## HOUSING NOW

## Edmonton CMA

Canada Mortgage and Housing Corporation

Date Released: December 2008

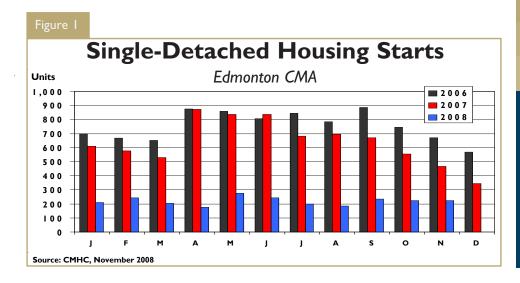

#### **New Home Market**

# Housing Starts Decrease in November

According to preliminary figures released today by Canada Mortgage and Housing Corporation (CMHC), housing starts in the Edmonton Census Metropolitan Area (CMA) totalled 279 units in November, 74 per cent fewer than reported in November 2007. On a year-to-date

basis, total housing starts have declined by 56 per cent from activity recorded by CMHC in the first I I months of last year. This comes despite a robust local economy that is showing impressive employment and income growth. The home building industry has been impacted by a slowdown in net migration to the province since mid-2007 and concerns locally about elevated new and existing home inventories.

Single-detached starts throughout

Greater Edmonton reached 224 units in November, representing a decrease of 52 per cent from November 2007. So far this year, single starts have fallen by 67 per cent to 2,419 units compared with 7,337 units started from January to November of last year. CMHC expects single-detached starts to rise to 3,000 units in 2009. A decline in new home and resale inventories in the coming months will be two important factors pushing single starts higher next year.

Single-detached homes under construction in November stood at 2,376 units, down 62 per cent year-over-year and representing the lowest level since April 2002. Completions declined by 47 per cent from last November to 364 units. Meanwhile, absorptions were also down from November 2007 but exceeded completions by 37 units allowing for further reductions in the

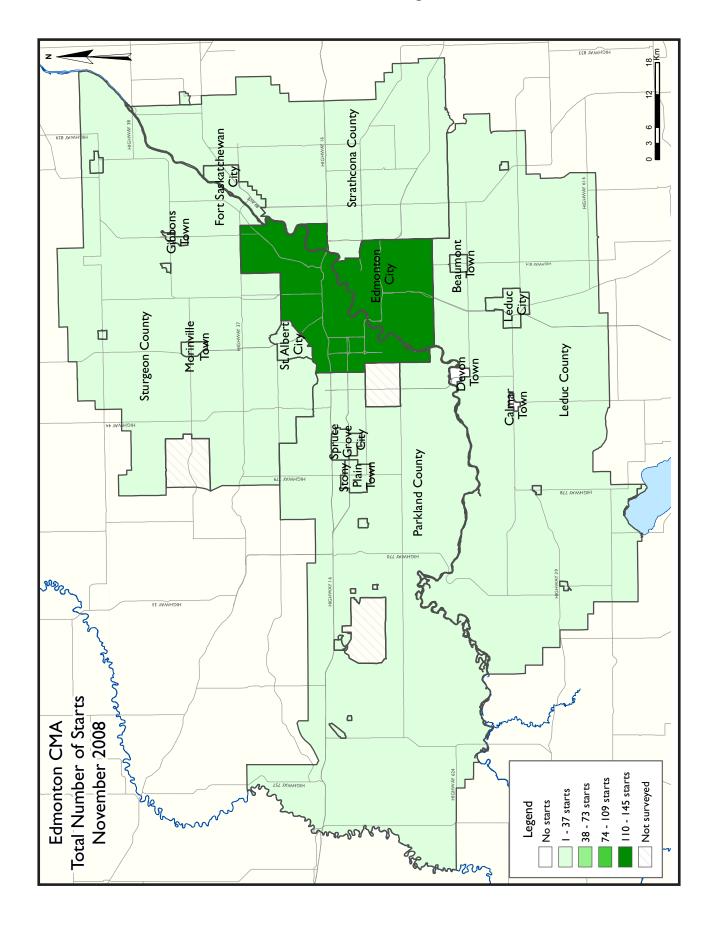

unabsorbed inventory which peaked in August at 1,090 units. Single-detached dwellings that were completed and unoccupied stood at 1,011 units in November, 33 per cent higher that the same month least year.

Multiple dwelling starts across the Capital region totalled 55 units in November, down 91 per cent from the same month last year. At 32 units, semi-detached starts were 78 per cent below the volumes reported in November 2007. Row unit starts tallied to 23 units compared with 60 starts in November of last year. There were no apartment starts this November while in the same month of 2007 there were 419 units started.

For the year-to-date, multi-family starts have declined by 44 per cent from the levels seen during January to November of 2007. Despite this

slowdown, units under construction across Metro were down by only 10 per cent to 9,295 units. The high volume of units still in progress suggests that completions will ramp upwards in the coming months, putting upward pressure on inventories. As such, further reduction in new construction is warranted in the coming year. CMHC expects multiple dwelling starts to moderate in 2009 to 3,000 units.

Multiple unit completions increased to 444 units in November compared with 235 units during the same month last year. While absorptions in November more than doubled last year's count, they fell short of completions for the seventh consecutive month. Total unabsorbed multiples increased to 545 units in November, representing a 44 per cent increase year-over-year and the highest level since October 2006.

<sup>&</sup>quot;NHPI" means New Housing Price Index

<sup>&</sup>quot;CPI" means Consumer Price Index

<sup>&</sup>quot;SA" means Seasonally Adjusted

#### METHODOLOGY

#### Starts & Completions Survey Methodology

The Starts and Completions Survey is conducted by way of site visits which are used to confirm that new units have reached set stages in the construction process. Since most municipalities in the country issue building permits, these are used as an indication of where construction is likely to take place. In areas where there are no permits, reliance has to be placed either on local sources or searching procedures.

The Starts and Completions Survey is carried out monthly in urban areas with population in excess of 50,000, as defined by the 2006 Census. In urban areas with populations of 10,000 to 49,999, all Starts are enumerated in the last month of the quarter (i.e. four times a year, in March, June, September and December). In these centres with quarterly enumeration, Completion activity is modelled based on historical patterns. Monthly Starts and Completions activity in these quarterly locations are statistically estimated at a provincial level for single and multi categories. Centres with populations below 10,000 are enumerated on a sample basis, also in the last month of each quarter (i.e. four times a year, in March, June, September and December).

The Starts and Completions Survey enumerates dwelling units in new structures only, designed for non-transient and year-round occupancy.

Mobile homes are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory and then moved to a foundation before it is occupied.

Trailers or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the survey.

Conversions and/or alterations within an existing structure are excluded from the surveys as are seasonal dwellings, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and hostel accommodations, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

#### **Market Absorption Survey Methodology**

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, an update is also made as units are sold or rented. The dwellings are then enumerated each month until such time as full absorption occurs.

# STARTS AND COMPLETIONS SURVEY AND MARKET ABSORPTION SURVEY DEFINITIONS

A "dwelling unit", for purposes of the Starts and Completions Survey, is defined as a structurally separate set of self-contained living premises with a private entrance from outside the building or from a common hall, lobby, or stairway inside the building. Such an entrance must be one that can be used without passing through another separate dwelling unit.

A "start", for purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

The number of units "**under construction**" as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure, when completed, may contain more or fewer dwelling units than were reported at start.

A "completion", for purposes of the Starts and Completions Survey, is defined as the stage at which all the proposed construction work on a dwelling unit has been performed, although under some circumstances a dwelling may be counted as completed where up to 10 per cent of the proposed work remains to be done.

The term "absorbed" means that a housing unit is no longer on the market (i.e. has been sold or rented). This usually happens when a binding contract is secured by a non-refundable deposit and has been signed by a qualified purchaser. The purpose of the Market Absorption Survey is to measure the rate at which units are sold or rented after they are completed, as well as collect prices.

#### **DWELLING TYPES:**

A "Single-Detached" dwelling (also referred to as "Single") is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure. Includes link homes, where two units may share a common basement wall but are separated above grade. Also includes cluster-single developments.

A "Semi-Detached (Double)" dwelling (also referred to as "Semi") is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A "Row (Townhouse)" dwelling is a one family dwelling unit in a row of three or more attached dwellings separated by a common or party wall extending from ground to roof.

The term "Apartment and other" includes all dwellings other than those described above, including structures commonly known as stacked townhouses, duplexes, triplexes, double duplexes and row duplexes.

#### INTENDED MARKET:

The "intended market" is the tenure in which the unit is being marketed. This includes the following categories:

Freehold: A residence where the owner owns the dwelling and lot outright.

Condominium (including Strata-Titled): An individual dwelling which is privately owned, but where the building and/or the land are collectively owned by all dwelling unit owners. A condominium is a form of ownership rather than a type of house.

Rental: Dwelling constructed for rental purposes regardless of who finances the structure.

#### **GEOGRAPHICAL TERMS:**

A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a large urban area (known as the urban core). The census population count of the urban core is at least 10,000 to form a census agglomeration and at least 100,000 to form a census metropolitan area. To be included in the CMA or CA, other adjacent municipalities must have a high degree on integration with the central urban area, as measured by commuting flows derived from census place of work data. CMAs and CAs contain whole municipalities or Census Subdivisions.

A "Rural" area, for the purposes of this publication, is a centre with a population less than 10,000.

All data presented in this publication is based on Statistics Canada's 2006 Census area definitions, except the Economic Indicators data (Table 6) which is based on Statistics Canada's 2001 Census area definitions.

#### CMHC—HOME TO CANADIANS

Canada Mortgage and Housing Corporation (CMHC) has been Canada's national housing agency for more than 60 years.

Together with other housing stakeholders, we help ensure that the Canadian housing system remains one of the best in the world. We are committed to helping Canadians access a wide choice of quality, environmentally sustainable and affordable homes – homes that will continue to create vibrant and healthy communities and cities across the country.
