Note of Appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

About this publication

This publication presents aggregate level data tables for the provinces and territories. The tables cover several broad areas: 1) gross domestic product (GDP) by income and by expenditure, and 2) GDP by industry.

This release of provincial and territorial economic accounts is an update of the estimates released on April 27, 2009. This release incorporates the Input-Output benchmarks of 2005 (revised) and 2006 (preliminary), the revisions to the National Income and Expenditure Accounts released in May 2009, and the revisions to the gross domestic product (GDP) by industry data released in September 2009. In addition, updated provincial survey data and improved methodologies have contributed to revised measures of both the provincial GDP by income and expenditure and the provincial GDP by industry for the years 2005 to 2008.

Revision policy

GDP by income and by expenditure; GDP by industry:

Preliminary estimates are released in the spring following the end of the reference period, and revised in the fall of the same year. This latter release also comprises revisions to the three previous years. Estimates are not normally revised again except when historical revisions are carried out, usually once per decade. Statistical revisions are carried out in order to incorporate the most recent information from surveys, taxation statistics, public accounts, censuses, etc., as well as from the annual benchmarking process of the Input-Output Accounts.

Revisions in this issue

GDP by income and by expenditure; GDP by industry:

This release includes revisions from 2005. Also, the government detail tables have been updated to 2007.

Data tables

1. The first line is the series itself. The second line is the percentage change.

2. Personal saving divided by personal disposable income, multiplied by 100.

Product information

Provincial and Territorial Economic Accounts: Data Tables, Catalogue no. 13-018-XWE

The provincial and territorial economic accounts include estimates of the income and the expenditure based gross domestic product (GDP), estimates of real GDP, contributions to percent change in real GDP, implicit price indexes and government detail tables. The government detail tables include revised revenue and expenditure data based on government public accounts.

Summaries by sub-sector of government (federal, provincial, local, CPP and QPP) are provided in tables 6 to 10. Revenue side category details are presented in tables 11-13. Table 11 disaggregates direct taxes, social insurance contributions and transfers paid by persons to government. Table 12 presents the components of taxes on production and products by level of government, while Table 13 lists the sources of government investment income by level of government. On the expenditure side, the major transfers to persons by type are presented in Table 14 while subsidies and capital transfers, to both the personal and business sectors, can be found in Table 15. Table 16 lists the most important transfers by type between levels of governments. The sources and dispositions of personal income is presented in Table 17, while some selected indicators appear in Table 18.
