

# HOUSING NOW

## Ottawa<sup>1</sup>

CANADA MORTGAGE AND HOUSING CORPORATION

Date Released: November 2009

### New Home Market

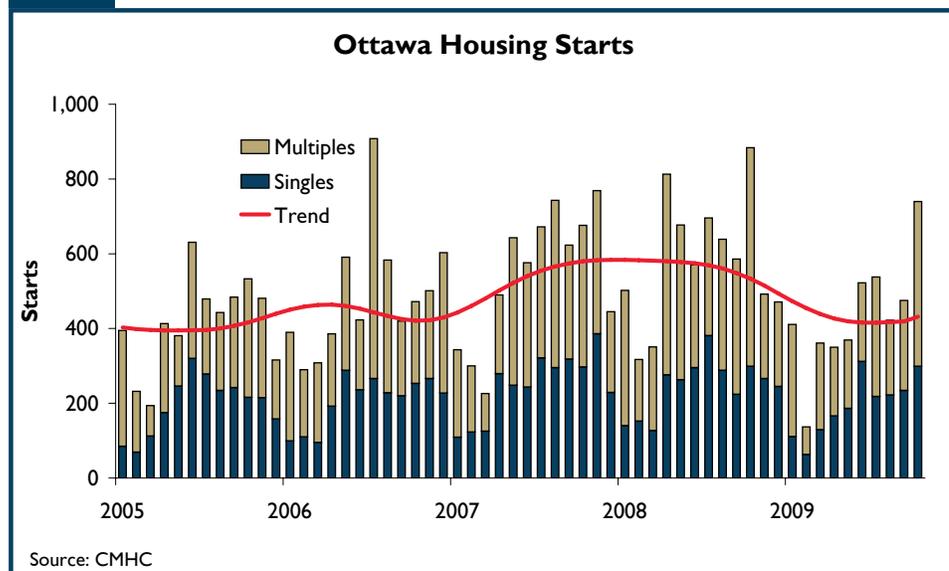

#### Tight Resale Market Driving High Ottawa Starts in October

Total housing starts in the Ottawa Census Metropolitan Area (CMA) declined from 884 units in October 2008 to 740 units this year.

The high number of starts in October led to an improvement in the year-to-date pace, even as they were compared to the highest-recorded

construction activity for October last year. The expectation of stronger spill-over demand from a historically tight resale market into new home starts finally materialized this past month. As further signs of a recovering labour market continue to emerge, households in Ottawa are clearly taking advantage of low mortgage rates to come up with renewed appetite for new homes. So far in 2009, total construction activity is just over 28 per cent below last year, largely consistent with CMHC's forecast.

<sup>1</sup> Ontario part of Ottawa-Gatineau CMA

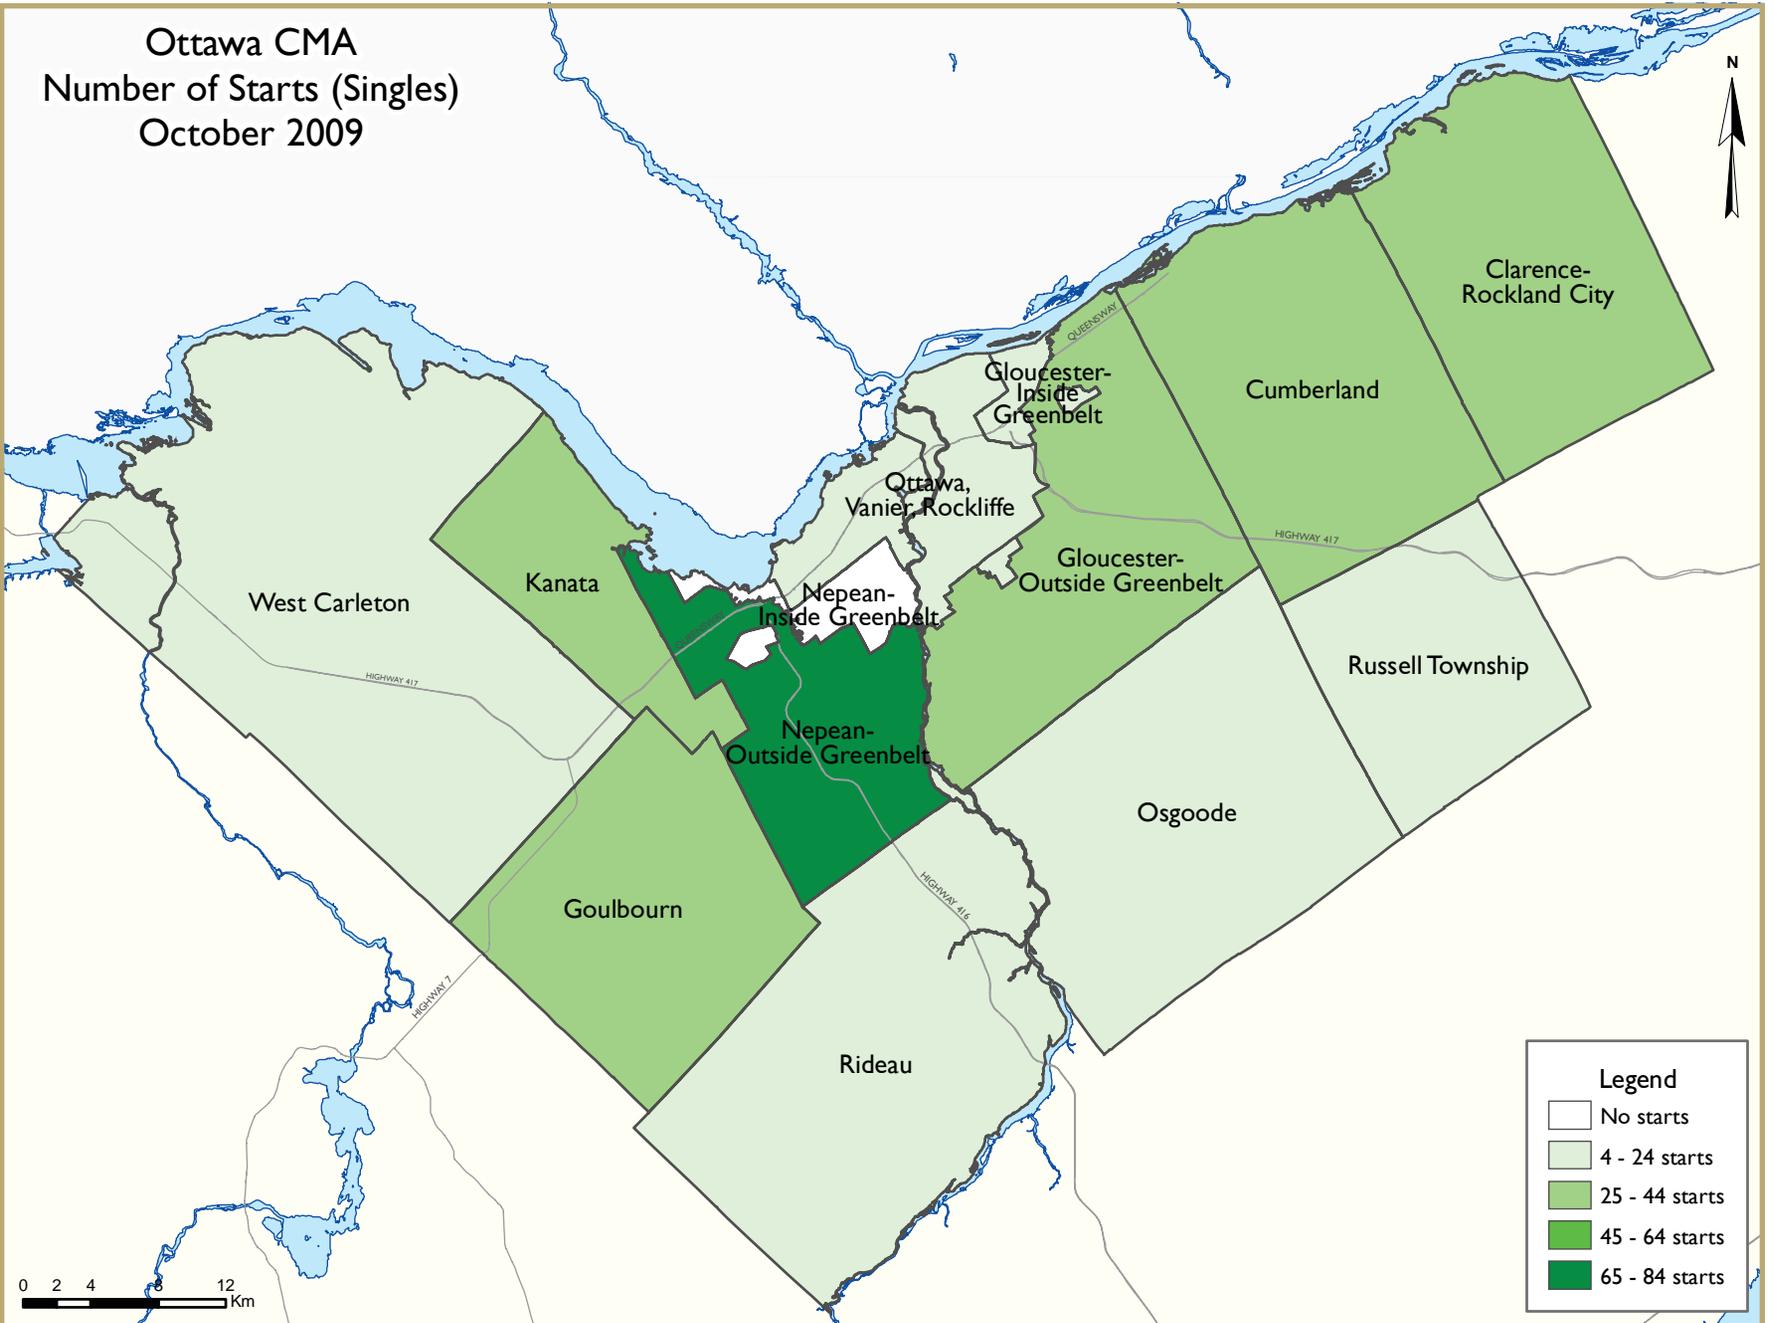

While all housing types experienced an active construction month, it was the single-detached housing segment that stood out with 40 per cent of all starts. Single-detached construction was the second highest so far this year and matched last October with 299 homes starts, which comes as another sign of a recovering market. As well, the presence of first-time buyers continued to be felt as they kept demand high for new semi-detached homes and townhomes, with 44 and 222 new units respectively. The apartment segment for its part added 175 new units for the second best month this year.

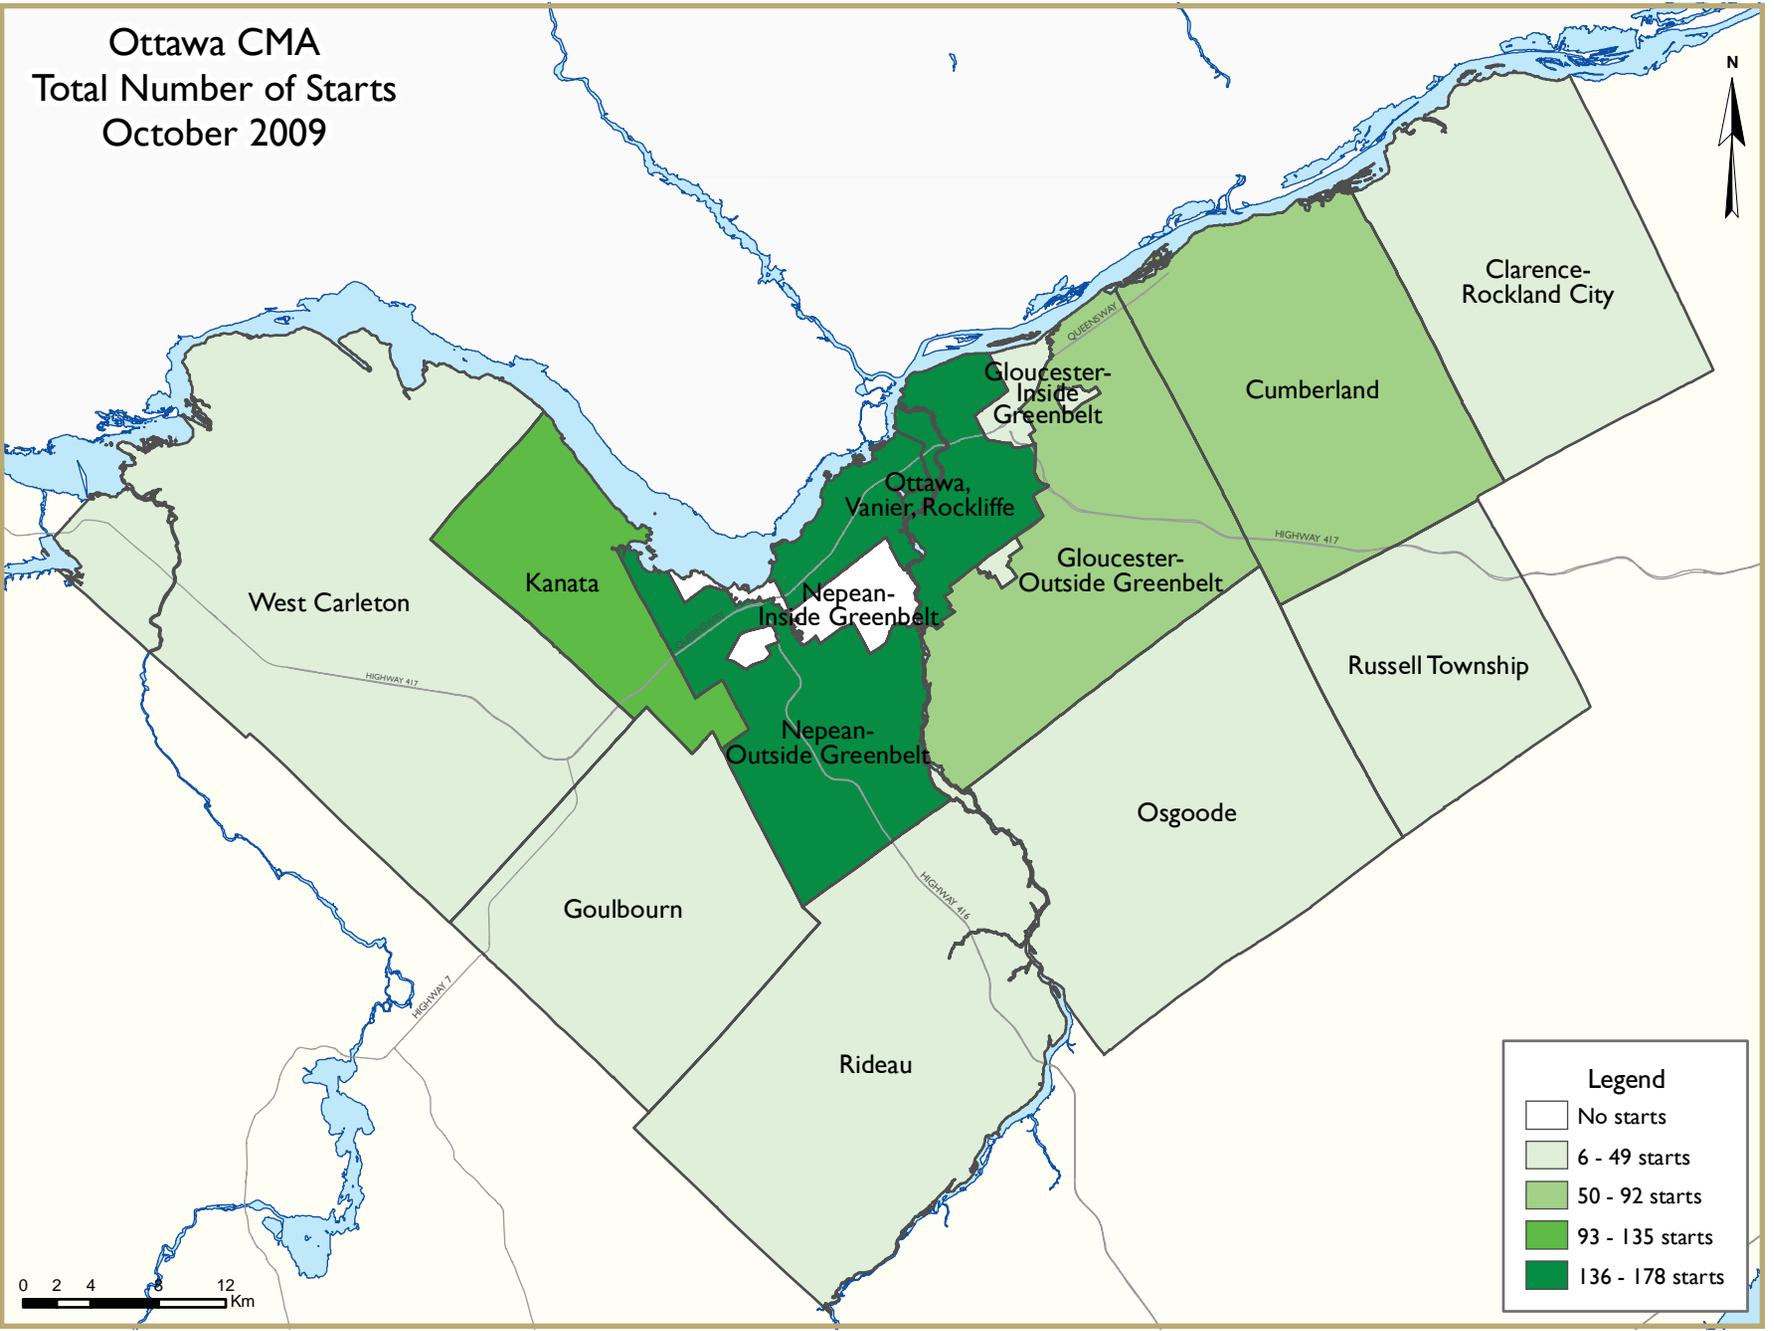

Construction broke ground strongly in the Old city of Ottawa with 178 new

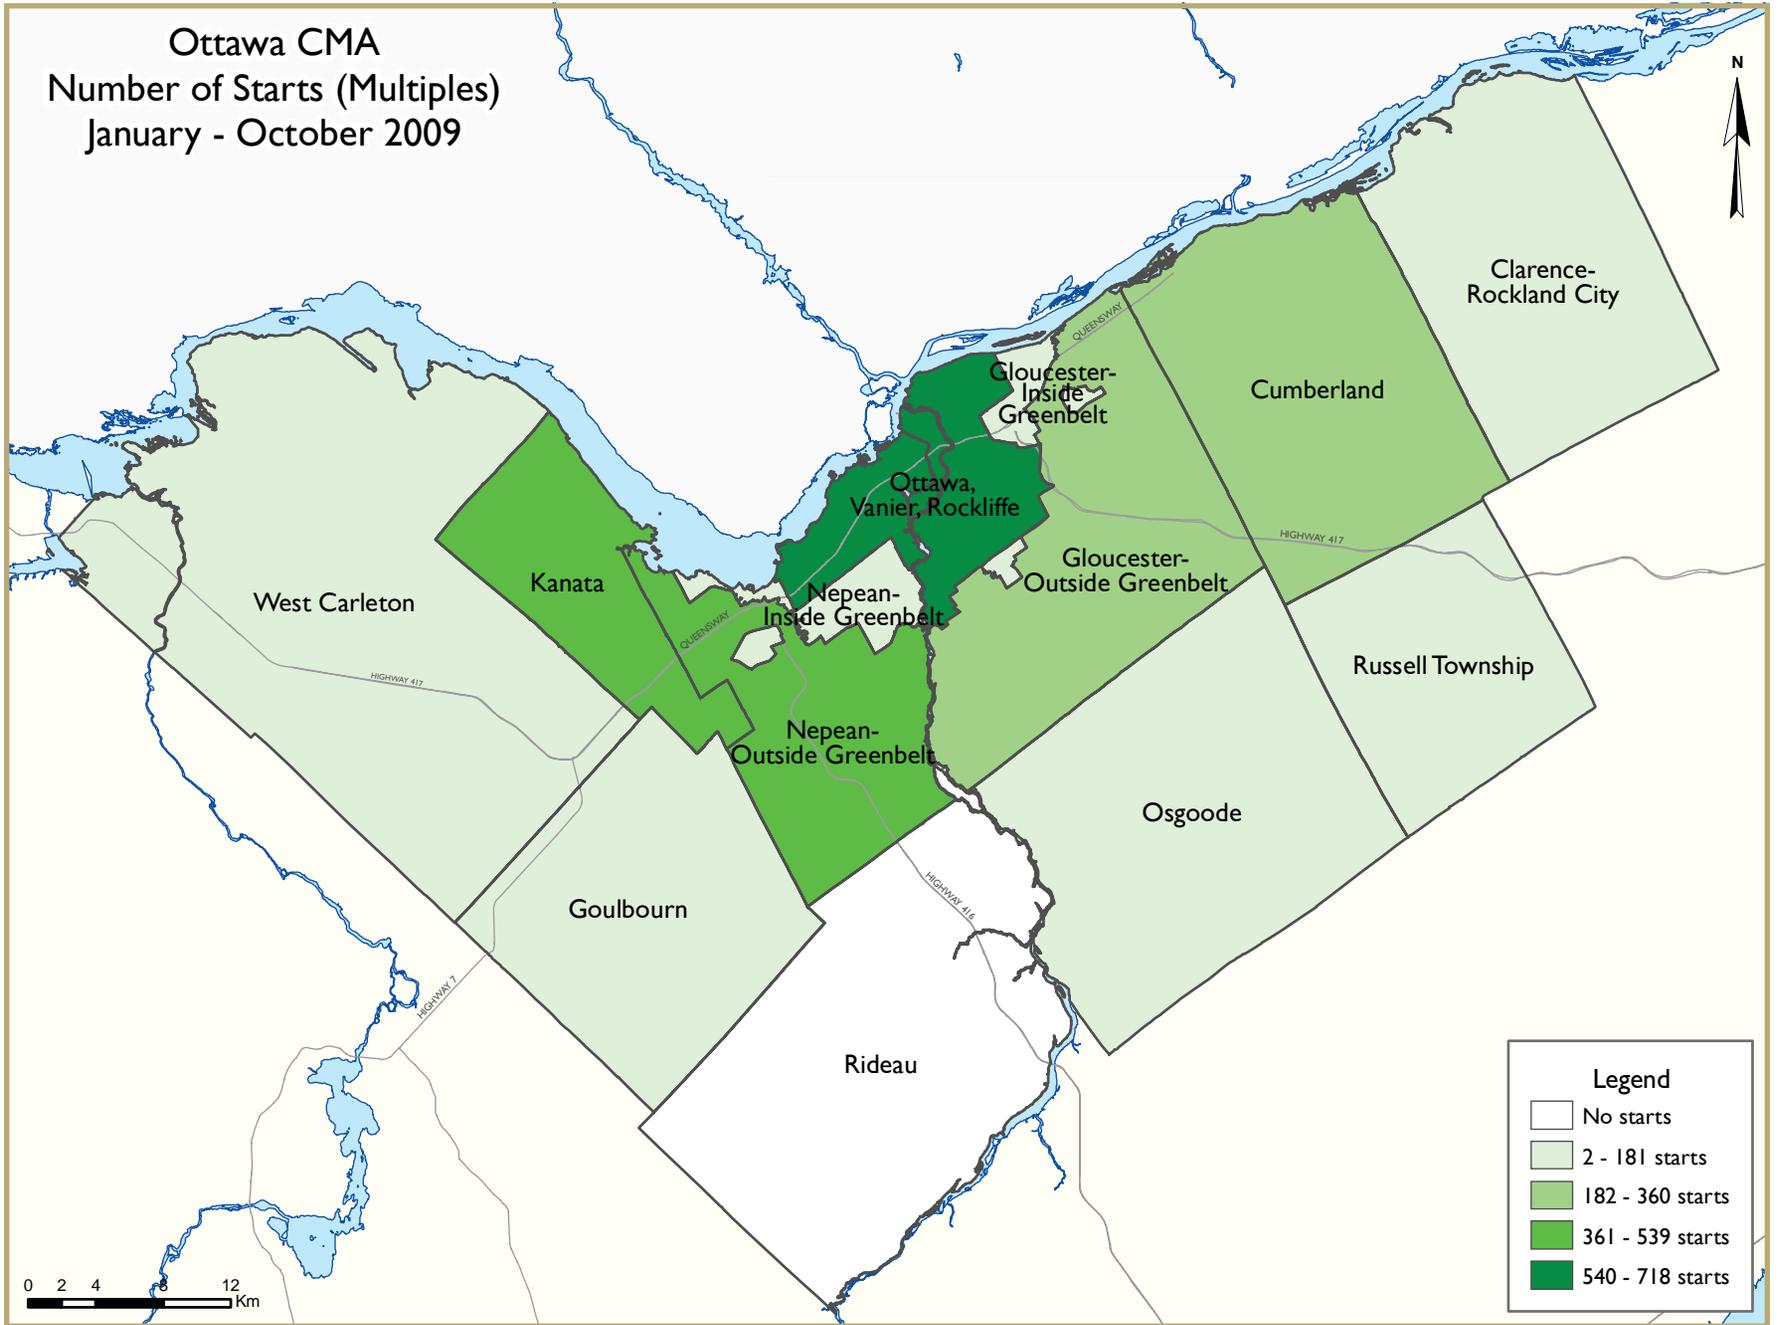

starts, 131 of which were as a result of two new condominium apartment buildings. This was nevertheless well below last year's pace for the region. For its part, the growing area of Nepean poured the foundation on 166 new homes, out of which 84 were single-detached homes and 68 townhomes. Nevertheless, only four areas saw higher starts this October. The outer city outskirts and Goulbourn were the locations of choice among repeat-buyers, with growth in starts being led by a higher share of single-detached homes. Conversely, the areas of Kanata and Gloucester were the preferred choice among most first-time buyers, with growth this month coming as a result of construction activity for the more affordable townhomes.

Year-to-date, the regional market that has kept the best pace continued to be the area in Nepean outside of the Greenbelt, up 12 per cent with 1,064 new starts, over 52 per cent of which were single-detached homes. However, due to weakness in activity inside the Greenbelt, the total for Nepean remained 12 per cent below last year's pace. The areas of Gloucester, the Old City of Ottawa, and Cumberland, which combined to almost half of all activity, sit between 20 per cent and 30 per cent below last year's pace. In sharp contrast to the weak beginning of the year, Kanata is now only 36 per cent below last year's pace. The only area that continues to show considerably weaker activity than last year is Goulbourn, which remains 60 per cent below pace.

## METHODOLOGY

### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

### Market Absorption Survey Methodology

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

## STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A “**dwelling unit**”, for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A “**start**”, for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A “**completion**”, for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term “**absorbed**” means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

## DWELLING TYPES:

A “**Single-Detached**” dwelling (also referred to as “**Single**”) is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A “**Semi-Detached (Double)**” dwelling (also referred to as “**Semi**”) is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A “**Row (Townhouse)**” dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term “**Apartment and other**” includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

## INTENDED MARKET:

The “**intended market**” is the tenure in which the unit is being marketed. This includes the following categories:

**Freehold:** A residence where the owner owns the dwelling and lot outright.

**Condominium (including Strata-Titled):** An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

**Rental:** Dwelling constructed for rental purposes regardless of who finances the structure.

## GEOGRAPHICAL TERMS:

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A “**Rural**” area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada’s 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada’s 2001 Census area definitions.

## CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
