¹The outlook is subject to uncertainty. Although point forecasts are presented in this publication, CMHC also presents forecast ranges and risks where appropriate. The forecasts included in this document are based on information available as of October 1, 2009.

Overview¹

Housing starts will rise moderately in Atlantic Canada in 2010 following an expected decline in 2009. Both singles and multiples will decline this year as economic growth continues to be affected by the global slowdown.

A gradual recovery is expected in 2010. The housing sector in Atlantic Canada is forecast to show positive growth of over four per cent in 2010. A favourable interest rate environment for consumers and additional fiscal and monetary stimulus will provide support for positive economic growth and housing activity in 2010.

Low vacancy rates will support an increase in multiples activity, as builders begin to refocus their efforts in 2010. Demographic trends related to an aging population and improving financial conditions will also help support a rebound in 2010.

Prices Will Continue to Rise in 2010

With inventory levels remaining lower in 2009, the growth in prices in the existing home market has continued, with prices up six per cent so far in 2009. It is expected that the growth in prices will remain close to current levels for the remainder of 2009, with a further rise of three per cent in 2010.

MLS® Sales Will Increase in 2010

In 2009, existing home sales activity is expected to decline across the region. Favourable market conditions including lower inventory levels and historically low mortgage rates, will continue to allow potential homeowners, particularly first time home buyers, to enter the market. As a result, the 2009 forecast continues to improve from previous forecasts, with sales expected to now decline less than 12 per cent. Momentum in the market will continue in 2010, as sales are expected to rise over four per cent.

Economic Forecast

The recent rise in both the dollar and energy prices has impacted the current and future growth prospects for exporters. Additional spending in 2009-2010 on infrastructure projects at both the provincial and municipal levels across Atlantic Canada, will help offset some of the expected decline in 2009. A global recovery and improvements in consumer activity will help support positive economic growth in 2010.

For Newfoundland and Labrador, weaker oil prices and natural declines in oil production have resulted in significant declines in manufacturing

shipments. At the same time, significant growth in labour income has resulted in positive retail sales in 2009. Infrastructure spending in 2009-2010 by the provincial government will offset some of the expected decline in private sector spending.

For Nova Scotia, growth in the service sector is offsetting declines in the goods sector. This has included growth in educational services, accommodation and food services and the public sector. Consumer spending in 2009 has been weak, although the current environment for interest rates is supportive for future growth in 2010.

The economic downturn in New Brunswick in 2009 resulted mostly from soft commodity prices, combined with a stronger Canadian dollar, as well as a decline in capital spending, as large scale projects are now complete or near completion. This will be partially offset by increased spending in 2009-2010 on infrastructure projects at both the provincial and municipal level.

Consumer spending in Prince Edward Island was weaker as of July 2009 compared to the same seven month period of 2008. An improving trend in auto sales and higher labour income suggest, however, that the outlook will become more positive in 2010. Tourism operators were expecting to do better in 2009 although the outlook has been affected by the poor weather in June and July. Better weather in August and the Canada Summer games have helped to increase tourism activity. The agriculture sector is doing better, as a result of higher potato exports. Prices are expected to improve moderately, as a result of a reduction in planted acreage.

CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.

For more information, visit our website at www.cmhc.ca

You can also reach us by phone at 1-800-668-2642 or by fax at 1-800-245-9274.
Outside Canada call 613-748-2003 or fax to 613-748-2016.

Canada Mortgage and Housing Corporation supports the Government of Canada policy on access to information for people with disabilities. If you wish to obtain this publication in alternative formats, call 1-800-668-2642.

The Market Analysis Centre's (MAC) electronic suite of national standardized products is available for free on CMHC's website. You can view, print, download or subscribe to future editions and get market information e-mailed automatically to you the same day it is released. It's quick and convenient! Go to www.cmhc.ca/housingmarketinformation

For more information on MAC and the wealth of housing market information available to you, visit us today at www.cmhc.ca/housingmarketinformation

To subscribe to priced, printed editions of MAC publications, call 1-800-668-2642.
