-free number: 1(866) 873-8788, Fax: (613) 951-4087; E-Mail: [labour@statcan.ca](mailto:labour@statcan.ca).

# 1. OBJECTIFS ET HISTORIQUE

## Objectifs

L'enquête sur l'emploi, la rémunération et les heures (EERH), a pour objet de mesurer les niveaux et les tendances mensuelles des salariés inscrits sur les listes de paye, des heures rémunérées et de la rémunération. Les estimations sont compilées pour des niveaux détaillés de la classification industrielle pour le Canada, les provinces et les territoires. La population cible comprend tous les employeurs du Canada, sauf ceux dont les activités relèvent des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques aux ménages privés, des organismes religieux et du personnel militaire des services de la défense.

## Historique de l'enquête

Lancée en 1918 par le ministère du Travail, l'enquête mensuelle canadienne sur l'emploi inscrit sur les listes de paye fut reprise en 1922 par le Bureau fédéral de la statistique. Menée encore aujourd'hui, elle vise toujours le même objectif fondamental. À l'origine, elle se limitait aux employeurs qui comptaient au moins quinze salariés et ne comprenait que certaines activités industrielles. Les données sur les gains furent ajoutées en 1941. En 1961, on éleva le seuil d'inclusion à vingt salariés et on lança une enquête-échantillon pour recueillir des données sur l'emploi auprès d'entreprises comptant moins de vingt salariés. Les services non commerciaux vinrent s'ajouter en 1968 pour donner une couverture complète des activités économiques, à l'exception de l'agriculture, de la pêche et du piégeage et des services militaires.

Au début des années 1970, les écarts entre un repère externe et les estimations fondées sur les établissements pour le Revenu du travail, ainsi que d'importantes révisions peu cohérentes apportées aux estimations mensuelles, devinrent un sujet d'inquiétude. On croyait que ces problèmes résultaient de l'absence de données sur les gains pour l'ensemble de l'univers. Ce facteur, ajouté à la volonté de réduire le fardeau de réponse à l'enquête et de résoudre des problèmes de conception et de définition, suscita une importante révision des enquêtes. On mit au point une nouvelle enquête intégrée (Enquête sur l'emploi, la rémunération et les heures) en ajoutant des données sur les gains et les heures aux petites entreprises et aux établissements non commerciaux.

Les résultats de l'EERH furent publiés pour la première fois, avec le mois de référence d'avril 1983 et, au cours des dix années qui suivirent, le programme ne cessa d'être perfectionné. À l'été de 1992, la Division du travail pouvait publier des données uniformes et détaillées par industrie, remontant jusqu'à 1983, de nouveaux produits avaient aussi été élaborés les indices à pondération fixe des gains, les indices de dispersion et les données désaisonnalisées. Les nouvelles données paraissaient dans une publication remaniée ayant avril 1992 comme mois de référence.

## Proposition visant à réduire le fardeau de réponse à grâce une collaboration entre Statistique Canada et l'Agence du Revenu du Canada

Vers la fin des années 1980, préoccupé par le fardeau de réponse, le Conseil canadien des petites entreprises écrivait à l'Agence du Revenu du Canada (ARC) et leur proposait d'ajouter, aux formulaires (PD7) de retenues sur la paye, des renseignements sur l'emploi et la rémunération mensuelle brute. En 1989, un groupe de travail formé de représentants de l'Agence du Revenu du Canada et de Statistique Canada jugeait qu'il était plausible d'ajouter deux questions au formulaire (PD7) de versement mensuel soit: le nombre de salariés et la rémunération totale (les employeurs qui versent moins de \$15,000 n'effectuent qu'un versement mensuel; les autres font habituellement deux versements ou plus par mois.) Au début de 1992, on a réexaminé la question des coûts et on a fait des essais auprès de groupes de discussion pour évaluer la réaction des répondants éventuels. Ces essais ont révélé que l'ajout des questions sur le formulaire PD7 sur l'emploi et sur la rémunération totale ne semblait pas accroître sensiblement le fardeau des répondants. Il a donc été décidé d'ajouter ces questions à compter de janvier 1993. Dans la mesure où l'on pouvait utiliser les données tirées des formulaires PD7 plutôt que des questionnaires de l'EERH, on bénéficiait d'une nette réduction du fardeau de réponse.

## Remaniement de l'EERH

Commençant au milieu des années 1990, l'EERH s'est engagé dans un important processus de remaniement à multiples phases. Les objectifs principaux de ce remaniement étaient d'améliorer la qualité des estimations et de réduire le fardeau de réponse imposé aux entreprises.

Durant les trois phases du remaniement, des données administratives ont été graduellement incluses dans l'échantillon de l'enquête en remplacement de données obtenues par questionnaire. L'échantillon administratif utilisé pour estimer l'emploi et la rémunération mensuelle était accompagné par un petit échantillon (Enquête sur la rémunération auprès des petites

entreprises) d'établissements afin de permettre l'estimation de la composante hebdomadaire de la rémunération, des catégories de salariés et des heures payées.

La phase I du remaniement de l'enquête a été introduite au mois de référence de mars 1994 lorsque des données administratives furent utilisées en remplacement des données obtenues des petites entreprises avec employés. Ceci a eu pour résultat de réduire la taille mensuelle de l'échantillon de l'EERH d'environ 30 000 répondants (elle était constituée auparavant d'environ 70,000 répondants). Au même moment, un échantillon de 2 500 établissements était tiré pour l'Enquête sur la rémunération auprès des petites entreprises (ERE).

En mai 1996, l'utilisation des données administratives fut élargie pour y inclure les moyennes et les grosses entreprises n'ayant des activités que dans une seule province et un seul groupe d'activités industrielles. La phase II a alors permis de réduire à nouveau la taille de l'échantillon de quelques 22 000 répondants sur une base mensuelle. La taille de l'échantillon de l'enquête sur la rémunération auprès des entreprises<sup>1</sup> (ERE) était alors augmentée à 6 000 établissements.

La dernière phase du remaniement (phase III) a été introduite en mai 1998. Le plus important changement effectué lors de cette phase consiste en l'extension de l'usage des dossiers administratifs pour y inclure les entreprises (complexes) ayant des activités économiques dans plus d'une province et plus d'un groupe majeur (CTI-3<sup>2</sup>). En conséquence de ce changement, la taille de l'échantillon global de l'enquête EERH a été réduite aux 10 000 établissements de l'enquête ERE.

Avec la fin du remaniement, la taille de l'échantillon de l'EERH est passée de 70 000 à 10 000 établissements. Ceci représente une diminution de 720 000 contacts sur une base annuelle.

Avec les données de janvier 2001, le programme EERH est passé de la Classification type des industries 1980 (CTI 80) au Système de classification des industries de l'Amérique du Nord 1997 (SCIAN 1997). L'augmentation du nombre de domaines d'estimation a rendu nécessaire un petit accroissement de la taille de l'échantillon de L'ERE qui compte maintenant 11 000 établissements.

Avec les données de janvier 2004, le programme EERH est passé du Système de classification des industries de l'Amérique du Nord 1997 (SCIAN 1997) au Système de classification des industries de l'Amérique du Nord 2002 (SCIAN 2002)

Avec les estimations de janvier 2008, les estimations courantes et historiques de l'Enquête sur l'emploi la rémunération et les heures de travail (EERH) sont fondées sur le Système de classification des industries de l'Amérique du Nord (SCIAN) 2007 au lieu de celui du SCIAN 2002.

## Perspectives d'avenir du EERH

Le programme sur l'Emploi, la rémunération et les heures de la Division de la Statistique du Travail a un avenir prometteur. Avec la collaboration de l'Agence du revenu du travail, fournisseurs des importantes données administratives, l'enquête sera en mesure de produire des données de meilleure qualité à moindre coût. Ces données demeureront essentielles à notre connaissance du marché du travail au Canada.

---

<sup>1</sup> En 1996, L'enquête sur la rémunération auprès des petites entreprises a été renommée Enquête sur la rémunération auprès des entreprises

<sup>2</sup> Les trois premiers chiffres de la classification industrielle type de 1980.

## 2. LA MÉTHODOLOGIE DE L'ENQUÊTE

### Population cible

La population cible comprend tous les employeurs au Canada, sauf ceux dont les activités relèvent des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques aux ménages privés, des organismes religieux et du personnel militaire des services de la défense. Les échantillons de l'EERH sont tirés à partir du Registre des entreprises (RE) dont la mise à jour est faite par la Division du registre des entreprises de Statistique Canada, ainsi que d'une liste de toutes les entreprises ayant au moins un compte actif de retenues sur la paye et qui sont enregistrées auprès du programme Numéro d'entreprise de l'Agence du revenu du Canada.

Le Registre des entreprises consiste en une liste de toutes les entreprises au Canada. La mise à jour est faite mensuellement à l'aide des résultats obtenus de différentes enquêtes, de profils d'entreprises et de données administratives. Le Numéro d'entreprise est un identificateur unique assigné par l'Agence du revenu du Canada aux entreprises participant à un ou plus des programmes suivants: le programme des retenues sur la paye, la taxe sur les biens et les services, la taxe auprès des importateurs et des exportateurs et l'impôt auprès des sociétés. Le programme de retenues sur la paye inclut tous les employeurs qui effectuent des remises d'impôt sur le revenu, des cotisations au RPC/RRQ ainsi que des cotisations d'assurance-emploi pour leurs employés.

### Période de référence

La période de référence de l'EERH correspond à la période de paye qui comprend les sept derniers jours du mois. Lorsque la période de paye sur laquelle porte la déclaration dépasse une semaine, on rajuste les données en divisant le nombre de jours de travail que représente la déclaration du répondant par le nombre de jours ouvrables compris dans la période de paye visée. Des rajustements sont faits aussi pour tenir compte des grèves, des lock-outs et des mises à pied qui surviennent durant la semaine de référence.

### Méthodologie

Les statistiques produites par l'EERH sont fondées sur un recensement des dossiers administratifs (provenant de l'Agence du revenu du Canada) pour tous les établissements dans le champ de l'enquête ayant des employés et qui sont sur le Registre des entreprises<sup>3</sup>. Le nombre total de salariés inscrits sur les listes de paye et la rémunération mensuelle sont calculés à partir des dossiers administratifs.

L'Enquête sur la rémunération auprès des entreprises (ERE) est effectuée chaque mois en vue de recueillir des données par ITAO (Interview téléphonique assistée par ordinateur) afin de permettre le calcul des variables de l'EERH non disponibles sur les dossiers administratifs. Les estimations obtenues à partir des dossiers administratifs sont combinées aux résultats de l'ERE en vue de produire des estimations pour la totalité des variables de l'EERH.

### Volet des dossiers administratifs

Aux termes d'une entente conclue avec l'Agence du revenu du Canada, Statistique Canada a accès aux renseignements portant sur la rémunération mensuelle brute totale et sur le nombre total de salariés pour la dernière période de paye du mois, lesquels sont tirés des formulaires de retenue sur la paye remplis par les employeurs (PD7).

L'utilisation des données administratives contribue à réduire les coûts de l'enquête et le fardeau de réponse. Elles améliorent les données produites par l'EERH, concernant les salariés inscrits sur les listes de paye ainsi que les estimations des salaires et traitements pour la Division des comptes des revenus et des dépenses de Statistique Canada. Ces améliorations sont possibles grâce à l'actualité des dossiers administratifs et à une meilleure couverture de la population enquêtée.

### Il existe trois genres de comptes de retenues sur la paye :

**Remises trimestrielles ou mensuelles** : ces deux types de comptes sont utilisés par les petites entreprises dont les remises n'excèdent pas 15 000 \$ par mois (12 000 \$ par année ou moins dans le cas des remises trimestrielles).

<sup>3</sup> Sauf pour les renseignements sur les services de l'administration publique générale aux niveaux provincial et fédéral qui sont fournis par la Division des institutions publiques

**Remises accélérées** : ce type de remise est généralement faite par de grandes entreprises effectuant des remises plus d'une fois par mois.

L'Agence du revenu du Canada transfère à Statistique Canada les renseignements sur le nombre de salariés et la rémunération mensuelle brute totale pour ces comptes PD7. L'échantillon étant un recensement, est par conséquent toujours constitué des mêmes unités, à l'exception des entreprises nouvellement créées et de celles qui cessent leurs activités au cours d'un mois.

### **L'Enquête sur la rémunération auprès des entreprises (ERE)**

L'ERE sert de base pour l'estimation des autres variables qui ne sont pas déclarées dans le formulaire PD7. Il s'agit notamment de la composante hebdomadaire de la rémunération mensuelle brute, des heures totales, de la répartition des heures, de la rémunération et de l'emploi entre les catégories de salariés (à l'heure, à salaire fixe et autres). La répartition de l'échantillon a pour but de maximiser l'exactitude de l'estimation de la rémunération hebdomadaire et du nombre total d'heures au niveau des sous-secteurs du SCIAN 2002 pour l'ensemble du Canada, les provinces et les territoires.

Dans le cadre de l'ERE, on tire un échantillon de 11 000 parmi les 915 000 établissements apparemment en activité et qui sont classés selon l'activité économique et la province. L'échantillon de l'ERE est stratifié selon la province, le sous-secteur et la taille. La répartition de l'échantillon est déterminée grâce à une stratégie qui repose sur la détermination initiale d'un coefficient de variation (c.v.) pour les estimations de la rémunération hebdomadaire et du nombre total d'heures pour l'ensemble du Canada. Les c.v. au niveau géographique et industriel sont par la suite calculés à partir du c.v. global.

Les estimations du nombre de salariés inscrits sur les listes de paye et de la rémunération mensuelle brute provenant des données administratives sont calculées sur la base d'un recensement des dossiers administratifs, tandis que les estimations pour les autres variables de l'EERH sont obtenues à l'aide d'une estimation par régression ou ratio.

Chaque mois, la base de sondage de l'ERE est mise à jour pour tenir compte des nouveaux établissements créés et de ceux qui ont cessé d'exister. Généralement, les unités échantillonnées ne font plus partie de l'échantillon après 12 mois et ne peuvent pas être choisies de nouveau avant 12 mois. Alors, environ 1/12 de l'échantillon de l'ERE est remplacé chaque mois.

## 3. LA COLLECTE ET LE TRAITEMENT DES DONNÉES

### COLLECTE DES DONNÉES

L'ERE utilise une combinaison de méthodes pour la collecte des données, afin d'offrir la plus grande souplesse possible aux répondants. Pour les unités utilisant la poste, des questionnaires sont envoyés chaque mois au service de la paye de l'entreprise. Les répondants qui le désirent peuvent être interviewés par téléphone. Les répondants ont aussi la possibilité de produire leurs déclarations électroniquement.

Les unités déclarantes, qui ne répondent pas au premier questionnaire envoyé par la poste, font l'objet d'un suivi par téléphone de la part du personnel des bureaux régionaux de Statistique Canada. Les établissements qui ne déclarent pas de données diminuent la précision des estimations.

Au Canada, la proportion des établissements qui refusent de fournir des données dans le cadre de l'enquête est inférieure à 1 %. Environ 10 % des entreprises renvoient leur questionnaire trop tard pour qu'il puisse être inclus dans le processus d'estimation.

Les renseignements administratifs sur la rémunération mensuelle brute et sur le nombre total de salariés pour la dernière période de paye du mois proviennent des comptes de retenues sur la paye (PD7) tenus par l'Agence du revenu du Canada.

Enfin, la Division des institutions publiques de Statistique Canada fournit des renseignements sur les services de l'administration publique générale au niveau provincial, territorial et fédéral.

### LE TRAITEMENT DES DONNÉES

#### Contrôle et correction des données

Une fois que l'on a saisi les données des questionnaires, l'exactitude et la cohérence des chiffres font l'objet d'une vérification intense. Cette vérification consiste notamment à comparer les valeurs des principales caractéristiques (nombre de salariés, heures travaillées, traitement par salarié, etc.) déclarées par la même unité durant plusieurs mois consécutifs, ce qui permet de déceler les grandes variations ou les erreurs. Chaque fois qu'une forte variation est constatée ou que les données semblent incohérentes, l'enregistrement est soit ; corrigé manuellement par les vérificateurs, les données imputées ou encore que le répondant est appelé à les confirmer.

#### Méthodes d'imputation

##### Volet des dossiers administratifs

Il existe trois principales méthodes d'imputation :

- Imputation d'une valeur nulle lorsque l'entreprise indique dans son formulaire PD7 à l'intention de l'Agence du revenu du Canada qu'elle n'aura aucun salarié pendant le mois.
- imputation des renseignements du mois précédent en tenant compte d'un taux de variation mensuelle lorsqu'il est permis de croire que les unités sont en activité pendant le mois.
- imputation basée sur les moyennes de la strate du mois courant dans certains cas où une seule valeur a été déclarée.

On reçoit des données administratives pour environ 80 % des formulaires PD7. Les autres 20% proviennent d'entreprises qui sont fermées temporairement ou de façon saisonnière ou qu'ils n'ont pas complété les 2 questions (emploi et rémunération) sur le formulaire PD7. Ce dernier cas de non-réponse est alors imputé.

## 4. LA QUALITÉ DES DONNÉES

### Fiabilité

Les estimations obtenues à partir des enquêtes par sondage peuvent comporter à la fois des **erreurs d'échantillonnage** et des **erreurs non dues à l'échantillonnage**.

**Les erreurs d'échantillonnage** viennent du fait que les observations sont obtenues à partir d'un échantillon et non de l'univers complet. Les estimations basées sur un échantillon peuvent différer des statistiques que l'on obtiendrait d'un recensement complet effectué au moyen des mêmes questionnaires, des mêmes directives, des mêmes intervieweurs et des mêmes techniques de traitement. Cette différence s'appelle l'erreur d'échantillonnage de l'estimation.

**L'erreur d'échantillonnage véritable** reste inconnue; on peut cependant l'estimer à partir de l'échantillon en utilisant une mesure appelée erreur-type. Lorsque l'erreur-type est exprimée en pourcentage de l'estimation, on l'appelle erreur-type relative ou coefficient de variation. Des tableaux d'indicateurs de coefficients de variation sont disponibles sur demande, ainsi qu'une note explicative sur la façon de les utiliser pour déterminer la qualité des estimations figurant dans la publication de l'EERH.

**Les erreurs non dues à l'échantillonnage** sont celles qui peuvent se produire tout au long d'une enquête pour plusieurs raisons: non-réponse, anomalies de couverture et de classification, différences d'interprétation des questions, renseignements inexacts donnés par les répondants, erreurs commises lors de l'entrée, le codage et le traitement des données. Dans le but de réduire le nombre d'erreurs de ce genre, on emploie divers moyens dont la conception soignée des questionnaires, la vérification des données, le suivi, l'imputation de données pour les unités non-répondantes et un contrôle rigoureux des opérations de traitement.

L'EERH comprend un programme de contrôle de la qualité des données qui est appliqué lors de la saisie des données, de la mise à jour des structures et de la vérification des données afin de réduire au minimum les erreurs non dues à l'échantillonnage. Ces programmes servent à vérifier et à contrôler l'intégrité, la précision et la cohérence des données déclarées. Des mesures sont prévues pour le suivi des cas de non-réponse et pour l'imputation de données dans le cas de déclarations tardives.

Une sous-section de l'assurance de la qualité au bureau central est chargée d'étudier et de réduire le nombre d'erreurs non dues à l'échantillonnage pour l'EERH et de veiller à ce que les concepts et les définitions soient observés.

### Erreurs de couverture

L'utilisation de bases de sondage donne lieu à deux types d'erreurs de couverture : les doubles comptes et le sous-dénombrement. Les doubles comptes se produisent lorsqu'il est impossible de relier les enregistrements des retenues sur la paye avec les entreprises correspondantes de la base de sondage créant de ce fait une deuxième entreprise statistique. Le sous-dénombrement se manifeste lorsque les entreprises nouvelles ne sont pas classées dans le registre des entreprises.

La portion administrative de l'enquête est continuellement mise à jour, contenant les plus récentes entreprises.

La publication de l'EERH comprend une estimation distincte de l'emploi total par province pour les «entreprises non classifiées». Il est impossible d'obtenir une telle estimation pour les autres variables de l'EERH parce que les «entreprises non classifiées» ne sont pas représentées dans l'ERE. Ces dernières ne sont pas réparties par industrie; elles sont toutefois comprises dans l'estimation de l'emploi global, de manière à ce qu'il reflète plus fidèlement la réalité économique.

### Désaisonnalisation

Il est de pratique courante de publier la plupart des indicateurs économiques sous forme désaisonnalisée et non désaisonnalisée. Les fluctuations dans les séries chronologiques d'ordre économique sont causées par des mouvements saisonniers, cycliques et irréguliers. Dans une série désaisonnalisée, les mouvements saisonniers ont été supprimés. Les mouvements saisonniers sont ceux qui sont causés par des événements qui se produisent chaque année, par exemple les changements climatiques habituels, le ralentissement ou l'accroissement de la production, et l'ouverture et la fermeture des établissements d'enseignement. Comme ces événements saisonniers se produisent à des intervalles annuels assez réguliers, leur incidence sur les tendances statistiques peut être supprimée en rectifiant les statistiques d'un mois à l'autre.

La désaisonnalisation n'est pas parfaite; si une série chronologique présente des variations irrégulières plus importantes que les variations saisonnières, cette série désaisonnalisée constitue une estimation peu fiable. D'après la Division des séries chronologiques de Statistique Canada, il est alors préférable d'utiliser une série non désaisonnalisée.

### **Indice des gains à pondération fixe**

La série à pondération fixe des gains horaires et hebdomadaires moyens a été conçue pour traiter l'impact sur les heures rémunérées et l'emploi des mouvements entre les industries, entre les provinces/territoires et entre les employés à salaire fixe et les salariés rémunérés à l'heure. Cet indice est un meilleur indicateur des tendances sous-jacentes des taux de salaire que la série des gains à pondération variable.

Il s'agit d'une série de données qui corrige les changements dans la composition de l'emploi en agrégeant différemment les données de l'EERH au moyen d'une pondération fixe d'une année de référence plutôt que variable pour les heures rémunérées et l'emploi. Les heures supplémentaires sont exclues parce que cet élément influe de façon considérable sur la composition de l'emploi pour certaines activités économiques. L'année de référence pour cet indice est 2002 (2002=100). Par conséquent, dans le but d'assurer la cohérence, c'est aussi celle qui a été retenue pour l'indice des gains à pondération fixe.

### **Indice de diffusion**

L'indice de diffusion permet d'évaluer l'étendue d'un changement qu'ont subi les variables de l'EERH, telles que l'emploi et les heures hebdomadaires moyennes pour l'ensemble des industries. L'indice de diffusion mesure l'ampleur des changements qu'ont subi les variables de l'EERH en indiquant la fraction des industries qui ont augmenté dans une variable donnée d'une année à l'autre. Les indices de diffusion rendus disponibles par l'EERH, sont calculés au niveau du Canada pour certains groupes d'industries, soit pour l'emploi, la rémunération brute, les heures hebdomadaires moyennes, les gains horaires moyens et les gains hebdomadaires moyens. Ces indices sont ajustés pour tenir compte de l'impact de l'inflation et sont alors particulièrement utiles pour analyser les tendances observées dans les secteurs des industries plus sensibles aux mouvements cycliques, tels que l'industrie manufacturière et le commerce.

### **Politique de révision**

Vers la fin de chaque mois, le programme EERH publie des estimations pour deux mois consécutifs. Le mois courant étant préliminaire et le mois précédent est révisé. Les estimations préliminaires sont disponibles deux mois plus tard donc un retard de deux mois au mois calendrier. Les estimations révisées sont disponibles trois mois plus tard soit un retard de 3 mois au mois calendrier. Par exemple les estimations de juillet 2002 révisés et celles du mois août 2002 préliminaires sont disponibles au mois calendrier d'octobre 2002. Les révisions sont nécessaires afin de tenir compte de la réception tardive de questionnaires ou encore de l'information additionnelle permettant de corriger des erreurs de déclaration ou de traitement.

Des révisions historiques périodiques sont généralement tenue une fois par année et sont disponible à la fin mars. Ces révisions sont rendues nécessaire suite à une analyse plus approfondie des estimations et fond parti du processus de validation des données.

Les révisions peuvent aussi comprendre des ajustements statistiques afin de maintenir des séries chronologiques comparables avec les estimations courantes. Il est possible que le programme apporte des changements important qui affectent à l'enquête. Par exemple, en janvier 2001 le programme passait à une nouvelle source de donnée dite administrative (ARC relevé de compte de retenues à la source) et convertissait au système SCIAN. Suite à ces modifications le niveau des estimations de l'emploi et de la rémunération partants de janvier 1991 a été re-calibré pour maintenir une comparabilité avec les estimations sous la nouvelle méthodologie et source de données.

Les révisions historiques et les corrections constituent un processus normal et continu dans le contexte d'un programme complexe. Les utilisateurs des estimations du programme EERH devraient toujours prendre ces facteurs en considération.

### **Confidentialité**

Les données de l'EERH sont revues annuellement afin de s'assurer qu'elles respectent en tout temps le caractère confidentiel des réponses fournies par les entreprises. Toute estimation agrégée de l'emploi susceptible de révéler une information propre à un répondant particulier est déclarée confidentielle et n'est donc pas publiée.

## 5. COMPARABILITÉ DES DONNÉES

### Comparabilité avec d'autres sources de données

#### Emploi

Les estimations sur les salariés inscrits sur les listes de paye produites par l'EERH sont souvent comparées à celles de l'emploi fournies par l'Enquête sur la population active (EPA). Lorsque l'on compare les données de l'EPA qui sont fondées sur les ménages et les estimations de l'emploi de l'EERH qui proviennent des entreprises, certaines différences peuvent être quantifiées et d'autres, non. Les rajustements quantifiables, dont peuvent faire l'objet les estimations de l'EPA, comprennent l'ajout des personnes cumulant plusieurs emplois et la suppression des travailleurs familiaux non rémunérés, des travailleurs autonomes, des absents non rémunérés (les travailleurs en grève, par exemple), des entreprises constituées en société, des associés actifs dans des entreprises sans salariés et des industries non visées par l'EERH. Les rajustements qui ne sont pas facilement quantifiables comprennent les erreurs dans l'attribution du code SCIAN, les différences au niveau des périodes de référence, les méthodes d'enquête et les données économiques non déclarées. De plus, les données sur les Territoires sont recueillies par l'EERH, mais non par l'EPA. Les données de l'EPA, qui sont axées sur les caractéristiques démographiques de la population active, sont des mesures raisonnables des tendances au niveau des grands groupes industriels et de professions. Les estimations de l'EERH constituent de meilleurs indicateurs des changements en matière d'emploi pour les groupes détaillés d'industries (SCIAN).

Selon le Système de classification des industries de l'Amérique du Nord 2007, l'administration publique (SCIAN 2007- 91) comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental et les organismes auxiliaires assurant les services internes de l'État. Les services de la défense (SCIAN 2007- 9111) sont exclus de l'EERH, sauf les employés civils travaillant pour ce ministère. L'EERH publie des données pour l'administration publique qui correspondent à cette définition. Les établissements à caractère gouvernemental oeuvrant dans le domaine de la santé, l'éducation et le service des transports et de la communication sont classifiés par rapport à leur industrie respective. La Division des institutions publiques (DIP) publie des données sur l'emploi total pour les entités non commerciales gérées par le gouvernement.

Les ajustements quantifiables des données de la DIP comprennent l'inclusion des intervieweurs de Statistique Canada et l'exclusion du personnel militaire, des fonctionnaires travaillant à l'extérieur du Canada, des employés en congé non payé et des fonctionnaires dont l'industrie est autre que l'administration publique. Les ajustements qui ne sont pas facilement quantifiables comprennent les différences dans la période de référence, les méthodes d'enquête et le traitement des périodes de paye supplémentaires. La Division de la statistique du travail et la Division des institutions publiques font une réconciliation afin de s'assurer que les données soient compatibles.

#### Rémunération

Les utilisateurs s'intéressent à deux indicateurs de rémunération qui sont souvent comparés aux rémunérations hebdomadaires et horaires produites par l'EERH. Ces deux indicateurs sont le taux salarial de base qu'établit le ministère du Développement des Ressources Humaines Canada (DRHC) à partir des règlements salariaux et les estimations des salaires et traitements et du revenu supplémentaire du travail produits par la Division des comptes des revenus et des dépenses de Statistique Canada.

Les données sur le taux salarial de base de DRHC ne portent que sur les travailleurs syndiqués visés par les conventions collectives importantes représentant 500 employés ou plus. Par exemple, le taux salarial de base de DRHC, qui sert d'indicateur de l'évolution des salaires, concerne environ 10% de l'ensemble des données d'emploi de l'EERH. Par conséquent, il convient de considérer avec soin dans quelle mesure le taux salarial de base de la DRHC s'avère valable et pertinent comme indicateur de la variation des salaires.

Les données de l'EERH sur les gains hebdomadaires/horaires moyens sont des indicateurs imparfaits de l'évolution des taux de salaire du fait qu'elles sont touchées par des changements compositionnels entre les industries et provinces, et par des changements dans les taux de rémunération sous-jacents.

Les estimations des salaires et traitements produites par la Division des comptes des revenus et des dépenses sont fondées en grande partie sur les données des fichiers administratifs provenant des feuillets annuels T4 Supplémentaire fournies par l'Agence du revenu du Canada; elles font l'objet de projections mensuelles/trimestrielles à l'aide des données de l'EERH et de l'EPA. L'EERH ne mesure pas le revenu supplémentaire du travail (RST), qui représente environ 11% du revenu total du travail total. Le RST comprend les cotisations patronales aux régimes de retraite, aux régimes d'assurance-maladie et à d'autres régimes de prévoyance, au Régime de pensions du Canada, au Régime des rentes du Québec et à la caisse d'indemnisation

des accidents du travail. Les estimations du revenu du travail, qui brossent un tableau plus complet de la rémunération du travail, ne fournissent pas de renseignements sur les taux de salaire.

### **Comparabilité dans le temps**

Les données de l'EERH ont été corrigées **à partir de janvier 1991** pour produire des séries chronologiques cohérentes.

## 6. TERMES ET DÉFINITIONS

### Termes et définitions

**Entreprise:** Toute entreprise commerciale ou institution, constituée ou non en société; il peut s'agir d'une entreprise à propriétaire unique, d'une association, d'une société ou d'une autre forme d'organisation. Une entreprise est qualifiée de simple si tous ses établissements se trouvent dans la même province/classification industrielle; autrement, une entreprise est considérée comme complexe.

**Établissement:** À des fins statistiques, l'établissement est la plus petite unité pouvant fournir des données sur la production économique, telle: une usine, une mine, un magasin ou une unité.

**Couverture par activité économique:** L'EERH comprend tous les différentes industries au Canada, sauf ceux dont les activités relèvent des secteurs de l'agriculture, de la pêche et du piégeage, des services domestiques aux ménages privés, des organismes religieux et du personnel militaire des services de la défense.

**Classement par activité économique:** L'EERH utilise le Système de classification des industries de l'Amérique du Nord 2007 (SCIAN 2007) qui est fondé sur des principes de l'offre ou de la production. Un code d'activité économique tiré du SCIAN 2007 est attribué à chaque établissement. Les industries et les différents groupes industriels sont décrits dans le manuel «Système de classification des industries de l'Amérique du Nord» au catalogue 12-501XPF. À des fins analytiques, nous avons créé des groupes spéciaux qui ne figurent pas dans le SCIAN 2007.

### Groupes d'activités économiques spéciaux:

- a) **Ensemble des industries y compris les entreprises non classifiées** (00-91N) représente la somme de toutes les industries visées par l'enquête. Depuis mars 1994, l'emploi pour l'ensemble des industries comprend les entreprises non classifiées (0000). Tous autres variables soit la rémunération et les heures excluent les entreprises non classifiées (0000).
- b) **Les entreprises non classifiées** (0000) représentent des entreprises n'ayant pas été identifiées au SCIAN 2007. Cette industrie est disponible depuis mars 1994. Les estimations pour cette industrie sont disponibles pour l'emploi pour l'ensemble des salariés, toutes les autres variables ne sont pas calculées pour cette industrie.
- c) **Branche productrice de biens** (11-33N) comprend les industries des forêts, des mines, des services publics, et de la construction ainsi que la fabrication.
- d) **Branche productrice de services** (41-91N) englobe le commerce, le transport et l'entreposage, les industries de l'information et de la culture, les finances et les assurances, les services immobiliers et services de location et de location à bail, les services professionnels scientifiques et techniques, les services administratifs, services de soutien, services de gestion des gestions des déchets et services d'assainissement, les services d'enseignement, les soins de santé et l'assistance sociale, les arts, les spectacles et les loisirs, l'hébergement et les services de restauration, les administrations publiques (excepté le personnel militaire et les autres services gouvernementaux) et les autres services (sauf les organismes religieux et les ménages privés).
- e) **Biens durables des industries de la fabrication** (321N) comprend la fabrication de produits en bois (321) la fabrication de produits minéraux non-métalliques (327), la première transformation des métaux (331), la fabrication de produits métalliques (332), la fabrication de machines (333), la fabrication de produits informatiques et électroniques (334), la fabrication de matériel, d'appareils et de composants électroniques (335), la fabrication de matériel de transport (336) et la fabrication de meubles et de produits connexes (337) et les activités diverses de fabrication (339).
- f) **Biens non durables des industries de la fabrication** (311N) englobe les industries la fabrication d'aliments (311), la fabrication de boissons et de produits du tabac (312), les usines de textiles (313), les usines de produits textiles (314), la fabrication de vêtements (315), la fabrication de produits en cuir et de produits analogues (316), la fabrication de papier (322), l'impression et activités connexes (323), la fabrication de produits du pétrole et du charbon (324), la fabrication de produits chimiques (325), et la fabrication de produits en caoutchouc et en plastique (326).
- g) **Le groupe spécial sur l'enseignement** (611N) comprend les écoles primaires et secondaires (6111), les collèges communautaires et les CÉGEP(s) (6112), les universités (6113), les écoles de commerce et de formation en informatique et en gestion (6114) et les écoles techniques et écoles de métiers (6115).

- h) **Administration publique** (91) comprend seulement les établissements dont les activités ont un caractère essentiellement gouvernemental et les organismes auxiliaires assurant les services internes de l'État. Les établissements publics dont l'activité dominante relève d'autres activités économiques sont classés sous les mêmes rubriques que les établissements privés semblables. Alors, les données publiées pour cette division économique ne représentent pas le nombre réel de personnes employées par les différents pouvoirs publics.

**Classement géographique** : on attribue les unités déclarantes à une province ou à un territoire. Les statistiques publiées par l'EERH sont fondées sur la Classification géographique type de 1996.

**Congés payés** : les congés payés comprennent les jours fériés payés, les vacances payées, les congés de maladie incluant les congés d'accident du travail, et les congés pour motifs personnels tels que les congés de deuil et les congés pour service judiciaire, etc.

## Salarié

Toute personne rétribuée pour ses services ou ses absences et pour laquelle l'employeur doit remplir une déclaration T-4 Supplémentaire de l'Agence du revenu du Canada, est considéré comme étant un salarié. Le concept de «salarié» utilisé dans l'enquête désigne des personnes travaillant à plein temps, à temps partiel (ceux qui travaillent régulièrement un nombre d'heures inférieur à la semaine normale de travail de l'entreprise) et les salariés occasionnels ou temporaires. Il désigne aussi les propriétaires, administrateurs, associés et autres dirigeants actifs des entreprises constituées en société.

**Le concept de salarié utilisé dans l'enquête exclut** les propriétaires et les associés des entreprises non constituées en société et des bureaux voués à l'exercice d'une profession libérale, les travailleurs autonomes, les travailleurs familiaux non rémunérés, les personnes travaillant à l'extérieur du Canada, le personnel militaire et les employés occasionnels pour lesquels l'employeur n'est pas tenu de remplir une formule T4. Sont également exclus les travailleurs n'ayant pas reçu de paye de leur employeur pendant la période de référence de l'enquête (c.-à-d. les personnes en grève, en congé non payé, les personnes recevant une rémunération aux termes d'un régime d'assurance, d'une caisse d'indemnisation des accidents au travail ou d'un régime analogue, etc.). Cependant, les travailleurs rémunérés par leur employeur pour une partie de la période de référence, mais en chômage ou en grève pendant l'autre partie sont quand même considérés comme des salariés.

**Les salariés sont classés selon les catégories suivantes :**

- a) **Ensemble des salariés**: comprend les salariés rémunérés à l'heure, les employés (à salaire fixe) ainsi que les autres salariés.

- b) **Salariés rémunérés à l'heure** : toute personne dont la rémunération de base est calculée selon un taux horaire.

Pour les écoles primaires et secondaires (6111), les collèges communautaires et les CÉGEP(s) (6112), les universités(6113), les écoles de commerce et de formation en informatique et en gestion (6114) et les écoles techniques et écoles de métiers (6115), cette catégorie d'emploi représente le **personnel non enseignant**: toute personne autre que le personnel enseignant, c'est-à-dire le président, le vice-président, le bibliothécaire, le registraire, le boursier, le comptable, les orienteurs, les techniciens de laboratoire, les agents du personnel et les autres services (conciergerie, chauffeur autobus etc.).

- c) **Employés (à salaire fixe)** : toute personne dont la rémunération de base constitue une somme fixe versée pour au moins une semaine.

Pour les écoles primaires et secondaires (6111), les collèges communautaires et les CÉGEP(s) (6112), les universités (6113), les écoles de commerce et de formation en informatique et en gestion (6114) et les écoles techniques et écoles de métiers (6115), cette catégorie représente le **personnel enseignant**: tout travailleur classé comme enseignant ou chargé de cours dans les dossiers du service de la paye (directeur, professeurs, doyens, chefs de département, maîtres, enseignants, etc.), qu'il enseigne le jour ou le soir. Les suppléants ou remplaçants sont exclus.

- d) **Autres salariés** : toute personne dont la rémunération de base se présente sous forme de commissions, de salaire à la pièce, d'indemnités de millage, etc.

Pour les écoles primaires et secondaires (6111), les collèges communautaires et les CÉGEP(s) (6112), les universités (6113), les écoles de commerce et de formation en informatique et en gestion (6114) et les écoles techniques et écoles de métiers (6115), cette catégorie d'emploi représente le **personnel suppléant ou remplaçant**: enseignants appelés à

se présenter au travail lorsqu'on a besoin de leurs services soit pour accroître le personnel existant, soit pour remplacer pendant une courte période un enseignant à temps plein ou à temps partiel.

## Rémunération

**Rémunération** : il s'agit de la rémunération brute imposable avant les retenues à la source. La rémunération mensuelle brute est définie comme étant la partie de la rémunération hebdomadaire brute qui reflète le travail accompli durant la semaine de référence. Ça représente la valeur brute en dollars avant les déductions pour l'impôt sur le revenu, les contributions à l'assurance-emploi etc., incluant le salaire régulier, le surtemps et la partie bonis, commissions et tout autres types de paiements spéciaux. Le concept sur la rémunération, ne comprend pas les montants en dollars qui représentent des allocations et des avantages imposables, certains types d'indemnités non salariales ainsi que les cotisations patronales à l'assurance-emploi, au régime de pension du Canada ou au Régime des rentes du Québec, aux régimes d'assurance-maladie provinciaux, aux caisses d'indemnisation des accidents du travail et à d'autres régimes de prévoyance. Les paiements annuels spéciaux sont exclus tandis que les paiements forfaitaires spéciaux sont rajustés de façon à coïncider avec la semaine de référence. La rémunération mensuelle brute provient des dossiers administratifs.

**Rémunération du temps supplémentaire** : il s'agit de la rémunération versée pour le travail effectué en sus de la journée ou de la semaine normale de travail. Ces données sont calculées à l'égard de l'ensemble des salariés, des salariés rémunérés à l'heure et des employés (à salaire fixe).

**Rémunération hebdomadaire moyenne (incluant le temps supplémentaire)** : il s'agit de la rémunération brute imposable (incluant le temps supplémentaire) divisée par le nombre de salariés. Ces données sont calculées pour tous les types de salariés.

**Rémunération hebdomadaire moyenne (excluant le temps supplémentaire)** : il s'agit de la rémunération brute imposable (excluant le temps supplémentaire) divisée par le nombre de salariés. Ces données sont calculées à l'égard de l'ensemble des salariés, des salariés rémunérés à l'heure et des employés (à salaire fixe).

**Rémunération horaire moyenne des salariés rémunérés à l'heure (incluant ou excluant le temps supplémentaire)**: il s'agit de la rémunération brute imposable (incluant ou excluant le temps supplémentaire) divisée par le nombre total d'heures hebdomadaires rémunérées (incluant ou excluant le temps supplémentaire).

**Rémunération horaire moyenne des employés (à salaire fixe) (incluant ou excluant le temps supplémentaire)**: il s'agit de la rémunération brute imposable (incluant ou excluant le temps supplémentaire) divisée par le nombre d'heures hebdomadaires (les heures des employés excluent le temps supplémentaire).

## Heures:

**Heures totales des salariés rémunérés à l'heure (incluant ou excluant le temps supplémentaire)**: Il s'agit des heures travaillées (incluant ou excluant le temps supplémentaire) qui comprennent les congés payés (par ex., les jours fériés, les congés de maladie, les congés pour fonctions judiciaires, ext.) ainsi que les heures supplémentaires.

**Heures totales des employés (à salaire fixe)**: Il s'agit du nombre moyen d'heures de travail d'une semaine normale de travail (les heures des employés excluent le temps supplémentaire) multiplié par le nombre d'employés (à salaire fixe).

**Heures supplémentaires des salariés rémunérés à l'heure**: Il s'agit du nombre total des heures supplémentaires payées. Il s'agit des heures réellement travaillées.

**Heures hebdomadaires moyennes des salariés rémunérés à l'heure (incluant et excluant le temps supplémentaire)**: Il s'agit du nombre d'heures totales travaillées (incluant ou excluant le temps supplémentaire) par le nombre de salariés rémunérés à l'heure.

**Heures hebdomadaires moyennes (semaine normale de travail) employées à salaire fixe** : Il s'agit du nombre d'heures totales divisées par le nombre des employés (à salaire fixe).

**Réponse et non-réponse**

- a) **Taux de réponse** : comprend toutes les unités répondantes, qui durant la cueillette ont fourni des renseignements utilisables.
- b) **Taux de refus** : comprend toutes les unités contactées ayant refusé de participer à l'enquête.
- c) **Taux d'unités non contactées** : comprend les unités qui ont été contactées et qui étaient dans l'impossibilité de fournir les renseignements requis.
- d) **Taux d'unités non répondantes résiduelles** : comprend les unités pour lesquelles les estimations ont été reçues en retard pour le mois de **référence et tout autre type de non-réponse**.

## 7. ESTIMATIONS PAR TAILLE D'ENTREPRISES DE L'EERH

Sur une base trimestrielle et annuelle, l'EERH produit des estimations par taille d'entreprise selon l'emploi pour l'ensemble des salariés, la rémunération hebdomadaire moyenne et les heures rémunérées pour le Canada les provinces et les territoires. Par conséquent, la taille des entreprises pour les provinces et territoires est déterminée selon la taille de l'entreprise (emploi) du Canada. La taille de l'entreprise est calculée à partir de la moyenne des niveaux d'emploi mensuels de la période de référence. Les données sont produites pour les secteurs industriels du Système de la classification industrielle de l'Amérique du Nord 2007 ainsi que pour l'ensemble des industries.

### Les tailles de salariés sont:

0 à 4 salariés,  
5 à 19,  
20 à 49,  
50 à 99,  
100 à 299,  
300 à 499,  
500 et plus,  
Toutes les tailles.

### L'EERH produit aussi des données pour les tailles suivantes:

0 à 49 salariés,  
50 à 299  
300 et plus

Les données désagrégées par taille d'entreprises sont généralement plus volatiles que les estimations de l'EERH produite mensuellement. Par exemple, les estimations publiées par taille d'entreprises peuvent être affectées par les mouvements d'entreprises passant d'une taille à une autre, d'un trimestre à l'autre. D'autres événements comme des grèves, des fermetures provisoires, des changements dans la structure des entreprises sur le Registre des entreprises causeront aussi de la volatilité dans les séries par taille d'entreprise. De plus, les données trimestrielles par taille produites pour l'année 2000 doivent être utilisées avec prudence puisqu'elles ont été dérivées à partir des données basées sur le CTI-1980 et révisées pour refléter la nouvelle classification SCIAN 2007. Il faut noter que même si les données par taille d'entreprises sont un excellent outil de recherche, l'usage de ces données détaillées dans des clauses d'indexation de contrat est déconseillé à cause de la volatilité potentiellement plus importante associée à ces estimations.

## 8. PRODUITS ET SERVICES

- **Emploi, gains et heures; 72-002XIB Mensuelle (Internet)**

La publication mensuelle est disponible à partir d'**Internet** et contient des renseignements à jour sur l'emploi, les gains et les heures sur le plan national, provincial et territorial pour des niveaux industriels détaillés selon le Système de classification des industries de l'Amérique du Nord 2007. De plus, cette publication contient des estimations par taille d'entreprise pour une sélection d'industries et de variables. Elle a été conçue à partir du logiciel Adobe Acrobat (PDF) qui vous permet de facilement visualiser à l'écran ou d'imprimer les données selon vos besoins.

- **Les estimations annuelles de l'emploi, des gains et des heures; Catalogue 72F0023XCB Mensuel et annuel 1991-2007 (CD-ROM)**

Ce **CD-ROM** fait usage du logiciel Beyond 20/20. Il présente une perspective historique des données annuelles et mensuelles pour l'emploi, les gains et les heures pour les années 1991-2007. Cet outil de référence vous assistera dans l'étude et l'analyse des groupes industriels à des niveaux détaillés selon le Système de classification des industries de l'Amérique du Nord 2007. De plus le CD-Rom comprend des estimations par taille d'entreprise pour une sélection d'industries et de variables et est disponible en mai de chaque année.

- **CANSIM**

Près de 80 000 séries de données sont aussi disponibles sur CANSIM, la base de données électronique de Statistique Canada dans les tableaux 281-0023 à 281-0046. Les séries sont mises à jour mensuellement et au besoin. Elles sont disponibles lors de la parution du Quotidien qui est le bulletin de diffusion officielle des données de Statistique Canada numéro 11-001-XIF au catalogue. Vous pouvez avoir accès à CANSIM via le site WEB de Statistique Canada: [www.statcan.ca](http://www.statcan.ca) sous la rubrique Produits et services.

- **Demandes spéciales et nos services aux clients**

Des tableaux spéciaux peuvent être préparés sur demandes de façon ponctuelle ou régulière. Ce service vous permet de spécifier exactement le genre de tableaux et les variables dont vous avez besoin. Le coût pour ce service dépend du type et de la complexité de la demande. Si vous avez des questions ou désirez simplement une estimation précise veuillez nous contacter au téléphone: 613-951-4090 ou au numéro sans frais 1(866) 876-8788; par télécopieur: 613-951-4087; ou par courriel: [travail@statcan.ca](mailto:travail@statcan.ca).
