Fisheries - Annual Statistics Review 2005-2006, 225 p.

## **Foreword**

The hard times that the Quebec fishing industry has been experiencing in recent years underscore the importance of producing reliable statistics that are as up to date as possible. The requests for information that we receive have not only become more numerous and more pressing, but above all more complex. This is the background to this annual statistical report.

The twenty-first edition of the Annual Statistics Review of Quebec marine fisheries, produced by the Department of Fisheries and Oceans (DFO), paints a detailed portrait of the industry in 2005 and 2006. In a nutshell, in this last year, the volume of landings totalled 56 730 MT and had an associated value of close to \$152 million and in 2006 the volume of landings totalled 58 748 MT and had an associated value of close to \$117 million.

In the present edition, you will find a section entitled: “**Statistical Profile of Seal Fishery**”. In this section, we are presenting an overview of the activities related to seal fishery in the Quebec Region. You will find information concerning the number of licences issued per type and maritime areas as well as information concerning the landings of harp seal by fleet, and finally, data relating to the seal fishery observation activities.

*A supplement entitled “Quebec Marine Fisheries: 2005 and 2006 Highlights” is included in a special pocket on the back cover. This handy, comprehensive reference tool was prepared jointly by the Statistics and Licensing Division and the Policy and Economics Branch to provide a snapshot of the state of Quebec’s fishing industry in 2005 and 2006.*

The Statistics and Licensing Division, which is responsible for this publication, is mandated to compile, process, analyse and publish data on Quebec marine fisheries. The statistics produced are of vital importance, first, to assess and highlight the economic value of the industry, and second, to provide managers and scientists with a basis for the various analyses required for effective fishery resource management.

It is important to note that a federal-provincial agreement between the Department of Fisheries and Oceans (DFO) and the Quebec Department of Agriculture, Fisheries and Food (MAPAQ - Ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec) has laid the groundwork for greater coordination in collecting data. It aims to eliminate duplication of effort by public servants seeking information from fishing industry players and to promote intergovernmental data sharing.

The three types of data in this report have been obtained in different ways. Catch data are based on the sales transactions between fishers and fish buyers when each vessel lands its catch. For data on fishing effort, used by scientists in their research work, we rely upon the excellent cooperation of skippers, who provided information on fishing grounds, type of gear, target species and species caught, among other things. Finally, statistics on fishermen, fishing fleets and licences come from the licensing process.

The quality of the data in this review depends on (a) the quantity of data that our system gathers from fishermen, buyers and processing plants, and (b) the accuracy of the data. With limited resources, the Statistics and Licensing Division does everything within its power to check the data it gathers, but cannot guarantee that everyone involved submitted all their data. We turn to resource management programs such as enterprise allocations (quota licences), for which strict monitoring methods exist, to ensure that data entered into the system are consistent with observations of landings by dockside monitors.

This does not however apply to every fishery. In addition to that, consultations with Inspectors, Protection Officers, Policy and Economics Branch representatives as well as with industry representatives further enable Statistics and Licensing Division staff to produce reliable, representative data.

The descriptive narratives accompanying the tables and figures are not intended as an in-depth analysis of the state of the marine fisheries in Quebec in 2005 and 2006.

The publication of this annual review of Quebec marine fisheries has been made possible by the hard work and rigour of the Statistics and Licensing Division staff and groups in Sept Îles, Gaspé and Cap-aux-Meules. We would also like to thank the Policy and Economics Branch for its important contribution.

We wish to take this opportunity to thank the fishermen, buyers and producers for their ongoing cooperation; knowing that supplying statistics is an extra burden for them.

All of us in Statistics and Licensing Division hope that you enjoy reading this annual review and welcome any comments or ideas that might help us improve it.

## **Table of Contents**

**LIST OF TABLES**

**LIST OF FIGURES**

**METHODOLOGY**

**MARITIME TERRITORY**

**CONVENTIONAL SYMBOLS**

**DEFINITIONS OF TERMS USED IN THIS PUBLICATION**

**CATCH PORTRAIT OF QUEBEC SECTOR FOR 2005 AND 2006**

**WORK FORCE**

- Commercial fishermen
- Vessels
- Buyers

**RESOURCE ACCESSIBILITY**

- Fishing licenses issued in 2006
- Fishing quotas in Quebec - 2006 year
- Weekly landings by area for selected species

**LANDINGS IN QUEBEC**

- Landings in Quebec
- Landings by vessels length category - Quebec
- Supplementary purchase slips in Quebec
- Monthly landings in Quebec
- Landings by fishing gear type
- Average landed price
- Ranking of fishing ports
- Landings in Quebec by non Quebec vessels
- Landings outside Quebec by Quebec vessels

## **Table of Contents**

### **STATISTICAL PROFILE OF SEAL FISHERY**

## List of tables

### **WORK FORCE IN QUEBEC**

- 1 Number of active registered licence holders for 2005 and 2006 by sector (according to port of landing) by age group
- 1B Number of active licence holders in 2005 and 2006 by sector and by fishermen status
- 2 Number of registered vessels in 2005 and 2006 by sector and length group (according to port of landing)
- 2A Number of vessels in all Quebec sectors by tonnage and length group in 2006
- 2B Number of active vessels in Quebec in 2005 and 2006 by sector and length group (according to port of landing)
- 2C Number of active Quebec vessels in Quebec in 2005 and 2006 by sector and length group (according to port of landing)
- 3 Buyers operating in Quebec in 2005 and 2006 by sector

### **RESOURCE ACCESSIBILITY**

- 4 Number of commercial fishing licences issued by sector in 2005 and 2006 for selected species (excluding seal fishery licences)
- 4A Number of seal fishery licences issued in 2005 and 2006, by sector
- 5 Number of commercial fishing licences issued in Quebec in 2006 for the main species (excluding seal fishery licences)
- 6 Number of commercial fishing licences issued on the Gaspé Peninsula in 2006 for the main species (excluding seal fishery licences)
- 7 Number of commercial fishing licences issued on the North Shore in 2006 for the main species (excluding seal fishery licences)
- 8 Number of commercial fishing licences issued in the Magdalen Islands in 2006 for the main species (excluding seal fishery licences)
- 9 Fishing quotas applicable to Quebec, 2006  
(excluding supplementary purchase slips)

## List of tables

- 10A Weekly crab landings by zone  
(excluding supplementary purchase slips), 2006
- 10B Weekly shrimp landings by shoal, 2006
- 10C Weekly cod landings by division for the main mobile gears groups  
(excluding supplementary purchase slips), 2006
- 10D Weekly cod landings, by division, for all fixed gears  
(excluding supplementary purchase slips), 2006
- 10E Weekly lobster landings by zone, 2006

### **LANDINGS IN QUEBEC**

- 11 Landings in Quebec in 2005 and 2006
- 11A Landings in Quebec by vessels under 35' in 2005 and 2006
- 11B Landings in Quebec by vessels 35' to 44'11" in 2005 and 2006
- 11C Landings in Quebec by vessels 45' to 64'11" in 2005 and 2006
- 11D Landings in Quebec by vessels 65' and over in 2005 and 2006
- 11E Supplementary purchase slips in Quebec in 2005 and 2006
- 12 Monthly landings in Quebec by species, 2005 and 2006,  
all administrative sectors (Quantity)
- 12A Monthly landings in Quebec by species, 2005 and 2006,  
all administrative sectors (Value)
- 13 Landings in Quebec by type of fishing gear used  
in 2005 and 2006 (Quantity and value)
- 14 Landing average price by species in Quebec  
(excluding supplementary purchase slips), 2005 and 2006
- 15 Quebec - Ten most important municipalities of landing  
in 2005 and 2006 (Quantity and Value)
- 16 Landings in Quebec by non Quebec boats  
in 2005 and 2006 (Quantity)
- 16A Value of landings in Quebec by non Quebec boats  
in 2005 and 2006

## List of tables

- 17 Landings outside of Quebec by Quebec boats  
in 2005 and 2006 (Quantity)
- 17A Value of landings outside of Quebec by Quebec boats  
in 2005 and 2006 (Value)

### **DISTRIBUTION OF LANDINGS BY SECTOR**

- 18 Landings in the Gaspé Peninsula in 2005 and 2006
- 18A Landings in the Gaspé Peninsula by vessels under 35'  
in 2005 and 2006
- 18B Landings in the Gaspé Peninsula by vessels 35' to 44'11"  
in 2005 and 2006
- 18C Landings in the Gaspé Peninsula by vessels 45' to 64'11"  
in 2005 and 2006
- 18D Landings in the Gaspé Peninsula by vessels 65' and over  
in 2005 and 2006
- 18E Supplementary purchase slips in the Gaspé Peninsula in 2005 and 2006
- 18.1 Monthly landings in the Gaspé Peninsula by species,  
2005 and 2006 (Quantity)
- 18.1A Monthly landings in the Gaspé Peninsula by species,  
2005 and 2006 (Value)
- 19 Landings, Gaspé North, 2005 and 2006, Bic to Rivière-La-Madeleine
- 20 Landings, Gaspé East, 2005 and 2006, Grande-Vallée to Cap Gaspé
- 21 Landings, Gaspé South, 2005 and 2006, Cap-aux-Os  
to Port Daniel
- 22 Landings, Baie-des-Chaleurs, 2005 and 2006, Shigawake  
to Matapédia
- 23 Landings average price by species in the Gaspé Peninsula  
(excluding supplementary purchase slips), 2005 and 2006
- 24 Landings on the North Shore in 2005 and 2006

## List of tables

- 24A Landings on the North Shore by vessels under 35'  
in 2005 and 2006
- 24B Landings on the North Shore by vessels 35' to 44'11"  
in 2005 and 2006
- 24C Landings on the North Shore by vessels 45' to 64'11"  
in 2005 and 2006
- 24D Landings on the North Shore by vessels 65' and over  
in 2005 and 2006
- 24E Supplementary purchase slips on the North Shore in 2005 and 2006
- 24.1 Monthly landings on the North Shore by species,  
2005 and 2006 (Quantity)
- 24.1A Monthly landings on the North Shore by species,  
2005 and 2006 (Value)
- 25 Landings, Upper North Shore, 2005 and 2006, Tadoussac  
to Gallix
- 26 Landings, Middle North Shore, 2005 and 2006, Sept-Iles  
to Pointe Parent, including Anticosti Island
- 27 Landings, Lower North Shore, 2005 and 2006, Kégaska  
to Blanc-Sablon
- 28 Landings average price by species on the North Shore  
(excluding supplementary purchase slips), 2005 and 2006
- 29 Landings in the Magdalen Islands in 2005 and 2006
- 29A Landings in the Magdalen Islands by vessels under 35'  
in 2005 and 2006
- 29B Landings in the Magdalen Islands by vessels 35' to 44'11"  
in 2005 and 2006
- 29C Landings in the Magdalen Islands by vessels 45' to 64'11"  
in 2005 and 2006
- 29D Landings in the Magdalen Islands by vessels 65' and over  
in 2005 and 2006
- 29E Supplementary purchase slips in the Magdalen Islands in 2005 and 2006

## **List of tables**

- 29.1 Monthly landings in the Magdalen Islands by species  
2005 and 2006 (Quantity)
- 29.1A Monthly landings in the Magdalen Islands by species  
2005 and 2006 (Value)
- 30 Landings average price by species in the Magdalen Islands  
(excluding supplementary purchase slips), 2005 and 2006

### **ATLANTIC COAST LANDINGS**

- 31 Landings in New Brunswick, 2005 and 2006
- 32 Landings in Nova Scotia, 2005 and 2006
- 33 Landings in Newfoundland, 2005 and 2006
- 34 Landings in Prince Edward Island, 2005 and 2006
- 35 Landings on the Atlantic Coast, 2005 and 2006
- 36 Number of commercial fishermen on the Atlantic Coast in 2005 and 2006,  
by province and fishermen category
- 37 Number of commercial fishermen on the Atlantic Coast in 2005 and 2006,  
by administrative region and fishermen category
- 38 Number of vessels on the Atlantic Coast in 2005 and 2006,  
by province and length group
- 39 Number of vessels on the Atlantic Coast in 2005 and 2006,  
by administrative region and length group
- 40 Number of commercial fishing licences issued in 2005 and 2006, on the  
Atlantic Coast, by province and for selected species
- 41 Number of commercial fishing licences issued in 2005 and 2006, on the  
Atlantic Coast, by administrative region and for selected species

## List of tables

### **LANDINGS BY ADMINISTRATIVE REGION DEPARTMENT OF FISHERIES AND OCEANS**

- 42 Landings and associated values, by administrative region in 2005 and 2006

### **COMPARATIVE DATA - INSIDE AND OUTSIDE GULF**

- 43 Landings and associated values inside and outside Gulf of St. Lawrence,  
2005 and 2006

### **PRODUCTION AND MANPOWER IN PLANT**

- 44 Quebec plant production, 2005 and 2006,  
by species and product type
- 45 Gaspé Peninsula plant production, 2005 and 2006,  
by species and product type
- 46 North Shore plant production, 2005 and 2006,  
by species and product type
- 47 Magdalen Islands plant production, 2005 and 2006,  
by species and product type
- 48 Manpower in plant in 2005 and 2006

### **QUEBEC EXPORTS AND IMPORTS OF MARINE PRODUCTS**

- 49 Quebec Exports of marine products in 2005 and 2006
- 50 Quebec Imports of marine products in 2005 and 2006

## **List of figures**

Maritime Sectors in Quebec

**CATCH PORTRAIT OF QUEBEC SECTOR FOR 2005 AND 2006**

**STATISTICAL PROFILE OF SEAL FISHERY**

**ECONOMIC PROFILE OF QUEBEC MAIN FISHING FLEETS**

Shrimpers economic profile, group A, 2005 and 2006

Shrimpers economic profile, group B, 2005 and 2006

Midshore crabbers economic profile, area 12, 2005 and 2006

Midshore crabbers economic profile, area 12 A, 2005 and 2006

Midshore crabbers economic profile, area 12 B, 2005 and 2006

Midshore crabbers economic profile, area 12 C, 2005 and 2006

Midshore crabbers economic profile, area F, 2005 and 2006

Crabbers economic profile, area 14, 2005 and 2006

Crabbers economic profile, area 15, 2005 and 2006

Crabbers economic profile, area 16, 2005 and 2006

## **List of figures**

Economic profile of Gaspé Peninsula lobster fleet, 2005 and 2006

Economic profile of North Shore lobster fleet, 2005 and 2006

Economic profile of Anticosti Island lobster fleet, 2005 and 2006

Economic profile of rock crab fishermen, 2005 and 2006

Economic profile of whelk fishermen, 2005 and 2006

## **Methodology**

The data in this publication are taken from the statistical system of Fisheries and Oceans Canada, Quebec Region. The system consists of three components, all of which were used to produce this report: catch-effort-quotas, people-vessels-licences, and processing plant production and workforce.

Data on people, vessels and licences come from licensing paperwork. The number of licence holders corresponds to the number of people registered with the Department of Fisheries and Oceans, who operated authorized fishing gears under the terms of a commercial fishing licence in 2005 and 2006. The number of vessels is the number of fishing boats licensed in 2005 and 2006. The number of licences is the total number of fishing licences issued, but not necessarily active, in 2005 and 2006.

Data on fish and shellfish landings are provided by commercial buyers, who are required to provide us with a copy of the DFO form to record their purchases from fishermen. Each transaction of this type generally corresponds to one fishing trip. The Enterprise Allocation Monitoring Program, initiated in 1989, now covers some mobile and fixed gear vessels less than 64' 11" and some 65'-100' long, for groundfish in areas 4RST and 3PN. The program also affects all crabbers and shrimpers, as well as many scallopers and surf clam fishers. For these fleets, an additional check has to be carried on the data supplied to the Statistics Service.

Furthermore, to estimate the volume of fish eaten by commercial fishermen and their families, the volume of fish sold directly to the public or used as bait and processed by fishermen themselves, we use an estimation methodology which takes into consideration socio-economic elements, data provided by fisheries officers and resource managers as well as information obtained from fishermen's associations. **This type of data, called “supplementary purchase slips” is being included only in tables where we added a note to that effect.**

Data are gathered, coded and entered locally in each of the maritime sectors: Gaspé, Sept Îles and Cap aux Meules. The concepts and definitions used meet the standards set by the Statistical Coordinating Committee for the Atlantic Coast (STACAC) and are thus compatible with the systems of the other Atlantic regions (the Gulf, Nova Scotia and Newfoundland).

Papers published by the STACAC provide more information on the concepts and definitions used here (see reference list). Some of them are available from Statistics Service at the Quebec City Regional Office.

Figures in the tables on landings have been rounded, so they may not add up to the totals shown.

It should also be noted that some data on salmon, eel, smelt, tomcod, capelin and sturgeon landings were supplied by the Quebec Department of Agriculture, Fisheries and Food (MAPAQ - Ministère de l'Agriculture, des Pêcheries et de l'Alimentation du Québec).

Another important point is that until 1992, seal fishery licences were issued in the maritime sectors and did not figure in the publication of the various statistical tables on fishing licences. In 1993, the policy on licensing for the seal fishery was amended to make it much more like the ones for other types of licences, so seal fishery licences are now counted the same way as other existing licences. To avoid skewing the trend analysis, we decided to publish the seal fishery data separately. Statistical table 4A gives the number of seal fishery licences according to quite specific parameters.

It should be noted that the process of gathering data at the source is the result of the Federal-Provincial Harmonization Agreement on the Quebec Marine Fisheries, the main objective of which was to eliminate duplication of effort in this area.

## **Maritime territory**

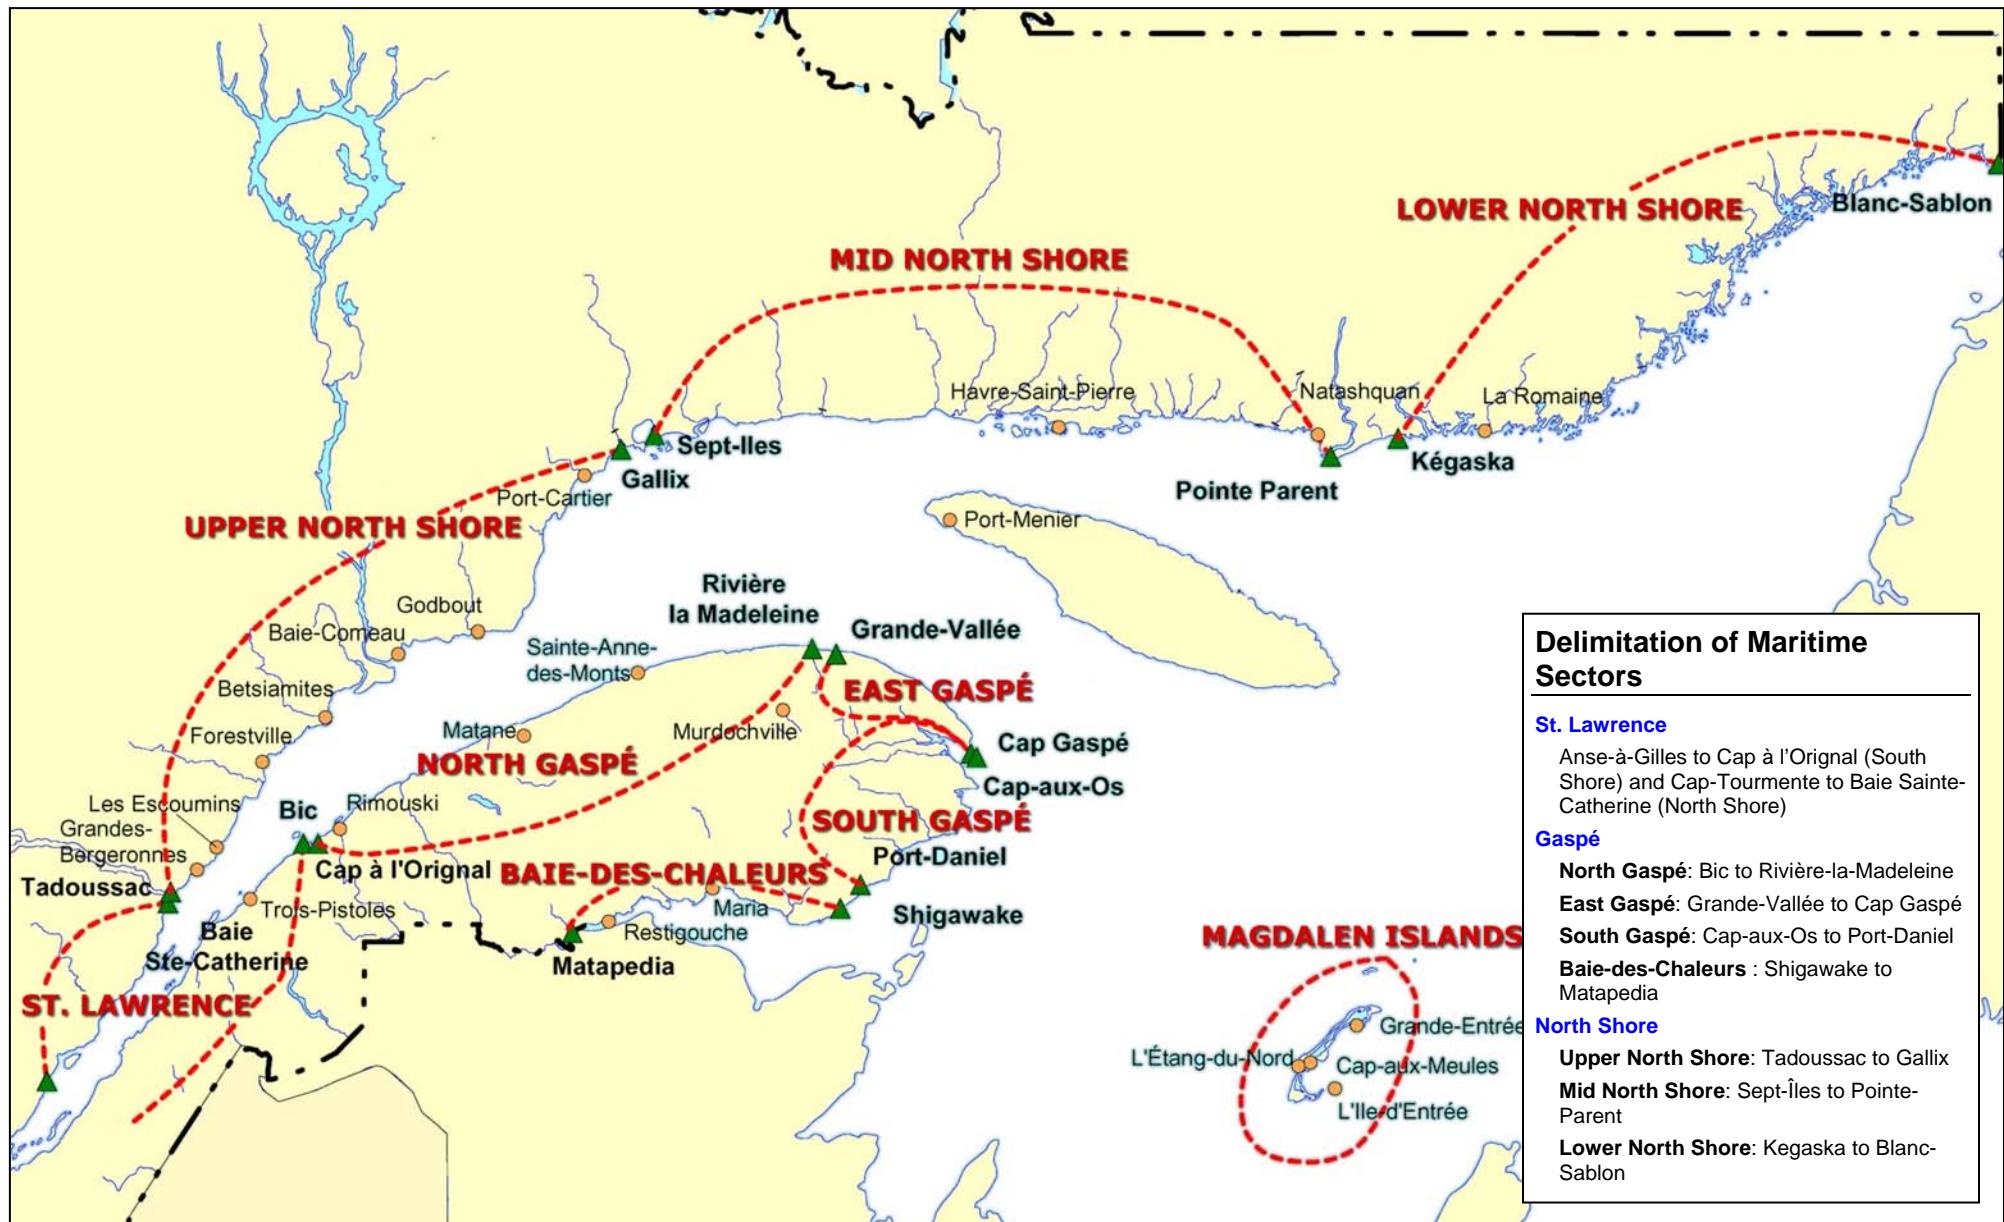

Quebec maritime territory begins at the eastern tip of Île d'Orléans and is divided into four sectors.

The St. Lawrence Sector extends from Anse à Gilles to Cap à l'Original (on the south shore) and from Cap Tourmente to Baie Sainte Catherine (on the north shore). The North Shore Sector lies between Tadoussac and Blanc Sablon (including Anticosti Island). The Gaspé Sector begins at Le Bic and stops at Matapédia. The fourth sector comprises the Magdalen Islands. For more details, refer to the map entitled “Maritime Sectors in Quebec” on next page.

On another basis, the Quebec Region maritime territory is subdivided into 28 statistical districts. These districts are defined by limits represented by geographic points and are used in most statistical systems. This standardization makes it possible to compare the data that DFO has been collecting in Quebec since 1984 with those published by the Bureau de la statistique du Québec for previous years.

The 28 statistical districts, with their geographic limits, are listed in an Appendix.

# MARITIME SECTORS IN QUEBEC

## Conventional Symbols

o	Less than half of the smallest unit used
-	Nil or zero
%	Proportion of a quantity to another expressed as a percentage
Var. %	Percentage variation indicating the size of increases or decreases from one year to the next and calculated as follows:
Var. % =	$\frac{\text{figure from target year} - \text{figure from preceding year}}{\text{figure from preceding year}} \times 100$
<b>N.B.:</b>	All variations presented in this review refer to the years 2005 and 2006 only.
N/A	Information not applicable
N/AV	Information not available
MT	Metric ton
...	Not applicable because of different units
◇	Not publishable, because there were fewer than three buyers or fewer than three fishermen for this fishery (protected information)

## **Definitions of terms used in this publication**

Active fisherman	Fisherman or fisherman's helper who has made at least one landing in the season.
Active fishing enterprise	Fishing enterprise that has made at least one landing in the season.
Active registered licence holders	Any person registered with BAPAP (Bureau d'accréditation des pêcheurs et des aides-pêcheurs) who uses fishing gear authorized by a commercial fishing licence. This definition does not cover fishermen helpers.
Active vessel	A vessel for which at least one landing in the reference year has been counted.
Actual deviation	Difference between data for the year under consideration and the preceding year.
Administrative regions	Regions defined by DFO. In this publication, we refer to the Atlantic administrative regions:  Quebec Region: Encompasses the province of Quebec  Gulf Region: Encompasses coastal areas of the Gulf in New Brunswick and Nova Scotia, as well as the province of Prince Edward Island  Nova Scotia: Encompasses the waters of the Bay of Fundy, the Scotian Shelf and Georges Bank which is the ocean side of Nova Scotia  Newfoundland Region: Encompasses the geographic sector of the same name.
Atlantic Coast	Covers the Quebec, Gulf, Nova Scotia and Newfoundland regions.
Average Price	Total value of all landings sold divided by the total weight landed.

Buyer	Person or firm that commercially purchases fish directly from fishermen.
Certified plant	Any place that fish is processed for export or stored before exporting.
“Commercial fisherman” (southern Gulf)	In the Gulf, a commercial fisherman is a registered fisherman who does not take part in the fisheries fished by vessels with an LOA of 15.2 m (50') or longer and does not meet the requirements of a bona fide full-time or part-time fisherman.
Commercial fishing licence	Designate an instrument by which the Minister of Fisheries and Oceans authorizes, pursuant to his discretionary authority under the Fisheries Act, grants permission to a person including an Aboriginal organization to harvest certain species of fish or marine plants subject to the conditions attached to the licence. This is in no sense a permanent permission; it terminates upon expiry of the licence. The licensee, is essentially given a limited fishing privilege rather than any kind of absolute or permanent “right or property”.
Conversion factor	Ratio used to convert the weight of a product or form of a product on landing into equivalent live weight.
Core	<p>In order to qualify as a member of the core group, a person must meet the following criteria:</p> <ul style="list-style-type: none"> <li>- be the head of an active fishing enterprise, i.e., have fished full time for the previous two years (1994 and 1995) and have a vessel in the fishery; and</li> <li>- hold either two key licences, <b>OR</b> one key licence and in two of the years 1993, 1994 and 1995, have fished for 10 weeks with minimum reported landings of \$5,000 from their own licences for vessels less than 35' and of \$10,000 from their own licences for vessels longer than 35', <b>OR</b> one key licence and, in two of the years 1993, 1994 and 1995, have earned at least 75% of their income from fishing</li> </ul>

License holders who meet the eligibility criteria for the Atlantic Groundfish Strategy (TAGS) or the Northern Cod Adjustment and Recovery Program (NCARP) may use the TAGS or NCARP qualifying years instead.

Key licences are defined as shrimp, crab, lobster, groundfish other than handline, scallop, herring and, on the Lower North Shore, capelin.

Division	NAFO (Northwest Atlantic Fisheries Organization) divisions.
Fishing day	Day in which fishing gear was used with the goal of catching fish to sell.
Gear	Any equipment used to catch fish.
Gulf of St. Lawrence	Coastal areas of the Gulf in New Brunswick, Nova Scotia, western Newfoundland and southern Labrador, as well as Prince Edward Island and Quebec.
ITQ	Individual transferable quota
Landed value	Monetary value of the recorded landed quantity, that is, the landed quantity multiplied by the unit price, or the value supplied by the buyer.
Landing	Quantities of fish and shellfish (molluscs and crustaceans) landed, excluding discards, measured as live weight.
Live weight	Weight (round weight) of a live fish, which can be estimated, if necessary, on the basis of the form at landing using a standard conversion factor.
Non-core	Any fisherman not qualified for membership in the core group.
Non registered licence holders	Non registered holders of active licence refer only to companies, shellfish harvesters, aboriginal fishermen, successions and to licences bought back by DFO.

Other items	Includes sea urchins, lumpfish caviar, scallop roe, other seafood and seal products.
Outside the Gulf of St. Lawrence	Waters of the Bay of Fundy, the Scotian Shelf and Georges Bank that is, the ocean side of Nova Scotia as well as the province of Newfoundland, not including the west coast and southern Labrador.
Quota	For a given species and fishing area, the catch limit set for a segment of the commercial fleet.
Specialized enterprise	Fishing enterprise that has recorded at least 25% of the average value of landings of its reference fleet.
Supplementary purchase slips	<p>These data are used to compile all landings not recorded on general purchase receipts. This information comes from estimates from four different sources:</p> <p>Fish processed by fishermen</p> <p>Direct sales to the public</p> <p>Fish used as bait by fishermen</p> <p>Other landings (including personal consumption by fishermen and their families and sport fishing)</p>
Value	Statistics on value are expressed in current Canadian dollars.

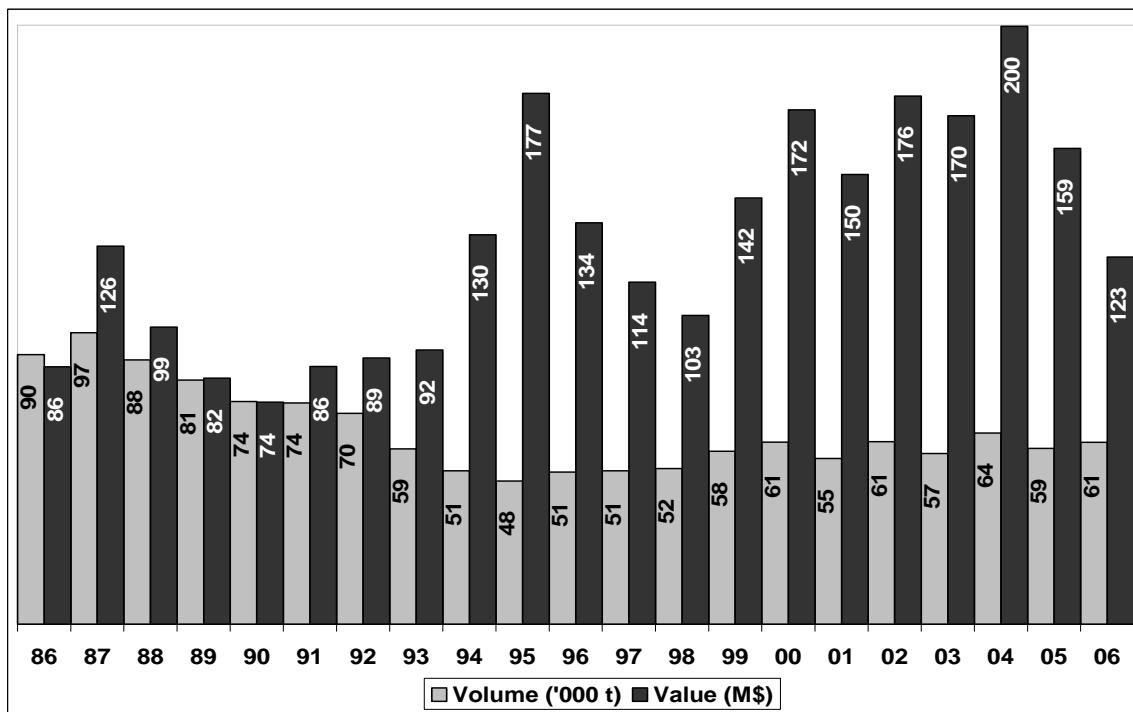

*CATCH PORTRAIT OF*  
*QUEBEC SECTOR*

## **Portrait of the Quebec Capture Sector in 2006**

Quebec landed a total of 60 689 t in 2006, for a value of \$123M, which is 3% more in terms of volume and 23% less in terms of value compared to 2005. This decrease in value of landings is mainly due to a drop in the value of snow crab landed, a species that accounted for 32% of the Quebec total value of landings in 2006. Snow crab landings recorded a loss of \$24M of the value of catches compared to 2005, resulting from a 34% decrease in the price at landing.

The total value of landings for some other species is also facing a drop, this is the case for shrimp (-21%) and lobster (-11%). Concerning the shrimp, the increase of landings of 11% did not compensate the important drop of 29% of the landing price. As a matter of fact, the value of shrimp landings has been facing a drop of 21%.

### **Evolution of Landings by Quebec Fishing Industry, 1986-2006**

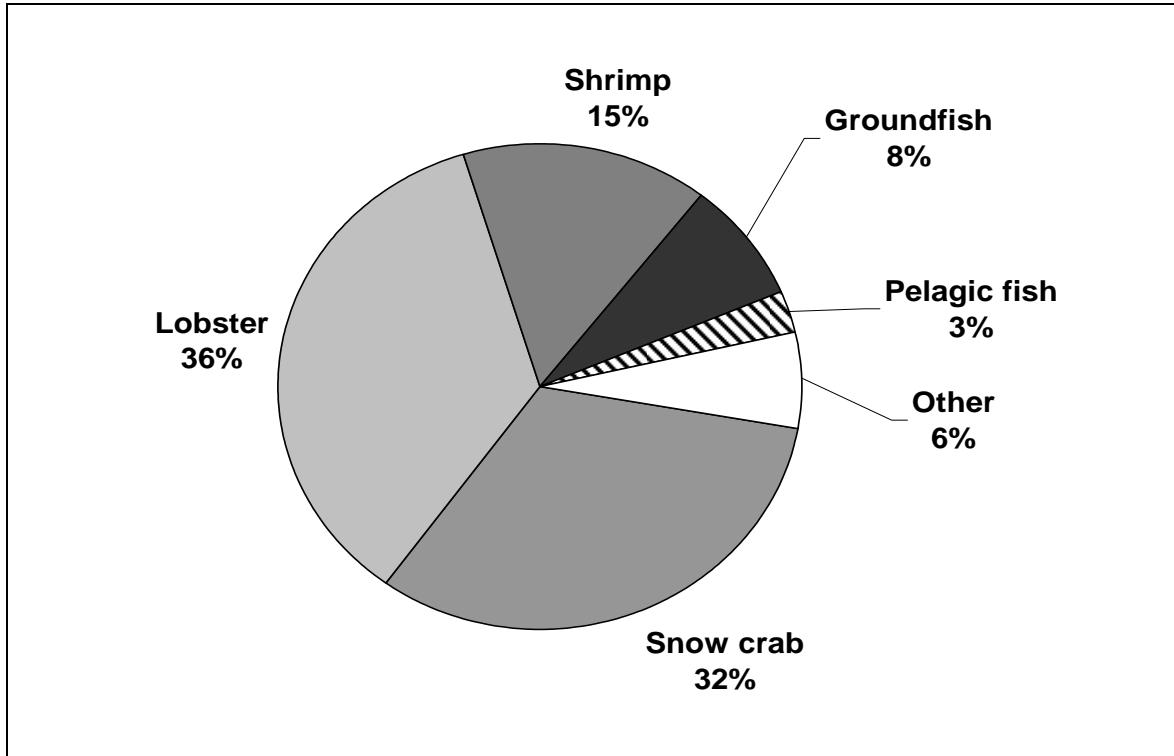

Source: DFO, Quebec Region

Note: Additional receipts are included in the landings.

Among groundfish, we note an important increase of cod landings of 25%. Moreover, we had an increase of the total value of landings of \$700,000 given that the price (gutted head on) increased of 6%. For greenland halibut the catches decreased of 6% while the value of landings decreased of 25%.

The breakdown of landed value by species shows that lobster is the first species in order of importance with a landed value of \$43M representing 36% of all landings. However, the snow crab obtained the second place with a value of \$40M representing 32% of the all landings. Shrimp follows in third place with landings worth \$19M representing 15% of all landings. Together, these three crustaceans represented 83% of the landed value in 2006. Far behind, the value of groundfish and pelagic fish landings was of \$10M (groundfish) and \$3 M (pelagic fish) in 2006.

**Breakdown of the Value of Quebec Landings by Species, 2006**

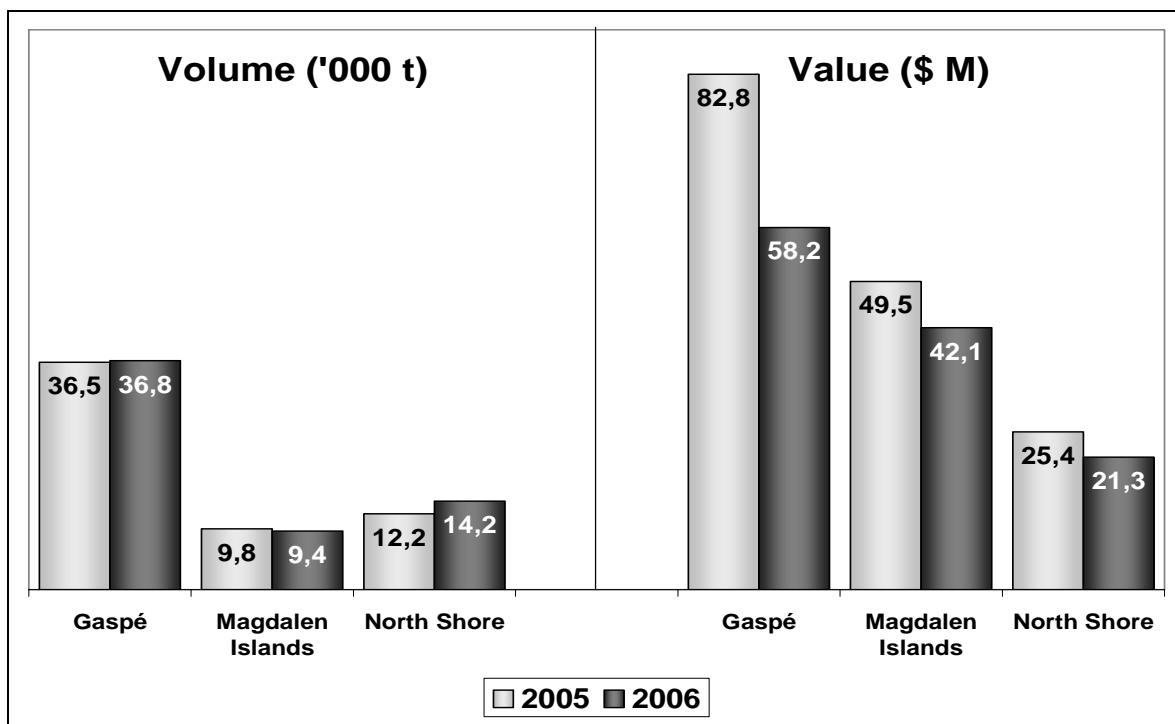

Source: DFO, Quebec Region

At the regional level, Gaspé suffered the largest drop in landed value, being a drop of 30%. This can be explained by the importance of the quantity of snow crab landed among all other species landed in this area. The drop in snow crab prices therefore had a considerable impact on this area. Moreover, the substantial decrease of the landing value of shrimp (-22%) in 2006 also contributed to the decline of the total value of Gaspé landings.

The Magdalen Islands had a \$7M drop for their landings caused mainly by the snow crab and lobster value, being a drop of 35% for snow crab and a drop of 11% for lobster. This impairment of value was due to important reduction of prices paid at landings.

The North Shore landed value nevertheless faced a \$4M drop in 2006. Once again, the significant decrease in the landed price of snow crab is the main cause, notwithstanding an increase in catches of this species (22%).

***RESOURCE***  
***ACCESSIBILITY***

## **Resource accessibility**

In order to achieve its objective of conserving and preserving various fish stocks, DFO imposes control measures each year. Licensing and quotas are responding to this necessity.

Quotas are used to determine the quantities allocated to each fishery, while licensing is an efficient means of controlling access to the various resources.

Licences for anadromous and catadromous species are issued by the Government of Quebec, while the Federal Government looks after licensing for all other species.

- (1) Refers to NAFO (Northwest Atlantic Fisheries Organization) divisions except for Shrimp where we use the management areas as established by the Department of Fisheries and Oceans.
- (2) This global quota is subdivided into individual quotas and is set for Quebec fishers only.
- (3) This global quota is subdivided into individual quotas.
- (4) For this total, figures originating from Newfoundland, Gulf and Scotia Fundy Regions are not final.
- (5) Dates indicating the duration of the fishery except for Herring where we identify the various Spring and Fall fisheries.
- (6) Unit 1 is grouping together 4RST,3PN divisions (January to May) and 4Vn division (January to May) and Unit 2 is grouping together 3Pn division (June to December) and 3Ps,4Vn divisions (June to December).
- (7) For this species only, quantities are indicated in meat weight.
- (8) Considering that these are individual quotas, duration periods are not specified.
- (9) In accordance with Access to Information Act, we are reporting landings against quotas only where there were at least three participants, unless we have the authorization from the concerned participants.

## **Average landed price**

The average landed price by species as indicated here reflects the prices paid to fishermen and is determined by dividing the total value of all landings by the total landed weight.

The average price takes into account the condition of the catch at landing. The advantage of this method is that the significance of the price given can be specified. An identical approach is used for each of the maritime sectors.

It should also be pointed out that the average prices in the following tables exclude supplementary purchase slips, which explains why no figure is given for some species.

TABLE 14

3) The posted value represents all landings of *pandalus borealis* shrimp and *montagui* shrimp as a whole.

***STATISTICAL PROFILE  
OF SEAL FISHERY***

## **Statistics on Seal Fishing Activities**

In this section we are presenting an overview of the activities related to the seal fishery in the Quebec Region. You will find information concerning the number of licences issued per type and per maritime area as well as information concerning the captures of harp seal by fleet, and finally, data relating to the seal fishing observation activities.

### **Context**

The Seal management plan 2006-2010 has been announced during the winter of 2006. The main change compared to the previous plan is the establishment of a precautionary approach to fix the total allowable catches. In 2006, temporary regional shares by traditional geographic area for seal fishing have also been established. The share of the Magdalen Islands has been established at 20% of the available allocation for the Gulf of St. Lawrence while the Quebec North Shore obtained 8%. A 2 000 seal allocation was also available for the Quebec Aboriginal.

This new sharing approach allowed the two concerned Quebec maritime areas to manage their own activities for the seal fishery, as opposed to previous years where the fishery was conducted in a competitive mode for the whole Gulf of St. Lawrence. In this context, even though the fishing season for seal extends from November 15 to May 15 of each year, in 2006 each maritime area has determined opening and closing dates adapted to its own reality.

### **Summary of the Magdalen Islands seal fishery for the 2006 season**

The opening date has been fixed to March 25 for the Magdalen Islands fish harvesters. The activities have been concentrated on a six day period ending on March 30.

As opposed to the previous year, the activities took place in two areas, being the northern part of the Gulf of St. Lawrence and the southern part of the Gulf of St. Lawrence. This situation resulted from the poor ice cover which prevailed in the south of the Gulf of St. Lawrence in 2006.

About ten vessels over 45' long have concentrated their activities in the Belle-Isle Straight while more than 50 vessels less than 45' long were fishing in the southern part of the Gulf of St. Lawrence. Finally, nearly 400 fish harvesters took part in the fishing effort.

The catches were composed of harp seals (beaters). More than 55% of the catches taken by Magdalen Islands fish harvesters came from vessels with a length of more than 45 feet.

### **Summary of the North Shore seal fishery for the 2006 season**

On the Quebec North Shore, the Aboriginal seal fishery has been opened from March 25 to April 3 and from April 15 to 23. The commercial fishery took place from April 7 to 10. We had 126 vessels participating in the fishery, out of which 105 were vessels less than 35' long. These less than 35' long vessels have captured almost 50% of the North Shore allocation. Nearly 500 fish harvesters have participated in the fishing effort.

### **Statistics and graphics 2005-2006**

The available allocation for the Gulf of St. Lawrence was 92 343 seals. At the beginning, 27 856 seals were available for the Quebec, all categories united, including the part set aside for Aboriginal. Later on, the Aboriginal have received a supplementary allocation derived from a transfer from the Maritimes Aboriginal Communities (1 169 seals). Here is the initial distribution of the share allocated to the Quebec Region in 2006:

<b>Area</b>	<b>Allocation</b>
Magdalen Islands	18 469
North Shore	7 387
North Shore – Aboriginal (1)	2 000
Gaspe Peninsula	0
<b>Total QC</b>	<b>27 856</b>

- (1) Available allocation for Quebec Region (2 000 seals) + Transfer of allocation from Maritime Provinces (1 169 seals) = 3 169 seals.

The Quebec Region catches reached 50 582 seals including Aboriginal catches and the transfer from Maritime Provinces. They were distributed as follows:

### **2006 season**

Fleet	Magdalen Islands		North Shore (including Aboriginal)		Gaspe Peninsula (1)		Total Quebec	
	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels
<35' vessels and landsmen	1 376	14	13 987	105	0	0	15 363	119
Vessels between 35' and 45'	8 073	41	3 479	11	0	0	11 552	52
>45' vessels	12 306	11	11 361	10	0	0	23 667	21
<b>TOTAL</b>	<b>21 755</b>	<b>66</b>	<b>28 827</b>	<b>126</b>	<b>0</b>	<b>0</b>	<b>50 582</b>	<b>192</b>

(1) No catches registered by fish harvesters from Gaspe Peninsula in 2006.

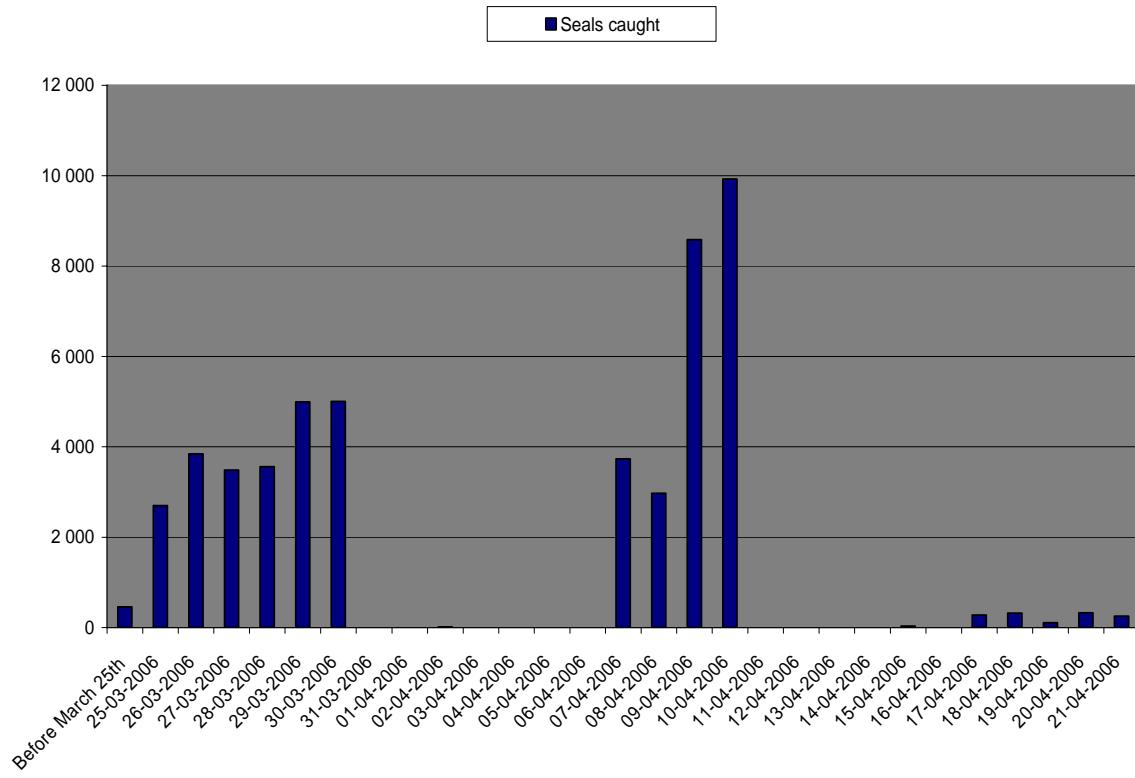

### **Comparison with 2005**

Fleet	Magdalen Islands		North Shore (including Aboriginal)		Gaspe Peninsula (1)		Total Quebec	
	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels	Number of seals captured	Number of active vessels
<35' vessels and landsmen	2 509	14	5 359	104	0	0	7 868	118
Vessels between 35' and 45'	4 554	30	3 832	7	0	0	8 386	37
>45' vessels	7 895	10	5 398	7	0	0	13 293	17
<b>TOTAL</b>	<b>14 958</b>	<b>54</b>	<b>14 589</b>	<b>118</b>	<b>0</b>	<b>0</b>	<b>29 547</b>	<b>172</b>

(2) No catches registered by fish harvesters from Gaspe Peninsula in 2005.

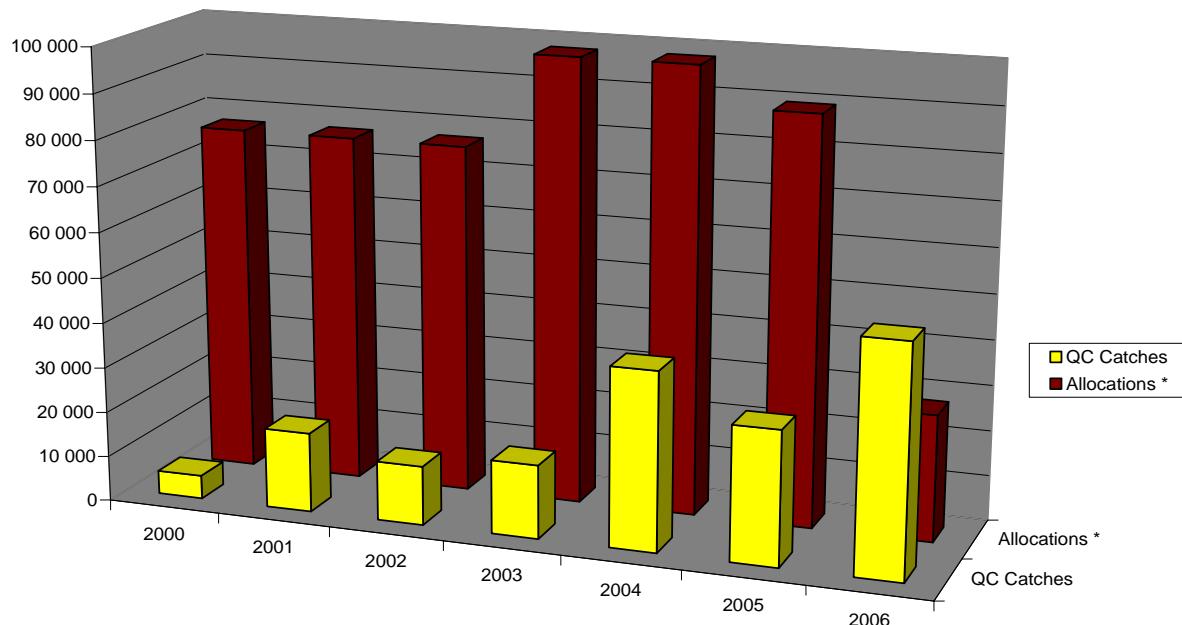

Note: The number of vessels is an approximation, considering that in 2005, the fish harvesters using vessels less than 35' long were not required to register them with DFO.

### Evolution of daily catches, harp seals, 2006 season, Quebec Region

Source : Fisheries and Oceans Canada, Magdalen Islands area

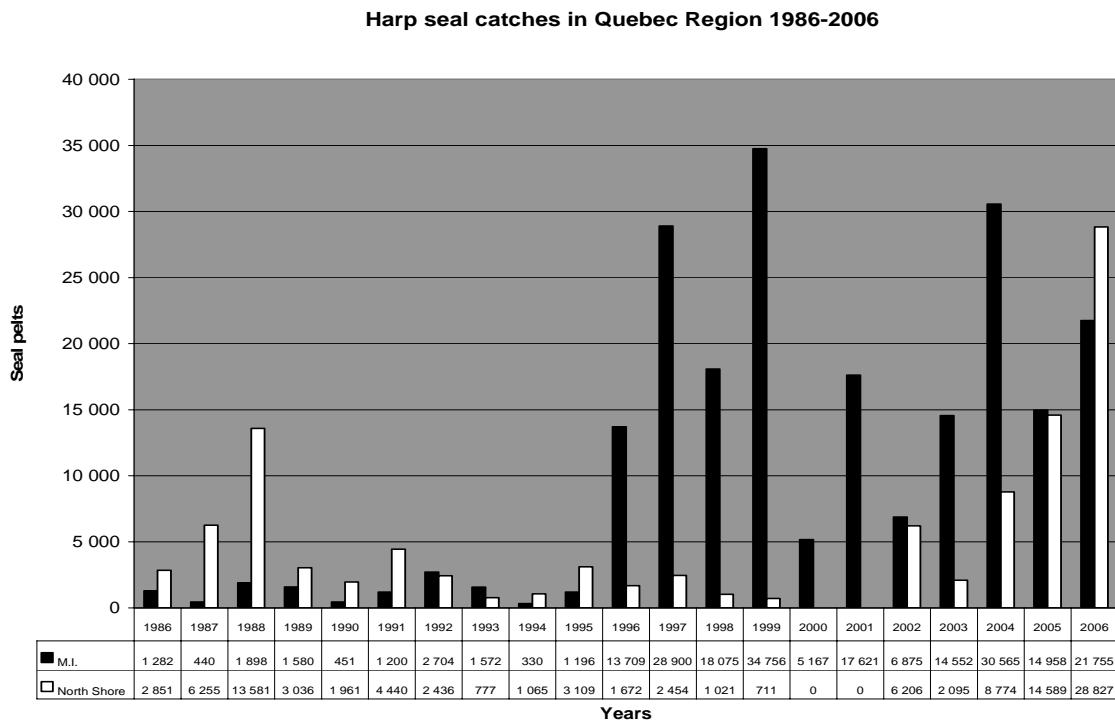

### Quebec seal harvesters catches and allocations for 2000/2006

\* Up to 2005, the allocation was attributed to the Gulf of St. Lawrence as a whole.  
Starting in 2006, the allocation shown on the table is the share attributed to Quebec Region.

Source: Fisheries and Oceans, Magdalen Islands area

## Evolution of catches, by area, per year:

Note: There were no catches registered at DFO for the Gaspe Peninsula for the years mentioned above.

## Statistics on commercial licences

According to the recommendations made by the Industry, DFO has imposed a freeze on the issuance of sealing licences, starting in June 2004, in order to avoid any increase in the fishing effort and to identify the conditions which should encompass the issuance of commercial sealing licences. This freeze however does not apply to Grey Seal fishing licences, nor to Aboriginal.

## Number of commercial sealing licences issued, by type and by maritime area

Number of licences issued	Magdalen Islands		North Shore		Gaspe Peninsula		Total Quebec	
	2005	2006	2005	2006	2005	2006	2005	2006
Commercial Professional	817	906	798	852	59	66	1 674	1 824
Commercial Assistant	113	17	109	45	11	0	233	62
Personal use	6	6	431	395	59	48	496	449
<b>TOTAL</b>	<b>936</b>	<b>929</b>	<b>1 338</b>	<b>1 292</b>	<b>129</b>	<b>114</b>	<b>2 403</b>	<b>2 335</b>

Note: All licences are not necessarily active licences, we can note the approximative number of participants on the first page of this chapter.

## **Statistics on licences to observe the seal fishery**

Each year, observers come to watch commercial seal fishing activities. In order to be authorised near the fishing sites, observers must obtain a seal fishery observation licence and respect the licence conditions. An observation licence is valid for one (1) day and may be renewed on request. In 2006, all observers have been able to get on the ice and some have been able to renew their licence up to 4 times. Individuals, mainly journalists and photographers coming from Canada, United States and from Europe came to observe the commercial fishery. For the first year, licences were issued to observe the seal fishery on the Front (East Coast of Newfoundland).

<b>Seal fishery observation licences</b>	<b>2005</b>	<b>2006</b>	
		<b>Gulf</b>	<b>Front</b>
<b>Number of requests received <sup>(1)</sup></b>	106	74	23
<b>Number of licences issued</b>	60	51	19
<b>Number of days of observation</b>	5	4	4

<sup>(1)</sup> Some people did not make any follow up on their request.

## **Statistics concerning product processing**

In 2006, the Quebec Region fish harvesters' catches have been sold and processed in Quebec and Newfoundland and Labrador. The estimated total value for the sale of seal pelts is worth \$4.2M for Quebec seal fish harvesters.

In Quebec, pelts provide the essential part of the value of the processed products. Once the fat is taken off the pelts and once these pelts are tanned, they take the road to Asia and Eastern Europe. The fat taken out of the pelts is then transformed into oil. Small quantities of meat are also processed for the local market and Quebec market (specialised market), as well as for personal consumption.

***ECONOMIC PROFILE  
OF QUEBEC MAIN  
FISHING FLEETS***

## **Economic Profile of Quebec Main Fishing Fleets**

The Annual Statistics Review 2005-2006 proposes a section intended to the Quebec main fishing fleets. You will find in the following pages, information related to the size of the fleets, the manpower, the fishing effort as well as the average landings for these various Quebec fleets.

In order to characterize each fleet, we have classified them by main species landed, and in some cases, by fishing area, gear type and vessel length. For example, for a fisherman who is fishing groundfish, pelagic fish and crustaceans, we will classify him in the fleet where he gets the higher value for his landings, being groundfish, pelagic fish or crustaceans. In other respects, landings and average prices are always calculated according to a fleet considered as “specialized” or according to a group of specialized enterprises. The expression “specialized” refers to fishing enterprises where their landings represent at least 25% of the average value of their fleet.

In addition, we want to inform you that the data concerning the fleets presented in the next section exclude the statistics for aboriginal fleets to ensure that the average value of the landings could be calculated from comparable data.

Please note that Scallops fleets of the North Shore (fisheries on individual quotas and competitive fisheries), of the Gaspe Area and Magdalen Islands have very few participants. Consequently, data concerning these fleets cannot be disclosed in this review for confidentiality considerations.

Finally, data on the groundfish fleets will be published at a later date as changes are being made to a more precise breakdown. This data will be available on the DFO's Policy and Economics Branch, Quebec Region Web site.

<b>Evolution of average landing, 1997 to 2006</b>																																				
<p>The chart displays the annual average landing for the Magdalen Islands lobster fleet from 1997 to 2006. It features two data series: 'Quantity (mt)' represented by light grey bars and 'Value (thousands of \$)' represented by dark grey bars. The quantity values show a general upward trend, starting at 25 mt in 1997 and reaching 108 mt in 2006. The value series shows a similar upward trend, starting at approximately 22 thousand dollars in 1997 and reaching 99 thousand dollars in 2006.</p> <table border="1"> <thead> <tr> <th>Year</th> <th>Quantity (mt)</th> <th>Value (thousands of \$)</th> </tr> </thead> <tbody> <tr><td>1997</td><td>25</td><td>22</td></tr> <tr><td>1998</td><td>68</td><td>22</td></tr> <tr><td>1999</td><td>62</td><td>29</td></tr> <tr><td>2000</td><td>73</td><td>24</td></tr> <tr><td>2001</td><td>82</td><td>23</td></tr> <tr><td>2002</td><td>93</td><td>21</td></tr> <tr><td>2003</td><td>95</td><td>25</td></tr> <tr><td>2004</td><td>90</td><td>21</td></tr> <tr><td>2005</td><td>104</td><td>15</td></tr> <tr><td>2006</td><td>108</td><td>99</td></tr> </tbody> </table>				Year	Quantity (mt)	Value (thousands of \$)	1997	25	22	1998	68	22	1999	62	29	2000	73	24	2001	82	23	2002	93	21	2003	95	25	2004	90	21	2005	104	15	2006	108	99

## **2005 - 2006 Landings St. Lawrence Sector**

The St. Lawrence Sector is distinguished by a low level of marine fishing activity. Landings made in 2005 and in 2006 for the sector between Anse à Gilles and Cap à l'Orignal on the south shore, and between Cap Tourmente and Baie Sainte Catherine on the north shore, represented respectively 85.0 and 124.5 metric tons for an assorted value .160 and .206 million of dollars. Thus, 2006 landings are higher in quantity and their value has increased of 28.8% compared to 2005.

In 2006, we had 25 active registered licence holders, 2 less than in 2005. Concerning the number of buyers, we have 6 buyers in 2006 compared to 4 buyers in 2005.

To abide by confidentiality regulations, it is not possible for the Department to reveal any information concerning St. Lawrence Sector landings. The small number of participants in marine fishery activities as well as the small amount of catches justify the application of such a confidentiality measure.

**2005 - 2006 Landings**  
**Northern Quebec**

The Department of Fisheries and Oceans has no registered data for 2005 and 2006 for the Northern Quebec Sector.

***PRODUCTION AND  
MANPOWER IN PLANT***

## **Plant production data**

This section concerns fish and seafood processed in Quebec in 2005 and 2006. In this review, production refers to any processing by a plant or any sale of a product to a merchant who buys directly from fishermen. Most of the enterprises listed here are located in the Gaspé, the Magdalen Islands or on the North Shore. Our data-collection network is concentrated in these three regions, although we did obtain information from a few firms in the Quebec City and Montreal areas.

The volume of the various products listed is based on information provided by each of the processing plants and merchants. Value is calculated on the basis of selling prices for each type of seafood. It is important to note that the tables shown in this section are not covering seal fishing data.

Some figures were adjusted if there were discrepancies with the rest of the available data. When making these adjustments, we used the following information as reference points: purchase value of raw material, value of same types of products when processed and, wherever possible, from the same geographic sector, the selling price of the preceding year taking into account variations in prices and inflation.

The data are given for the whole of Quebec and by maritime sector. Note that for reasons of confidentiality, in some cases we have grouped a number of products together.

## **Plant workforce data**

The number of employees in the 2005-2006 statistical review represents the maximum number of people who worked in the same plant over the course of the year (the month with the highest number of employees was used as the yardstick). This method of accounting is based on the following definition of an employee: “An employee is any person working for a definite period for an employer operating an establishment that processes or deals in any seafood product.”

The annual employment survey of processing plants is the source of our information on employment. A few plants, however, provided us with employment information over the telephone. In a few rare cases, we made estimates, based on information gathered by DFO staff.

## ***APPENDICES***

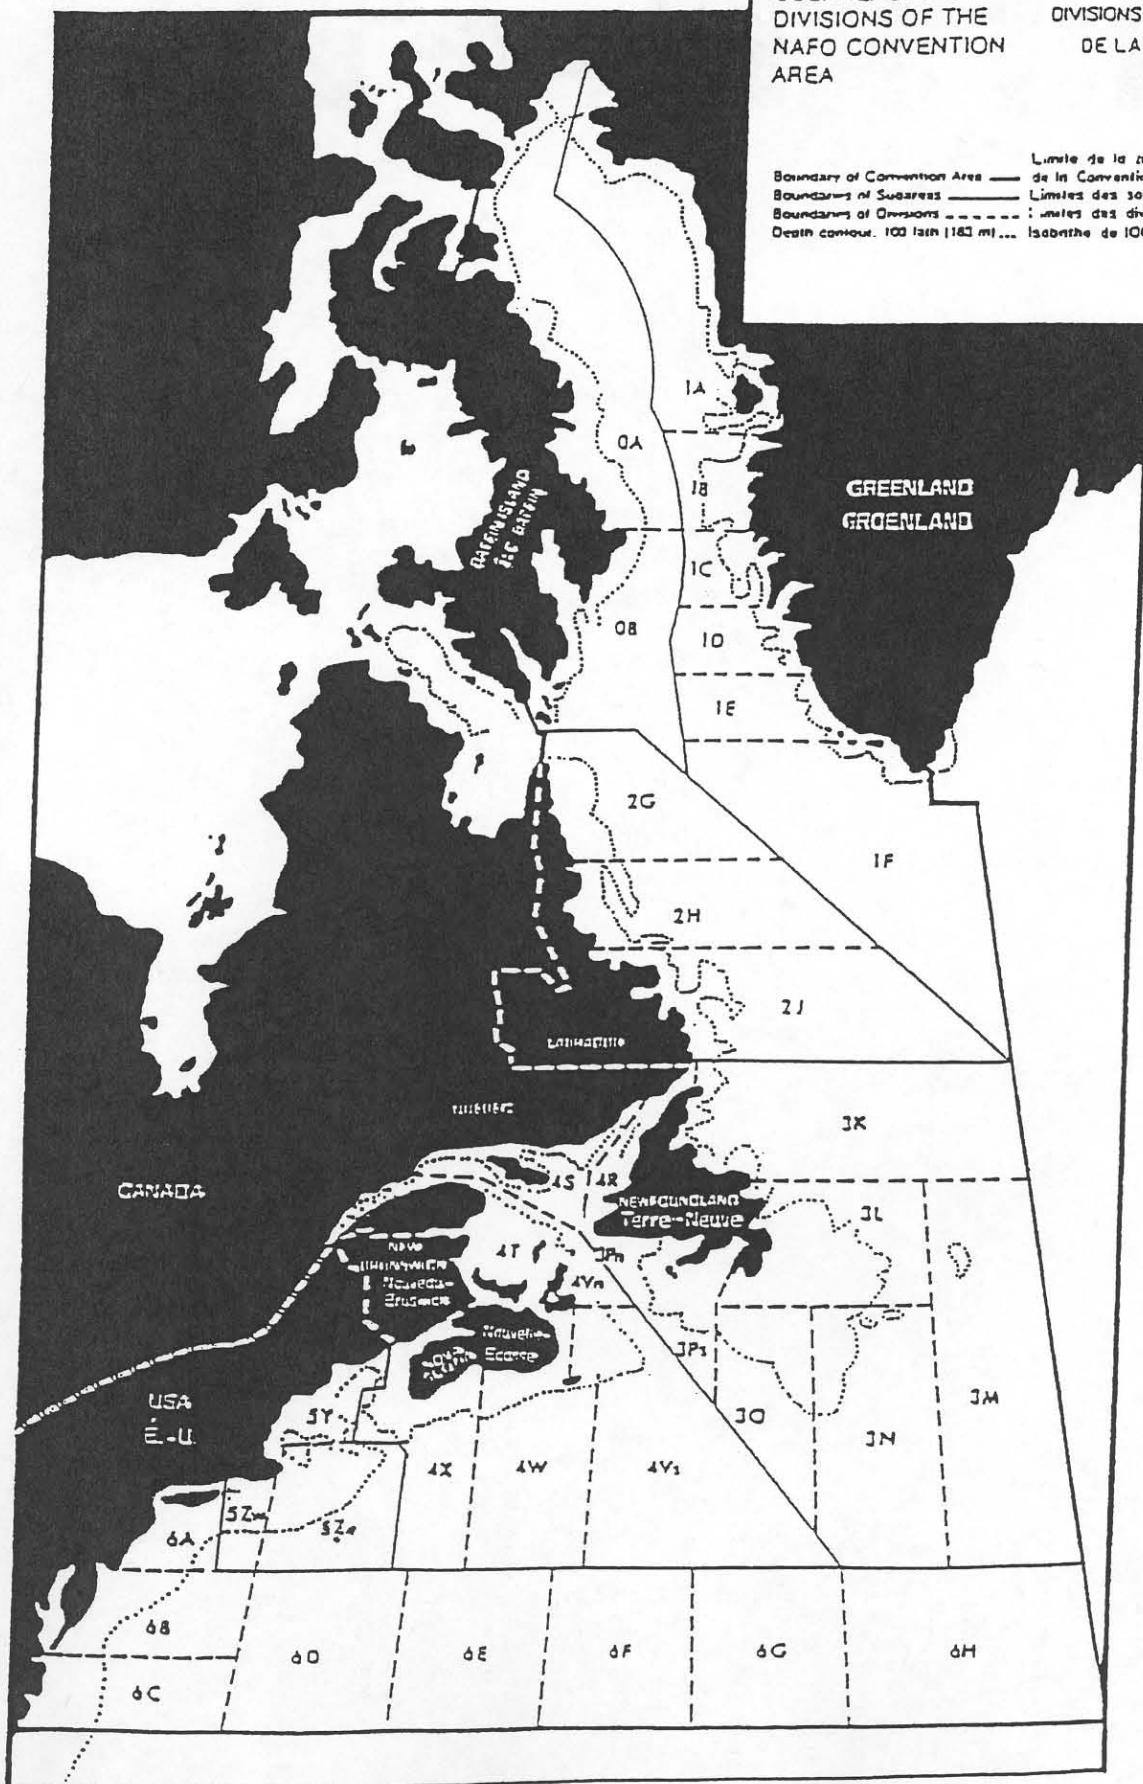

## APPENDIX 1

### Boundaries of Quebec maritime statistical districts

<u>District</u>	<u>Geographic point</u>	<u>Landing point</u>
1	Anse à Gilles to Pointe Rouge	Anse à Gilles to St-Roch-des-Aulnaies
2	Pointe Rouge to Notre-Dame du Portage	Ste-Anne de la Pocatière to St-André
3	Notre-Dame du Portage to Ste-Luce	Notre-Dame du Portage to Cap-à-l'Original
4	Ste-Flavie to eastern boundary of Matane County	Ste-Flavie to Petits Méchins
5	Cap-Chat to Duchesnay	Fonderie to Ruisseau Castor
6	Duchesnay to St-Hélier	Ruisseau à Rebours to Anse à Thibault
7	St-Hélier to Petite Rivière-au-Renard	Ruisseau à l'Ail to Petit Cap
8	Petite Rivière-au-Renard to Cap des Rosiers	Petite Rivière-au-Renard to Cap des Rosiers
9	Cap Gaspé to Pointe St-Pierre	Cap Gaspé to Pointe Navarre
10	Pointe St-Pierre to Brèche à Manon	Malbay to Weygand
11	Brèche à Manon to Pointe Maquereau	Brèche à Manon to Newport
12	Pointe Maquereau to New Carlisle	Pointe Maquereau to Cullens Brooks
13	New Carlisle to Rivière Grande-Cascapédia	New Carlisle to St-Siméon ouest
14	Rivière Grande-Cascapédia to Pointe Miguasha	Maria to Pointe Bourg
15	Pointe Miguasha to Rivière Restigouche	Miguasha to Matapédia
16	Cap Tourmente to Rivière Saguenay	Petite Rivière St-François to Cap-Brûlé
17	Rivière Saguenay to Bersimis	Tadoussac to Anse à Bouleau
18	Bersimis to Rivière Ste-Marguerite	Bersimis to Îles de May
19	Rivière Ste-Marguerite to Rivière Pigou	Sept-Îles to Maloténam
20	Rivière Pigou to Havre St-Pierre	Rivière aux Graines to Rivière Pigou
21	Havre St-Pierre to Rivière Kégaska	Havre St-Pierre to Pointe Parent
22	Rivière Kégaska to Baie des Moutons	Rivière Kégaska to Chevery
23	Baie des Moutons to Bonne Espérance	Baie des Moutons to Rivière St-Paul
24	Bonne Espérance to Blanc Sablon	Bonne Espérance to Îles Demoiselles
25	Île d'Anticosti	Anticosti
26	Îles-de-la-Madeleine, northern division	Havre-aux-Maisons to Lapointe
27	Île du Havre Aubert to l'Île d'Entrée	Havre Aubert to l'Île d'Entrée
28	Île de Cap-aux-Meules	Cap-aux-Meules to Cap Vert

N.B.: The geographic points that mark the boundaries of the statistical districts are shown here with the corresponding points of landing.  
There are thus two types of boundaries for each district.
