## Canada Small Business Financing Act

## Annual Report 2007-2008

The Canada Small Business Financing (CSBF) Program is a national program operating in all provinces and territories. Financial institutions make term loans of up to $\$ 250000$ to small businesses to purchase land, buildings or equipment, or to improve buildings and equipment. The Government of Canada pays lenders 85 percent of the eligible losses incurred on defaulted loans. One of the objectives of the CSBF Program is incrementality, which is the program's effectiveness in extending financing that would otherwise have been unavailable to small and medium-sized businesses, or available only under less attractive conditions. The other objective is cost recovery, which is defined as the cost of claims on defaulted loans being balanced by revenues on loans over a period of 10 years.

I am pleased to present to Parliament the 2007-08 Canada Small Business Financing (CSBF) Program Annual Report, in accordance with section 20 of the Canada Small Business Financing Act.

The CSBF Program aims to ensure that small businesses with particular difficulty in accessing financing are able to get the financing they need to start up, expand, enhance their productivity and innovate. This report outlines how Industry Canada, working in partnership with lending institutions across the country, helped SMEs access over 9000 loans worth more than $\$ 1.0$ billion last year, leading to the creation of more than 20400 jobs in Canada.

Our commitment as a government to assist Canadian entrepreneurs has been made clear in Advantage Canada, our long-term economic plan, and all recent budgets. Through these efforts we have made great strides toward creating a healthy and sustainable climate of innovation and growth across all sectors of the economy.

Canada's small and medium-sized enterprises are key drivers of our economic success. The Government remains fully committed to maintaining a positive business environment and appropriate measures and programs of support for them, including the CSBF Program. This commitment is increasingly critical, given the challenging economic climate in which Canadian businesses now operate and the need for constant innovation in response to global competition.

Tony Clement

## Highlights for 2007-08

## Small and medium-sized businesses took out loans worth more than \$1 billion.

There were 9015 small business loans made under the Canada Small Business Financing Act. The average loan size was $\$ 111685$. The funds were used to help new businesses get started and established firms make improvements, purchase equipment and modernize.

## \$99.3 million in claims was paid to lenders.

There were 1843 claims on loans settled, with payments of $\$ 99.3$ million, which averaged $\$ 53877$ per claim. These claims were associated with defaulted loans registered during the nine-year period from 1999-2008.

## Start-ups and new businesses received the largest share of available financing.

Start-ups and new businesses borrowed more than $\$ 626.8$ million, or 62 percent of the total loan value.

## More than 20400 new jobs were created.

Borrowers estimated that the loans enabled them to create 20424 new jobs across Canada, an average of 2.3 new jobs per loan.

## Lending is available in every province and territory.

A total of 1260 private-sector lenders - in every province and territory - are eligible to participate in the program to extend financing to small businesses.

## The Canada Small Business Financing Program website is one of Industry Canada's most visited sites.

The Canada Small Business Financing Program website recorded 165363 visits, evidence of a high level of interest in access to financing.

## 1. Introduction

## Lending a Hand to Business

The purpose of the Canada Small Business Financing (CSBF) Program is to help an important part of the economy - small and medium-sized businesses - get access to financing. The CSBF Program helps fill a gap in the range of financing instruments available to these businesses, which might otherwise have difficulty qualifying for financing or finding financing that meets their needs.

The CSBF Program works because the Government of Canada shares the burden of risk with private-sector lenders. As a result, lenders are able to increase the amount of financing they extend to small businesses.

The Canada Small Business Financing Act (CSBFA or the Act) took effect in 1999, replacing the successful Small Business Loans Act that had operated since 1961. The CSBFA provides for the financing of term loans and supporting asset-based debt financing. (See Section 2 for information on program parameters.)

In 2007-08, the CSBF Program helped small and medium-sized businesses obtain over 9000 loans with a value of more than $\$ 1$ billion. Since 1999 , almost $\$ 10$ billion in loans has been made.

Industry Canada administers the CSBF Program, registers loans, collects fees and pays lenders eligible portions of losses on defaulted loans. However, the Department is not involved in assessing individual loan applications. Industry Canada does not target any group or region.

It is the responsibility of private-sector lenders to make all credit decisions - to approve and administer the loans - and disburse funds. In accordance with the CSBFA and its regulations, lenders must act with due diligence, as they would with their own conventional loans. In addition, they are required to register securities against the loans.

Lenders include some 1260 chartered banks, credit unions and caisses populaires. They operate from more than 14600 locations, providing service to Canadians in all provinces and territories.

## 2. Major Program Parameters

The CSBF Program operates according to the following major parameters.

- Assets financed: loans are restricted to financing: (1) equipment; (2) real property or immovables; (3) leasehold improvements; and (4) program registration fees.
- Small business eligibility: for-profit businesses only; no farms or charitable institutions; revenues cannot exceed $\$ 5$ million per year; business is carried on in Canada, with a place of business in Canada, and assets held in Canada for the purpose of operating the business.
- Percentage of asset cost accepted for financing: the maximum amount of financing available is 90 percent of the eligible cost of the assets.
- Fees: a one-time, up-front fee of 2 percent of the amount financed is paid at the time of registration. This fee can be included in the CSBF loan. In addition, the lender is charged an administration fee of 1.25 percent (paid quarterly) on outstanding loan amounts. Lenders may pass this fee on to borrowers only as part of the interest rate charged on their loans.
- Maximum interest rate: the maximum floating rate is the lender's prime rate plus 3 percent (includes the 1.25 percent administration fee). The maximum fixed rate is the lender's residential mortgage rate plus 3 percent (includes the 1.25 percent administration fee).
- Maximum financing amount: a borrower cannot have more than \$250 000 in total loans and capital leases outstanding under the CSBF Program.
- Length of term: the maximum term for any loan is 10 years from the date the first principal payment is scheduled to be made.
- Loss-sharing ratio: the Government of Canada shares in eligible losses after realizations on security. The Government of Canada's share of eligible losses for loans in default is 85 percent. Lenders are responsible for the remaining 15 percent.
- Cap on claims: each lender has a separate account for loans made under the program. The Government of Canada's obligation to an individual lender is to pay eligible claims (i.e., 85 percent of the eligible losses) on defaulted loans in its account, up to a maximum of the aggregate of 90 percent of the first $\$ 250000$ in loans registered, 50 percent of the next $\$ 250000$, and 10 percent of all loans in excess of $\$ 500000$.

## 3. Program Administration

The CSBF Program Directorate of Industry Canada is responsible for the administration of the CSBF Program (loans component) and the Capital Leasing Pilot Project (CLPP). The CLPP was discontinued on March 31, 2007, although the Directorate is still processing claims, and collecting revenues and recoveries from leases that were registered before 2007. (See Section 5 for information on the CLPP.)

The Directorate employed 26 full-time staff and operated with an annual budget of about $\$ 2.1$ million. There were 1950 telephone and email inquiries received through the info-line and website from small businesses and lenders. The program's website received 165363 visits, making it one of the most visited websites at Industry Canada. It took an average of two days or less to register loans.

## Claims for Losses

The Directorate evaluates claims for losses and reimburses lenders for eligible losses. During 2007-08, the Directorate accepted 94 percent (1843) and rejected 6 percent (115) of CSBF Program loan claims (see Table 1). The rejection rate is consistent with that of the previous year. During 2007-08, 95 percent (35) of the CLPP claims were accepted. The time required to process a claim in 2007-08 was an average of 14 days, consistent with 2006-07.
The Directorate received a total of nine appeals of decisions made related to the CSBF Program. Each appeal was considered in light of any additional information or clarifications. As a result, the Directorate accepted three and rejected six. There were no appeals under the CLPP.

## 4. Program Performance and Financial Review

### 4.1 Program Objectives and Impacts

The CSBF Program has two objectives: incrementality and cost recovery.
Incrementality means that small and mediumsized businesses have access to financing that otherwise would not have been available to them or would only be available under less attractive conditions.

Research shows that new businesses and startups have the greatest difficulty of any business in accessing capital. ${ }^{1}$ Therefore, an indicator of incrementality is the number of start-ups and new businesses that receive loans. In 2007-08, start-ups and new businesses borrowed $\$ 626.8$ million in loans, or 62 percent of the total value of loans under the program (see

Figure 1). This is a strong indicator that the program is achieving incrementality.

Cost recovery means that the CSBF Program's revenues will offset claims on defaulted loans.

For the current five-year period (2004-09), the CSBF Program's revenues amounted to $\$ 160.8$ million as of March 31, 2008 (see Table 2). Total claim expenses were $\$ 129.6$ million, resulting in a net balance of $\$ 31.2$ million. A positive net balance in the term of a five-year period is because the fees on loans start being collected at the time of registration, while claims are typically submitted two to four years after loans are made. For the first five-year period of the CSBF Program (1999-2004), expenses were $\$ 114.3$ million greater than revenues at the time of reporting.

Figure 1: Value of CSBF Loans by Age of Borrower Firm, 2007-08

For more information, see Appendix A, Table VIII.

*This column contains data for the first four years (April 1, 2004 to March 31, 2008) of the current period. Details may not add up to totals because of rounding.

For more information, see Appendix A, Table Ia and Ib.

## Small Business and Job Creation

Small and medium-sized businesses are engines of job creation. Information provided by borrowers on their loan registration forms enabled the CSBF Program to measure the gross effect on employment. In 2007-08, borrowers estimated that loans would help their businesses create a total of 20424 new jobs, or 2.3 jobs per loan. In the previous year, 2006-07, borrowers estimated job creation at 1.8 new jobs per loan. Over these two years, the CSBF Program has helped to create some 38149 new jobs, or 2.0 jobs per loan.

Loans numbered 9015, about 6 percent less than the previous year (see Figure 2). The size of the average loan grew 5 percent to $\$ 111685$ (see Figure 3).

Even with good financing at affordable rates, some business ventures cannot succeed. In 2007-08, 1843 claims were settled, with payments of $\$ 99.3$ million, which averaged $\$ 53877$ per claim (see Figures 2 and 3). These claims were associated with defaulted loans registered during the nine-year period from 1999-2008. The average value per claim in 2007-08 rose 12 percent from the previous year.

### 4.2 Program Activity

## Loans, Business Successes and Claims

During the period 2007-08, the total value of loans that private-sector lenders made under the CSBF Program surpassed $\$ 1$ billion. This represents a significant injection of new financing for small and medium-sized businesses.

Claims are typically submitted within four years after loans are made. ${ }^{2}$ This explains the rising number of claims later in the life of the program. The CSBF Program came into effect in 1999.
For more information, see Appendix A, Table II.

[^1]
## Figure 3: Average Loan Size and Average Claim Size, 1999-2008

For more information, see Appendix A, Table II.

## Investments in Modernization and Growth - Review by Asset Type

Firms sought financing for a variety of reasons. They invested in equipment and real property and made other business improvements and innovations. Figure 4 shows the distribution of the total value of CSBF loans and claims by asset type over the nine years of the program. The purchase of equipment accounted for the largest percentage of the total value of both loans ( 56 percent) and claims ( 65 percent). During the same period, leasehold improvements accounted for 23 percent of the total value of all loans, and 26 percent of the total value of claims. Finally, real property represented the smallest percentage ( 21 percent) of the total
value of loans, and accounted for 9 percent of the total value of claims.

In 2007-08:

- 49 percent of the total value of loans went toward purchasing equipment ( 56 percent for the nine-year average); 36 percent of the total value of loans went toward making improvements to leasehold improvements (23 percent for the nine-year average); and 15 percent of the total value of loans went toward purchasing real property (land and buildings) ( 21 percent for the nine-year average).
- Claim values were consistent with the nineyear average ( 64 percent for equipment, 27 percent for leasehold equipment, 9 percent for real property).

## Figure 4: Percent of Total Value of CSBF Loans and Claims by Asset Type, 1999-2008

For more information, see Appendix A, Table III.

## Loans for Businesses in Every Province and Territory

Due to a large network of private-sector lenders, the CSBF Program is able to serve Canadian firms in every part of the country, whether they do business in big cities, small towns or rural communities. The program is driven by demand. Variations in its use reflect choices made by lenders and borrowers.
In 2007-08, although businesses in every province and territory took out loans, the provinces of Quebec and Ontario registered the largest share. Businesses in these two provinces made 5930 loans that year ( 71 percent of the total value), bringing total loans made to

67353 (66 percent) in 1999-2008. Research has shown that 58 percent of all for-profit Canadian small and medium-sized businesses operate in Ontario and Quebec. ${ }^{3}$

Ontario and Quebec together accounted for 86 percent of the value of claims during 2007-08 and 82 percent (Ontario 51 percent; Quebec 31 percent) over the period 1999-2008. For more information, see Appendix A, Table IV.

[^2]Food and Beverage Services, Retail Trade, Manufacturing, and| Transportation and Warehousing Sectors Lead the Way in Borrowing
Based on the nine-year average, the food and beverage sector accounted for 25 percent of the total value of loans made, the retail sector accounted for 15 percent, the transportation and warehousing sector accounted for 9 percent, and the manufacturing sector accounted for 8 percent (see Figure 5).
For the nine-year period from 1999-2008, the food and beverage sector accounted for 33 percent of the total value of claims paid, while the retail trade sector accounted for 16 percent, and the manufacturing sector accounted for 13 percent.

As for 2007-08:

- These top four industry sectors together accounted for 63 percent of the total value of loans and 59 percent of the number of loans. These numbers were higher than the nine-year average for loan values ( 57 percent) and loan numbers ( 54 percent).
- All other sectors together represented borrowing worth 37 percent of the value of loans. These include health care, construction, educational services, information and cultural industries, mining, oil and gas, and others.
- On the claims side, the top four industry sectors were responsible for a significant and consistent share of claims for losses, 65 percent of the value of claims.

## Figure 5: Percent of Total Value of CSBF Loans and Claims by Industry Sector, 1999-2008

Industry Sectors

[^3]
## Type and Size of Borrowers Remain Steady

- In 2007-08, non-franchise businesses accounted for 78 percent of the total value of loans ( 83 percent in 1999-2008), whereas franchise businesses accounted for 22 percent ( 17 percent in 1999-2008). Franchise businesses represented 21 percent of the value of claims, figures consistent with the nine-year average. For more information, see Appendix A, Table VI.
- The distribution of firms across revenue categories remains consistent with the nineyear trend (see Figure 6) with firms with annual revenues of between $\$ 100001$ and $\$ 2500000$ accounting for 91 percent of the value of all loans made in 2007-08. These firms also accounted for 93 percent of claims that were paid, also consistent with previous years.

Figure 6: Percent of Total Value of CSBF Loans and Claims by Borrower Firm Size, 1999-2008

Borrower Firm Size (According to Annual Revenues)*

[^4]For more information, see Appendix A, Table VII.

### 4.3 The Crown's Program Liability

To limit the Government of Canada's overall exposure, the Canada Small Business Financing Act established a $\$ 1.5$ billion maximum liability ${ }^{4}$ ceiling for each consecutive five-year period for claims paid on defaulted loans. For loans made between April 1, 2004 and March 31, 2008, the four years of the current five-year period, the maximum liability was $\$ 578.4$ million, which was well below the statutory limit.

Contingent liability is the maximum amount of money that the government may be called upon to pay to lenders if all loans were to default simultaneously. The contingent liability is calculated as the lesser of the maximum liability less reimbursement of losses by the government or the outstanding loan balance amount. For loans made between April 1, 2004 and March 31, 2008, the Crown's contingent liability balance was $\$ 458.7$ million.

[^5]
## 5. Capital Leasing Pilot Project

The five-year Capital Leasing Pilot Project (CLPP), which was launched on April 1, 2002 to identify and test the viability and utility of the CSBF Program for capital leasing, was discontinued on March 31, 2007. Research and results of the pilot project have shown that the vast majority of Canadian small business' capital leasing needs are being met in the marketplace without government assistance. The CSBF Program Directorate continues to process claims, administration fee revenues and recoveries from leases registered before 2007.

### 5.1 Revenues and Expenses

For the six-year period (2002-08), revenues reached $\$ 5.6$ million. Total claim expenses were $\$ 1.9$ million, resulting in a net balance of $\$ 3.7$ million (see Table 3). A positive net balance early in the term is expected because fees on leases start being collected at the time of registration, while claims are typically submitted within four years after leases are made. There
were 35 claims received in 2007-08. For more information, see Appendix B, Table I.

### 5.2 The Crown's Program Liability

To limit the Government of Canada's exposure, the CLPP established a $\$ 400$-million maximum liability ceiling. ${ }^{5}$ For leases made under the pilot project, the maximum liability was $\$ 15.7$ million, well below the statutory limit.

On March 31, 2008, the Crown's contingent liability was calculated at $\$ 14.0$ million. Contingent liability is the maximum amount of money that the government may be called upon to pay to lessors if all leases were to default simultaneously. The contingent liability is calculated as the lesser of the maximum liability less reimbursement of losses by the government or outstanding balance amounts of capital leases.

| Table 3: Cumulative Revenues and Expenses, CLPP |  |
| :---: | :---: |
|  | $\begin{gathered} 2002-08 \\ (\$ 000) \end{gathered}$ |
| Revenues |  |
| Registration fees Administration fees | $\begin{aligned} & 2673.35 \\ & 2910.41 \end{aligned}$ |
| Total revenues | 5583.76 |
| Expenses |  |
| Claims paid | 1854.48 |
| Total expenses | 1854.48 |
| Total revenues less total expenses | 3729.28 |

Details may not add up to totals because of rounding.
For more information, see Appendix B, Table II.

[^6]
## 6. Future Directions

Industry Canada is continuing to work to address program improvements, as well as regular program monitoring and assessment based on an evaluation framework that provides results-based monitoring of program activities. Framework evaluation activities include program awareness and satisfaction surveys, analysis of cost recovery and incrementality, and assessment of economic and employment impact.

In 2008-09, work will begin to prepare the comprehensive review of the 2004-09 lending period of the CSBF Program. Required by legislation to be held every five years, the review helps the Department monitor and assess the operational and financial performance of the program. The goal is to determine:

- the extent to which the program is meeting its goals of incrementality and cost recovery;
- the program's relevance and challenges faced in meeting the financing needs of small and medium-sized businesses under evolving market conditions; and
- what changes to the program are necessary.

Industry Canada has commissioned a number of program studies to look at these issues, the results of which will provide information and data for the review process. A comprehensive review report must be tabled in Parliament within 12 months of March 31, 2009.

[^3]:    For more information, see Appendix A, Table V.

[^4]:    *Based on borrower's revenue forecasts at time of loan registration.

[^5]:    ${ }^{4}$ The Government of Canada's maximum liability is calculated as the sum of the Government of Canada's contingent liability to each lender, per lending period, capped by the $90-50-10$ formula. This formula limits the Crown's payments with respect to any lender according to the following: 90 percent of the first $\$ 250000$ of loans in a lender's account; 50 percent on the next $\$ 250000$; and 10 percent of all remaining loans.

[^6]:    ${ }^{5}$ The Government of Canada's maximum contingent liability is calculated as the sum of the Government of Canada's contingent liability to each lessor, per lease period, capped by the $90-50-10$ formula. This formula limits the Crown's payments with respect to any lessor according to the following: 90 percent of the first $\$ 250000$ of leases in a lessor's account, 50 percent on the next $\$ 250000$ and 10 percent of all remaining leases.

[^7]:    * Distribution of 1.25 percent administration fees among fiscal years has been determined on the estimated average loan outstanding amount of each fiscal year.

[^8]:    *Since loans can be used for multiple purposes, a given loan was associated with an asset type if more than 50 percent of the proceeds were devoted to that asset type.
