## Acknowledgements

The Centre for Education Statistics sincerely appreciates the continued support and collaboration from the Departments/Ministries of Education from each province and territory and their employees who work diligently to collect and compile data for the Elementary-Secondary Education Statistics Project (ESESP) survey in a timely and thorough fashion.

The Centre for Education Statistics also appreciates the efforts of Jean Francois Laroche, Chief, Institutional Surveys Section, Isabelle Thony, former ESESP Unit Head, Elaine Tremblay for her technical assistance with the tables and charts, Danielle Baum and Rosemarie Andrews for the production of dissemination tables, Kathryn McMullen for editing and Patric Blouin, former ESESP Manager for his past work and continued guidance and patience.

## Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

## 1. Enrolments

Over 5.16 million students were enrolled in public schools in the academic year 2006/2007, a $3.5 \%$ decrease from 2000/2001. This continued a downward trend which has seen declines every year since 2002/2003.

Alberta and Nunavut were the only two jurisdictions that experienced enrolment increases since 2000/2001. Alberta's enrolment stood under 561,000 in 2006/2007, up $2.0 \%$ from 2000/2001. Nunavut's enrolment stood just over 9,000, up 3.6\% from 2000/2001.

The only province to record an enrolment increase from 2005/2006 to 2006/2007 was Alberta, where enrolment increased 1.6\%.

Chart 1.1
Percentage change in enrolments (headcounts) between 2000/2001 to 2006/2007, Canada, provinces and territories

With the exception of Alberta, all provinces and territories experienced decreases in their enrolment levels between 2005/2006 and 2006/2007. The largest decreases occurred in the Yukon, (-4.2\%), Newfoundland and Labrador, (-3.2\%) and Prince Edward Island (-2.7\%) (Chart 1.1 and Table A.1).

Overall, between 2000/2001 and 2006/2007, enrolment declined $17.6 \%$ in Newfoundland and Labrador, $11.6 \%$ in Saskatchewan and $11.0 \%$ in Nova Scotia. (Table A.1)

This is consistent with population estimates data that show that the population aged 5 to 17 declined by $17.3 \%$ in Newfoundland and Labrador, $10.7 \%$ in Saskatchewan and 8.2\% in Nova Scotia over the corresponding period (Table A.28). The aging population, lower birth rates and continued migration to other parts of Canada are some of the main reasons for these declines.

There were slightly more males than females enrolled in Canadian public schools in 2006/2007, with $51.4 \%$ of enrolments consisting of males. This ratio remained constant over the 2000/2001 to 2006/2007 period across all provinces and territories in Canada and is also consistent with population estimates of the school-age population.

Although enrolment across Canada continued to decrease, enrolment in second-language immersion programs in public elementary and secondary schools increased steadily every year. Over 304,000 students were enrolled in a secondlanguage immersion program in 2006/2007, up $3.1 \%$ from a year earlier and up $9.5 \%$ since 2000/2001. (Table A.5)

Over the six-year period between 2000/2001 and 2006/2007, the total number of students enrolled in second-language immersion programs increased $45.7 \%$ in Newfoundland and Labrador, 29.9\% in British Columbia and 27.6\% in Nova Scotia. (Table A.5, Chart 1.2)

## Chart 1.2

Percentage change in second language immersion enrolment program (headcounts) between 2000/2001 to 2006/2007, Canada, provinces and territories

## 2. Graduates ${ }^{1}$

Over 323,000 students graduated from public secondary schools in the 2006/2007 academic year. This figure represents an increase of 3.3\% from 2005/2006 and $5.8 \%$ from 2000/2001.

Most provinces and territories recorded increases in the number of graduates between 2005/2006 and 2006/2007. The total number of graduates increased 7.0\% in Nunavut, $6.7 \%$ in Ontario, and $4.1 \%$ in Quebec. It decreased in three jurisdictions: New Brunswick ( $-3.9 \%$ ), British Columbia ( $-3.7 \%$ ) and the Northwest Territories (-1.7\%). (Table A.7)

Overall, during the six-year period between 2000/2001 and 2006/2007, the total number of graduates increased $13.1 \%$ in Alberta, $9.0 \%$ in Ontario and $6.0 \%$ in Nova Scotia. The three territories recorded strong gains in the number of graduates over the period 2000/2001 to 2006/2007, with increases of $69.2 \%$ in Nunavut, $24.5 \%$ in the Northwest Territories and $23.4 \%$ in the Yukon. (Table A.7)

Newfoundland and Labrador posted a $16.1 \%$ decrease in the number of graduates between 2000/2001 to 2006/2007, followed by a $6.7 \%$ decrease in New Brunswick. (Table A.7, Chart 2).

## Chart 2

Percentage change in the number of graduates between 2000/2001 and 2006/2007, Canada provinces and territories

## 3. Graduation rates ${ }^{2}$

In 2006/2007, the graduation rate for publicly funded high school students stood at $71.3 \%$, down from $73.2 \%$ in 2005/2006. (Chart 3)

There have been notable increases in the graduation rate since 2000/2001 in Nova Scotia and the three territories, and small declines in Manitoba, Ontario and New Brunswick. (Table A.8)

In the 2006/2007 academic year, four provinces recorded graduation rates above $80 \%$, with Prince Edward Island peaking at $85.4 \%$, followed by Saskatchewan at $82.8 \%$, New Brunswick at $81.0 \%$ and Nova Scotia at $80.1 \%$. (Table A.8)

Alberta recorded the lowest graduation rate among the provinces in 2006/2007 at $65.0 \%$. Compared to other provinces, Alberta had the lowest graduation rate for the entire six-year period.

Nunavut's graduation rate did not exceed $30.0 \%$ during the entire six-year period. In 2006/2007, the graduation rate stood at $29.6 \%$.

The graduation rate at the Canada level in 2006/2007 was higher for females $(75.3 \%)$ than for males ( $67.6 \%$ ). Provincial graduation rates for both females and males were highest in Prince Edward Island at (89.2\% and 81.7\% respectively) and lowest in Alberta (at $68.2 \%$ and $62.0 \%$, respectively).

The largest female-male percentage-point difference in graduation rates occurred in the three territories and Newfoundland and Labrador, with a $17.6 \%$ difference in the Yukon, $16.4 \%$ in the Northwest Territories, $11.2 \%$ in Nunavut and $9.7 \%$ in Newfoundland and Labrador. The smallest difference occurred in Nova Scotia which had a $4.7 \%$ difference between the two sexes.

Chart 3
Secondary graduation rate, 2006/2007, Canada, provinces and territories

## 4. Educators ${ }^{3}$

Despite declining enrolments across Canada, the total number of educators (fulltime equivalent) has increased. In 2006/2007, there were over 329,000 educators, up $2.5 \%$ from 2005/2006 and up $4.1 \%$ from 2000/2001.

Most provinces and territories reported increases in the number of full-time equivalent (FTE) educators between 2005/2006 and 2006/2007. It increased 4.0\% in Ontario, well above the national average.

Saskatchewan posted the largest provincial decline, decreasing by $0.9 \%$, while Nunavut posted a decrease of $1.4 \%$. (Table A.10)

Between 2000/2001 and 2006/2007, the largest increase in the number of full-time equivalent educators at the provincial level was in Alberta (10.3\%) and Ontario (8.4\%). During the same period, student enrolment increased $2.0 \%$ in Alberta, but decreased $1.9 \%$ in Ontario.

Between 2000/2001 and 2006/2007, the number of full-time equivalent educators fell $13.5 \%$ in Newfoundland and Labrador and $5.9 \%$ in British Columbia. (Table A.10)

## Chart 4

Percentage change in the number of educators (full-time equivalent) between 2000/2001 and 2006/2007, Canada, provinces and territories

In 2006/2007, $71.3 \%$ of the educators in Canadian public schools were female. This was up from $67.3 \%$ in 2000/2001. The proportion of female educators increased in every province.

Between 2000/2001 and 2006/2007, public schools in Canada both attracted young educators and retained older ones. While the total number of educators, based on headcounts, increased $8.3 \%$ during that period, the number of those aged 29 or younger increased $80.6 \%$ ( 32,672 in 2000/2001 to 59,001 in 2006/2007), while the number of those aged 60 almost tripled (2,823 in 2000/2001 to 10,594 in 2006/ 2007).

## Chart 5

Percentage change in the number of educators (full-time equivalent) between 2005/2006 and 2006/2007, Canada, provinces and territories

## 5. Student-educator ratio ${ }^{4}$

The student-educator ratio has decreased every year between 2000/2001 to 2006/2007. A decline in the student-educator ratio means fewer students per educator.

The Canada student-educator ratio in 2006/2007 was 14.7 students per educator.

With the exceptions of the Northwest Territories and Nunavut, the studenteducator ratio decreased or remained the same in every jurisdiction in 2006/2007 from the previous year. (Table A.11)

Chart 6
Student-educator ratio, Canada, provinces and territories, 2006/2007

In 2006/2007, the student-educator ratio was highest in Alberta ( 16.8 students/ educator), British Columbia ( 16.6 students/educator) and the Northwest Territories (15.3 students/educator) and lowest in Yukon (10.6 students/educator), Newfoundland and Labrador (13.0 students/educator) and Quebec (13.5 students/ educator). (Chart 6 and Table A.11)

## 6. Total expenditures

Total expenditures in public elementary and secondary schools in Canada increased at almost twice the rate of inflation between 2000/2001 and 2006/2007.

Total expenditures rose to $\$ 49.6$ billion in 2006/2007, up $4.5 \%$ from a year earlier and $27.9 \%$ since 2000/2001 (Table A.16). During the same six-year period, the rate of inflation rose $14.4 \%$ (Table A.33).

Between 2000/2001 and 2006/2007, total expenditures increased 39.0\% in Alberta, $36.1 \%$ in Saskatchewan and $30.5 \%$ in Ontario.

Nova Scotia posted a $4.9 \%$ reduction in expenditures from 2000/2001 to 2006/2007.

Except for Alberta, total expenditures increased by more than the rate of inflation in all jurisdictions between 2005/2006 and 2006/2007. Alberta recorded an increase in total expenditures of $1.5 \%$, compared to an inflation rate in Alberta of $3.9 \%$. The inflation rate in Canada in 2006/2007 was $2.0 \%$.

Chart 7
Breakdown by type of expenditures, Canada, provinces and territories 2006/2007

Note: Operating expenditures include salaries, wages and allowances, fringe benefits, teachers' pension plans and other operating expenditures. However, differences in the type of teachers' pension systems may affect the comparability between jurisdictions. In general, other expenditures include interest on debt services.

## Operating expenses

Between 2005/2006 and 2006/2007, operating expenses increased $4.0 \%$ at the Canada level. The largest increases occurred in Nunavut with expenditures rising $13.6 \%$ and Quebec, where there was a $7.8 \%$ increase. Saskatchewan posted the smallest increase at $1.2 \%$, followed by Alberta at $1.6 \%$. (Table A.14)

In 2006/2007, operating expenditures represented $89.8 \%$ of total education spending across Canada, while capital expenditures represented $7.7 \%$; the remaining $2.5 \%$ consisted of other expenditures, mainly interest payments on debt services. (Chart 7 and Tables A.14, A. 15 and A.16)

Between 2000/2001 to 2006/2007, the increase in operating expenditures was greatest in Alberta, at $42.1 \%$, and smallest in Nova Scotia, at $15.9 \%$. (Table A.14)

## Capital expenditures

The year-over-year increase in capital expenditures across Canada was 11.5\% from 2005/2006 to 2006/2007, reaching an all-time high of $\$ 3.8$ billion. In 2006/2007, capital expenditures reached their highest levels in Newfoundland and Labrador, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Yukon and the NorthWest Territories. (Table A.15)

It should be noted that unlike operating expenditures, it is common for capital expenditures to fluctuate greatly from year to year, depending on the size of investment in new construction, major renovation projects or other large capital initiatives and when this does occur, particularly in smaller jurisdictions, the percentage change from one period to another can be quite large.

The largest relative increase occurred in Prince Edward Island, where capital expenditures went from $\$ 1.5$ million in 2005/2006 to $\$ 10.1$ million in 2006/2007, followed by the Yukon at $41.1 \%$. Nunavut posted the only decrease, with capital expenditures falling almost $20 \%$.

## 7. Total expenditures per student

Total expenditures per student in public elementary and secondary schools averaged $\$ 10,262$ (current dollars) across Canada in 2006/2007. This was up $5.7 \%$ from one year earlier and up $33.3 \%$ from 2000/2001 (Table A.17.1). In comparison, the inflation rate in Canada over the 2000/2001 to 2006/2007 period was $14.4 \%$.

In 2006/2007, total expenditures per student were highest in the three territories, peaking at $\$ 20,772$ per student in Yukon. At the provincial level, total expenditures per student ranged from a high of $\$ 10,823$ in Manitoba to a low of \$8,594 in Prince Edward Island.

Since 2000/2001 the increase in total expenditures per student ranged from $56.4 \%$ in Yukon and $54.2 \%$ in Saskatchewan to $6.9 \%$ in Nova Scotia.

Chart 8
Total expenditures per student, 2006/2007 (in current dollars), Canada, provinces and territories

Note: Comparisons between jurisdictions should be made with care. Factors that influence total spending per student on education, such as the size of the school-age population, need to be taken into account.

Over the six year study period, with the exception of Nova Scotia, total expenditures per student rose at a significantly higher rate than total inflation in Canada in every jurisdiction (Table A.17.1 and A.33).

## 8. Average remuneration of educators ${ }^{5}$

Average remuneration per educator (in current dollars) rose $2.7 \%$ to $\$ 67,344$ across Canada between 2005/2006 and 2006/2007. All jurisdictions posted annual increases, except Nova Scotia (down 3.5\%). (Table A.12)

The largest year-over-year increases were in Nunavut where average remuneration per educator rose $21.8 \%$ to $\$ 117,281$ in 2006/2007, Saskatchewan (increase of $13.2 \%$ to $\$ 66,752$ ) and Prince Edward Island (increase of $6.3 \%$ to $\$ 62,156$ ).

Across the provinces, average remuneration per educator varied between $\$ 73,342$ in Alberta to $\$ 57,605$ in Quebec in 2006/2007. Average remuneration per educator was highest in the three territories at $\$ 117,281$ in Nunavut, $\$ 84,986$ in the Northwest Territories, and $\$ 81,870$ in the Yukon.

In 2006/2007, Quebec had the smallest gap between the average remuneration per full-time educators and full-year, full-time workers. The average remuneration for Quebec educators was $\$ 57,600$, compared to $\$ 45,000$ for full-year, full-time workers, a difference of $\$ 12,600$. Prince Edward Island was the jurisdiction with the largest gap between the average remuneration per full-time educator $(\$ 62,200)$ and full-year, full-time workers $(\$ 38,000)$, a difference of $\$ 24,200$. In all other provinces, the average remuneration of educators exceeded the income of full-year, full-time workers by more than $\$ 13,300$ (Chart 9 and Table A.31).

## Chart 9

Average remuneration per educator (in current dollars), Canada, provinces and territories, 2006/2007

Note: Due to differences in methodology, comparisons between jurisdictions should be made with care.

## Note to readers

The data in this report were provided by provincial and territorial departments of education in accordance with definitions detailed in Appendix 2.

The data are for regular programs (for youth), adult programs and vocational programs (for youth and adults) offered by public schools in Canada.

Public schools in Canada generally represent about $93 \%$ of all students in Canada.

Reference tables are available starting at table A. 27 (Table A. 27 to Table A.33).

## Endnotes

1. The number of graduates is as the end of the school year, while population estimates are as of July 1 of the corresponding school year. Late graduates are included in the calculations while graduates from private schools are not. For this reason, the methodology underestimates the actual graduation rate. The graduation rate should not be used to infer a dropout rate. The four programs that comprise the graduate pool are: regular programs for youth, adult upgrading programs (GED), vocational programs for youth and vocational programs for adults.
2. The graduation rate is calculated by dividing the number of graduates by the average of the 17 and 18 year-old population: Graduation rate=Graduates(High school graduates(youth and adults) and Vocational program graduates(youth and adults))/Average number of the 17 and 18 year-old population.
3. The term "educator" refers to not only a teacher, but to all employees in the public school system who are required to have teaching certification as a condition of their employment. This definition generally includes principals, vice-principals and professional non-teaching staff such as education consultants, guidance counselors and religious and pastoral counselors.
4. Note that the student-educator ratio is not the same as the student-teacher ratio. The studenteducator ratio accounts for personnel outside of the classroom, such as principals, counselors and specialists as well as teachers' time outside of the classroom dedicated to classroom preparation and marking.
5. Changes in methodology for Alberta does not allow for data comparability prior to 2004/2005, as well as for Nova Scotia, prior to 2005/2006.

1. See appendix for definitions. Certain jurisdictions include all students whether they are funded or not while others include only funded students.
2. Includes enrolments in vocational programs for youth and adults.
3. Includes enrolments in adult programs and vocational programs for youth and adults.
4. Includes enrolments in adult programs.
5. Until 2000/2001, includes enrolments in adult programs and professional training under the authority of the school boards or districts.
6. Data exclude publicly funded hospital and provincial schools, care, treatment and correctional facilities.

Chart A.1.1

1. Data exclude publicly funded hospital and provincial schools, care, treatment and correctional facilities.
2. The number of graduates in the final year is understated by $2-3 \%$ because some schools have not submitted course information before the data collection cutoff for this report.
3. Historical revisions have been made to this table to exclude students that graduated from Adult Learning Centres registered under the Adult Learning Centres Act, effective July 2001.

1. The number of graduates is as of the end of a school year while the population estimates are as of July 1 of the corresponding school year. Late graduates are included in the calculations while graduates from private schools, are not. For this reason, this methodology underestimates the "final" graduation rate and should not be used to infer dropout rate.
2. Data exclude publicly funded hospital and provincial schools, care, treatment and correctional facilities.
3. The graduation rate in the final year is slightly understated because some schools have not submitted course information before the data collection cutoff for this report.
4. Historical revisions have been made to this table to exclude students that graduated from Adult Learning Centres registered under the Adult Learning Centres Act, effective July 2001.

## Appendix 2

## Definitions

## Enrolments

Number of students enrolled in public schools operated by school boards or the province in September (or as close as possible thereafter) of the school year. It includes all students in publicly funded schools (graded and ungraded), provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance education enrolments, private school students, independent school students or students in schools financed by federal departments (e.g. the Department of National Defense and the Department of Indian and Northern Affairs).

Includes other non-standard enrolment including students receiving educational services (if recognized by the province) and for schools and/or school districts that receive funding in a unique manner. They may be non-graduates who are taking only a few courses required to complete graduation. For example, a student who is enrolled in only $25 \%$ of a 'regular' course load and for whom the school or school district receives only $25 \%$ of the usual funding. This category may not apply to some provinces or territories.

## Headcount enrolment

Defined as the number of students enrolled in September (or as close as possible thereafter) of the school year.

## Full Time Equivalent (FTE) enrolment

Defined as the number of full-time students enrolled in September (or as close as possible thereafter) of the school year, plus the sum of part-time students according to the time fraction spent in the classroom and for which students are funded. For example, junior kindergarten and kindergarten students taking a half-time program and where a half-time program is being funded, the FTE enrolment would be the headcount enrolment divided by two, which is 0.5 . If a student is only taking a quarter of the usual course load and is funded on that basis, the FTE enrolment would be the headcount enrolment divided by four, which is 0.25 .

## Minority and Second Language Programs

## Regular Second Language Programs

Enrolments in programs where French is taught to Anglophone students or English is taught to Francophone students as a "subject" in the regular course offerings. One or more additional subjects can also be taught in the student's second official language but second language instruction must total less than $25 \%$ of all instruction time.

## Second Language Immersion Programs

Enrolments in programs where French is the language of instruction for Anglophone students or English is the language of instruction for Francophone students. Instruction time in the student's second official language is more than $25 \%$ of all instruction time.

## Minority Language Programs

Enrolments in programs for students from the official language linguistic minority in the relevant province or territory (French outside Québec, English in Québec). These programs allow children in the linguistic minority to pursue their education in their first official language.

## Graduates

Graduates of general training programs offered to similarly aged young students. Includes first time graduates only.

Includes graduates in General Education Development (GED), Adult Basic Education (ABE) and other equivalency programs. Excludes any graduates of upgrading programs offered at the postsecondary level.

Includes graduates in all professional and technical training programs. Excludes any graduates of vocational programs offered at the postsecondary level.

## Graduation rate

The number of graduates is as of the end of a school year while the population estimates are as of July 1 of the corresponding school year. Late graduates are included in the calculations while graduates from private schools, are not. For this reason, this methodology underestimates the "final" graduation rate and should not be used to infer dropout rate.

The graduation rate is calculated by dividing the number of graduates with the average of the 17 and 18 year-old population:

Graduation Rate $=$ Total number of secondary graduates / [(17 year old population +18 year-old population)/2]

## Educators

Includes all employees in the public school system (either school-based or school district-based) who belong to one of the three following categories: teachers, school administrators and pedagogical support.

It includes all educators in regular public schools, provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance programs, private schools or independent schools financed by federal departments (e.g. the Department of National Defense and the Department of Indian and Northern Affairs).

Please note that all teachers in regular programs for youth, adult upgrading programs and vocational programs for youth and adults are also included. Any programs offered at the postsecondary level are excluded.

## Teachers

This category includes personnel involved in direct student instruction in a group or one-on-one basis. Chairpersons of departments who spend the majority of their time teaching are also reported in this category. Personnel temporarily not at work (e.g. for reasons of illness or injury, maternity or parental leave, holiday or vacation) are also included.

Includes:

- Classroom teachers
- Special education teachers
- Specialists (music, physical education)
- Other teachers who work with students as a whole class in a classroom, in small groups in a resource room, or one-on-one inside or outside a regular classroom

## Excludes:

- Teacher aides, student teachers
- Other personnel who do not get paid for their employment.

## School Administrators

This category includes all personnel who support the administration and management of the school (e.g. principals, vice-principals and other management staff with similar responsibilities), only if they do not spend the majority of their time teaching.

Excludes:

- Higher level management
- Receptionists, secretaries, clerks and other staff who support the administrative activities of the school

## Pedagogical support

This category covers professional non-teaching which provides services to students to support their instruction program. It includes guidance counselors, librarians and educational media specialists.

Excludes:

- Health and social support

## Headcount educator

Defined as the number of educators on September the $30^{\text {th }}$ (or as close as possible thereafter) of the school year who are responsible for providing services to the headcount enrolment students.

## Full Time Equivalent (FTE) educator

Defined as the number of full-time educators on September the $30^{\text {th }}$ (or as close as possible thereafter) of the school year, plus the sum of part-time educators according to their percentage of a full-time employment allocation (determined by the province or territory). For example, if a normal full-time work allocation is ten months per year, an educator who works for six months of the year would be counted as 0.6 of a Full Time Equivalent (FTE) or an employee who works part time for ten months at $60 \%$ of full time would be 0.6 of an FTE.

# Culture, Tourism and the Centre for Education Statistics Research Papers Cumulative index 

Statistics Canada's Division of Culture, Tourism and the Centre for Education Statistics develops surveys, provides statistics and conducts research and analysis relevant to current issues in its three areas of responsibility.

The Culture Statistics Program creates and disseminates timely and comprehensive information on the culture sector in Canada. The program manages a dozen regular census surveys and databanks to produce data that support policy decision and program management requirements. Issues include the economic impact of culture, the consumption of culture goods and services, government, personal and corporate spending on culture, the culture labour market, and international trade of culture goods and services. Analysis is also published in Focus on Culture (87-004-XIE, free, http://www.statcan.ca/bsolc/english/bsolc?catno=87-004-X).

The Tourism Statistics Program provides information on domestic and international tourism. The program covers the Canadian Travel Survey and the International Travel Survey. Together, these surveys shed light on the volume and characteristics of trips and travellers to, from and within Canada.

The Centre for Education Statistics develops and delivers a comprehensive program of pan-Canadian education statistics and analysis in order to support policy decisions and program management, and to ensure that accurate and relevant information concerning education is available to the Canadian public and to other educational stakeholders. The Centre conducts fifteen institutional and over ten household education surveys. Analysis is also published in Education Matters (81-004-XIE, free, http://www.statcan.ca/bsolc/english/bsolc?catno=81-004-X), and in the Analytical Studies Branch research paper series (11F0019MIE, free, http://www.statcan.ca/bsolc/english/bsolc?catno=11F0019M).
