

The Fiscal Monitor

A Publication of the Department of Finance

Highlights

January 2009: budgetary surplus of \$37 million

There was a budgetary surplus of \$37 million in January 2009, compared to a surplus of \$1.2 billion recorded in January 2008. Budgetary revenues were down \$2.1 billion, or 9.8 per cent, from January 2008, largely reflecting lower corporate income tax and goods and services tax (GST) revenues. Program expenses decreased by \$0.6 billion, or 3.1 per cent, compared to January 2008, reflecting a decrease in operating expenses of departments and agencies. Public debt charges decreased by \$0.4 billion compared to January 2008.

April 2008 to January 2009: budgetary surplus of \$0.5 billion

For the first ten months of the 2008–09 fiscal year, there was a budgetary surplus of \$0.5 billion, down \$9.1 billion from the \$9.6-billion surplus reported in the same period of 2007–08. Revenues decreased by \$3.3 billion, or 1.7 per cent, primarily reflecting declines in corporate income tax and GST revenues, partially offset by growth in personal income tax and other revenues. Program expenses were up \$7.5 billion, or 4.7 per cent, due to higher transfer payments, Crown corporation expenses and operating expenses of National Defence. Public debt charges were down \$1.7 billion on a year-over-year basis, reflecting a lower average effective interest rate on the stock of interest-bearing debt.

Actions to support the availability of credit are reflected in the financial requirement. There was a financial requirement of \$67.5 billion in the April to January period of 2008–09 compared to a financial source of \$14.3 billion in the same period the previous year. This year-over-year difference reflects \$41 billion in initial purchases of insured mortgage pools through Canada Mortgage and Housing Corporation under the Insured Mortgage Purchase Program, as well as the Budget 2007 announcement that the Government would meet all of the borrowing needs of Canada Mortgage and Housing Corporation, the Business Development Bank of Canada and Farm Credit Canada through direct lending.

January 2009

There was a budgetary surplus of \$37 million in January 2009, compared to a surplus of \$1.2 billion in January 2008.

Budgetary revenues decreased by \$2.1 billion, or 9.8 per cent, to \$19.6 billion in January 2009.

- Personal income tax revenues declined by \$0.1 billion, or 0.9 per cent, in January, reflecting the accrual of \$0.4 billion for the monthly cost of Budget 2009 measures.
- Corporate income tax revenues were down \$1.5 billion, or 44.4 per cent, reflecting weakness in settlement payments relative to January 2008 as well as lower installment payments for corporations' 2009 tax years.
- Other income tax receipts—withholdings from non-residents—increased by \$0.1 billion, or 14.4 per cent.

Note: Unless otherwise noted, changes in financial results are presented on a year-over-year basis.

The Fiscal Monitor

- Excise taxes and duties were down \$0.8 billion, or 21.1 per cent. GST revenues, which can be volatile on a month-to-month basis, declined by \$0.7 billion, or 26.5 per cent. Customs import duties were down \$38 million, sales and excise taxes were down \$57 million, and revenues from the Air Travellers Security Charge were virtually unchanged.
- Employment Insurance (EI) premium revenues were up \$0.1 billion, or 3.0 per cent, as employment levels and wages and salaries remain above 2008 levels. The premium rate was kept stable at \$1.73 per \$100 of insurable earnings for 2009.
- Other revenues, consisting of net profits from enterprise Crown corporations, revenues of consolidated Crown corporations, sales of goods and services, returns on investments, foreign exchange revenues and miscellaneous revenues, were up \$0.2 billion, or 10.2 per cent.

Program expenses in January 2009 were \$17.2 billion, down \$0.6 billion, or 3.1 per cent, from January 2008, largely reflecting a decrease in operating expenses of departments and agencies.

In January 2009, transfer payments were up \$0.1 billion, or 0.5 per cent, from January 2008.

- Major transfers to persons, consisting of elderly benefits, EI benefits and children's benefits, increased \$0.2 billion, or 4.7 per cent, in January 2009. Elderly benefits and EI benefit payments each increased \$0.1 billion, and children's benefits, which consist of the Canada Child Tax Benefit and the Universal Child Care Benefit, increased \$13 million.
- Major transfers to other levels of government, consisting of federal transfers in support of health and other social programs (Canada Health Transfer and Canada Social Transfer), fiscal transfers, transfers to provinces on behalf of Canada's cities and communities, and Alternative Payments for Standing Programs, were up \$0.2 billion, or 4.9 per cent.
- Subsidies and other transfers decreased by \$0.4 billion, or 13.1 per cent.

Other program expenses consist of operating expenses of Crown corporations, departments and agencies, including National Defence, and also reflect the ongoing assessment of the Government's liabilities. These expenses decreased by \$0.6 billion, or 10.3 per cent, over the prior year.

Public debt charges declined \$0.4 billion compared to January 2008, as the impact of the increase in the stock of interest-bearing debt was more than offset by a decrease in the average effective interest rate on that stock.

April 2008 to January 2009

Through the first ten months of the 2008–09 fiscal year, there was a budgetary surplus of \$0.5 billion, down \$9.1 billion from the \$9.6-billion surplus reported during the same period of 2007–08.

Budgetary revenues decreased by \$3.3 billion, or 1.7 per cent, to \$193.0 billion.

- Personal income tax revenues rose \$3.9 billion, or 4.2 per cent.
- Corporate income tax revenues were down \$6.5 billion, or 21.2 per cent. This decline reflects both weaker profits and the impact of ongoing tax reductions.
- Other income tax receipts—withholdings from non-residents—rose \$0.6 billion, or 11.4 per cent.

Revenues and expenses

(April 2008 to January 2009)

\$ billions

- Excise taxes and duties decreased \$3.7 billion, or 9.8 per cent. GST revenues were down \$3.8 billion, or 14.6 per cent, reflecting the 1-percentage-point reduction in the GST rate effective January 1, 2008. Customs import duties increased by \$0.2 billion, sales and excise taxes were down \$0.1 billion, and revenues from the Air Travellers Security Charge were virtually unchanged.
- EI premium revenues were up \$0.1 billion, or 0.9 per cent, as the decline in the premium rate from \$1.80 to \$1.73 per \$100 of insurable earnings, effective January 1, 2008, was more than offset by gains in employment and wages and salaries.
- Other revenues rose \$2.4 billion, or 13.2 per cent. As noted in the October *Fiscal Monitor*, other revenues (and corresponding operating expenses) for 2007–08 have been restated. This adjustment has no net impact on the budgetary balance.

Program expenses from April 2008 to January 2009 were \$166.2 billion, up \$7.5 billion, or 4.7 per cent, from the same period the previous year, reflecting an increase in transfer payments, Crown corporation expenses and operating expenses of National Defence.

From April to January, transfer payments increased \$6.3 billion, or 6.1 per cent, from the same period the previous year.

- Major transfers to persons were up \$2.0 billion, or 4.2 per cent, year-to-date. Elderly benefits increased 4.3 per cent and EI benefit payments increased 7.4 per cent. Children's benefits increased 0.5 per cent.
- Major transfers to other levels of government were up \$2.4 billion, or 6.6 per cent, reflecting legislated growth in the Canada Health Transfer, Canada Social Transfer and Equalization.
- Subsidies and other transfers were up \$1.9 billion, or 9.6 per cent, mainly reflecting increases in payments related to support for labour market training and higher transfers to Newfoundland and Labrador and Nova Scotia under the Atlantic Offshore Accords.

Other program expenses increased \$1.1 billion, or 2.0 per cent, from the previous year's level.

Public debt charges decreased \$1.7 billion, or 6.0 per cent, reflecting lower interest rates.

The Fiscal Monitor

Financial requirement of \$67.5 billion for April 2008 to January 2009

The budgetary balance is presented on a full accrual basis of accounting, recording government assets and liabilities when they are receivable or incurred, regardless of when the cash is received or paid. In contrast, the financial source/requirement measures the difference between cash coming in to the Government and cash going out. This measure is affected not only by changes in the budgetary balance but also by the cash source/requirement resulting from the Government's investing activities through its acquisition of capital assets and its loans, financial investments and advances, as well as from other activities, including payment of accounts payable and collection of accounts receivable, foreign exchange activities, and the amortization of its tangible capital assets. The difference between the budgetary balance and financial source/requirement is recorded in non-budgetary transactions.

With a budgetary surplus of \$0.5 billion and a requirement of \$68.0 billion from non-budgetary transactions, there was a financial requirement of \$67.5 billion in the April to January period of 2008–09 compared to a financial source of \$14.3 billion in the same period the previous year. This year-over-year difference reflects the Budget 2007 announcement that the Government would meet all of the borrowing needs of Canada

Mortgage and Housing Corporation, the Business Development Bank of Canada and Farm Credit Canada through direct lending in order to reduce overall borrowing costs and improve the liquidity of the government securities market. The financial requirement also reflects \$41 billion in initial purchases of insured mortgage pools through Canada Mortgage and Housing Corporation under the Insured Mortgage Purchase Program to support the availability of longer-term credit. The requirement for foreign exchange activities mainly reflects the impact of exchange rate movements on the Canadian dollar value of foreign-denominated assets.

Net financing activities up \$92.7 billion

The Government financed this financial requirement of \$67.5 billion and increased its cash balances by \$25.2 billion by increasing unmatured debt by \$92.7 billion. The increase in debt was achieved largely through the issuance of treasury bills and marketable bonds. Cash balances at the end of January 2009 stood at \$36.5 billion, \$32.4 billion above their level at the end of January 2008. The increase in cash balances over the prior year mainly reflects increased balances at the Bank of Canada to support the Bank's operations to provide liquidity to financial markets and to cover some of the Government's own funding needs for the Insured Mortgage Purchase Program.
