New Home Market

Condominium Townhouse and Apartment Starts Up

New home starts in the Hamilton Census Metropolitan Area (hereafter referred to as Hamilton) reached their highest level since the peak in 2004. Builders started 3,529 new homes last year in Hamilton, an 18 per cent increase from 2007. Much of the increased

activity in new home construction was due to starts of semi-detached homes, townhouses and condominium apartments which rose by one-third over 2007. At the same time, single-detached starts fell to 1,675 units from 1,761 a year ago, though the decline varied by sub-market. Starter homes such as townhouses and condominium apartments may have appealed more to some buyers who were

Figure 2

looking for more reasonably priced home options since the average price of a new, single-detached home climbed above \$400,000 last year. Also, the popularity of condominium ownership in Hamilton has kept builders busy with double the number of condominium townhouse and apartment starts this year as compared to 2007.

New home starts increased in every sub-market across Hamilton except for in Grimsby and Glanbrook. In other areas, there were notable increases in new home construction starts with condominium units dominating in Burlington, Ancaster, and Dundas. The decline in Grimsby and Glanbrook reflected the shift in demand away from single-detached houses. Single-detached starts also fell in the former Hamilton City.

Starts in the fourth quarter helped to boost total starts for the year in Hamilton. There were 780 starts of new homes last quarter, up 25 per

cent as compared to the fourth quarter of 2007. A new condominium apartment building as well as several freehold and condominium townhouse projects started in Burlington in October contributed to the climb in new home starts last quarter.

In Brantford, total new home starts dropped by one-third in 2008 as compared to the previous year. There were 432 starts of new

homes in Brantford in 2008, and just 83 starts during the fourth quarter. Single-detached homes continued to dominate the Brantford new home market, but starts of this housing type dropped by more than half last year. The number of condominium townhouse and apartment starts rose last year, increasing their proportion of total starts to 19 per cent. The shift of demand away from single-detached houses may be in response to the rising average price of these homes. It reached \$254,000 last year, nearly 14 per cent higher than in 2007.

Resale Home Market

Fewer Existing Home Sales

The resale home market cooled in 2008, but sellers' market conditions continued to prevail. Sales of existing homes in Hamilton last year fell by 15 per cent to 12,110 units sold. At the same time, listings increased, bringing the sales-to-new-listings

Figure 3

Figure 4

ratio down to 61 per cent from 73 per cent a year ago¹.

Average home prices rose at a rate that was closer in line with the rate of inflation than in the past several years. Last year, the average price of an existing home in Hamilton was \$280,790, an increase of 4.4 per cent from 2007. Average home prices and the rate of change varied across sub-markets. Stronger home price increases occurred in Hamilton Centre and Flamborough. Flamborough also had the highest average home price at \$471,000. Prices fell only in Ancaster to \$373,000. For the quarter ending in December, sales dropped considerably and the average price of an existing home was \$260,900.

In Brantford, existing home sales decreased by 10 per cent last year,

and the sales-to-new-listings ratio dropped to 57 per cent from 67 per cent a year ago. The average price of an existing home in Brantford last year continued to rise to \$218,890, up 4.7 per cent. Stronger price increases during the first three quarters of the year boosted the average price up, while the average price fell during the fourth quarter to \$212,650.

Economic Trends

Persistent Economic Weakness

Economic weakness continues to persist in the local and national economies and the impact has been reflected in the housing market. Though total employment remained steady in Hamilton last year, full-time jobs fell by 1.5 per cent. Fewer full-time jobs and uncertainty in the economy

translated into fewer households looking to purchase a home. Manufacturing employment tumbled to its lowest level in a decade last year with jobs lost in most in product manufacturing sectors such as food and furniture manufacturing. However, employment in other sectors such as trade, finance, insurance, real estate, and construction were up, and service sector employment (excluding trade, health and transportation) continued to rise to record levels. In contrast, part-time jobs increased for all age groups, with nearly 6,000 part-time jobs added to the labour market. This resulted in a lower rental vacancy rate last year, indicating more people stayed in their rental accommodation in anticipation of a weakening economy.

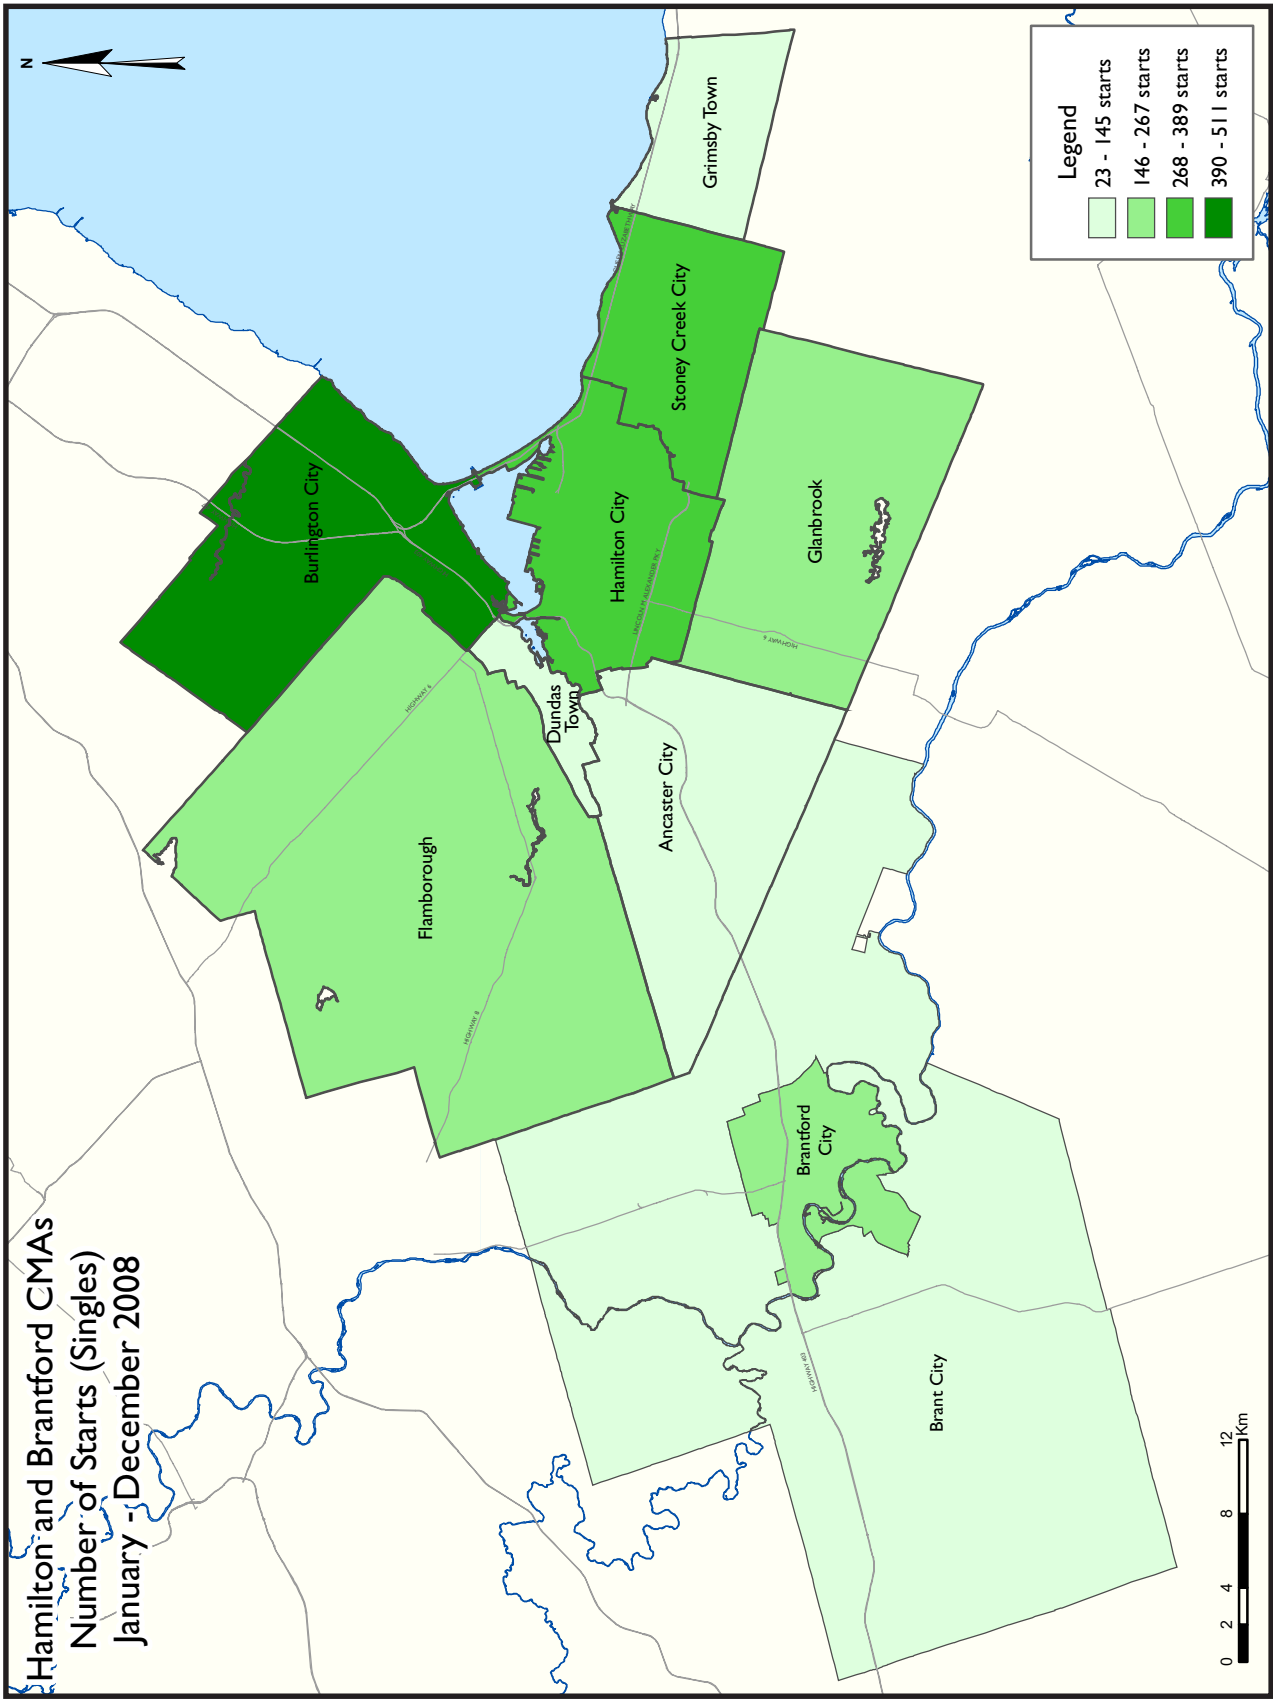

In Brantford, total employment rose by a modest 1.7 per cent last year, boosted by an increase in full-time jobs. Although employment conditions were stable and the relatively less expensive home market in Brantford is attractive, consumers continue to hesitate in making home purchases.

¹A market with an SNLR above 55 per cent and prices rising above the rate of inflation signifies sellers' market conditions. Alternatively, a market with an SNLR below 32 per cent indicates buyers' market conditions and a balanced market occurs when the SNLR is between 32 and 55 per cent..

METHODOLOGY

Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

DWELLING TYPES:

A **“Single-Detached”** dwelling (also referred to as **“Single”**) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A **“Semi-Detached (Double)”** dwelling (also referred to as **“Semi”**) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“Row (Townhouse)”** dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term **“Apartment and other”** includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

INTENDED MARKET:

The **“intended market”** is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A **“Rural”** area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.
Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to www.cmhc.ca/housingmarketinformation
