

HOUSING MARKET OUTLOOK

Quebec Region Highlights

Canada Mortgage and Housing Corporation

Date Released: Third Quarter 2009

Latest CMHC forecast for 2009 and 2010

Overview

A notably weaker economic environment, combined with increased supply of homes will lower housing construction in Quebec this year. Despite favorable buying conditions, housing starts will descend to the 43,000 level in 2009. Meanwhile, sales of existing homes decrease by approximately 5 per cent. The province's economy and housing sector will both show signs of growth in 2010.

Quebec's economy, whose growth went from 2.6 per cent in 2007 to 1.0 per cent last year, has contracted in the fourth quarter of 2008 and in the first quarter of 2009. Domestic consumption, which has largely sustained the province's economy, is no longer in growth mode. Indeed, recent losses in the labour market combined with the currently high level of economic uncertainty will continue to hold back household spending in the near term. This, in turn, will further compromise private investment. Moreover, exports will record continued weakness in 2009 as

Figure 1

Figure 2

external (foreign and Canadian) demand weakens.

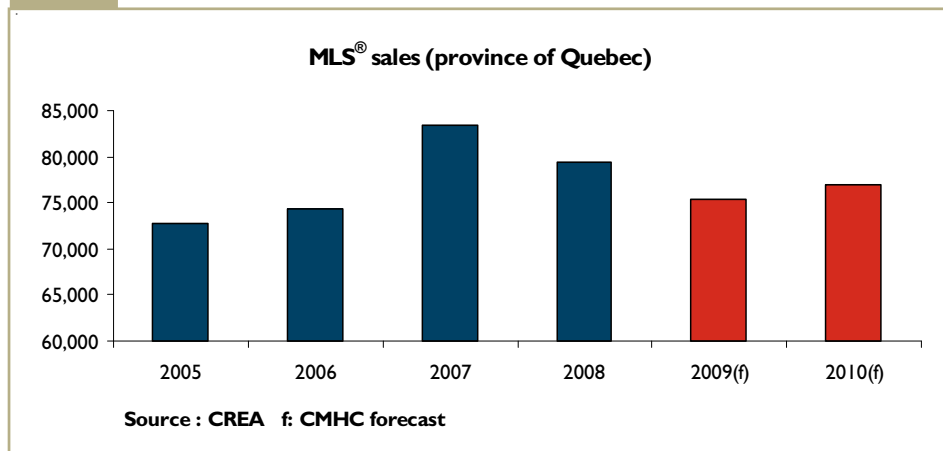

Household spending will likely continue to decrease as a result of a declining and uncertain labour market and lower disposable income growth. However, prompt government actions such as increased spending on infrastructure projects and recent fiscal and monetary stimulus plans will undoubtedly moderate the extent of economic contraction. The less concentrated Québec's industrial base is in the automobile sector and the more robust housing markets will also moderate the economic downturn in 2009. The Québec economy is expected to recede by 2 per cent in 2009, while job growth will register a decline of 1.1 per cent. In 2010, the economy will grow by 1.4 per cent while the labour market begins to recover (0.4 per cent).

Mortgage rates

The Bank of Canada cut the target for the Overnight Rate in the early months of 2009. The rate was 1.50 per cent at the start of 2009 and has since fallen to 0.25 per cent. The Bank of Canada has committed to keeping the target at 0.25 per cent through the middle of 2010 unless inflationary pressures warrant an increase.

Mortgage rates have fallen in the last few months and are now expected to be relatively stable throughout 2009, remaining within 25-75 basis points of their current levels. Posted mortgage rates will gradually increase through 2010, but will do so at a slow pace. For 2010, the one-year posted mortgage rate will be in the 4.00-5.25 per cent range,

Figure 3

while three and five-year posted mortgage rates are forecast to be in the 5.50-6.75 per cent range.

In Detail

Single Starts: This segment will undoubtedly be affected by the economic and financial environment, as well as by the recently rising supply of resale homes. Affordability has become more of an issue, prompting homebuyers to turn to the resale market, where supply is more abundant and prices have flattened. As well, semi-detached and row housing are likely to be viewed as substitutes. Approximately 17,600 starts are expected in 2009 and just under 18,000 in 2010.

Multiple Starts: These recent years, vigorous construction of retirement homes and condominiums brought multi-family starts to historically high levels in Québec markets. Given the fact the growth rate of the population aged 75 and over will temporarily slow and given current supply, starts in this category will drop to approximately 25,500 units in 2009 and just over 23,000 in 2010.

Resales: Sales of existing homes will decline in 2009, but will remain at a relatively high level. Demand for condominiums will still be an important component, but will nevertheless decrease. The Multiple Listing Service (MLS) will record over 75,000 sales in 2009. Being the first market to react to the economic recovery, resales will amount to 77,000 in 2010.

Prices: Lower sales and higher inventories will continue to take pressure off prices. Cooling demand should rule out price growth in 2009. As a result, the MLS average resale price will post growth of 1.4 per cent to \$213,700 in 2009. Slightly evolving market conditions will translate into marginal price growth in 2010, as the average MLS price surpasses the \$215,000 level.
