

The Fiscal Monitor

A Publication of the Department of Finance

Highlights

June 2009: budgetary deficit of \$5.0 billion

There was a budgetary deficit of \$5.0 billion in June 2009, compared to a surplus of \$1.6 billion recorded in June 2008. Revenues were down \$2.7 billion, or 13.1 per cent, from June 2008, largely reflecting lower revenues from income taxes and the goods and services tax (GST). Program expenses increased by \$4.2 billion, or 25.2 per cent, compared to June 2008, largely reflecting increased Employment Insurance (EI) benefit payments and the impact of support for the automotive industry. Public debt charges decreased \$0.3 billion compared to June 2008 due to lower average effective interest rates.

April 2009 to June 2009: budgetary deficit of \$12.5 billion

For the first three months of the 2009–10 fiscal year, the budgetary deficit stood at \$12.5 billion, down \$13.3 billion from the \$0.8-billion surplus reported in the same period of 2008–09. Revenues decreased by \$5.3 billion, or 9.1 per cent, mainly reflecting declines in personal and corporate income tax and GST revenues. Program expenses were up \$8.5 billion, or 17.3 per cent, due primarily to higher transfer payments. Public debt charges were down \$0.5 billion, on a year-over-year basis, reflecting lower interest rates.

Lower revenues and higher expenses also reflect the impact of measures announced under Canada's Economic Action Plan. The results for the first three months of the 2009–10 fiscal year are consistent with the update of the fiscal outlook for 2009–10 published in *Canada's Economic Action Plan: A Second Report to Canadians* on June 16, 2009, in which a budgetary deficit of \$50.2 billion was projected for the fiscal year.

June 2009

There was a budgetary deficit of \$5.0 billion in June 2009, compared to a \$1.6-billion surplus in June 2008.

Revenues decreased by \$2.7 billion, or 13.1 per cent, to \$18.2 billion in June 2009.

- Personal income tax revenues decreased by \$1.1 billion, or 11.0 per cent, due to the impact of tax relief measures, lower employment and the unwinding of timing factors associated with the April and May results.
- Corporate income tax revenues were down \$0.8 billion, or 25.1 per cent, reflecting higher corporate refunds and weaker installment payments.
- Other income tax receipts—withholdings from non-residents—were down \$0.1 billion, or 32.6 per cent.
- Excise taxes and duties were down \$0.6 billion, or 15.9 per cent, driven by lower GST revenues. GST revenues were lower by \$0.6 billion, or 25.1 per cent. By its nature as a value-added tax, the GST can yield volatile net collections on a month-to-month basis due to timing differences between the significant volumes of GST owed to the government and credits claimed for GST paid on inputs. As such, much of this weakness is expected to unwind in the coming months. Customs import duties were down \$35 million, energy taxes were up \$0.1 billion, other excise taxes and duties were up \$33 million, and revenues from the Air Travellers Security Charge were down \$4 million.
- EI premium revenues were up \$40 million, or 2.6 per cent. The premium rate was kept stable at \$1.73 per \$100 of insurable earnings for 2009.

Note: Unless otherwise noted, changes in financial results are presented on a year-over-year basis.

The Fiscal Monitor

- Other revenues, consisting of net profits from enterprise Crown corporations, revenues of consolidated Crown corporations, sales of goods and services, returns on investments, foreign exchange revenues and miscellaneous revenues, were down \$0.1 billion, or 6.1 per cent.

Program expenses in June 2009 were \$20.7 billion, up \$4.2 billion, or 25.2 per cent, from June 2008. This increase is largely attributable to higher EI benefit payments and the impact of support for the automotive sector.

In June 2009, transfer payments were up \$3.6 billion, or 33.0 per cent, from June 2008

- Major transfers to persons, consisting of elderly benefits, EI benefits and children's benefits, increased \$0.6 billion, or 12.9 per cent. Elderly benefits increased \$0.2 billion, or 6.1 per cent. EI benefit payments increased \$0.4 billion, or 39.0 per cent, reflecting significantly higher regular benefits. Children's benefits, which consist of the Canada Child Tax Benefit and the Universal Child Care Benefit, increased by \$10 million.
- Major transfers to other levels of government, consisting of federal transfers in support of health and other social programs (Canada Health Transfer and Canada Social Transfer), fiscal transfers, transfers to provinces on behalf of Canada's cities and communities, and Alternative Payments for Standing Programs, were down \$0.2 billion, or 5.1 per cent, reflecting the accelerated payment of the gas tax transfer on behalf of Canada's cities and communities in April of 2009–10.
- Subsidies and other transfers increased by \$3.2 billion, largely reflecting the impact of support for the automotive industry.

Other program expenses consist of operating expenses of Crown corporations, departments and agencies, including National Defence, and also reflect the ongoing assessment of the Government's liabilities. These expenses increased by \$0.5 billion, or 9.6 per cent, over the prior year, due in part to a one-time adjustment in June 2009, based on revised estimates, to reflect an under-accrual of pension costs in April and May of 2009.

Public debt charges decreased \$0.3 billion, or 9.0 per cent, compared to June 2008 due to lower average effective interest rates on the stock of interest bearing debt.

April 2009 to June 2009

Through the first three months of the 2009–10 fiscal year, there was a budgetary deficit of \$12.5 billion, down \$13.3 billion from the \$0.8-billion surplus reported during the same period of 2008–09.

Revenues declined by \$5.3 billion, or 9.1 per cent, to \$52.8 billion.

- Personal income tax revenues were down \$1.4 billion, or 4.9 per cent, reflecting the impact of tax relief measures and lower employment.
- Corporate income tax revenues were down \$2.2 billion, or 24.1 per cent, reflecting a combination of higher refunds and lower installment payments.

- Other income tax receipts—withholdings from non-residents—were up \$25 million, or 2.0 per cent.
- Excise taxes and duties were down \$2.1 billion, or 22.2 per cent, primarily due to a \$2.0-billion, or 32.6-per-cent, decline in GST revenues. This is a much larger decline than suggested by the expected decline in taxable consumption. By its nature as a value-added tax, the GST can yield volatile net collections on a month-to-month basis due to timing differences between the significant volumes of GST owed to the government and credits claimed for GST paid on inputs. Since results to date represent only three months, much of this weakness is expected to unwind in the coming months. Customs import duties were down \$0.1 billion, energy taxes were up \$15 million, other excise taxes and duties rose \$21 million, and revenues from the Air Travellers Security Charge declined by \$5 million.
- Employment insurance premium revenues were up \$0.1 billion, or 2.6 per cent. The premium rate was kept stable at \$1.73 per \$100 of insurable earnings for 2009.
- Other revenues rose \$0.2 billion, or 3.8 per cent.

Program expenses from April to June 2009 were \$57.6 billion, up \$8.5 billion, or 17.3 per cent, from the same period the previous year, reflecting increases in transfer payments and operating expenses of National Defence.

From April to June, transfer payments increased \$8.1 billion, or 24.7 per cent, from the same period last year.

- Major transfers to persons were up \$2.2 billion, or 14.7 per cent, year-to-date. Elderly benefits increased \$0.5 billion, or 5.7 per cent, in line with growth in the elderly population and changes in consumer prices, to which benefits are fully indexed. EI benefit payments increased \$1.7 billion, or 46.9 per cent, reflecting higher unemployment and benefit enhancements introduced as part of Canada's Economic Action Plan. Children's benefits were up \$16 million compared to the same period last year.
- Major transfers to other levels of government were up \$1.4 billion, or 11.2 per cent, reflecting legislated growth in the Canada Health Transfer, the Canada Social Transfer and Equalization, as well as the previously announced doubling of the gas tax transfer to provinces and municipalities, as of April 1, 2009.
- Subsidies and other transfers were up \$4.6 billion, or 78.6 per cent, mainly reflecting the impact of support for the automotive industry.

Other program expenses increased by \$0.4 billion, or 2.4 per cent, from last year's level.

Public debt charges decreased \$0.5 billion, or 6.3 per cent, as the increase in the stock of interest bearing debt was more than offset by lower average effective interest rates on that stock.

The Fiscal Monitor

Financial requirement of \$33.0 billion for April to June 2009

The budgetary balance is presented on a full accrual basis of accounting, recording government assets and liabilities when they are receivable or incurred, regardless of when the cash is received or paid. In contrast, the financial source/requirement measures the difference between cash coming in to the Government and cash going out. This measure is affected not only by changes in the budgetary balance but also by the cash source/requirement resulting from the Government's investing activities through its acquisition of capital assets and its loans, financial investments and advances, as well as from other activities, including payment of accounts payable and collection of accounts receivable, foreign exchange activities, and the amortization of its tangible capital assets. The difference between the budgetary balance and financial source/requirement is recorded in non-budgetary transactions.

With a budgetary deficit of \$12.5 billion and a requirement of \$20.4 billion from non-budgetary transactions, there was a financial requirement of \$33.0 billion in the April to June period of 2009–10 compared to a financial requirement of \$19.6 billion from the same period the previous year. This year-over-year difference is due mainly to the deterioration in the budgetary balance.

Net financing activities up \$7.9 billion

The government financed this financial requirement of \$33.0 billion by increasing market debt by \$7.9 billion and reducing cash balances by \$25.1 billion. The increase in market debt was achieved largely through the issuance of marketable bonds. The level of cash balances varies from month to month based on a number of factors including periodic large debt maturities, which can be quite volatile on a monthly basis. Cash balances at the end of June 2009 stood at \$20.0 billion, \$15.5 billion above their level at the end of June 2008.
