Methodology and Data Quality

Introduction

The Culture Statistics Program has been analysing and presenting data on federal expenditures on culture since fiscal year 1976/1977. Prior to 1984/1985, the data were extracted from the Public Accounts of Canada and thus were not broken down by province. Since the fiscal year 1984/1985, data have been collected by directly surveying the federal departments and agencies and are now broken down by province or territory.

Data on provincial and territorial government expenditures on culture have been gathered since the fiscal year 1981/1982 and data on municipal government culture expenditures since 1984.

Population

The target population for the federal and provincial-territorial surveys consists of all departments, ministries, agencies, commissions, boards, special funds and government business enterprises responsible for the support of arts and culture in Canada. The municipal survey covers all municipalities.

Survey frame

The federal and provincial-territorial data are collected from all known cultural departments, ministries, agencies, commissions, boards, special funds and government business enterprises. The list of these government entities is based on information obtained from the Public Accounts of Canada, provincial public accounts, and other sources such as the "Directory of the Arts". The frame is updated each year.

The municipalities included in the municipal survey are drawn from the census listing of all local governments in Canada. This listing is maintained and updated using information from various sources, including provincial departments of municipal affairs.

Data collection

The federal and provincial-territorial data are collected via mail-back forms sent out in early fall of each year. Federal data are collected by directly surveying the federal departments and agencies, whereas provincial-territorial data are collected through the assistance of a coordinator in each province or territory. Follow-ups are carried out by telephone to those departments and agencies which do not provide the data within sixty days following the receipt of the questionnaire.

The Culture Statistics Program collects municipal data in co-operation with the Public Institutions Division of Statistics Canada, which conducts a sample survey of municipalities.

Data processing

Completed federal and provincial-territorial forms are edited for accuracy and consistency according to pre-established specifications. The Public Accounts of Canada and the provincial-territorial public accounts are also used to check the accuracy of survey results.

Data quality

Federal and provincial-territorial data are collected from all known culture departments and agencies rather than from a sample. Some of the provinces and territories did not provide data on their spending on school, university and college libraries. Statistics Canada estimated these data.

The survey results do not include data from the Government of Nunavut, which failed to respond to the survey. The missing information is estimated at 0.2% of the total provincial and territorial cultural budget and will have a minor impact on data comparability at the national level.

Any inaccuracy in the results is due to non-sampling error. This may occur at any phase of survey preparation and includes coverage errors, non-reporting and partial non-response, response errors and processing errors. The careful design of the questionnaire, the existence of quality control procedures and the monitoring of survey operations help to limit the magnitude of these errors.

The methodology used for the municipal survey involves a sample of about 10% of all municipalities. Since the survey includes all major cities, which account for a significant proportion of the transactions of all municipalities, sampling error is expected to be low.

Operating expenditures include the direct operating program costs of culture departments and ministries, excluding their related corporate costs.

Provincial distribution of federal government data

Operating expenditures of federal departments and agencies are broken down by province or territory according to the location of the department or agency incurring these expenditures.

Federal expenditures related to the purchase of land and construction of buildings are broken down according to their provincial/territorial location. The costs associated with the acquisition of machinery and equipment are distributed according to the provincial/territorial location of the supplier.

Grants, contributions and transfers made by the federal government are distributed according to the permanent residence or location of the recipient.
